

Exhibit I

Does Facebook use cookies if I don't have an account or have logged out of my account? When you log out of Facebook, we remove the cookies that identify your particular account, but we do use other cookies primarily to help keep you and others on Facebook safe and secure. For example, we use cookies to identify and disable the accounts of spammers and phishers, to prevent people who are underage from signing up with a false birth date, to help you recover your account if you lose access to it or it's compromised, to power our opt-in security features like Login Notifications and Login Approvals, and to help identify public computers so that we can discourage people from using "Keep me logged in." We may also use anonymized or aggregate information to improve our products.

We also use cookies if you don't have a Facebook account, but have visited facebook.com. Again, these cookies help us protect Facebook and the people who use it from malicious activity. For example, they help us detect and prevent denial-of-service attacks and the mass creation of fake accounts.

We do not use these cookies to create a profile of your browsing behavior on third-party sites.
