## About Rockstar

Rockstar is a patent licensing business that owns and manages a portfolio of more than 4,000 patents developed by technology pioneer Nortel Networks. This portfolio consists of patents covering a wide range of consumer and enterprise communications technologies currently in use or in development in markets worldwide.

Through [patent licensing](#) and [sales](#), Rockstar brings these innovations to businesses around the globe.

### Facts about Rockstar's portfolio

The bulk of the Nortel Networks patent portfolio was transitioned to Rockstar as part of Nortel's bankruptcy process in 2011. This transaction yielded an historic \$4.5B for Nortel's creditors, and established an initial set of founding licensees to the Rockstar portfolio. Because Rockstar's portfolio is based on a wide range of telecommunications, wired and networking based research and development performed by Nortel engineers, a significant portion of today's high technology products and services relate to these patents.
