UNITED STATES DISTRICT COURT
NORTHERN DISTRICT OF CALIFORNIA
SAN JOSE DIVISION

NANCY LANOVAZ, on behalf of herself and
all others similarly situated,

Plaintiff,

v.

TWININGS NORTH AMERICA, INC.,

Defendant.

Case No. C-12-02646-RMW

**ORDER GRANTING IN PART,
DENYING IN PART DEFENDANT'S
MOTION TO DISMISS**

[Re Docket No. 29]

I. INTRODUCTION

Nancy Lanovaz, on behalf of herself and a purported class of similarly situated individuals, filed a complaint on May 23, 2012, asserting claims against Twinings North America, Inc. ("Twinings") seeking monetary and injunctive relief to redress her and her alleged class members for the losses they incurred as a result of their purchases of allegedly misbranded Twinging's green tea and to prevent further misbranding. The tea box has a label describing the tea as a "natural source of antioxidants." After Twinings filed a motion to dismiss but before it was heard, plaintiff filed her Amended Complaint ("AC") in which she asserts claims under Cal.

1 Bus. & Prof. Code § 17200 *et seq.* (California Unfair Competition Law or "UCL"), Cal. Bus. &
2 Prof. Code § 17500 *et seq.* (California False Advertising Law or "FAL"), Cal. Civ. Code § 1750
3 *et seq.* (California Consumers Legal Remedies Act or "CLRA"), Cal. Civ. Code § 1790 *et seq.*
4 (Song-Beverly Consumer Warranty Act or "Song-Beverly"), and 15 U.S.C. § 2301 *et seq.*
5 (Magnuson-Moss Warranty Act or "Magnuson-Moss"). The basic claim underlying plaintiff's
6 causes of action is that Twinings' "natural source of antioxidants" label violates California law
7 and is deceptive. Plaintiff asserts broadly that defendant is:

8 A. Making unlawful nutrient content claims on the labels of food products that fail
9 to meet the minimum nutritional requirements legally required for the nutrient
10 content claims being made;

11 B. Making unlawful antioxidant claims on the labels of food products that fail to
12 meet the minimum nutritional requirements legally required for the antioxidant
13 claims being made;

14 C. Making unlawful and unapproved health claims about their products that are
15 prohibited by law; and

16 D. Making unlawful claims that suggest to consumers that their products can
17 prevent the risk or treat the effects of certain diseases like cancer or heart disease.

18 AC 9.

19 Defendant Twinings seeks to dismiss the AC and contends that plaintiff's claims fail for
20 four reasons: (1) they are all preempted; (2) plaintiff cannot show Article III injury in fact; (3)
21 plaintiff's claims are not plausible; and (4) none of plaintiff's causes of action states a viable
22 claim. Defendant also requests that the court strike as "immaterial" all allegations concerning
23 Twinings' advertisements and a press release that plaintiff did not see and labels on products she
24 did not buy.

25 II. ANALYSIS

26 A. Scope of Labels and Products At Issue

27 Twinings moves to strike the portions of the claims regarding statements that plaintiff did
28 not see and concerning products she did not buy. The only product that Lanovaz specifically

1 identifies that she purchased is Twinings' "Green Tea, 1.41 oz box." FAC ¶ 111. She alleges she
2 relied on the label on the box stating "natural source of antioxidants." FAC ¶ 113. Although she
3 does refer to having bought other Twinings products and viewing its website (*see, e.g.*, ¶¶ 87,
4 111), she does not identify those other products or other specific information on which she relied
5 in purchasing Twinings' products. Although she does not allege that she relied on information on
6 Twinings' website, she included in her AC information health information that was purportedly
7 on the website.

9 One generally cannot expand the scope of his or her claims to include a product not
10 purchased or advertisements not relied upon. *See, e.g., Johns v. Bayer Corp.*, 2010 WL 476688,
11 at *5 (S.D. Cal. Feb. 9, 2010) (in a proposed class action, finding that the named plaintiff "cannot
12 expand the scope of his claims to include . . . advertisements relating to a product that he did not
13 rely upon."). The statutory standing requirements of the UCL and CLRA are narrowly
14 prescribed and do not permit such generalized allegations. *Id.*

16 Lanovaz also purports to represent the class of people who purchased Twinings' Green
17 Tea product over the last four years and brings claims based upon those unidentified products as
18 well. FAC ¶ 122. Although courts are split as to whether actual purchase is required to establish
19 the requisite injury-in-fact, *see Miller v. Ghirardelli Chocolate Co.*, 2012 WL 6096593, at *6-7
20 (N.D. Cal. Dec. 7, 2012) (recognizing split and analyzing cases), in this case, the court agrees
21 with defendants that there can be no requisite *pecuniary* injury where plaintiff did not herself
22 purchase the product at issue. *See Granfield v. NVIDIA Corp.*, 2012 WL 2847575, at *6 (N.D.
23 Cal. July 11, 2012) ("[C]laims related to products not purchased must be dismissed for lack of
24 standing."); *Larsen v. Trader Joe's Co.*, 2012 WL 5458396, at *5 (N.D. Cal. June 14, 2012)
25 (same); *Mlejnecky v. Olympus Imaging Am. Inc.*, 2011 WL 1497096, at *4 (E.D. Cal. Apr. 19,
26 2011) (same); *Carrea v. Dreyer's Grand Ice Cream, Inc.*, 2011 WL 159380, at *3 (N.D. Cal. Jan.
27
28

1 10, 2011) (same); *Johns v. Bayer Corp.*, 2010 WL 476688, at *5 (S.D. Cal. Feb. 9, 2010)
2 ("[P]laintiff cannot expand the scope of h[er] claims to include a product [s]he did not purchase or
3 advertisements relating to a product that [s]he did not rely upon."); *see generally*,
4 *TrafficSchool.com, Inc. v. Edriver Inc.*, 653 F.3d 820, 825 n.1 (9th Cir. 2011) ("Plaintiffs filing an
5 unfair competition suit must prove a pecuniary injury.") Therefore, Lanovaz's claims, brought on
6 her own behalf or on behalf of a class, cannot survive a motion to dismiss where there is no
7 allegation that she purchased the product.

9 Plaintiff's allegations are too indefinite to allow her to proceed on her own behalf or as a
10 representative of a class on any claim except one based upon the green tea product bearing the
11 label "natural source of antioxidants." To the degree that Lanovaz has attempted to make claims
12 based upon different labels or products other than green tea, the court strikes those allegations as
13 immaterial with leave to amend. Plaintiff must identify the specific Twinings' products which she
14 claims she purchased and specifically set forth any misleading label or information on which she
15 relied in making her purchase. *See* Fed. R. Civ. P. 9(b) ("a party must state with particularity the
16 circumstances constituting fraud or mistake.").

18 **B. Preemption**

19 Defendant contends that plaintiff's claims are preempted by the Federal Food, Drug, and
20 Cosmetic Act ("FDCA") as amended by the Nutrition Labeling and Education Act ("NLEA").
21 The FDCA gives the Food and Drug Administration ("FDA") the responsibility to protect public
22 health by ensuring that "foods are safe, wholesome, sanitary, and properly labeled." 21 U.S.C. §
23 393(b)(2). In 1990 Congress passed the NLEA to specifically address labeling requirements for
24 certain food and beverage products. Pub. L. No. 101-535, 104 Stat. 2353 (1990). The FDA has
25 promulgated regulations to carry out its responsibilities. *See, e.g.*, 21 C.F.R. 101.54(g)
26 (regulation of nutrient content claims using the term "antioxidant"). The NLEA provides for
27
28

1 national uniform nutrition labeling and expressly preempts state law that is inconsistent with its
2 requirements. 21 U.S.C. § 343-1(a). In addition, there is no private right of action under the
3 FDCA. 21 U.S.C. § 337(a). Defendant, therefore, submits that plaintiff's complaint is preempted.

4 Plaintiff counters that she is not suing under the FDCA but rather under California state
5 law and specifically California Health & Safety Code section 110100(a) which adopts "[a]ll food
6 labeling regulations of the FDA and any amendments to those regulations" and section 110670
7 which provides that "[a]ny food is misbranded if its labeling does not conform with the
8 requirements for nutrient content or health claims as set forth in Section 403(r) (21 U.S.C. Sec.
9 343(r)) of the federal act and the regulations adopted pursuant thereto."

10
11 Twinings argues that plaintiff should not be able to make an end run around the no private
12 action rule by indirectly bringing a claim to obtain redress for an alleged violation of the FDA
13 labeling regulations. Defendant relies heavily on *Pom Wonderful LLC v. Coca-Cola Co.*, 679
14 F.3d 1170 (9th Cir. 2012), where the Ninth Circuit held that a plaintiff juice manufacturer could
15 not sue a competitor under the Lanham Act for using a deceptive label where the label apparently
16 was authorized under FDA regulations. *Id.* at 1177. The court concluded:

17
18
19 We are primarily guided in our decision not by Coca-Cola's
20 apparent compliance with FDA regulations but by Congress's
21 decision to entrust matters of juice beverage labeling to the FDA
22 and by the FDA's comprehensive regulation of that labeling. To
23 give as much effect to Congress's will as possible, we must respect
the FDA's apparent decision not to impose the requirements urged
by Pom. And we must keep in mind that we lack the FDA's
expertise in guarding against deception in the context of juice
beverage labeling.

24 *Id.*

25 *Pom* does not preclude plaintiff's claim. First, the appellate court did not hold that the
26 state law claims asserted were preempted or otherwise barred. Instead, the court applied a
27 principle of deference to the expertise of the FDA. *See Astiana v. Hain Celestial Group*, 2012

1 WL 5873585, at *2 (N.D. Cal. Nov. 19, 2012). *Pom* affirmed the district court's summary
2 judgment to the extent it barred Pom's Lanham Act claim but vacated summary judgment to the
3 extent it had ruled that Pom lacked statutory standing on its state UCL and FAL claims. Those
4 claims were remanded to the district court. *Pom*, 679 F.3d at 1179.

5
6 The NLEA does expressly preempt state labeling laws that cover certain described foods.
7 21 U.S.C. § 343–1. This statutory provision, however, has been repeatedly interpreted not to
8 preempt requirements imposed by state law that effectively parallel or mirror the relevant sections
9 of the NLEA. *See, e.g., New York State Rest. Ass'n*, 556 F.3d 114, 123 (2nd Cir. 2009); *Chavez v.*
10 *Blue Sky Natural Beverage Co.*, 268 F.R.D. 365, 370 (N.D. Cal. 2010); *In re Farm Raised*
11 *Salmon Cases*, 42 Cal. 4th 1077, 1091 (2008). Therefore, it appears clear that the NLEA
12 contemplates state enactment and enforcement of labeling requirements as long as they are
13 identical to or parallel NLEA requirements. Although Congress intended to preempt non-
14 identical requirements in the field of food labeling, the purpose of the NLEA is not to preclude all
15 state regulation of nutritional labeling, but to prevent State and local governments from adopting
16 inconsistent requirements with respect to the labeling of nutrients. *Astiana v. Ben & Jerry's*
17 *Homemade, Inc.*, 2011 WL 2111796, at *9 (N.D. Cal. May 26, 2011). Congress declared that the
18 NLEA "shall not be construed to preempt any provision of State law, unless such provision is
19 expressly preempted under section [343–1(a)] of the [FDCA]." *Id.* (quoting Pub. L. No. 101–
20 535, 104 Stat. 2353, 2364 (1990)).

21
22
23 The preemption issue here is whether the alleged violations that Lanovaz seeks to enforce
24 are violations of the FDA regulations (incorporated into California law) or whether she is making
25 claims that go beyond what the regulations require. There is a two-part test to determine statutory
26 preemption in such cases: there must be (1) a federal requirement, and (2) the challenged state or
27 local rule must impose a requirement that is different from, or adds additional obligations to, the
28

1 federal requirement. *Degelmann v. Advanced Med. Optics, Inc.*, 659 F.3d 835, 841 (9th Cir.
2 2011), *vacated on other grounds*, 699 F.3d 1103 (9th Cir. 2012). The FDA regulates the labels.
3 Thus, the issue here becomes whether the label violations on which Lanovaz bases her claim
4 require imposing a requirement that is different from the FDA regulations.

5
6 Lanovaz asserts that Twinings' claim that its green tea is a "natural source of antioxidants"
7 violates the FDA's regulation of nutrient, antioxidant, and health claims and that since California
8 has incorporated those regulations, her claim is not preempted. A health claim is a statement that
9 expressly or implicitly links the consumption of a food to a disease or health-related condition.
10 *See* 21 C.F.R. §§ 101.14(a)(1), 101.14(a)(2), 101.14(a)(5). Lanovaz depends on representations
11 made on Twinings' website to support her health claims. However, the court struck claims
12 depending upon information on the website as plaintiff has not adequately alleged that she bought
13 any particular product based upon specific representations or statements on the website.

14
15 The more difficult question is whether the statement "natural source of antioxidants" is a
16 federally regulated nutrient content claim. "A claim that expressly or implicitly characterizes the
17 level of a nutrient of the type required to be in nutrition labeling . . . (that is, a nutrient content
18 claim) may not be made on the label or in labeling of foods unless the claim is made in
19 accordance with this regulation." 21 C.F.R. § 101.13(b). Under California law "[a]ny food is
20 misbranded if its labeling does not conform with the requirements for nutrient content or health
21 claims as set forth in Section 403(r)(21 U.S.C. Sec. 343(r)) of the federal act and the regulations
22 adopted pursuant thereto." Cal. Health & Safety Code § 110670. Twinings argues that its label
23 does not characterize the *level* of antioxidant but only claims its tea is a "natural source," and
24 therefore, it is not a nutrient content claim. Twinings further asserts that any interpretation of
25 "source of" by the courts could result in the term being defined differently under state and federal
26 law. *See Turek v. Gen. Mills, Inc.*, 662 F3d 423, 427 (7th Cir. 2011) ("consistency is not the test;
27
28

1 identity is"). Therefore, Twinings concludes, the court should not define the term and should
2 defer to the expertise of the FDA. *See Pom*, 679 F.3d at 1177.

3 Lanovaz does not dispute the truth of the statement that green tea is a source of
4 antioxidants. Rather, Lanovaz submits that describing the tea as a "source of" antioxidants
5 constitutes a "nutrient content claim" and that Twinings' label violates the requirements for a
6 nutrient content claim.
7

8 Under 21 C.F.R. § 101.54(g) a nutrient content claim that characterizes the level of
9 antioxidant nutrients present in a food may be used on the label or in the labeling of that food
10 when:

- 11 (1) An RDI (Reference Daily Intake) has been established for each of the nutrients;
- 12 (2) The nutrients that are the subject of the claim have recognized antioxidant
13 activity. . . ;
- 14 (3) The level of each nutrient that is the subject of the claim is sufficient to qualify
15 for the [type of claim made]; and
- 16 (4) The names of the nutrients that are the subject of the claim are included as part
17 of the claim

18 Twinings' "natural source of antioxidants" label does not meet these requirements. Therefore, if
19 the label makes a nutrient content claim, Lanovaz's state UCL and FAL claims are viable.

20 The FDA has not officially defined "source of" or "natural source of" as making a nutrient
21 content claim. However, it has identified similar terms such as "excellent source of," "good
22 source of," "contains," and "provides" as the operative words in nutrient content claims.

23 In a March 24, 2011 warning letter issued to Jonathan Sprouts, Inc., the FDA advised that
24 certain claims using the word "source" were nutrient content claims. AC ¶ 54. The FDA said
25 that by using the term "source" the company "characterize[d] the level of nutrients of a type
26 required to be in nutrition labeling" and are subject to FDA regulations. *Id.* The warning stated
27
28

1 further that the FDA had not defined the characterization "source" by regulation and the
2 characterization could not be used in a nutrient content claim. *Id.*

3 Based upon the allegations in the AC, which the court must accept as true, the court is
4 satisfied that Lanovaz is asserting a "nutrient content claim" under state law that is identical to
5 what the FDA describes as a nutrient content claim. Therefore, her state claims are not
6 preempted.
7

8 **C. Injury in Fact**

9 Article III standing, for purposes of a motion to dismiss, requires a plaintiff to plead
10 "injury in fact," "a causal connection between the injury and the conduct complained of," and it
11 must be likely the injury will be redressed by a favorable decision. *Lujan v. Defenders of*
12 *Wildlife*, 504 U.S. 555, 561 (1992). In particular, the injury must be "an invasion of a legally
13 protected interest which is (a) concrete and particularized and (b) actual or imminent, not
14 conjectural or hypothetical." *Id.* (internal quotation marks omitted.)
15

16 Article III's injury-in-fact requirement is effectively the same as that under the UCL and
17 FAL. *Kwikset Corp. v. Super. Ct.*, 51 Cal. 4th 310, 322 (2011) (the law expressly adopted the
18 federal standard). The only difference is that injury-in-fact under the UCL and FAL must be an
19 economic injury while Article III allows standing for non-economic injuries. *Id.* at 323; *see also*
20 *TrafficSchool.com, Inc. v. Edriver Inc.*, 653 F.3d 820, 825 n.1 (9th Cir. 2011) (UCL injury-in-fact
21 standing is slightly narrower than Article III standing because plaintiff must prove a pecuniary
22 injury).
23

24 Here, Twinings argues that Lanovaz's claimed injuries arise from her allegation that
25 Twinings' products are "legally worthless," FAC ¶ 1, but that this is a theoretical construct and
26 not an injury in fact. Twinings points out that Lanovaz paid for tea which was not tainted,
27 spoiled, adulterated or contaminated and she consumed it without incident or physical injury.
28

1 Lanovaz, on the other hand, argues that she is not claiming she suffered a health related injury but
2 is contending that Twinings made an unlawful claim on its product label, which misled Lanovaz
3 into buying Twinings tea that she otherwise would not have purchased or paid a premium for.
4 FAC ¶¶ 110-21. Here, defendant's argument misses the mark because plaintiff's injury is based
5 on the allegation that she would not have *purchased* the product if she had known that the label
6 was unlawful. The alleged purchase of a product that plaintiff would not otherwise have
7 purchased but for the alleged unlawful label is sufficient to establish an economic injury-in-fact
8 for plaintiff's unfair competition claims. *See Chacanaca v. Quaker Oats, Co.*, 752 F. Supp. 2d
9 1111, 1125 (2012); *Chaves v. Blue Sky Natural Beverage Co.*, 340 Fed. App'x 359, 360-61 (9th
10 Cir. 2009); *Kashin v. Hershey Co.*, 2012 WL 5471153, at *6 (N.D. Cal. Nov. 11, 2012); *Carrea v.*
11 *Dreyer's Grand Ice Cream, Inc.*, 2011 WL 159381, at *2-3 (N.D. Cal. Jan. 10, 2011). To the
12 extent the injury alleged is reliance on a misleading, as opposed to an unlawful, label, whether
13 plaintiff was actually misled is a factual question that is an inappropriate basis for dismissal at
14 this stage. *See Kashin*, 2012 WL 5471153, at *7 ("[T]he issues Defendant raise ultimately
15 involve questions of fact as to whether Plaintiff was or was not deceived by the labeling; this
16 argument is . . . beyond the scope of this Rule 12 (b)(6) motion."); *Ben & Jerry's*, 2011 WL
17 2111796, at *4 (same).

21 **D. Implausibility**

22 Twinings claims that plaintiff's alleged reliance on a "hyper-technical" violation of FDA
23 regulations is implausible on its face. Lanovaz claims that she thought she was purchasing tea
24 that met the minimum threshold to make an antioxidant and nutrient claim and that buying
25 healthy food products was important to her. Twinings claims that it is implausible that plaintiff
26 would find the statement "natural source of antioxidants" misleading. The statement is literally
27 true and Twinings asserts that the reasonable consumer would not know that the FDA has not
28

1 defined "source" and "natural source" and, therefore, that the terms have no ascribed meaning.
2 Thus Twinings submits that plaintiff's claim does not meet the plausibility requirement of
3 *Ashcroft v. Iqbal*, 556 U.S. 662, 679 (2009).

4 The plaintiff's allegation in her AC, which must be considered true for pleading purposes,
5 is that the label meant that the tea met a minimum nutritional requirement and that she would not
6 have bought it, or paid a premium for it, had she known that it did not meet the minimum
7 requirements for listing a product as containing antioxidants. The court finds that plaintiff meets
8 the plausibility requirement.
9

10 **E. Claims Under the Song-Beverly Consumer Warranty Act and Magnuson-Warranty**
11 **Act**

12 Lanovaz brings breach of warranty claims under the Song-Beverly Consumer Warranty
13 Act, Cal. Civ. Code § 1790 *et seq.*, and the Magnuson-Moss Warranty Act, 15 U.S.C. § 2301 *et*
14 *seq.* Plaintiff alleges that Twinings' label constitutes an express warranty, which the Song-
15 Beverly Act defines as "[a] written statement arising out of a sale to the consumer of a consumer
16 good pursuant to which the manufacturer, distributor, or retailer undertakes to preserve or
17 maintain the utility or performance of the consumer good or provide compensation if there is a
18 failure in utility or performance." Cal. Civ. Code § 1791.2 (emphasis added). The Act defines a
19 "consumer good" as "any new product or part thereof that is used, bought, or leased for use
20 primarily for personal, family, or household purposes, except for . . . consumables." *Id.* § 1791(a)
21 (emphasis added). Twinings' tea is a "consumable[]," which means "any product that is intended
22 for consumption by individuals." Cal. Civ. Code § 1791(d). Since California Civil Code section
23 1791.2 defines an express warranty as applying only to "consumer goods," and the definition of
24 consumer goods excludes consumables, plaintiff cannot successfully allege that Twinings created
25 an express warranty on its product. Therefore, the claim is dismissed without leave to amend.
26
27

28 Plaintiff's Magnuson–Moss Act claim also fails. The Act defines a written warranty as

1 any written affirmation of fact or written promise made in connection with the sale of a consumer
2 product by a supplier to a buyer which relates to the nature of the material or workmanship and
3 affirms or promises that such material or workmanship is defect free or will meet a specified level
4 of performance over a specified period of time. 15 U.S.C. § 2301(6)(A). A label, such as a
5 "natural source of antioxidants," does not constitute a warranty against a product defect. *See*
6 *Astiana v. Dreyer's Grand Ice Cream, Inc.*, 2012 WL 2990766 at *3 (N.D. Cal. July 20, 2012);
7 *Jones v. ConAgra Foods, Inc.*, 2012 WL 6569393, *12-13 (N.D. Cal. Dec. 17, 2012). Since
8 plaintiffs do not allege that the statement on Twinings' label affirms that the tea is "defect free,"
9 the court dismisses without leave to amend plaintiff's Magnuson–Moss Act claim.

11 **F. Restitution Based on Unjust Enrichment**

12 "The doctrine [of unjust enrichment] applies where plaintiffs, while having no
13 enforceable contract, nonetheless have conferred a benefit on defendant which defendant has
14 knowingly accepted under circumstances that make it inequitable for the defendant to retain the
15 benefit without paying for its value." *Hernandez v. Lopez*, 180 Cal. App. 4th 932, 938 (2009).
16 Here, plaintiff's claim for unjust enrichment is based on the same allegations as the UCL, FAL,
17 and CLRA claims. Lanovaz's claim is simply a reformulation of her UCL, FAL, and CLRA
18 claims. Restitution is already a remedy under the UCL, so plaintiff's restitution claim is
19 superfluous. *Barocio v. Bank of Am.*, 2012 WL 3945535, at *4 (N.D. Cal., Sept. 10, 2012).
20 "[P]laintiff[] cannot assert unjust enrichment claims that are merely duplicative of statutory or tort
21 claims." *Id.* (quoting *In re Apple & AT&T iPad Unlimited Data Plan Litig.*, 802 F. Supp. 2d
22 1070, 1077 (N.D. Cal. 2011) (citing cases)). The court, therefore, dismisses the restitution claim
23 without leave to amend.
24
25

26 **III. ORDER**

27 The court dismisses with prejudice Lanovaz's Song-Beverly Consumer Warranty Act,
