Re: Certain Mobile Devices and Related Software, Inv. No. 337-TA-750 (U.S.I.T.C.)

Dear Mr. Jou:

I write to follow up on my letter of June 3 and our meet-and-confer discussion of earlier today regarding the production of documents and source code by non-party Google Inc. (“Google”).

1. Additional Source Code Protections

During our discussion, we agreed to submit a joint motion to amend the protective order regarding production of documents and source code by Google, including the additional protections in my letter of June 3. As you requested, I have enclosed with this letter a Word version of my June 3 letter, so that you can prepare a revised draft motion. We look forward to reviewing this draft.

2. Google’s Document and Source Code Production

We also discussed Google’s production of documents in response to Apple’s subpoena in this investigation. Google has begun the search and review process for this production, and

anticipates producing responsive and non-privileged documents before the end of June. Regarding source code, we confirmed that in this investigation Apple seeks only Android operating system files for builds corresponding to the two accused Motorola lead devices: the Motorola Droid and Xoom. Google will make this code available for inspection on a confidential source code computer as soon as possible following entry of an appropriate protective order.

3. Google 30(b)(6) Depositions

Finally, we discussed scheduling depositions of Google's corporate designees in response to Apple's subpoena. Google will provide witnesses as soon as possible and will attempt to provide witnesses in June but, given the timing of the subpoena, may not be able to do so. In that case, we agreed to discuss a potential motion to extend the discovery deadline for the purpose of deposing Google's corporate designees.
