Best phone to date

The iPhone 8GS is a great phone for the price! For those who are not ready to make the more expensive jump to the iPhone 4 this is a great alternative. The phone is easy to use and packed with features right out of the box. Apps can be added easily and at a fair value. My only complaint would be the battery.

What's great about it: Features  
What's not so great: Battery

Awesome ^5

Posted by: susannc from susieNC on 06/05/2011

I have so many friends with the newest Android phones, Blackberry, etc and I checked them all out and finally decided on the iphone 3G. I would have gotten the iphone 4 but in all reality it doesnt do a ton more that this doesnt do. As far as the camera, theres an app with a camera with flash in it, and works awesome when youre on trips and want to catch a photo. \*GB is alot of storage, thought Id use it by now but not even close. Get the car charger bcuz if you use internet and camera, like ALL phones, the battery dies. It does last long tho for all that this little thing does. I just love it, I got my daughter one and we are getting my husband one for fathers day.

What's great about it: EVERYTHING  
What's not so great: NOTHING

### Awesome 1st Smart Phone!!!!

★★★★★ 5.0

Posted by: [ninet1gt](#) from canton, ohio on 04/27/2011

I actually bought 3 of these. One for my wife, my mother in law (60 y/o), and myself. Very easy to use, very good plans (switched from verizon), very cheap! My wife goes through her battery about once every day in a half (using mainly texting and apps). Mine last about 2-3 days, as I really only text and play the occasional game. My mother in law needed a little help but can do pretty much everything with it! Our biggest issue was finding good cases for the 3gs!

Love this phone!

**What's great about it:** Ease of use & Price  
**What's not so great:** Harder to find accessories in stores
