NOT FOR CITATION  
IN THE UNITED STATES DISTRICT COURT  
FOR THE NORTHERN DISTRICT OF CALIFORNIA  
SAN JOSE DIVISION

CES GROUP, LLC,

No. C14-02919 BLF (HRL)

Plaintiff,

**ORDER RE: DISCOVERY DISPUTE  
JOINT REPORT #1**

v.

ENERGY LABS INC.; et al.,

**[Re: Docket No. 60]**

Defendants.

Plaintiff sues Energy Labs Inc., DMG Corporation, and DMG North, Inc. for infringement of U.S. Patent Nos. 7,922,442; 8,414,251; 8,398,365; 8,562,283; 8,694,175; 8,727,700; and 8,734,086. Under the current scheduling order, Defendants’ invalidity contentions were due on February 9, 2015. In late January 2015, Defendants objected to the amount of detail provided in Plaintiff’s infringement contentions, and asserted that they were not obligated to serve invalidity contentions.

The parties filed the present Discovery Dispute Joint Report (“DDJR”) regarding this dispute on February 6, three days before Defendants’ invalidity contentions were due. Defendants object to Plaintiff’s infringement contentions as well as the documents produced therewith. Defendants seek an order: (1) requiring Plaintiff to supplement its infringement contentions to be in compliance with Patent L.R. 3-1, and (2) stating that Defendants’ invalidity contentions are due 45 days after Plaintiff serves infringement contentions that comply with Patent L.R. 3-1.

**United States District Court**  
For the Northern District of California

1           The Patent Local Rules of this District provide for a “‘streamlined’ mechanism to replace the  
2 ‘series of interrogatories that defendants would likely have propounded’ in its absence.” *FusionArc,*  
3 *Inc. v. Solidus Networks, Inc.*, No. C06–06770 RMW (RS), 2007 WL 1052900, at \*2 (N.D. Cal.  
4 Apr. 5, 2007) (quoting *Network Caching Tech., LLC v. Novell Inc.*, No. C01–2079 VRW, 2002 WL  
5 32126128, at \*4 (N.D. Cal. Aug. 13, 2002)). As such, a plaintiff is required to include in its  
6 infringement contentions all facts known to it, including those discovered in its Fed. R. Civ. P. 11  
7 pre-filing investigation. *Network Caching Tech., LLC*, 2002 WL 32126128, at \*4. The rules  
8 “require parties to crystallize their theories of the case early in litigation and to adhere to those  
9 theories once they have been disclosed.” *O2 Micro Int’l Ltd. v. Monolithic Power Sys., Inc.*, 467  
10 F.3d 1355, 1366 n.12 (Fed. Cir. 2006); *see also Atmel Corp. v. Info. Storage Devices, Inc.*, C95-  
11 1987 FMS, 1998 WL 775115, at \*2 (N.D. Cal. Nov. 5, 1998).

12           Patent Local Rule 3-1 requires a plaintiff in a patent infringement action to serve  
13 infringement contentions setting forth “[e]ach claim of each patent in suit that is allegedly infringed  
14 by each opposing party” and identifying for each asserted claim “each accused apparatus, product,  
15 device, process, method, act, or other instrumentality (‘Accused Instrumentality’) of each opposing  
16 party of which the party is aware.” Patent L.R. 3-1(a), (b). The identification of each Accused  
17 Instrumentality should be “as specific as possible.” Patent L.R. 3-1(b). “Each product, device, and  
18 apparatus shall be identified by name or model number, if known. Each method or process shall be  
19 identified by name, if known, or by any product, device, or apparatus which, when used, allegedly  
20 results in the practice of the claimed method or process.” *Id.* In addition, a plaintiff must provide a  
21 “chart identifying specifically where each limitation of each asserted claim is found within each  
22 Accused Instrumentality, including for each limitation that such party contends is governed by 35  
23 U.S.C. § 112(6), the identity of the structure(s), act(s), or material(s) in the Accused Instrumentality  
24 that performs the claimed function.” Patent L.R. 3-1(c).

25           These rules do not “require the disclosure of specific evidence nor do they require a plaintiff  
26 to prove its infringement case.” *See DCG Sys. v. Checkpoint Tech., LLC*, No. C11–03729 PSG,  
27 2012 WL 1309161, at \*2 (N.D. Cal. Apr. 16, 2012) (internal quotation marks omitted). But to the  
28 extent appropriate information is reasonably available to it, a patentee must nevertheless disclose the

1 elements in each accused instrumentality that it contends practices each and every limitation of each  
2 asserted claim. *Cf. FusionArc, Inc.*, 2007 WL 1052900, at \*1.

3 Here, Plaintiff’s infringement contentions charts fail to satisfy Patent L.R. 3-1(c). First, the  
4 infringement contentions charts largely parrot the language of each claim limitation and frequently  
5 cite to over a hundred pages. For instance, for claim 16.D in Exhibit A-2, Plaintiff does not provide  
6 specifically where in the San Jose Project or brochures are “fan units configured to be ON and  
7 OFF.” Plaintiff recites the claim language and states that “[t]he control panel includes a motor  
8 circuit protector for each individual motor that, when tripped, turns the corresponding fan OFF.”  
9 Plaintiff then cites to approximately two hundred pages. Plaintiff does not sufficiently explain how  
10 a circuit breaker turns a fan on. Such contentions do not aid in identifying where each claim  
11 limitation is found within the accused instrumentality. *See Droplets, Inc. v. Amazon.com, Inc.*, No.  
12 C12-03733 HRL, 2013 WL 1563256, at \*3 (N.D. Cal. Apr. 12, 2013) (finding that where  
13 infringement contentions chart parroted the respective language of each claim limitation and  
14 included 14 identical screen shots, “[w]ithout the aid of labels or some other indication of how the  
15 screenshots connect to the limitations, the infringement contentions fail[ed] to provide the factual  
16 basis of the contentions”).

17 Second, the infringement contentions charts do not provide notice of Plaintiff’s theories of  
18 infringement as to Defendants’ customized air handling units. *See* FAC ¶¶ 13-15. Plaintiff’s  
19 infringement contentions only cite to a single “San Jose Project” and generally to Energy Lab’s  
20 Optiline Fan Arrays brochures. However, Plaintiff’s discovery requests define “Accused Products”  
21 as “all versions, past and present, of air handling units or fan assemblies that use or include fans in  
22 an array, including without limitation the Optiline Fan Arrays, that are used, sold, and/or offered to  
23 sell within the United States, and/or imported into the United States, by You.” The infringement  
24 contentions “must be sufficient to raise a ‘reasonable inference that all accused products infringe.’”  
25 *Shared Memory Graphics LLC v. Apple, Inc.*, 812 F. Supp. 2d 1022, 1025 (N.D. Cal. 2010) (quoting  
26 *Antonious v. Spalding & Evenflo Cos., Inc.*, 275 F.3d 1066, 1075 (Fed. Cir. 2002)).

27 In regards to claims asserted under the doctrine of equivalents, Defendants argue that the  
28 infringement contentions contain no allegations other than boilerplate assertions of the doctrine of

1 equivalents. Plaintiff, however, asserts that this issue was resolved in the meet-and-confer process.  
2 According to Plaintiff, Plaintiff told Defendants that its infringement contentions assert literal  
3 infringement and that, should it become necessary to address the doctrine of equivalents (e.g., based  
4 on Defendants' future claim construction positions and/or the Court's claim constructions), Plaintiff  
5 would follow the proper procedures to amend. This resolution that the parties reached during the  
6 meet-and-confer process is sufficient. The Court declines to reach this issue.

7 Accordingly, the Court orders Plaintiff to supplement its infringement contentions to be in  
8 compliance with Patent L.R. 3-1 by **March 13, 2015**. In regards to Defendants' request that the  
9 Court modify the deadline for serving invalidity contentions, this issue will be addressed when the  
10 Court rules on Plaintiff's motion to enforce the Court's scheduling order, which is set for hearing on  
11 March 10, 2015.

12 **IT IS SO ORDERED.**

13 Dated: February 27, 2015
