Smart Energy Summit 2012 Topics

FEB 28 - MAR 1, 2012, in Austin Texas, will address the following topics:

Strategies and tactics to engage consumers

Business-model analysis to examine what works and how to drive revenues through energy services

Opportunities and business strategies for broadband service providers, residential security service firms, HVAC maintenance contractors, utilities, manufacturers, and installers

Consumer interest in energy-focused cloud-based services and strategies to integrate with other platforms, including smartphones and tablets like the iPad

Consumer segmentation by interest in energy management solutions

Competitive assessments of current industry participants and business opportunities within the value chains for emerging energy management solutions

Current status of home area network (HAN) trials, smart grid deployments, and sales of independent/non-utility in-home energy management solutions

Technical and business requirements for succeeding in

Energy Insights & News from Parks Associates

Blue Line and PlotWatt Partner for Home Energy Monitoring

Blue Line Innovations and PlotWatt have recently announced their home energy reporting partnership. With no additional hardware, families using the PowerCost Monitor™ can now see real-time, whole-home and appliance level energy usage. PlotWatt's patent-pending algorithms identify appliance-specific data signatures from a whole-house meter, and report the appliance-level costs to the homeowner.

AMI Fact Book: 2011 Update

This two-volume report is a catalog of current and future AMI and smart meter deployments in the U.S.

Volume I contains information on Demand Response (DR) programs being implemented, summary and detailed profiles of selected utilities.

Profiles include status of smart meter deployments and plans, number of residential customers covered, and the types of meters and technologies being implemented. Detailed data are provided in a separate Excel file for more than 2,400 utilities for review and analysis.

"The percentage of U.S. households with IP-based professionally monitored security will grow from less than 1% in 2011 to more than 15% by 2020."

From IP-based Home Monitoring: Security - This report provides an overview of the emergence of IP-based home security solutions. It analyzes the evolution taking place in the professional security monitoring market and offers insight on the impact of new monitoring systems on the traditional security business model.
