Stock Applets Script 1,0 Description

Stock Applets is a set of stock and finance applets, inspired by stockapplets.com, including: Currency Converter, Two Tickers, Live Stock Quote Feed, Forex Cross Rates, and Stock Indicator Watcher.

Features:
- All applets include a variety of externally-stored XML settings to control various aspects of the display (varies from applet to applet).
- Financial and stock data is retrieved remotely from Yahoo! Finance. URL parameters are configurable using the XML configuration file.
- 100% of the Flash 2004 Professional source code is included, with free upgrades for life! This is a highly Actionscript -oriented set of applets.
- Stock Watch applet includes 4 possible views of the stocks; switch easily among views using the links at the top of the applet.

Requirements:

· PHP 4.1.0 or higher
· PHP safe mode must be turned off
· Flash 7 Player or higher
