Product Features

[See All Features](#)

Android 2.3, Gingerbread

Gingerbread builds on some of the most popular Android features like multi-tasking and Wi-Fi hotspot and adds a refreshed user interface, an improved keyboard, near field communication (NFC) support, and more.

Fast just got faster

1 GHz Hummingbird processor paired with 16GB of internal memory makes Nexus S one of the fastest phones on the market.

Menus open faster, tabs are more responsive, and web pages load quicker with virtually no lag time. Switch between apps effortlessly with true multitasking on Android.

Nexus S has a dedicated Graphics Processing Unit (GPU). Playing mobile games, browsing the web, and watching videos are fast, fluid, and smooth. It's like having a pocket-sized multimedia and game console.

Brilliant 4" Contour Display

Nexus S is manufactured by Samsung, and it is the first smartphone to launch with a Contour Display. The curved glass screen fits comfortably in the palm of your hand and along the side of your face. A brighter screen with higher contrast means colors are incredibly vibrant, text is crisp at any size, and luminance is up to 1.5x higher than conventional LCD displays.
