20 Attorneys for Plaintiffs Samsung Electronics Co., Ltd. and  
 Samsung Telecommunications America, LLC

21 UNITED STATES DISTRICT COURT  
 22 NORTHERN DISTRICT OF CALIFORNIA  
 23 SAN JOSE DIVISION

**CV 11-02079**

23 SAMSUNG ELECTRONICS CO., LTD., a  
 24 Korean corporation, and SAMSUNG  
 TELECOMMUNICATIONS AMERICA,  
 25 LLC, a Delaware limited liability company,

Plaintiffs,

vs.

27 APPLE INC., a California corporation,

28 Defendant.

**ORIGINAL FILED**

APR 27 2011

Richard W. Wiekling  
 Clerk, U.S. District Court  
 Northern District of California  
 San Jose

E-filing

ADR

EDL

CASE NO.

**COMPLAINT FOR PATENT  
 INFRINGEMENT**

**JURY TRIAL DEMANDED**

1 Plaintiffs Samsung Electronics Co., Ltd. ("SEC") and Samsung Telecommunications  
2 America, LLC ("STA") (collectively, "Samsung") complain and allege as follows against Apple  
3 Inc. ("Apple"):

4 **THE PARTIES**

5 1. Plaintiff SEC is a corporation organized under the laws of Korea, with its  
6 principal place of business at 416 Maetan-3dong, Yeongtong-gu, Suwon-City, Gyeonggi-do,  
7 Korea 443-742.

8 2. Plaintiff STA is a limited liability company organized under the laws of  
9 Delaware, with its principal place of business at 1301 East Lookout Drive, Richardson, Texas  
10 75082.

11 3. Upon information and belief, Apple is a corporation organized under the laws of  
12 California and has its principal place of business at 1 Infinite Loop, Cupertino, California 95014.  
13 Upon information and belief, Apple imports into the United States, offers for sale, sells and/or  
14 uses in the United States mobile electronic devices.

15 **NATURE OF THE ACTION**

16 4. This is an action for patent infringement.

17 5. Apple has infringed and continues to infringe, contribute to the infringement of,  
18 and/or actively induce others to infringe SEC's U.S. Patent No. 7,675,941 ("the '941 patent"),  
19 U.S. Patent No. 7,362,867 ("the '867 patent"), U.S. Patent No. 7,447,516 ("the '516 patent"), U.S.  
20 Patent No. 7,200,792 ("the '792 patent"), U.S. Patent No. 7,386,001 ("the '001 patent"), U.S.  
21 Patent No. 7,050,410 ("the '410 patent"), U.S. Patent No. 6,928,604 ("the '604 patent"), U.S.  
22 Patent No. 6,292,179 ("the '179 patent"), U.S. Patent No. 7,009,626 ("the '626 patent"), and U.S.  
23 Patent No. 7,069,055 ("the '055 patent") (collectively "the patents-in-suit").

24 **JURISDICTION AND VENUE**

25 6. This lawsuit is an action for patent infringement arising under the patent laws of  
26 the United States, 35 U.S.C. §§ 1 *et seq.* This Court has jurisdiction over this action pursuant to  
27 28 U.S.C. §§ 1331 and 1338.

1 28,700 United States patents, including 5,933 in the telecommunications field. Samsung is  
2 consistently ranked ahead of other technology companies in terms of the number of issued  
3 patents obtained in the United States, with 4,551 issued patents in 2010 alone.

4 13. Samsung's research and development successes have propelled the company to  
5 its status as the largest provider by volume of mobile devices in the United States and the second  
6 largest in the world. During the last half of 2010, Samsung sold more Android-based devices  
7 worldwide than any other company.

8 14. Samsung has been a pioneer in the mobile device business sector since the  
9 inception of the mobile device industry. In 1999, Samsung introduced its first multi-function  
10 "smart phone" that provided both internet access (for sending E-mails and for electronic chatting)  
11 and personal digital assistant ("PDA") features. In 2001 Samsung introduced into the United  
12 States the first PDA phone with a 256-color screen, selected as one of the Best Products of 2001  
13 by BusinessWeek magazine.

14 15. Also in 2001, Samsung broke the 1 cm technological barrier and stunned the  
15 industry with an ultra-slim, lightweight flip phone that was only 9.8 mm thick. This innovation  
16 sparked the ultra-portable mobile phone revolution spurring dozens of competitors to slim down  
17 the design form factors and develop their own portable mobile phone technology design. In  
18 2002, Samsung unleashed the world's first high-definition color LCD display suitable for mobile  
19 devices. Now users could browse the web and view images directly from their mobile devices in  
20 true color. In 2004, after selling over 20 million mobile handsets in the United States, Samsung  
21 announced the first mobile phone that supported digital multimedia broadcast via satellite. Users  
22 could now watch streaming high-quality multimedia content wherever they traveled.

23 16. Samsung announced the world's first five and seven megapixel camera phones  
24 in late 2004 and early 2005, respectively. Now, mid- to high-range digital camera functionality  
25 could be integrated with mobile handsets, allowing users to snap life-like photos on-the-go. In  
26 2008, Samsung became the leading mobile handset vendor in the United States.

27 17. Samsung has also continuously innovated in the area of mobile phone displays.  
28 In 2008 and 2009, Samsung released the industry's first high resolution AMOLED display for a

1 mobile phone. The new display featured a 180-degree viewing angle and reduced power  
2 consumption when compared to traditional LCD displays. Samsung's clearer and brighter Super  
3 AMOLED displays continued to improve mobile phone displays with 30% better color  
4 reproduction over the best quality LCD displays.

5 18. Samsung's innovative features, including the integrated high resolution cameras  
6 and displays, were the result of the exceptional creativity and ingenuity of thousands of Samsung  
7 engineers across the globe engaged in cutting-edge research and development projects.

8 19. Samsung's innovative contributions to the mobile device industry have been  
9 recognized through numerous awards for excellence in mobile device design. For example,  
10 Samsung has received numerous "Red Dot Design Awards" in one of the largest international  
11 design competitions. Similarly, a number of Samsung mobile devices have been awarded the "iF  
12 Design Award" from the iF Industrie Forum Design e.V., based in Germany, for features such as  
13 the user interface. The iF Designs Awards are among the most important in the world, as  
14 evidenced by more than 11,000 annual entries from almost 50 countries. Samsung has also  
15 received a number of "Good Design Awards" from the Japan Industrial Design Promotion  
16 Organization (JIDPO). Overall, Samsung's mobile phones and devices have won close to 60  
17 awards between 2007 and the beginning of 2011.

18 20. Samsung has consistently introduced market-relevant and innovative products,  
19 including over 1,500 mobile phone models, incorporating Samsung patented technology, into the  
20 U.S. marketplace since 1997. Over 281 million Samsung mobile devices have been sold since  
21 1997.

22 21. Without the ability to enforce its intellectual property rights, such as those  
23 relating to mobile device technology at issue in this action, Samsung would not be able to sustain  
24 the extensive commitment to research and development that has enabled it to lead the way into  
25 numerous improvements across a broad range of technologies, including the mobile device  
26 technologies at issue in this action.

27  
28

**SAMSUNG'S INTELLECTUAL PROPERTY RIGHTS**

1  
2 22. Samsung's patents relate to fundamental innovations that increase mobile device  
3 reliability, efficiency, and quality, and improve user interface in mobile handsets and other  
4 products. These innovations are critical to the user's ability to communicate with family, friends,  
5 and business associates reliably and effectively.

6 23. In communications systems, standards that prescribe the formats for sending  
7 information are essential to ensure that mobile devices made by different manufacturers are  
8 capable of interacting within a network. Because interoperability is key for communications,  
9 the development of protocols that ultimately result in a technical standard is very important to  
10 ensuring an efficient and functional system. As modern wireless networks carry more data at  
11 higher data rates and service more users than their predecessors, continued innovation is essential  
12 to keep pace with the increased demands on cellular networks. Samsung has been a leader in  
13 developing the ideas and protocols needed to increase the efficiency, reliability, and functionality  
14 of standards-based networks and the features available in these networks.

15 24. In the United States, one of the key standards governing cellular  
16 communications, known as Wideband Code-Division Multiple-Access (W-CDMA), is published  
17 by 3GPP (Third Generation Partnership Project). W-CDMA is one of the main technologies for  
18 the implementation of third-generation (3G) and more advanced cellular networks such as those  
19 of AT&T and T-Mobile. W-CDMA is the most common form of air interface standard within  
20 the Universal Mobile Telecommunications System (UMTS) telecommunications technologies  
21 standard. Samsung has made key inventions that are part of these standards.

22 25. The Samsung W-CDMA and UMTS patents at issue in this action relate to  
23 reliability, capacity, efficiency, compatibility, and functioning of mobile devices in W-CDMA  
24 and UMTS networks.

25 26. Samsung's technology relating to transmission of multiple streams, including  
26 voice and data, onto a single radio channel, allows users to talk on a mobile device and view and  
27 transmit information at the same time.  
28

1           27.       Samsung's technology increases the reliability of mobile devices. In particular,  
2 Samsung's technology increases the fidelity of transmission of data such as E-mail, text  
3 messages, and attachments sent by the user from the mobile device.

4           28.       Samsung's technology increases the throughput and capacity of mobile device  
5 networks. The rapid increase in usage of the mobile device networks has led to unprecedented  
6 demand for increased capacity and throughput, particularly as data-demanding applications such  
7 as video have become widespread. Samsung's technology enables a given network to pack in  
8 more users' data without increasing the size of the frequency band used, and can therefore  
9 accommodate a larger number of users.

10          29.       Samsung's technology reduces interference among mobile devices. As more  
11 and more mobile devices are used in today's networks, the likelihood of interference among  
12 different devices increases, and therefore regulation of the amount of transmit power is  
13 important. Samsung's technology provides techniques to regulate the amount of power  
14 transmitted by mobile devices, reducing interference in cellular communications.

15          30.       The Samsung user interface patents at issue in this action relate to generating  
16 and displaying time, keyboard function, and viewing of images on mobile devices.

17          31.       As users travel across time zones, the ability of a mobile device to update to the  
18 local time is important for tracking appointments and meetings. Samsung's technology provides  
19 a means for a mobile device to control and display world time.

20          32.       Input techniques that do not require a conventional hardware keyboard are  
21 important to functionality for small mobile devices. Samsung has developed a technique using a  
22 software keyboard system on a touch screen to fill this need.

23          33.       Graphical data, *e.g.*, images, are an integral part of modern web pages viewed  
24 on computers and other mobile devices. High-resolution images can take time to load,  
25 depending on their size and the speed of the user's connection to the network. Samsung's  
26 technology permits the user to view an approximation of the image while the full resolution  
27 image is loading.

28

1           34.       Samsung has sold millions of mobile phones in the United States incorporating  
2 the patented technology at issue here. For example, in 2010, Samsung sold over 24 million  
3 mobile phones incorporating Samsung's innovations that reduce data transmission errors,  
4 including the Samsung Galaxy S 4G. The Samsung Galaxy S 4G has been heralded by CNET as  
5 a "fantastic Android smartphone" that delivers "fast data speeds," and PC Magazine named the  
6 Samsung Galaxy S 4G one of the best AT&T and T-Mobile phones.

7           35.       Samsung's Captivate and Vibrant mobile phone models, which also incorporate  
8 the patented technologies at issue here, were both named to PC Magazine's Top 10 Smartphones  
9 list, with the Samsung Captivate being described as a "super-phone," and the Samsung Vibrant  
10 being described as T-Mobile's "top smartphone."

11          36.       Apple has copied many of Samsung's innovations in its Apple iPhone, iPod, and  
12 iPad products. Unlike other Samsung competitors that have respected Samsung's innovations  
13 and licensed the Samsung patents covering these technologies, Apple continues to violate  
14 Samsung's patent rights by using these patented technologies without a license.

15          37.       SEC is the owner of all rights, title, and interest in the '941 patent, entitled  
16 "Method and Apparatus for Transmitting/Receiving Packet Data Using Pre-Defined Length  
17 Indicator in a Mobile Communication System," which was duly and properly issued by the  
18 United States Patent and Trademark Office ("USPTO") on March 9, 2010. A copy of the '941  
19 patent is attached as Ex. 1.

20          38.       SEC is the owner of all rights, title, and interest in the '867 patent, entitled  
21 "Apparatus and Method for Generating Scrambling Code in UMTS Mobile Communication  
22 System," which was duly and properly issued by the USPTO on April 22, 2008. A copy of the  
23 '867 patent is attached as Ex. 2.

24          39.       SEC is the owner of all rights, title, and interest in the '516 patent, entitled  
25 "Method and Apparatus for Data Transmission in a Mobile Telecommunication System  
26 Supporting Enhanced Uplink Service," which was duly and properly issued by the USPTO on  
27 November 4, 2008. A copy of the '516 patent is attached as Ex. 3.

28

1           40.       SEC is the owner of all rights, title, and interest in the '792 patent, entitled  
2 "Interleaving Apparatus and Method for Symbol Mapping in an HSDPA Mobile Communication  
3 System," which was duly and properly issued by the USPTO on April 3, 2007. A copy of the  
4 '792 patent is attached as Ex. 4.

5           41.       SEC is the owner of all rights, title, and interest in the '001 patent, entitled  
6 "Apparatus and Method for Channel Coding and Multiplexing in CDMA Communication  
7 System," which was duly and properly issued by the USPTO on June 10, 2008. A copy of the  
8 '001 patent is attached as Ex. 5.

9           42.       SEC is the owner of all rights, title, and interest in the '410 patent, entitled  
10 "Apparatus and Method for Controlling a Demultiplexer and a Multiplexer Used for Rate  
11 Matching in a Mobile Communication System," which was duly and properly issued by the  
12 USPTO on May 23, 2006. A copy of the '410 patent is attached as Ex. 6.

13           43.       SEC is the owner of all rights, title, and interest in the '604 patent, entitled  
14 "Turbo Encoding/Decoding Device and Method for Processing Frame Data According to QOS,"  
15 which was duly and properly issued by the USPTO on August 9, 2005. A copy of the '604 patent  
16 is attached as Ex. 7.

17           44.       SEC is the owner of all rights, title, and interest in the '179 patent, entitled  
18 "Software Keyboard System Using Trace of Stylus on a Touch Screen and Method for  
19 Recognizing Key Code Using the Same," which was duly and properly issued by the USPTO on  
20 September 18, 2001. A copy of the '179 patent is attached as Ex. 8.

21           45.       SEC is the owner of all rights, title, and interest in the '626 patent, entitled  
22 "Systems and Methods for Generating Visual Representations of Graphical Data and Digital  
23 Document Processing," which was duly and properly issued by the USPTO on March 7, 2006. A  
24 copy of the '626 patent is attached as Ex. 9.

25           46.       SEC is the owner of all rights, title, and interest in the '055 patent, entitled  
26 "Mobile Telephone Capable of Displaying World Time and Method for Controlling the Same,"  
27 which was duly and properly issued by the USPTO on June 27, 2006. A copy of the '055 patent  
28 is attached as Ex. 10.

1 **COUNT I**

2 **INFRINGEMENT OF THE '941 PATENT**

3 47. Samsung realleges and incorporates by reference the allegations of Paragraphs  
4 1-46 of this Complaint as though fully set forth herein.

5 48. Upon information and belief, in violation of 35 U.S.C. § 271, Apple is and has  
6 been directly infringing, contributing to the infringement of, and/or inducing others to infringe  
7 the '941 patent by making, using, selling, and/or offering to sell in the United States, or  
8 importing into the United States, products or processes that practice the inventions claimed in the  
9 '941 patent, including without limitation, the Apple iPhone 3G, the Apple iPhone 3GS, the Apple  
10 iPhone 4, the iPad 3G, and the iPad 2 3G.

11 49. As a result of Apple's unlawful infringement of the '941 patent, Samsung has  
12 suffered and will continue to suffer damage. Samsung is entitled to recover from Apple the  
13 damages suffered by Samsung as a result of its unlawful acts.

14 50. On information and belief, Apple intends to continue its unlawful infringing  
15 activity, and Samsung continues to and will continue to suffer irreparably harm – for which there  
16 is no adequate remedy at law – from such unlawful infringing activities unless this Court enjoins  
17 Apple from further infringing activities.

18 **COUNT II**

19 **INFRINGEMENT OF THE '867 PATENT**

20 51. Samsung realleges and incorporates by reference the allegations of Paragraphs  
21 1-50 of this Complaint as though fully set forth herein.

22 52. Upon information and belief, in violation of 35 U.S.C. § 271, Apple is and has  
23 been directly infringing, contributing to the infringement of, and/or inducing others to infringe  
24 the '867 patent by making, using, selling, and/or offering to sell in the United States, or  
25 importing into the United States, products or processes that practice the inventions claimed in the  
26 '867 patent, including without limitation, the Apple iPhone 3G, the Apple iPhone 3GS, the Apple  
27 iPhone 4, the iPad 3G, and the iPad 2 3G.

28

1 is no adequate remedy at law – from such unlawful infringing activities unless this Court enjoins  
2 Apple from further infringing activities.

3 **COUNT VI**

4 **INFRINGEMENT OF THE '410 PATENT**

5 67. Samsung realleges and incorporates by reference the allegations of Paragraphs  
6 1-66 of this Complaint as though fully set forth herein.

7 68. Upon information and belief, in violation of 35 U.S.C. § 271, Apple is and has  
8 been directly infringing, contributing to the infringement of, and/or inducing others to infringe  
9 the '410 patent by making, using, selling, and/or offering to sell in the United States, or  
10 importing into the United States, products or processes that practice the inventions claimed in the  
11 '410 patent, including without limitation, the Apple iPhone 3G, the Apple iPhone 3GS, the Apple  
12 iPhone 4, the iPad 3G, and the iPad 2 3G.

13 69. As a result of Apple's unlawful infringement of the '410 patent, Samsung has  
14 suffered and will continue to suffer damage. Samsung is entitled to recover from Apple the  
15 damages suffered by Samsung as a result of its unlawful acts.

16 70. On information and belief, Apple intends to continue its unlawful infringing  
17 activity, and Samsung continues to and will continue to suffer irreparably harm – for which there  
18 is no adequate remedy at law – from such unlawful infringing activities unless this Court enjoins  
19 Apple from further infringing activities.

20 **COUNT VII**

21 **INFRINGEMENT OF THE '604 PATENT**

22 71. Samsung realleges and incorporates by reference the allegations of Paragraphs  
23 1-70 of this Complaint as though fully set forth herein.

24 72. Upon information and belief, in violation of 35 U.S.C. § 271, Apple is and has  
25 been directly infringing, contributing to the infringement of, and/or inducing others to infringe  
26 the '604 patent by making, using, selling, and/or offering to sell in the United States, or  
27 importing into the United States, products or processes that practice the inventions claimed in the  
28

1 '604 patent, including without limitation, the Apple iPhone 3G, the Apple iPhone 3GS, the Apple  
2 iPhone 4, the iPad 3G, and the iPad 2 3G.

3 73. As a result of Apple's unlawful infringement of the '604 patent, Samsung has  
4 suffered and will continue to suffer damage. Samsung is entitled to recover from Apple the  
5 damages suffered by Samsung as a result of its unlawful acts.

6 74. On information and belief, Apple intends to continue its unlawful infringing  
7 activity, and Samsung continues to and will continue to suffer irreparably harm – for which there  
8 is no adequate remedy at law – from such unlawful infringing activities unless this Court enjoins  
9 Apple from further infringing activities.

10 **COUNT VIII**

11 **INFRINGEMENT OF THE '179 PATENT**

12 75. Samsung realleges and incorporates by reference the allegations of Paragraphs  
13 1-74 of this Complaint as though fully set forth herein.

14 76. Upon information and belief, in violation of 35 U.S.C. § 271, Apple is and has  
15 been directly infringing, contributing to the infringement of, and/or inducing others to infringe  
16 the '179 patent by making, using, selling, and/or offering to sell in the United States, or  
17 importing into the United States, products or processes that practice the inventions claimed in the  
18 '179 patent, including without limitation, the Apple iPhone 3G, the Apple iPhone 3GS, the Apple  
19 iPhone 4, the iPod Touch, the iPad, the iPad 3G, the iPad2, and the iPad 2 3G.

20 77. As a result of Apple's unlawful infringement of the '179 patent, Samsung has  
21 suffered and will continue to suffer damage. Samsung is entitled to recover from Apple the  
22 damages suffered by Samsung as a result of its unlawful acts.

23 78. On information and belief, Apple intends to continue its unlawful infringing  
24 activity, and Samsung continues to and will continue to suffer irreparably harm – for which there  
25 is no adequate remedy at law – from such unlawful infringing activities unless this Court enjoins  
26 Apple from further infringing activities.

27  
28

1 **COUNT IX**

2 **INFRINGEMENT OF THE '626 PATENT**

3 79. Samsung realleges and incorporates by reference the allegations of Paragraphs  
4 1-78 of this Complaint as though fully set forth herein.

5 80. Upon information and belief, in violation of 35 U.S.C. § 271, Apple is and has  
6 been directly infringing, contributing to the infringement of, and/or inducing others to infringe  
7 the '626 patent by making, using, selling, and/or offering to sell in the United States, or  
8 importing into the United States, products or processes that practice the inventions claimed in the  
9 '626 patent, including without limitation, the Apple iPhone 3G, the Apple iPhone 3GS, the Apple  
10 iPhone 4, the iPod Touch, the iPad, the iPad 3G, the iPad 2, and the iPad 2 3G.

11 81. As a result of Apple's unlawful infringement of the '626 patent, Samsung has  
12 suffered and will continue to suffer damage. Samsung is entitled to recover from Apple the  
13 damages suffered by Samsung as a result of its unlawful acts.

14 82. On information and belief, Apple intends to continue its unlawful infringing  
15 activity, and Samsung continues to and will continue to suffer irreparably harm – for which there  
16 is no adequate remedy at law – from such unlawful infringing activities unless this Court enjoins  
17 Apple from further infringing activities.

18 **COUNT X**

19 **INFRINGEMENT OF THE '055 PATENT**

20 83. Samsung realleges and incorporates by reference the allegations of Paragraphs  
21 1-82 of this Complaint as though fully set forth herein.

22 84. Upon information and belief, in violation of 35 U.S.C. § 271, Apple is and has  
23 been directly infringing, contributing to the infringement of, and/or inducing others to infringe  
24 the '055 patent by making, using, selling, and/or offering to sell in the United States, or  
25 importing into the United States, products or processes that practice the inventions claimed in the  
26 '055 patent, including without limitation, the Apple iPhone 3G, the Apple iPhone 3GS, the Apple  
27 iPhone 4, the iPod Touch, the iPad, the iPad 3G, the iPad 2, and the iPad 2 3G.  
28

1
