Re: *Apple v. Samsung*, Case No. 11-cv-1846-LHK (PSG) (N.D. Cal.)

Dear Rachel:

It has come to our attention that Samsung has incorporated a "blue glow" functionality into its products in an apparent attempt to design around certain Apple patents, including the '381 patent asserted in this action.

We have not found any documents regarding this "blue glow" functionality in Samsung's production thus far, although they are responsive to at least RFPs 20, 197, 198, and 199. Please be prepared during this Wednesday's meet-and-confer call to provide a date certain by which Samsung will substantially complete its production of documents discussing this functionality and other attempts by Samsung to design around Apple's patents.

Sincerely,

/s/ Mia Mazza
