TITLE

Number of likes dropped more than 50% in one day

DESCRIPTION

Is it related to removing the count from sharing the url in private messages?

=====
Bug Description
=====

The past year we have seen our number of likes grow to ~4500. Since yesterday our like counter dropped to 2100.

=====
Repro
=====

1. Open the website <http://www.lijstje.nl/>
2. Facebook like counter reads 2.1k, yesterday it was ~4.5k

*** Expected Behavior**

We expect the number of likes to be ~4.5k

*** Actual Behavior**

The current number reads 2.1k

 yea I will do that. This is going to frustate the developers :(I am going to say:
"This is by design. We fixed an accounting bug at our end and hence you see changes in the like counts. We apologize for the inconvenience."

 yes,
this is expected and by design. we should report this as fixing an accounting error rather than describing exactly what happened because it was a privacy issue letting the count be that high.
