**Search Directed to the Invention**

The pre-examination search was directed to the claimed invention, encompassing all the features of the claims and giving the claims their broadest reasonable interpretation.

**Search Directed to the Disclosure**

No disclosed features that are unclaimed at this time in this application are currently seen as features that may be claimed later in this application.

**Search Report from a Foreign Patent Office**

No search report from a foreign patent office is provided here as the pre-examination search.

**Statement of Good Faith**

All statements above in support of the petition to make special are based on a good faith belief that the search was conducted in compliance with the requirements of this rule.

Respectfully submitted,

Date: December 14, 2007

This collection of information is required by 37 CFR 1.16. The information is required to obtain or retain a benefit by the public which is to file (and by the USPTO to process) an application. Confidentiality is governed by 35 U.S.C. 122 and 37 CFR 1.14. This collection is estimated to take 12 minutes to complete, including gathering, preparing, and submitting the completed application form to the USPTO. Time will vary depending upon the individual case. Any comments on the amount of time you require to complete this form and/or suggestions for reducing this burden, should be sent to the Chief Information Officer, U.S. Patent and Trademark Office, U.S. Department of Commerce, P.O. Box 1450, Alexandria, VA 22313-1450. DO NOT SEND FEES OR COMPLETED FORMS TO THIS ADDRESS. SEND TO: Commissioner for Patents, P.O. Box 1450, Alexandria, VA 22313-1450.

If you need assistance in completing the form, call 1-800-PTO-9199 and select option 2.

### NOTICE OF NEW OR REVISED PROJECTED PUBLICATION DATE

The above-identified application has a new or revised projected publication date. The current projected publication date for this application is 07/10/2008. If this is a new projected publication date (there was no previous projected publication date), the application has been cleared by Licensing & Review or a secrecy order has been rescinded and the application is now in the publication queue.

If this is a revised projected publication date (one that is different from a previously communicated projected publication date), the publication date has been revised due to processing delays in the USPTO or the abandonment and subsequent revival of an application. The application is anticipated to be published on a date that is more than six weeks different from the originally-projected publication date.

More detailed publication information is available through the private side of Patent Application Information Retrieval (PAIR) System. The direct link to access PAIR is currently <http://pair.uspto.gov>. Further assistance in electronically accessing the publication, or about PAIR, is available by calling the Patent Electronic Business Center at 1-866-217-9197.

Questions relating to this Notice should be directed to the Office of Patent Publication at 1-888-786-0101.

FILING RECEIPT

Date Mailed: 01/02/2008

Receipt is acknowledged of this non-provisional patent application. The application will be taken up for examination in due course. Applicant will be notified as to the results of the examination. Any correspondence concerning the application must include the following identification information: the U.S. APPLICATION NUMBER, FILING DATE, NAME OF APPLICANT, and TITLE OF INVENTION. Fees transmitted by check or draft are subject to collection. Please verify the accuracy of the data presented on this receipt. If an error is noted on this Filing Receipt, please write to the Office of Initial Patent Examination's Filing Receipt Corrections. Please provide a copy of this Filing Receipt with the changes noted thereon. If you received a "Notice to File Missing Parts" for this application, please submit any corrections to this Filing Receipt with your reply to the Notice. When the USPTO processes the reply to the Notice, the USPTO will generate another Filing Receipt incorporating the requested corrections

**PROTECTING YOUR INVENTION OUTSIDE THE UNITED STATES**

Since the rights granted by a U.S. patent extend only throughout the territory of the United States and have no effect in a foreign country, an inventor who wishes patent protection in another country must apply for a patent in a specific country or in regional patent offices. Applicants may wish to consider the filing of an international application under the Patent Cooperation Treaty (PCT). An international (PCT) application generally has the same effect as a regular national patent application in each PCT-member country. The PCT process **simplifies** the filing of patent applications on the same invention in member countries, but **does not result** in a grant of "an international patent" and does not eliminate the need of applicants to file additional documents and fees in countries where patent protection is desired.

Almost every country has its own patent law, and a person desiring a patent in a particular country must make an application for patent in that country in accordance with its particular laws. Since the laws of many countries differ in various respects from the patent law of the United States, applicants are advised to seek guidance from specific foreign countries to ensure that patent rights are not lost prematurely.

Applicants also are advised that in the case of inventions made in the United States, the Director of the USPTO must issue a license before applicants can apply for a patent in a foreign country. The filing of a U.S. patent application serves as a request for a foreign filing license. The application's filing receipt contains further information and guidance as to the status of applicant's license for foreign filing.

Applicants may wish to consult the USPTO booklet, "General Information Concerning Patents" (specifically, the section entitled "Treaties and Foreign Patents") for more information on timeframes and deadlines for filing foreign patent applications. The guide is available either by contacting the USPTO Contact Center at 800-786-9199, or it can be viewed on the USPTO website at <http://www.uspto.gov/web/offices/pac/doc/general/index.html>.

For information on preventing theft of your intellectual property (patents, trademarks and copyrights), you may wish to consult the U.S. Government website, <http://www.stopfakes.gov>. Part of a Department of Commerce initiative, this website includes self-help "toolkits" giving innovators guidance on how to protect intellectual property in specific countries such as China, Korea and Mexico. For questions regarding patent enforcement issues, applicants may call the U.S. Government hotline at 1-866-999-HALT (1-866-999-4158).

**LICENSE FOR FOREIGN FILING UNDER****Title 35, United States Code, Section 184****Title 37, Code of Federal Regulations, 5.11 & 5.15****GRANTED**

The applicant has been granted a license under 35 U.S.C. 184, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" followed by a date appears on this form. Such licenses are issued in all applications where the conditions for issuance of a license have been met, regardless of whether or not a license may be required as

set forth in 37 CFR 5.15. The scope and limitations of this license are set forth in 37 CFR 5.15(a) unless an earlier license has been issued under 37 CFR 5.15(b). The license is subject to revocation upon written notification. The date indicated is the effective date of the license, unless an earlier license of similar scope has been granted under 37 CFR 5.13 or 5.14.

This license is to be retained by the licensee and may be used at any time on or after the effective date thereof unless it is revoked. This license is automatically transferred to any related applications(s) filed under 37 CFR 1.53(d). This license is not retroactive.

The grant of a license does not in any way lessen the responsibility of a licensee for the security of the subject matter as imposed by any Government contract or the provisions of existing laws relating to espionage and the national security or the export of technical data. Licensees should apprise themselves of current regulations especially with respect to certain countries, of other agencies, particularly the Office of Defense Trade Controls, Department of State (with respect to Arms, Munitions and Implements of War (22 CFR 121-128)); the Bureau of Industry and Security, Department of Commerce (15 CFR parts 730-774); the Office of Foreign Assets Control, Department of Treasury (31 CFR Parts 500+) and the Department of Energy.

**NOT GRANTED**

No license under 35 U.S.C. 184 has been granted at this time, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" DOES NOT appear on this form. Applicant may still petition for a license under 37 CFR 5.12, if a license is desired before the expiration of 6 months from the filing date of the application. If 6 months has lapsed from the filing date of this application and the licensee has not received any indication of a secrecy order under 35 U.S.C. 181, the licensee may foreign file the application pursuant to 37 CFR 5.15(b).

This is a decision on the petition filed on December 14, 2007 to make the above-identified application special for accelerated examination procedure under 37 C.F.R. § 1.102(d).

The petition to make the application special is **DISMISSED**.

### REGULATION AND PRACTICE

A grantable petition to make special under 37 C.F.R. § 1.102(d) and pursuant to the "Change to Practice for Petitions in Patent Applications to Make Special and for Accelerated Examination" published in the Federal Register on June 26, 2006 (71 Fed. Reg. 36323), must satisfy the following conditions:

#### I. Conditions Regarding the Application:

1. the application must be a non-reissue utility or design application filed under 37 CFR 1.111(a);
2. the application, the petition and the required fees must be filed electronically using the USPTO's electronic filing system (EFS), or EFS-web; if not filed electronically, a statement asserting that EFS and EFS-web were not available during the normal business hours.
3. at the time of filing, the application must be complete under 37 CFR 1.51 and in condition for examination;
4. the application must contain three or fewer independent claims and twenty or fewer total claims and the claims must be directed to a single invention.

## II. Conditions Regarding the Petition:

The petition must:

1. be filed with the application;
2. include a statement that applicant agrees not to separately argue the patentability of any dependent claim during any appeal in the application;
3. include a statement that applicant agrees to make an election without traverse in a telephone interview.
4. include a statement that applicant agrees to conduct such an interview when requested by the examiner.
5. include a statement, made based on a good faith belief, that a preexamination search in compliance with the following requirements, was conducted, including an identification of the field of search by United States class and subclass, where applicable, and for database searches, the search logic or chemical structure or sequence used as a query, the name of the file(s) searched and the database service, and the date of the search.

The preexamination search must:

- 5.1 involve U.S. patents and patent application publications, foreign patent documents, and non-patent literature, unless the applicant can justify with reasonable certainty that no references more pertinent than those already identified are likely to be found in the eliminated sources and includes such a justification with this statement;
  - 5.2. be directed to the claimed invention and encompass all of the features of the claims, giving the claims the broadest reasonable expectation;
  - 5.3. encompass the disclosed features that may be claimed.
6. must provide in support of the petition an accelerated examination support document.  
An accelerated examination support document must include:

- 6.1. an information disclosure statement (IDS) in compliance with 37 CFR 1.98 citing each reference deemed most closely related to the subject matter of each of the claims;
- 6.2. an identification of all the limitations in the claims that are disclosed by the reference specifying where the limitation is disclosed in the cited reference;
- 6.3. a detailed explanation of how each of the claims are patentable over the references cited with particularity required by 37 CFR 1.111(b) and (c);
- 6.4. a concise statement of the utility of the invention as defined in each of the independent claims (unless the application is a design application);
- 6.5. a showing of where each limitation of the claims finds support under 35 USC 112, first paragraph, in the written description of the specification. If applicable, the showing must also identify: (1) each means- (or step) plus-function claim element that invokes consideration under 35 USC 112, sixth paragraph; and (2) the structure, material, or acts in the specification that corresponds to each means- (or step) plus-function claim element that invokes consideration under 35 USC 112, sixth paragraph; if the application claims the benefit of one or more applications under title 35, United States Code, the showing must also include where each limitation of the claims finds support under 35 USC 112, first paragraph, in each such application in which such supports exists;
- 6.6. an identification of any cited references that may be disqualified under 35 USC 103(c).

## REVIEW OF FACTS

The conditions I. 1-4, II. 1-4, 5, 5.1, 6.1 - 6.6 above are considered to have been met. However, the petition fails to comply with conditions II. 5.2 & 5.3 above. Therefore, the petition fails to meet the required conditions to be accorded special status under the accelerated examination procedure.

Regarding the requirement of MPEP § 708.02(a)(I)(H)<sup>1</sup> and items 5.2 & 5.3 above, the preexam search must be directed to the (instant) claimed invention and encompass all of the disclosed features of the claim. Note, the provision of the identified search area and search logic provided to locate the references cited in the instant petition does not meet this requirement, in particular, based upon the claimed subject matter of the instant application, a search in the following class and subclass is necessary in order to provide full coverage of where the most pertinent references are most likely to be found: class 715 (DATA PROCESSING: PRESENTATION PROCESSING OF DOCUMENT, OPERATOR INTERFACE PROCESSING, AND SCREEN SAVER DISPLAY PROCESSING) subclass 764 (where the instant application is classified), as well as class 715 subclasses 702, 781, 788 and 831 (consistent with the "computer implemented method" of claims 1-18, the "device" of claim 19 and the "computer readable storage medium" of claim 20) should be searched.

With respect to the search logic identified, corresponding to the instant claim language, the search terms utilized appear to be too narrow. In conjunction with the above noted classification search, the following additional (supplemental) search terms and their various combinations (or equivalent) should be incorporated to complete the search:

stylus with touch adj3 (screen or display)

stylus near3 touch adj3 (screen or display)

This additional recommended search area was confirmed with (and recommended by) a (primary) examiner in the pertinent art area, based upon the pending claim of the instant application.

Thus, the petition does not meet the conditions II. 5.2 and 5.3 above.

## DECISION

---

<sup>1</sup> MPEP 8<sup>th</sup> ed. rev 5 August 2006

For the above-stated reasons, the petition is **DISMISSED**. The application will therefore be taken up by the examiner for action in its regular turn.

Petitioner is given a single opportunity to perfect the petition. Any request for reconsideration of this decision must be submitted within 1 (one) month or 30 (thirty) days, whichever is longer, (no extension of time under 37 CFR 1.136(a)) from the date of this decision in order to be considered timely. Any request for reconsideration must address the deficiencies indicated above.

Petitioner is reminded that, upon granting of the special status of the application on request for reconsideration, the application will be processed expeditiously. However, due to the dismissal of the instant petition, examination may not be completed within twelve months of the filing date of the application.

Any inquiry regarding this decision should be directed to Brian Johnson, Quality Assurance Specialist, at (571) 272-3595. If attempts to reach the undersigned by telephone are unsuccessful, Kakali Chaki, Quality Assurance Specialist, can be reached at (571) 272-3719.

**Request for Reconsideration**

Commissioner for Patents  
P.O. Box 1450  
Alexandria, VA 22313-1450

The following Request for Reconsideration is in response to the Decision on Petition to Make Special for New Application Under 37 C.F.R. § 1.102 and M.P.E.P. § 708.02, mailed on February 29, 2008.

This Request for Reconsideration is filed within one (1) month or thirty (30) days, whichever is the longer, of the mailing date of the Decision.

Applicants filed a Petition for Accelerated Examination under 37 C.F.R. § 1.102(d) on December 14, 2007. The Patent Office dismissed the Petition because the Petition did not, in the Patent Office's view, meet all the requirements of MPEP §§ 708.02 II.5 listed in the dismissal.

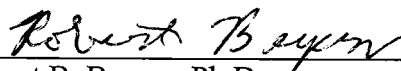

Specifically, the Patent Office dismissed the Petition because the Pre-Examination Search Statement did not include: (1) a search of class 715 subclasses 702, 764, 781, 788, and 831; and (2) searches with additional search terms "stylus with touch adj3 (screen or display)" and "stylus near3 touch adj3 (screen or display)."

In this Request for Reconsideration, Applicants submit a revised Pre-Examination Search Statement that includes the requested additional searches. The additional searches did not find any references that were more closely related to the claimed invention than those already cited in the Accelerated Examination Support Document filed on December 14, 2007.

The Commissioner is hereby authorized to charge any required fee(s) to Morgan, Lewis & Bockius LLP Deposit Account No. 50-0310 (order no. 063266-5054-US).

Respectfully submitted,

Date: March 13, 2008

**Pre-Examination Search Statement (Revised)**

Commissioner for Patents  
P.O. Box 1450  
Alexandria, VA 22313-1450

Dear Sir or Madam:

This revised pre-examination search statement is provided in support of the petition for accelerated examination filed herewith. This statement has been revised in accordance with the revisions requested in the Decision on Petition to Make Special for New Application Under 37 C.F.R. § 1.102 & M.P.E.P. § 708.02, mailed February 29, 2008.

The Commissioner is hereby authorized to charge any required fee(s) to Morgan, Lewis & Bockius LLP Deposit Account No. 50-0310 (order no. 63266-5054-US).

A pre-examination search was conducted involving U.S. patents and patent application publications, foreign patent documents and non-patent literature as indicated below. The results of the search are provided on an Information Disclosure Statement filed concurrently herewith.

**Pre-examination Search**

**US Field of Search:**

**Class(es)/Subclass(es) Searched:**

715/702, 764, 781, 788, 831;

**Date Conducted:** March 7, 2008.

**Class(es)/Subclass(es) Searched:**

345/173, 660, 684;  
715/784, 785, 863, 864;

**Date Conducted:** July 20, 2007.

**IPC Field of Search:**

**Class(es)/Subclass(es) Searched:**

G06F3/01, G06F3/048;

**Date Conducted:** March 7, 2008.

**Class(es)/Subclass(es) Searched:**

G06F3/033, G06F3/041;  
G09G5/00

**Search Directed to the Invention**

The pre-examination search was directed to the claimed invention, encompassing all the features of the claims and giving the claims their broadest reasonable interpretation.

**Search Directed to the Disclosure**

No disclosed features that are unclaimed at this time in this application are currently seen as features that may be claimed later in this application.

**Search Report from a Foreign Patent Office**

No search report from a foreign patent office is provided here as the pre-examination search.

**Statement of Good Faith**

All statements above in support of the petition to make special are based on a good faith belief that the search was conducted in compliance with the requirements of this rule.

Respectfully submitted,

Date: March 13, 2008

DECISION ON PETITION TO  
MAKE SPECIAL FOR NEW  
APPLICATION UNDER 37  
C.F.R. § 1.102 & M.P.E.P. §  
708.02

This is a decision on the renewed petition filed on March 13, 2008 to make the above-identified application special for accelerated examination procedure under 37 C.F.R. § 1.102(d). The original petition, submitted on December 14, 2007 was dismissed in the decision mailed on February 29, 2008.

The petition to make the application special is **GRANTED**.

The application is eligible for accelerated examination and the petition complies with the conditions for granting the application special status pursuant to the "Change to Practice for Petitions in Patent Applications to Make Special and for Accelerated Examination" published June 26, 2006, in the Federal Register. (71 Fed. Reg. 36323).

The prosecution of the instant application will be conducted expeditiously according to the following guidelines.

1. The application will be docketed to an examiner and taken up for action within two weeks of the date of this decision.
2. Restriction Practice:  
If the examiner determines that the claims are not directed to a single invention, a telephone request to elect one single invention will be made pursuant to MPEP 812.01. As a prerequisite to the grant of this petition, the applicant has agreed to make an oral election, by telephone, without traverse. If the applicant refuses to make an election

without traverse, or the examiner cannot reach the applicant after a reasonable effort, the examiner will treat the first claimed invention (invention defined by claim 1) as having being constructively elected without traverse for examination.

3. Office action:

If it is determined that, after appropriate consultation, there is a potential rejection or any other issue to be addressed, the examiner will telephone the applicant and arrange an interview to discuss and resolve the issue. An Office action, other than a Notice of Allowance and Fee(s) Due (Notice of Allowance), will not be issued unless either: 1) an interview was conducted but did not result in agreed to action that places the application in condition for allowance, or, 2) a determination is made that an interview would be unlikely to result in the application being placed in condition for allowance, and 3) an internal conference has been held to review any rejection of any claim.

4. Time for Reply:

An Office action other than a Notice of Allowance or a final Office action will set a shortened statutory period of one month or thirty days, whichever is longer, for reply with no extension of time available under 37 CFR 1.136(a). Failure to timely file a reply within this non-extendible period for reply will result in the abandonment of the application.

5. Reply by Applicant:

A timely reply to an Office action other than the Notice of Allowance must be submitted electronically via EFS or EFS-web and limited to addressing the rejections, objections and requirement made. Any amendment that attempts to: 1) add claims which would result in more than three pending independent claims or more than twenty pending total claims; 2) present claims not encompassed by the pre-examination search or an updated accelerated examination support document; or 3) present claims that are directed a non-elected invention or an invention other than that previously claimed and examined in the application, will be treated as not fully responsive and will not be entered.

For any amendment to the claims (including any new claim) that is not encompassed by the accelerated examination support document, applicant must provide an updated accelerated examination support document that encompasses the amended or new claims at the time of filing of the amendment.

To proceed expeditiously with the examination, it is recommended that a reply with amendments made to any claim or with any new claim being added be accompanied by an updated accelerated examination support document or a statement explaining how the amended or new claim is supported by the original accelerated examination support document.

6. Information Disclosure Statement (IDS):

Any IDS filed during prosecution must be submitted electronically via EFS or EFS-web, accompanied by an updated accelerated examination support document, and be in compliance with 37 CFR 1.97 and 1.98.

7. Post-Allowance Processing:

To expedite processing of the allowed application into a patent, the applicant must: 1) pay the required fees within one month of the date of the Notice of Allowance, and 2) not file any post allowance papers not required by the Office. In no event may the issue fee be paid and accepted later than three months from the date of the Notice of Allowance.

8. After-Final and Appeal Procedures:

To expedite prosecution, after receiving the final Office action, applicant must: 1) promptly file a notice of appeal, an appeal brief and appeal fees; and 2) not request a pre-appeal brief conference.

Any amendment, affidavit or other evidence filed after final Office action must comply with applicable rules and the requirements outlined in numbered paragraphs 5 and 6 above.

On appeal, the application will proceed according to normal appeal procedures. After appeal, the application will again be treated special.

9. Proceedings Outside the Normal Examination Process:

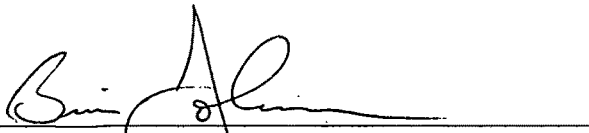

If the application becomes involved in a proceeding that is outside the normal examination process (e.g., a secrecy order, national security review, interference proceeding, petitions under 37 CFR 1.181, 182 or 183), the application will be treated special before and after such proceeding.

10. Final Disposition:

The twelve-month goal of this accelerated examination procedure ends with a final disposition. The mailing of a final Office action, a Notice of Allowance, the filing of a Notice of Appeal, or the filing of a Request for Continued Examination (RCE) is the final disposition.

If, during prosecution, a paper is not filed electronically using EFS-web, a reply is filed but is not fully responsive, the application is involved in an appeal, or a proceeding outside normal examination process, the application will still be examined expeditiously, however, the final disposition may occur more than twelve months from the filing of the application. In addition, Applicant is reminded that due to the dismissal of the previous petition submission, examination may not be completed within twelve months of the filing date of the application.

Any inquiry regarding this decision should be directed to Brian Johnson, Quality Assurance Specialist, at (571) 272-3595.

**This Acknowledgement Receipt evidences receipt on the noted date by the USPTO of the indicated documents, characterized by the applicant, and including page counts, where applicable. It serves as evidence of receipt similar to a Post Card, as described in MPEP 503.**

**New Applications Under 35 U.S.C. 111**

**If a new application is being filed and the application includes the necessary components for a filing date (see 37 CFR 1.53(b)-(d) and MPEP 506), a Filing Receipt (37 CFR 1.54) will be issued in due course and the date shown on this Acknowledgement Receipt will establish the filing date of the application.**

**National Stage of an International Application under 35 U.S.C. 371**

**If a timely submission to enter the national stage of an international application is compliant with the conditions of 35 U.S.C. 371 and other applicable requirements a Form PCT/DO/EO/903 indicating acceptance of the application as a national stage submission under 35 U.S.C. 371 will be issued in addition to the Filing Receipt, in due course.**

**New International Application Filed with the USPTO as a Receiving Office**

**If a new international application is being filed and the international application includes the necessary components for an international filing date (see PCT Article 11 and MPEP 1810), a Notification of the International Application Number and of the International Filing Date (Form PCT/RO/105) will be issued in due course, subject to prescriptions concerning national security, and the date shown on this Acknowledgement Receipt will establish the international filing date of the application.**

**Supplemental Accelerated Examination Support Document**

Commissioner for Patents  
P.O. Box 1450  
Alexandria, VA 22313-1450

Dear Sir or Madam:

This supplemental accelerated examination support document (AESD) is provided in support of the petition for accelerated examination filed on December 14, 2007. This supplemental AESD includes an additional reference deemed most closely related to the subject matter of the claims, namely Miller, D., "PersonalJava Application Environment," <http://java.sun.com/products/personaljava/touchable/>, June 8, 1999, 12 pages.

The Commissioner is hereby authorized to charge any required fee(s) to Morgan, Lewis & Bockius LLP Deposit Account No. 50-0310 (order no. 63266-5054).

**Listing of Claims** begins on page 2 of this paper.

**References Deemed Most Closely Related** are stated on page 6 of this paper.

**Identification of Limitations Disclosed by References** begins on page 6.

**Detailed Explanation of Patentability** begins on page 26 of this paper.

**Concise Statement of Utility** begins on page 27 of this paper.

**Showing of Support under 35 USC 112, First Paragraph** begins on page 28 of this paper.

**Identification of References Disqualified as Prior Art under 35 USC 103(c)** begins on page 53 of this paper.

## **Listing of Claims**

There are 3 independent claims and 20 total claims currently pending in the application. The claims read as follows:

1. A computer-implemented method, comprising:  
at a device with a touch screen display,  
detecting a movement of an object on or near the touch screen display;  
in response to detecting the movement, translating an electronic document displayed on the touch screen display in a first direction;  
in response to an edge of the electronic document being reached while translating the electronic document in the first direction while the object is still detected on or near the touch screen display, displaying an area beyond the edge of the document; and  
after the object is no longer detected on or near the touch screen display, translating the document in a second direction until the area beyond the edge of the document is no longer displayed.
2. The computer-implemented method of claim 1, wherein the device is a portable multifunction device.
3. The computer-implemented method of claim 1, wherein the movement of the object is on the touch screen display.
4. The computer-implemented method of claim 1, wherein the object is a finger.
5. The computer-implemented method of claim 1, wherein the first direction is a vertical direction, a horizontal direction, or a diagonal direction.
6. The computer-implemented method of claim 1, wherein the electronic document is a web page.
7. The computer-implemented method of claim 1, wherein the electronic document is a digital image.
8. The computer-implemented method of claim 1, wherein the electronic document is a word processing, spreadsheet, email or presentation document.

9. The computer-implemented method of claim 1, wherein the electronic document includes a list of items.
10. The computer-implemented method of claim 1, wherein the second direction is opposite the first direction.
11. The computer-implemented method of claim 1, wherein translating in the first direction prior to reaching an edge of the document has an associated speed of translation that corresponds to a speed of movement of the object.
12. The computer-implemented method of claim 1, wherein translating in the first direction is in accordance with a simulation of an equation of motion having friction.
13. The computer-implemented method of claim 1, wherein the area beyond the edge of the document is black, gray, a solid color, or white.
14. The computer-implemented method of claim 1, wherein the area beyond the edge of the document is visually distinct from the document.
15. The computer-implemented method of claim 1, wherein translating the document in the second direction is a damped motion.
16. The computer-implemented method of claim 1, wherein changing from translating in the first direction to translating in the second direction until the area beyond the edge of the document is no longer displayed makes the edge of the electronic document appear to be elastically attached to an edge of the touch screen display or to an edge displayed on the touch screen display.
17. The computer-implemented method of claim 1, wherein translating in the first direction prior to reaching the edge of the electronic document has a first associated translating distance that corresponds to a distance of movement of the object prior to reaching the edge of the electronic document; and wherein displaying an area beyond the edge of the electronic document comprises translating the electronic document in the first direction for a second associated translating distance, wherein the second associated

translating distance is less than a distance of movement of the object after reaching the edge of the electronic document.

18. The computer-implemented method of claim 1, wherein translating in the first direction prior to reaching the edge of the electronic document has a first associated translating speed that corresponds to a speed of movement of the object, and wherein displaying an area beyond the edge of the electronic document comprises translating the electronic document in the first direction at a second associated translating speed, wherein the second associated translating speed is slower than the first associated translating speed.

19. A device, comprising:

a touch screen display;

one or more processors;

memory; and

one or more programs, wherein the one or more programs are stored in the memory and configured to be executed by the one or more processors, the programs including:

instructions for detecting a movement of an object on or near the touch screen display;

instructions for translating an electronic document displayed on the touch screen display in a first direction, in response to detecting the movement;

instructions for displaying an area beyond an edge of the electronic document in response to the edge of the electronic document being reached while translating the electronic document in the first direction while the object is still detected on or near the touch screen display; and

instructions for translating the document in a second direction until the area beyond the edge of the document is no longer displayed, after the object is no longer detected on or near the touch screen display.

20. A computer readable storage medium having stored therein instructions, which when executed by a device with a touch screen display, cause the device to:

detect a movement of an object on or near the touch screen display;  
translate an electronic document displayed on the touch screen display in a first direction, in response to detecting the movement;  
display an area beyond an edge of the electronic document if the edge of the electronic document is reached while translating the electronic document in the first direction while the object is still detected on or near the touch screen display; and  
translate the document in a second direction until the area beyond the edge of the document is no longer displayed, after the object is no longer detected on or near the touch screen display.

**References Deemed Most Closely Related:**

An Information Disclosure Statement in compliance with 37 CFR 1.98 has been filed herewith citing each of the following references deemed most closely related to the subject matter of the claims.

1. Zimmerman et al                    US 6,690,387
2. Kwatinetz et al                    US 5,495,566
3. Pallakoff                            US Patent Application Publication 2005/0012723
4. Miller, D., "PersonalJava Application Environment,"  
<http://java.sun.com/products/personaljava/touchable/>, June 8, 1999, 12 pages.

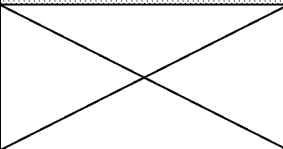

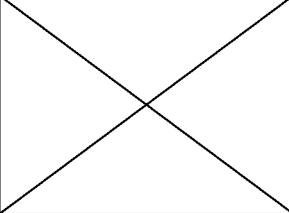

**Identification of Limitations Disclosed by References:**

The following charts identify the limitations that are disclosed, in whole or in part, by Zimmerman, Kwatinetz, Pallakoff, and Miller.

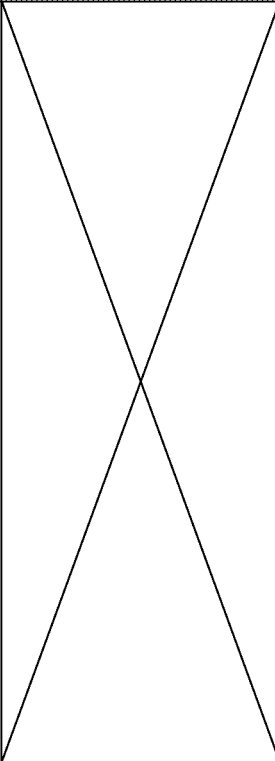

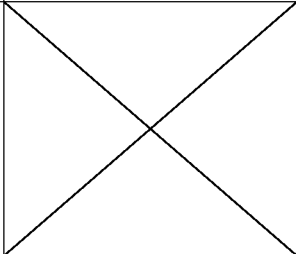

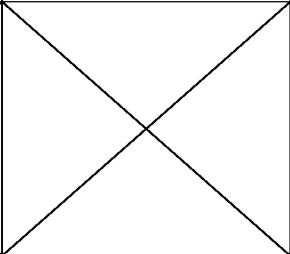

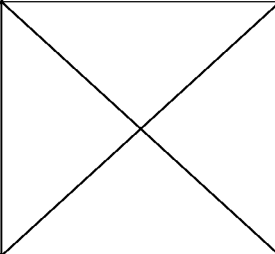

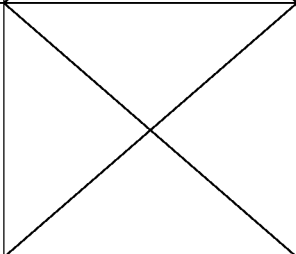

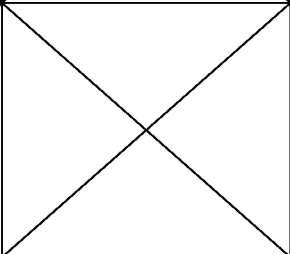

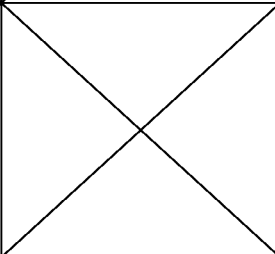

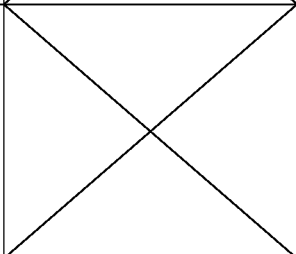

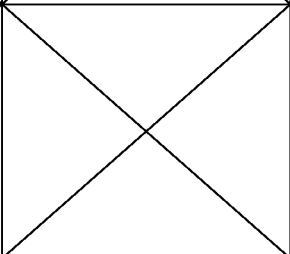

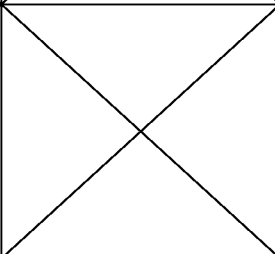

| <b>Claim Language</b>   | <b>Zimmerman et al</b>                                | <b>Kwatinetz et al</b>  | <b>Pallakoff</b>              |
|---|---|---|-------------------------------|
| 1. A computer-implemented method, comprising:   | Abstract.   | Abstract.   | Abstract.                     |
| at a device with a touch screen display,  | Col. 5, lines 26-29, and Fig. 2.                      | Kwatinetz discloses a system with a "display" (Col. 4, lines 50-56, col. 5, lines 37-44, and Figs. 1-2).<br><br>But Kwatinetz does not disclose "a device with a <u>touch screen</u> display" as required by claim 1. | Paragraph 0109 and Fig. 14-A. |
| detecting a movement of an object on or near the touch screen display;  | Col. 3, lines 15-16, Col. 5, lines 27-31, and Fig. 2. | X   | Paragraph 0120.               |
| in response to detecting the movement, translating an electronic document displayed on the touch screen display in a first direction; | Col. 3, lines 55-57, Col. 5, lines 27-31.             | X   | Paragraph 0120.               |

| Claim Language  | Zimmerman et al   | Kwatinetz et al  | Pallakoff              |

| instructions for translating the document in a second direction until the area beyond the edge of the document is no longer displayed, after the object is no longer detected on or near the touch screen display. |   |   |                              |
| 20. A computer readable storage medium having stored therein instructions, which when executed by a device with a touch screen display, cause the device to:   | Col. 5, lines 17-21, and 29-31.           | Kwatinetz discloses a system with a “display” (Col. 4, lines 50-64, col. 5, lines 37-44, and Figs. 1-2).<br><br>But Kwatinetz does not disclose “a device with a <u>touch screen display</u> ” as required by claim 20. | Paragraph 0274, and Fig. 24. |
| detect a movement of an object on or near the touch screen display;  | Col. 3, lines 15-16, Col. 5, lines 27-31. |   | Paragraph 0120.              |
| translate an electronic document displayed on the touch screen display in a first direction, in response to detecting the movement;  | Col. 3, lines 55-57, Col. 5, lines 27-31. |   | Paragraph 0120.              |

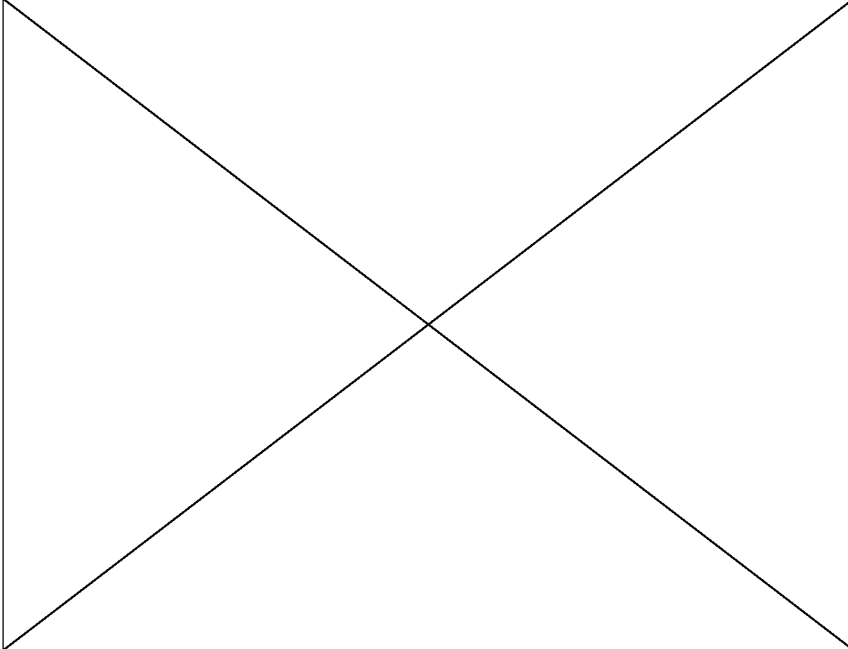

| <b>Claim Language</b>  | <b>Zimmerman et al</b> | <b>Kwatinetz et al</b> | <b>Pallakoff</b> |
|--|------------------------|------------------------|------------------|
| display an area beyond an edge of the electronic document if the edge of the electronic document is reached while translating the electronic document in the first direction while the object is still detected on or near the touch screen display; and |                        |                        |                  |
| translate the document in a second direction until the area beyond the edge of the document is no longer displayed, after the object is no longer detected on or near the touch screen display.  |                        |                        |                  |

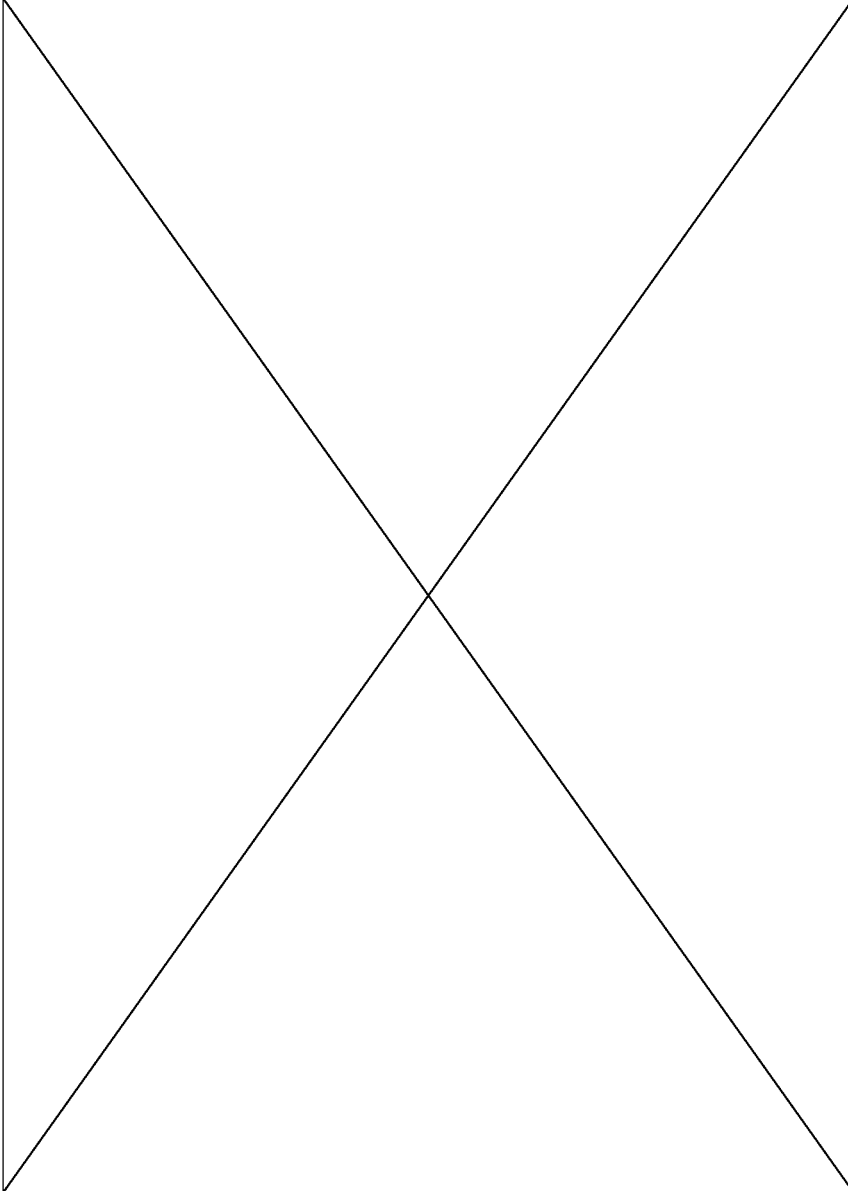

| <b>Claim Language</b>  | <b>Miller</b>  |
|--|--|
| 1. A computer-implemented method, comprising:                          | Page 1 states "This document focuses on the Touchable look and feel, a specific look and feel designed for touch screen based consumer products, including retail kiosks, personal digital assistants (PDAs), and screen phones."  |
| at a device with a touch screen display,                               | Page 1 states "This document focuses on the Touchable look and feel, a specific look and feel designed for touch screen based consumer products, including retail kiosks, personal digital assistants (PDAs), and screen phones."  |
| detecting a movement of an object on or near the touch screen display; | Page 6 states ". . . the Touchable look and feel is targeted for use on touch screen based consumer products. On such products, typically a finger or a stylus is used for input . . ."<br><br>But Miller does not disclose "detecting a <u>movement</u> of an object on or near the touch screen display" as required by this claim. Rather, Miller discloses touch screens that use one or more <u>stationary</u> taps to activate soft buttons (e.g., scroll-up and scroll-down buttons) on the touch screen: "A single tap interaction model is common" (Miller, page 6) |

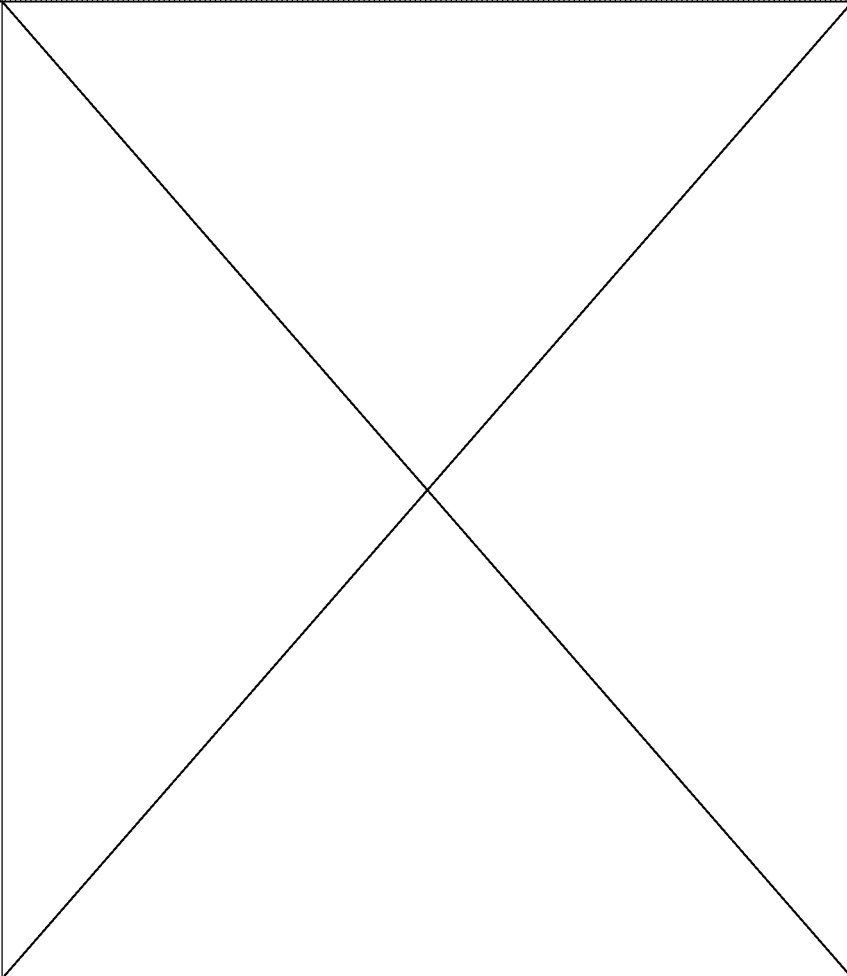

| Claim Language  | Miller   |
|---|--|
| <p>in response to detecting the movement, translating an electronic document displayed on the touch screen display in a first direction;</p>  | <p>Pages 9-10 disclose touch screens that use <u>stationary</u> taps on scroll-up and scroll-down buttons to translate electronic lists on the touch screen.</p> <p>But Miller does not disclose translating an electronic document "<u>in response to detecting the movement</u>" (i.e., in response to detecting the movement of the object on or near the touch screen display) as required by this claim.</p>                                  |
| <p>in response to an edge of the electronic document being reached while translating the electronic document in the first direction while the object is still detected on or near the touch screen display, displaying an area beyond the edge of the document; and</p> | <p>Page 9 states "When the scrolling list is at the top (see Figure 6), there is a half-space left blank to tell users they are at the top. If there is more information to scroll to, then the last item is shown clipped in half. In addition, the scroll buttons are enabled or disabled appropriately for each state. . . . When the list is at the bottom (see Figure 8), the half space is at the bottom and the upper item is clipped."</p> |
| <p>after the object is no longer detected on or near the touch screen display, translating the document in a second direction until the area beyond the edge of the document is no longer displayed.</p>  |   |
| <p>2. The computer-implemented method of claim 1, wherein the device is a portable multifunction device.</p>  | <p>Page 1 states "This document focuses on the Touchable look and feel, a specific look and feel designed for touch screen based consumer products, including retail kiosks, personal digital assistants (PDAs), and screen phones."</p>   |
| <p>3. The computer-implemented method of claim 1, wherein the movement of the object is on the touch screen display.</p>  | <p>Page 6 states ". . . the Touchable look and feel is targeted for use on touch screen based consumer products. On such products, typically a finger or a stylus is used for input . . ."</p>   |
| <p>4. The computer-implemented method of claim 1, wherein the object is a finger.</p>   | <p>Page 6 states ". . . the Touchable look and feel is targeted for use on touch screen based consumer products. On such products, typically a finger or a stylus is used for input . . ."</p>   |

| 5. The computer-implemented method of claim 1, wherein the first direction is a vertical direction, a horizontal direction, or a diagonal direction. | Figures 6-8 show a list that is scrolled in a vertical direction.          |
| 6. The computer-implemented method of claim 1, wherein the electronic document is a web page.  |  |
| 7. The computer-implemented method of claim 1, wherein the electronic document is a digital image.   |  |
| 8. The computer-implemented method of claim 1, wherein the electronic document is a word processing, spreadsheet, email or presentation document.    |  |
| 9. The computer-implemented method of claim 1, wherein the electronic document includes a list of items.   | Figures 6-8 show a list of items that is scrolled in a vertical direction. |
| 10. The computer-implemented method of claim 1, wherein the second direction is opposite the first direction.  |  |

| Claim Language   | Miller  |
|--|---|
| 11. The computer-implemented method of claim 1, wherein translating in the first direction prior to reaching an edge of the document has an associated speed of translation that corresponds to a speed of movement of the object. | X   |
| 12. The computer-implemented method of claim 1, wherein translating in the first direction is in accordance with a simulation of an equation of motion having friction.  | X   |
| 13. The computer-implemented method of claim 1, wherein the area beyond the edge of the document is black, gray, a solid color, or white.  | Page 9 states "When the scrolling list is at the top (see Figure 6), there is a half-space left blank to tell users they are at the top. If there is more information to scroll to, then the last item is shown clipped in half. In addition, the scroll buttons are enabled or disabled appropriately for each state. . . . When the list is at the bottom (see Figure 8), the half space is at the bottom and the upper item is clipped." |
| 14. The computer-implemented method of claim 1, wherein the area beyond the edge of the document is visually distinct from the document.   | Page 9 states "When the scrolling list is at the top (see Figure 6), there is a half-space left blank to tell users they are at the top. If there is more information to scroll to, then the last item is shown clipped in half. In addition, the scroll buttons are enabled or disabled appropriately for each state. . . . When the list is at the bottom (see Figure 8), the half space is at the bottom and the upper item is clipped." |
| 15. The computer-implemented method of claim 1, wherein translating the document in the second direction is a damped motion.   | X   |

| Claim Language  | Miller   |
|---|--|
| 16. The computer-implemented method of claim 1, wherein changing from translating in the first direction to translating in the second direction until the area beyond the edge of the document is no longer displayed makes the edge of the electronic document appear to be elastically attached to an edge of the touch screen display or to an edge displayed on the touch screen display. |  |

| <b>Claim Language</b>   | <b>Miller</b>   |
|---|---|
| <p>17. The computer-implemented method of claim 1, wherein translating in the first direction prior to reaching the edge of the electronic document has a first associated translating distance that corresponds to a distance of movement of the object prior to reaching the edge of the electronic document; and wherein displaying an area beyond the edge of the electronic document comprises translating the electronic document in the first direction for a second associated translating distance, wherein the second associated translating distance is less than a distance of movement of the object after reaching the edge of the electronic document.</p> |  |

| Claim Language  | Miller  |
|---|---|
| <p>18. The computer-implemented method of claim 1, wherein translating in the first direction prior to reaching the edge of the electronic document has a first associated translating speed that corresponds to a speed of movement of the object, and wherein displaying an area beyond the edge of the electronic document comprises translating the electronic document in the first direction at a second associated translating speed, wherein the second associated translating speed is slower than the first associated translating speed.</p> |    |
| <p>19. A device, comprising:</p>  | <p>Page 1 states "This document focuses on the Touchable look and feel, a specific look and feel designed for touch screen based consumer products, including retail kiosks, personal digital assistants (PDAs), and screen phones."</p>  |
| <p>a touch screen display;</p>  | <p>Page 1 states "This document focuses on the Touchable look and feel, a specific look and feel designed for touch screen based consumer products, including retail kiosks, personal digital assistants (PDAs), and screen phones."</p>  |
| <p>one or more processors;</p>  | <p>Page 1 states "This document focuses on the Touchable look and feel, a specific look and feel designed for touch screen based consumer products, including retail kiosks, personal digital assistants (PDAs), and screen phones." PDAs and screen phones inherently include a processor, memory, and one or more programs.</p> |
