### SoftBank 825SH

#### **Features**

# Express yourself with 8 PANTONE® color options

The PANTONE® mobile hits the market as a Full-Face Slider. In collaboration with PANTONE®, SoftBank has released the 825SH in eight pop color variations. Use your mobile phone as a fashion accessory for casual self-expression.

# Full-Face Slider loaded with useful functions

A round design and 48 mm thin profile makes the 825SH easy to grasp and operate. This compact full-face slider is replete with useful features such as Digital TV (One Seg), Global Roaming Service and more!

No communication charge for watching Digital TV (One Seg).

#### Motion Control Sensor makes operation a snap

Motion Control turns your motions into commands for the phone. Further, the screen menus automatically adjust as the handset is moved between horizontal to vertical positions, allowing greater freedom of operation.

## Specifications

825SH | SoftBank Page 2 of 3

Weight (approx.)	109 g
Dimensions (approx.)	48.0 (W) x 102.9 (H) x 14.9 (D) mm (closed, excluding protrusions)
Talk Time (in normal reception conditions)	240 minutes (3G); 210 minutes (GSM)
Standby Time (when phone not in use)	330 hours (3G); 310 hours (GSM)
Charging Time (approx.)	140 minutes

Average talk and standby times shown above are estimates under stable reception conditions with new, fully charged battery. Calculations are based on handsets used in Japan (3G) with IP service, incoming Graphic Mail and S! Applications notification disabled.

## 【Revision】 IMPORTANT INFORMATION To SoftBank 923SH/824SH/825SH Users

September 11, 2008

Thank you for using SoftBank Mobile.

A fault described below has been found on SoftBank 923SH/824SH. A revision has also been made on SoftBank 923SH to improve its operation.

Software to resolve the fault and improve the operation will be made available via the network.

We encourage all 923SH/824SH/825SH users to download the new software.

Please accept our apologies for any inconvenience. We appreciate your understanding and ask for your continuous support for our products and services.

#### 1-1. Revision of service specification (affected handset: SoftBank 923SH)

#### When Double Number is active

A revision was made to improve the operation when receiving the return call from the corresponding agency (police, marine safety agency or fire department), after placing emergency calls (110, 118 or 119) in B Mode. Details are as follows:

Before revision	Receiving a call was not possible in B Mode.  To receive a call, the handset was required to be manually changed to Dual Mode or A Mode.				
After revision	Receiving a call is possible in B Mode.  After placing emergency calls, it is possible to receive all calls in B Mode including those from land-line phones to Phone Number A. Since you may receive a return call from the corresponding agency, do not switch the mode until the emergency situation is resolved.  To cancel the state above, Power OFF/ON or switch the mode.				

See also the following link for "Emergency Call" when Double Number is active. The site is only available in Japanese.

http://mb.softbank.jp/mb/support/3G/doublenumber/attention.html

#### 1-2. Identified fault (affected handset: SoftBank 923SH/824SH/825SH)

When S! Familiar Usability is set

Scheduled Software Update and Secure Remote Lock cannot be executed.

This fault occurs only when S! Familiar Usability is set.

No error message appears to notify Secure Remote Lock cannot be executed as S! Familiar Usability is set.

#### 2. Affected handsets and software update

Software update of the affected handsets will be available via the network as shown in the table below. The software update will include other enhancements for the handsets.

Connection fees do not apply to updates (including checking, downloading and rewriting).

Handset	Date of Software Update Available	Notes
923SH	September 5, 2008	To set Scheduled Update to update this software, cancel S! Familiar Operation in advance by following the steps below: Menu -> Data Folder -> Customized Screen -> Cancel
824SH	September 11, 2008	To set Scheduled Update to update this software, cancel S! Familiar Operation in advance by following the steps below: Menu -> Data Folder -> Customized Screen -> Cancel
825SH	September 11, 2008	To set Scheduled Update to update this software, cancel S! Familiar Operation in advance by following the steps below: Menu -> Data Folder -> Customized Screen -> Cancel

#### < Software Update Precautions >

- 1. Before updating software, turn power off to end all active functions/applications, then restart handset.
- 2. Make sure battery is fully charged or charger is connected; a low battery may cause update failure.
- Implement Software Update in a place where signal is strong and stable. Do not remove battery during Software Update.
- 4. If USB is connected to the handset, disconnect it before Software Update.
- Do not remove battery during Software Update. If Update fails to complete after about 20 minutes, remove and reinstall battery before retrying. If Update still fails after retrying, bring the handset to the nearest SoftBank Shop.
- Other functions are disabled during Software Update. When other functions are active, Software Update cannot be implemented.
- 7. Software Update should not affect Phone Book entries, images, sounds, etc. saved on the handset. However, handset data may be lost due to hardware failure, damage, or water damage etc. Always back up important information before using Software Update.
