3 **UNITED STATES DISTRICT COURT**  
4 **NORTHERN DISTRICT OF CALIFORNIA**  
5 **SAN JOSE DIVISION**

6  
7 **WSOU INVESTMENTS LLC,**

8 **Plaintiff,**

9 **v.**

10 **JUNIPER NETWORKS INC,**

11 **Defendant.**

Case No. 21-cv-07557-BLF  
21-cv-07558-BLF  
21-cv-07560-BLF  
21-cv-07561-BLF  
21-cv-07562-BLF

12  
13 **ORDER GRANTING DEFENDANT'S**  
14 **MOTION TO STAY**

15 In these related patent infringement actions, Plaintiff WSOU Investments LLC d/b/a Brazos  
16 Licensing and Development (“Brazos”) asserts that Defendant Juniper Networks Inc. (“Juniper”)  
17 infringes U.S. Patent Nos. 7,483,998 (“the ’998 Patent”); 7,518,990 (“the ’990 Patent”); 7,596,140  
18 (“the ’140 Patent”); 7,620,273 (“the ’273 Patent”); and 8,284,656 (“the ’656 Patent”) (collectively,  
19 the “Asserted Patents”). Before the Court is Juniper’s motion to stay all cases pending *inter partes*  
20 review (“IPR”) of the ’140, ’656, and ’998 Patents and *ex parte* reexamination of the ’273 Patent  
21 (collectively, the “Challenged Patents”). All asserted claims of these four patents are under post-  
22 grant review, and the other Asserted Patent—the ’990 Patent—is not under post-grant review.  
23 Pursuant to Civil Local Rule 7-1(b), the Court finds the instant motion suitable for decision without  
24 oral argument and hereby VACATES the hearing set for April 14, 2022.

25 Based on the below reasoning, the Court GRANTS Juniper’s motion.

26 **I. BACKGROUND**

27 **A. Factual Background**

28 Brazos is a Delaware corporation with its principal place of business in Texas. Complaint,

1 ECF No. 57 ¶ 2. Brazos further alleges that Juniper has a “regular and established place of business”  
 2 in Texas. *Id.* ¶ 3. Juniper designs, develops, and sells computer networking hardware and software.  
 3 *Id.* ¶ 10. Brazos is a non-practicing entity that does not make or sell products or compete with  
 4 Juniper. Motion, ECF No. 117 at 9.<sup>1</sup>

5 The five Asserted Patents are unrelated patents pertaining to computer networking  
 6 technology. ’998 Patent, Abstract; ’990 Patent, Abstract; ’140 Patent, Abstract; ’273 Patent,  
 7 Abstract; ’656 Patent, Abstract. Brazos is asserting these patents against Juniper networking  
 8 hardware and software products. *See* Declaration of Todd M. Briggs (“Briggs Decl.”),  
 9 ECF No. 117-2, Ex. A, Brazos’s Disclosure of Asserted Claims and Infringement Contentions  
 10 (“Brazos Infringement Contentions”) at 3–4.

#### 11 **B. Procedural History**

12 In September 2020, Brazos filed six separate patent infringement cases against Juniper in  
 13 the Western District of Texas, each asserting one patent: U.S. Patent No. 7,382,781 (“the ’781  
 14 Patent”) in 6:20–cv–00812; the ’998 Patent in 6:20–cv–00813; the ’990 Patent in 6:20–cv–00814;  
 15 the ’140 Patent in 6:20–cv–00815; the ’273 Patent in 6:20–cv–00902; and the ’656 Patent in  
 16 6:20–cv–00903. The cases were assigned to Judge Albright. The parties engaged in fact discovery,  
 17 exchanged infringement and invalidity contentions, and completed briefing for claim construction  
 18 and a motion to dismiss Brazos’s indirect infringement claims filed by Juniper. *See* ECF Nos. 40,  
 19 43, 53, 60, 69, 76, 78. On June 24, 2021, Judge Albright issued a claim construction order for the  
 20 six cases. *See* ECF No. 87. On August 21, 2021, Brazos indicated that it was asserting the following  
 21 claims of the Asserted Patents (collectively, “the Asserted Claims”): claims 1, 2, 7, 9, and 18 of the  
 22 ’781 Patent; claims 17-19, 21 and 22-23 of the ’998 Patent; claims 1-4, 6-9, 17, and 18 of the ’990  
 23 Patent; claims 1-6, 13, 15-19, 21-24, 31, and 33-38 of the ’140 Patent; claims 1-3 of the ’273 Patent;  
 24 and claims 1, 2, and 7-10 of the ’656 Patent. *See* Brazos Infringement Contentions at 2. On  
 25 August 30, 2021, the parties stipulated to dismissal of the case involving the ’781 Patent. *See*  
 26 6:20–cv–00812, ECF No. 94.

---

27  
 28 <sup>1</sup> All docket numbers pertain to the 5:21–cv–07557 case unless otherwise noted.

1 On September 27, 2021, the court transferred the five remaining cases to the Northern  
2 District of California pursuant to a mandamus order from the Federal Circuit. *See In re: Juniper*  
3 *Networks, Inc.*, 14 F.4th 1313 (Fed. Cir. 2021); 5:21-cv-07557, ECF No. 95; 5:21-cv-07558, ECF  
4 No. 89; 5:21-cv-07560, ECF No. 97; 5:21-cv-07561, ECF No. 92; 5:21-cv-07562, ECF No. 94.  
5 On October 20, 2021, this Court related the cases following a joint administrative motion by the  
6 parties requesting a case relation order. *See* Related Case Order, ECF No. 104; Joint Administrative  
7 Motion to Consider Whether Cases Should Be Related Pursuant to Civil Local Rule 3-12, ECF No.  
8 103. The Court further terminated all currently pending motions without prejudice to refile in this  
9 Court. *See* Related Case Order, ECF No. 104. On October 28, 2021, Juniper filed a renewed motion  
10 to dismiss Brazos's indirect infringement claims, which the parties have fully briefed and which is  
11 set for hearing on March 3, 2022. *See* ECF Nos. 106, 113, 116. An Initial Case Management  
12 Conference is also set for March 3, 2022. *See* ECF No. 109.

13 On February 12, 2021, Juniper filed an IPR petition challenging the validity of claims 1-7,  
14 13, 15-19, 21-25, 31, and 33-38 of the '140 Patent, including all '140 Patent claims Brazos is  
15 asserting here. *See* Brazos Infringement Contentions at 2; Motion, ECF No. 117 at 2. The PTAB  
16 instituted IPR of the challenged '140 Patent claims on August 18, 2021, and a final written decision  
17 is expected by August 18, 2022. *See* Briggs Decl., Ex. C at 17; Motion, ECF No. 117 at 3. On April  
18 5, 2021, Juniper filed petitions for IPR challenging claims 1-2, 7-13, and 15 of the '656 Patent and  
19 17-19, 21-23, and 25-26 of the '998 Patent, including all claims asserted in these cases. *See* Brazos  
20 Infringement Contentions at 2; Motion, ECF No. 117 at 2. The PTAB instituted IPR of the  
21 challenged '656 and '998 Patent claims on November 22, 2021, and a final written decision is  
22 expected by November 22, 2022. *See* Briggs Decl., Exs. G, H; Motion, ECF No. 117 at 3. Further,  
23 on September 9, 2021, Juniper filed a request for *ex parte* reexamination of claims 1-3 of the '273  
24 Patent, which are the only '273 Patent claims Brazos is asserting. *See* Brazos Infringement  
25 Contentions at 2; Motion, ECF No. 117 at 2. The USPTO ordered reexamination on October 12,  
26 2021. *See* Briggs Decl., Ex. D. Accordingly, the asserted claims of four out of the five Asserted  
27 Patents—all except for the '990 Patent—are now under post-grant review—a total of 38 out of 48  
28 asserted claims. *See* Motion, ECF No. 117 at 3.

1 On December 2, 2021, Juniper filed a Motion to stay all five cases pending the post-grant  
2 review proceedings. *See* Motion, ECF No. 117. On December 16, 2021, Brazos filed an Opposition.  
3 *See* Opposition, ECF No. 118. On December 23, 2021, Juniper filed a Reply. *See* Reply,  
4 ECF No. 119. The Court set a hearing on the Motion for April 22, 2022, which is hereby vacated.

## 5 **II. LEGAL STANDARD**

6 A district court has inherent power to manage its own docket and stay proceedings,  
7 “including the authority to order a stay pending conclusion of a PTO reexamination.” *Ethicon, Inc.*  
8 *v. Quigg*, 849 F.2d 1422, 1427 (Fed. Cir. 1988) (citation omitted). A court is under no obligation  
9 to stay proceedings pending parallel litigation in the PTAB. *See Aylus Networks, Inc. v. Apple, Inc.*,  
10 No. C–13–4700 EMC, 2014 WL 5809053, at \*1 (N.D. Cal. Nov. 6, 2014) (citations omitted). The  
11 factors that courts in this District consider when determining whether to stay litigation are:  
12 “(1) whether discovery is complete and whether a trial date has been set; (2) whether a stay will  
13 simplify the issues in question and trial of the case; and (3) whether a stay would unduly prejudice  
14 or present a clear tactical disadvantage to the nonmoving party.” *PersonalWeb Techs., LLC v.*  
15 *Apple, Inc.*, 69 F.Supp.3d 1022, 1025 (N.D. Cal. 2014) (quoting *Telemac Corp. v. Teledigital, Inc.*,  
16 450 F.Supp.2d 1107, 1111 (N.D.Cal.2006)).

## 17 **III. DISCUSSION**

### 18 **A. Stage of the Litigation**

19 First, the Court considers whether the cases have progressed significantly enough for a stay  
20 to be disfavored. *PersonalWeb*, 69 F.Supp.3d at 1025. Juniper argues that the case is in its early  
21 stages, because (1) no fact discovery deadline has been set by this Court, and only limited fact  
22 discovery has taken place, including no exchanges under this District’s Patent Local Rules, no fact  
23 depositions, and incomplete document production; (2) while Judge Albright issued a claim  
24 construction order prior to the transfer, further claim construction may be necessary given the  
25 parties’ positions in the IPRs and further exchanges pursuant to this District’s Patent Local Rules;  
26 (3) motions to dismiss are pending; (4) no trial date has been set; (5) summary judgment is far in  
27 the distance; and (6) the PTAB is likely to issue final written decisions only eight months after the  
28 scheduled Initial Case Management Conference on March 3, 2022. *See* Motion, ECF No. 117

1 at 4–5. In response, Brazos argues that the stage of the case strongly disfavors a stay, because (1)  
2 the parties engaged in substantial fact discovery and other work prior to the transfer, including initial  
3 and final infringement and invalidity contentions; claim construction exchanges, briefing, and oral  
4 argument; source code review by expert consultants; document production; substantial written  
5 discovery; and briefing of motions to dismiss, and (2) claim construction has taken place, and Judge  
6 Albright’s constructions are owed deference, particularly where Juniper has not introduced new and  
7 material evidence indicating that further claim construction is warranted. *See* Opposition, ECF No.  
8 118 at 3–7.

9 The parties disagree on whether Judge Albright issuing a claim construction order prior to  
10 the transfer disfavors a stay. Juniper argues that further claim construction may be necessary given  
11 the parties’ positions in the IPRs and any exchanges pursuant to this District’s Patent Local Rules.  
12 *See* Motion, ECF No. 117 at 5. For example, Juniper points to positions Brazos has taken in the  
13 IPRs already that it argues are inconsistent with its positions here. *See* Reply, ECF No. 119 at 2  
14 (citing Briggs Decl., Ex. L). In response, Brazos argues that courts are generally “deferential” to  
15 other courts’ claim construction orders and “loathe” to revisit transferor courts’ decisions. *See*  
16 Opposition, ECF No. 118 at 5 (citing *Snyders Heart Valve LLC v. St. Judge Med.*, No. 18-2030  
17 (JRT/DTS), 2020 WL 1445835, at \*4 (D. Minn. Mar. 25, 2020)). Further, Brazos argues that  
18 Juniper has failed to specifically identify how (1) the IPRs or (2) this District’s Patent Local Rules  
19 exchange requirements could warrant further claim construction. *See id.* at 5–6.

20 The Court finds Judge Albright’s claim construction order weighs against a stay. The claim  
21 construction order indicates that the case is not in its early stages and most of the effort  
22 accompanying claim construction on the part of the parties and the Court has already been expended.  
23 Juniper does not identify any specific claim construction disputes resulting from the IPRs except  
24 through improper reply evidence, which the Court declines to consider. *See* Briggs Decl., Ex. L;  
25 *Provenz v. Miller*, 102 F.3d 1478, 1483 (9th Cir. 1996). While the Court takes no position at this  
26 stage on whether further claim construction will be necessary in these cases, it considers the fact  
27 that a claim construction order has been issued to weigh against a stay, regardless of whether further  
28 claim construction is necessary. *See, e.g., Int’l Test Sols., Inc. v. Mipox Int’l Corp.*,

1 No. 16–cv–00791–RS, 2017 WL 1316549, at \*2 (N.D. Cal. Apr. 10, 2017). However, given the  
2 unique procedural position of these cases—Judge Albright has issued a claim construction order,  
3 but this Court has not had a chance to consider claim construction issues and the parties have not  
4 made exchanges pursuant to this District’s Patent Local Rules—the Court finds that Judge  
5 Albright’s claim construction order does not weigh heavily against a stay.

6 The parties further disagree on whether the extent of discovery that has taken place thus far  
7 supports or disfavors a stay. Juniper argues that discovery is in its early stages, given that  
8 (1) discovery was only open three and a half months prior to the transfer, during which limited  
9 discovery took place; (2) neither party has taken fact depositions, except for two related to the  
10 transfer; (3) no fact discovery deadline has been set; (4) the parties are treating fact discovery as  
11 suspended until the March 3, 2022 Initial Case Management Conference; and (5) expert discovery  
12 has not opened. *See* Motion, ECF No. 117 at 5. Brazos points to the fact that (1) the parties have  
13 exchanged initial and final invalidity and infringement contentions; (2) the parties have engaged in  
14 claim construction discovery; (3) Juniper has responded to 11-13 interrogatories and 23 requests for  
15 production and Brazos has responded to 12 interrogatories and 47 requests for production;  
16 (4) Brazos’s experts have spent 10 days reviewing Juniper’s source code; and (5) around 2,000  
17 documents have been produced, including documents from six third parties. *See* Opposition,  
18 ECF No. 118 at 4.

19 On balance, the Court finds that the extent of discovery that has taken place favors a stay.  
20 While the parties have completed a substantial amount of work meeting their discovery obligations  
21 thus far, this pales in comparison to the amount of work that has yet to take place, particularly with  
22 only around 2,000 documents produced, only around half of the parties’ interrogatories propounded  
23 pursuant to Federal Rule of Civil Procedure 33, no fact depositions having taken place, no fact  
24 discovery deadline set, and the entirety of expert discovery on the horizon. *See PersonalWeb Techs.,*  
25 *LLC v. Facebook, Inc.*, No. 5:13–CV–01356–EJD, 2014 WL 116340, at \*4 (finding the stage of  
26 litigation favors a stay where “the parties have yet to engage in the significant and costly work of  
27 conducting expert discovery and preparing summary judgment motions”); *Evolutionary*  
28 *Intelligence, LLC v. Apple, Inc.*, No. C 13-04201 WHA, 2014 WL 93954, at \*2 (finding the stage

1 of litigation favors a stay where “[n]o depositions have been taken and expert reports have not been  
2 exchanged”). Accordingly, balancing the significant amount of discovery that has taken place  
3 against the even more substantial amount of discovery that has yet to take place, the Court finds that  
4 the status of discovery weighs slightly in favor of a stay.

5 Juniper also cites the lack of a trial date and the fact that summary judgment lies ahead in  
6 support of a stay. Motion, ECF No. 117 at 4–5. The Court notes that these considerations weigh  
7 further in favor a stay, particularly when the Court is currently scheduling trials for the latter half of  
8 2024. *See VirtualAgility Inc. v. Salesforce.com, Inc.*, 759 F.3d 1307, 1317 (Fed. Cir. 2014).

9 On balance, with a prior claim construction order weighing slightly against a stay and the  
10 status of discovery and the lack of trial or summary judgment dates weighing in favor of a stay, the  
11 Court finds that the stage of litigation factor favors granting Juniper’s stay request. *See*  
12 *PersonalWeb*, 2014 WL 116340, at \*3 (stage of litigation favors a stay where “a claim construction  
13 order has been issued” but “a substantial portion of the work—expert discovery, summary judgment,  
14 pre-trial preparation, and trial itself—lies ahead”); *Cypress Semiconductor Corp. v. LG Elecs., Inc.*,  
15 No. 13–cv–04034–SBA, 2014 WL 5477795, at \*2 (N.D. Cal. Oct. 29, 2014) (stage of litigation  
16 favors a stay following claim construction briefing where “[t]here has been no dispositive motion  
17 practice, the claims have not been construed, and no deadlines for completing discovery, motion  
18 practice or trial have been set”).

### 19 **B. Simplification of Issues**

20 The second factor courts consider in assessing whether a stay is appropriate is “whether a  
21 stay will simplify the issues in question and trial of the case[.]” *PersonalWeb*, 69 F.Supp.3d at 1025.  
22 Juniper argues that a stay will simplify the issues in these cases because the vast majority of the  
23 Asserted Claims—38 out of 48—and four out of the five Asserted Patents are under post-grant  
24 review, which will either lead to invalidated claims or Juniper being estopped from raising certain  
25 invalidity defenses before this Court. *See* Motion, ECF No. 117 at 5–7. Further, Juniper argues that  
26 the one patent not under review—the ’990 Patent—is asserted against only one of Juniper’s  
27 products. *See id.* at 6. In response, Brazos argues that a stay would do nothing to simplify the case  
28 involving the ’990 Patent because that patent is not under review, so at a minimum the Court should

1 not stay that case. *See* Opposition, ECF No. 118 at 7–8. For the other patents, Brazos argues that  
2 the efforts that the parties have already expended and the fact that “numerous issues” will remain to  
3 address before trial show that little simplification would result from a stay. *See id.* at 8. On reply,  
4 Juniper argues that staying the related cases together favors judicial economy, and there are legal  
5 issues like standing and ownership that are likely common to all asserted patents. *See* Reply, ECF  
6 No. 119 at 3–4. Juniper points to the parties’ joint motion in support of relating the cases, where  
7 the parties indicated that if the cases were not related, it would lead to “an unduly burdensome  
8 duplication of labor and expense for both the parties and the Court.” *Id.* at 3 (citing Joint  
9 Administrative Motion to Consider Whether Cases Should Be Related, ECF No. 103 at 2–3).  
10 Further, Juniper argues that even if issues would remain to resolve following a stay, a stay could  
11 eliminate some of those issues. *Id.* at 4.

12       Regarding the Challenged Patents, the Court agrees with Juniper. All the asserted claims of  
13 the Challenged Patents are under post-grant review, so there is a good likelihood that simplification  
14 will occur based on the invalidation of at least some of the asserted claims. *See* Motion, ECF No.  
15 117 at 6–7 (citing recent PTAB invalidation statistics). Further, even if the PTAB does not  
16 invalidate some or any of the asserted claims, Juniper will be estopped from raising certain invalidity  
17 grounds as to those claims under 35 U.S.C. § 315(e)(2). *See id.* at 7. And regardless of the outcome  
18 of the post-grant proceedings, this Court will benefit from the PTAB’s consideration of the claims,  
19 as well as the parties’ additional briefing. *See PersonalWeb*, 2014 WL 116340, at \*4 (finding  
20 simplification factor favors a stay where IPRs would “assist in streamlining the presentation of  
21 evidence and benefit the trier of fact by providing the expert opinion of the PTO”); *Evolutionary*  
22 *Intelligence*, 2014 WL 93954, at \*3 (“[I]f no asserted claims are cancelled or modified, this action  
23 may nevertheless benefit from the PTAB’s findings.”). Brazos’s arguments that (1) much of the  
24 effort that could have been saved by a stay has already been expended and (2) many issues will  
25 remain to be addressed before trial regardless of a stay miss the mark. *See* Opposition, ECF No.  
26 118 at 8. Simplification from a stay is likely if not assured; work-intensive stages of litigation  
27 undisputedly remain that could benefit from simplification (*e.g.*, the entirety of expert discovery and  
28 trial); and the fact that issues will likely remain to be addressed following a stay does not prove

1 otherwise. Accordingly, the simplification factor strongly favors a stay as to the cases involving the  
2 Challenged Patents.

3           Regarding the '990 Patent, the Court agrees with Brazos that a stay will not lead to  
4 simplification as to this patent alone, because this patent is not under post-grant review. Further,  
5 Juniper does not argue that post-grant review of the other patents could lead to any simplification  
6 as to the '990 Patent. However, even where some patents are not under post-grant review, courts  
7 commonly find the simplification factor favors a complete stay of the case. *See, e.g., Dolby Labs,*  
8 *Inc. v. Intertrust Techs. Corp.*, No. 19–cv–03371–EMC, 2021 WL 5322695, at \*4 (N.D. Cal. Nov.  
9 16, 2021) (“[A] number of courts have stayed an entire case where PTO proceedings have been  
10 instituted only to some of the patents if the stay would eliminate duplicative discovery and avoid  
11 having to spend the ‘time and expense of educating a judge and jury twice on similar technology.’”) (citing *Murata Mach. USA, Inc. v. Daifuku Co.*, No. 2:13CV866 DAK, 2015 WL 5178456, at \*1  
12 (D. Utah Sept. 4, 2015), *aff’d in part Murata Mach. USA v. Daifuku Co., Ltd.*, 830 F.3d 1357  
13 (Fed. Cir. 2016)); *Sonics, Inc. v. Arteris, Inc.*, No. C 11–05311 SBA, 2013 WL 503091, at \*3 (N.D.  
14 Cal. Feb. 8, 2013) (“Given the stage of the litigation, the Court is not familiar with the technology  
15 at issue in this case. Thus, regardless of the outcome of the reexamination proceedings, the Court’s  
16 interest in simplifying the proceedings by waiting for the PTO to reexamine six of the seven patents-  
17 in-suit weighs in favor of granting a stay.”); *Evolutionary Intelligence, LLC v. LivingSocial, Inc.*,  
18 No. 13–cv–04205–WHO, 2014 WL 2735185, at \*3 (N.D. Cal. June 16, 2014) (“Litigating the . . .  
19 '682 patent now and the '536 patent following resolution of the IPR would be inefficient and may  
20 result in duplication of effort.”); *LELO, Inc. v. Standard Innovation (US) Corp.*, No. 13–cv–01393–  
21 JD, 2014 WL 2879851, at \*3 (N.D. Cal. June 24, 2014) (“The standard is simplification of the  
22 district court case, not complete elimination of it by the PTAB.”). Brazos points to the fact that the  
23 '990 Patent is asserted in a separate case from the others, but it has not adequately explained how  
24 this should impact the Court’s analysis for these related cases. Opposition, ECF No. 118 at 7.

25           Judicial economy principles favor a stay as to the '990 Patent. Moving the 21–cv–7561 case  
26 forward on a different schedule than the other related cases could lead to multiple rounds of expert  
27 discovery, multiple trials, and other potentially duplicative efforts by the parties and the Court, as  
28

1 the parties previously acknowledged. *See* Joint Administrative Motion to Consider Whether Cases  
2 Should Be Related, ECF No. 103 at 2–3 (agreeing that if the “cases were now handled separately . . .  
3 on different schedules, the parties would need to brief issues that may apply to all cases separately,  
4 resulting in an unduly burdensome duplication of labor and expense for both the parties and the  
5 Court”). The Court does not consider such a disaggregation of the proceedings warranted under the  
6 simplification factor, especially when Brazos is asserting the ’990 Patent against only one of  
7 Juniper’s products. *See* Brazos Infringement Contentions at 3. Further, Juniper points to common  
8 issues of ownership and standing between the cases, which further support keeping the cases on the  
9 same schedule. *See* Reply, ECF No. 119 at 3; *Method Elecs., Inc. v. Infineon Techs. Corp.*,  
10 No. C 99–21142 JW, 2000 WL 35357130, at \*3 (N.D. Cal. Aug. 7, 2000) (“Duplicative discovery  
11 may result if only the ’408 patent is stayed since there are likely to be common documents and  
12 witnesses regarding the infringement litigation of the ’408 and ’468 patents.”); *Finjan, Inc. v.*  
13 *FireEye, Inc.*, No. C13–03133, 2014 WL 2465267, at \*4 (N.D. Cal. June 2, 2014) (“When there are  
14 overlapping issues between the re-examined patents and other non-reexamined patents-in-suit,  
15 courts have found that staying the entire case is warranted.”). And the bottom line is that in all  
16 likelihood all of these cases will be tried together. Accordingly, the Court finds that the  
17 simplification factor somewhat favors a stay as to the 21–cv–7561 case.

18 Based on the above reasoning, the Court finds that the simplification factor strongly weighs  
19 in favor of a stay for the cases involving the Challenged Patents and somewhat favors a stay for the  
20 case involving the ’990 Patent.

### 21 C. Undue Prejudice

22 The third factor courts consider in assessing whether a stay is appropriate is “whether a stay  
23 would unduly prejudice or present a clear tactical disadvantage to the nonmoving party.”  
24 *PersonalWeb*, 69 F.Supp.3d at 1025. Courts typically consider four subfactors (the “*Uniloc*  
25 subfactors”): “(1) the timing of the petition for review; (2) the timing of the request for the stay; (3)  
26 the status of review proceedings; and (4) the relationship of the parties.” *Uniloc USA Inc. v. LG*  
27 *Elecs. U.S.A. Inc.*, No. 4:18–cv–06737, 2019 WL 1905161, at \*5 (N.D. Cal. Apr. 29, 2019).

28 As a threshold matter, the Court considers Brazos’s argument that since the ’990 Patent is

1 not under post-grant review, the Court cannot appropriately weigh the *Uniloc* subfactors for the  
2 21-cv-7561 case involving the '990 Patent. Opposition, ECF No. 118 at 9. As discussed above,  
3 the Court finds it appropriate to consider a stay for the 21-cv-7561 case in the context of all five  
4 related patent cases, particularly given the potential for overlapping issues and duplicative efforts  
5 the parties previously identified. *See* Joint Administrative Motion to Consider Whether Cases  
6 Should Be Related, ECF No. 103 at 2–3 (agreeing that if the “cases were now handled separately .  
7 . . on different schedules, the parties would need to brief issues that may apply to all cases separately,  
8 resulting in an unduly burdensome duplication of labor and expense for both the parties and the  
9 Court”). Accordingly, the Court considers the below analysis regarding the “undue prejudice” factor  
10 to apply to the 21-cv-7561 case as well as the cases involving the Challenged Patents. However,  
11 even if the Court were to consider the *Uniloc* subfactors inapplicable to the 21-cv-7561 case, the  
12 undue prejudice factor would be neutral for the 21-cv-7561 case, since as a non-practicing entity  
13 seeking monetary damages, Brazos has not demonstrated any prejudice here other than a delay in  
14 asserting its rights. *PersonalWeb*, 69 F.Supp.3d at 1029.

### 15 **1. Timing of Petitions**

16 Under the first subfactor, the Court considers whether the timing of Juniper’s petitions for  
17 post-grant review indicates that a stay would unduly prejudice Brazos. *Id.* Juniper argues that the  
18 timing of its IPR and *ex parte* reexamination petitions favors a stay because it filed all its IPR  
19 petitions within seven months of being served with the complaints—several months ahead of the  
20 one-year statutory deadline. *See* Motion, ECF No. 117 at 7–8; 35 U.S.C. § 315(b). In response,  
21 Brazos argues that Juniper engaged in dilatory tactics in filing its petitions, waiting six months to  
22 file its first petition, another two months to file its second and third petitions, and another five  
23 months—a year total—to file its request for *ex parte* reexamination. *See* Opposition, ECF No. 118  
24 at 9. On reply, Juniper argues that courts have held that waiting until service of infringement  
25 contentions before filing petitions for review does not cause undue prejudice, and Juniper filed its  
26 post-grant review petitions after service of Brazos’s initial infringement contentions on December  
27 21, 2020 and final contentions on August 19, 2021. *See* Reply, ECF No. 119 at 4–5.

28 The Court agrees with Juniper that this subfactor supports a lack of undue prejudice to

1 Brazos. Juniper filed its IPR petitions long before the one-year statutory deadline, and it filed its  
2 *ex parte* reexamination petition within the first year of litigation even without a one-year statutory  
3 deadline for reexamination requests. *See* 35 U.S.C. § 315(b); 35 U.S.C. § 302. The timing of  
4 Brazos’s infringement contentions further bolsters Juniper’s diligence in filing its post-grant review  
5 petitions. *See Cypress Semiconductor Corp. v. GSI Tech., Inc.*, No. 13–cv–02013–JST,  
6 2014 WL 5021100, at \*4 (N.D. Cal. Oct. 7, 2014). In its Opposition, Brazos merely recites the  
7 number of months it took Juniper to file its various petitions for post-grant review, without  
8 explaining how this shows Juniper was anything less than diligent or that Juniper “engaged in  
9 dilatory tactics.” *See* Opposition, ECF No. 118 at 9; *KLA-Tencor Corp. v. Nanometrics, Inc.*, No.  
10 C 05-3116 JSW, 2006 WL 708661, at \*3 (N.D. Cal. Mar. 16, 2006) (finding no evidence of dilatory  
11 tactics given that “[t]his is not a case where reexamination is sought on the eve of trial or after  
12 protracted discovery”). Accordingly, the Court finds that the timing of Juniper’s petitions favors a  
13 finding that a stay would not unduly prejudice Brazos.

## 14 2. Timing of Request for Stay

15 Under the second subfactor, the Court considers whether the timing of Juniper’s stay motion  
16 indicates prejudice to Brazos. *Uniloc*, 2019 WL 1905161, at \*5. Juniper argues that the timing of  
17 its stay motion supports a lack of prejudice to Brazos, because it filed its stay motion on  
18 December 2, 2021, less than two weeks after the PTAB instituted IPR on its last two petitions—for  
19 the ’656 and ’998 Patents—on November 22, 2021. *See* Motion, ECF No. 117 at 8. Juniper further  
20 argues that while IPR had previously been instituted on the ’140 Patent on August 18, 2021, and *ex*  
21 *parte* reexamination had been instituted on the ’273 Patent on October 12, 2021, fewer than half of  
22 the asserted claims were subject to post-grant review based on those two petitions, so a stay would  
23 have been less clearly warranted. *See id.* at 8. In response, Brazos argues that since it is asserting  
24 each patent in a separate litigation, Juniper should have moved to stay the ’140 and ’273 Patent  
25 cases immediately after post-grant review of those patents was instituted. *See* Opposition,  
26 ECF No. 118 at 10. Brazos argues that by not seeking to stay these cases earlier, Juniper prejudiced  
27 Brazos by requiring it to continue to expend resources on these cases, including by filing motions  
28 to dismiss Brazos’s indirect infringement claims. *See id.* On reply, Juniper points to language in

1 the parties' joint motion requesting a case relation order citing the parties' practice of filing motions  
2 and pleadings as a single document that applies to all pending cases. Reply, ECF No. 119 at 5.

3 The Court agrees with Juniper. Waiting until post-grant review had been instituted on a  
4 majority of Asserted Claims was reasonable, not dilatory. *See DiCon Fiberoptics, Inc. v. Precisely*  
5 *Microtechnology Corp.*, No. 15-cv-01362-BLF, 2015 WL 12859346, at \*2 (N.D. Cal. Oct. 13,  
6 2015); *see also Wireless Recognition Techs. v. A9.com Inc.*, 5:12-CV-01217-EJD, 2012 WL  
7 4005459, at \*4 (N.D. Cal. Sep. 11, 2012) (defendants' actions were "reasonable and not dilatory"  
8 where they waited to file request for a stay "only after a likelihood that [the patent-in-suit] would be  
9 found invalid"). Brazos points to the fact that the patents here are asserted in separate cases. But  
10 the Court does not see how this changes the calculus for the appropriate timing of Juniper's stay  
11 motion for these related cases.

12 Further, Brazos's contention that it was prejudiced by Juniper's motions to dismiss is  
13 unconvincing. *See* Opposition, ECF No. 118 at 10. Brazos acknowledges that these were renewed  
14 motions to dismiss following Juniper's original filing of its motions on May 26, 2021, which were  
15 terminated without prejudice when the cases were transferred to this Court. *Id.* at 3-4. Further,  
16 since Juniper filed its motions to dismiss as a single document applicable to each case, Brazos would  
17 have likely expended a similar amount of effort responding to Juniper's motions regardless of  
18 whether the '140 and '273 cases were stayed. *See generally* Brazos's Opposition to Juniper's  
19 Motion to Dismiss, ECF No. 113 (addressing all asserted patents in parallel). And the Court finds  
20 it difficult to place much weight on Brazos's complaints about expending resources when Brazos  
21 also seeks to fault Juniper for not filing separate stay motions in each case, which would have likely  
22 involved significantly more effort for the parties and the Court than a single stay motion that applies  
23 to all five cases. *See* Opposition, ECF No. 118 at 10. Accordingly, the Court is not convinced by  
24 Brazos's attempts to characterize Juniper's facially diligent efforts as prejudicial.

25 Based on the above reasoning, the Court finds that this subfactor favors a finding that Brazos  
26 would not be unduly prejudiced by a stay.

### 27 **3. Status of Review Proceedings**

28 Under the third subfactor, the Court considers whether the status of Juniper's post-grant

1 review proceedings indicates that a stay would prejudice Brazos. *Uniloc*, 2019 WL 1905161, at \*5.  
2 Juniper argues that this subfactor weighs against a finding of prejudice, because the PTAB is  
3 expected to issue final written decisions by November 2022, which is only eight months after the  
4 Initial Case Management Conference scheduled for March 3, 2022 and long before any trial is likely  
5 to take place. *See* Motion, ECF No. 117 at 8–9. In response, Brazos argues that the stay could  
6 extend longer than November 2022, because it is not possible to predict when *ex parte*  
7 reexamination of the '273 Patent will be completed. *See* Opposition, ECF No. 118 at 10. Further,  
8 Brazos argues that it would be prejudiced if it is not able to pursue its '990 Patent claims during the  
9 stay, because the '990 Patent is not under post-grant review. *See id.*

10 The Court agrees with Juniper. Given that the Initial Case Management Conference is not  
11 until March 3, 2022 and the Court is currently scheduling trials for the latter half of 2024, a stay that  
12 lasts until November 2022 would only constitute a modest delay in the progress of these cases.  
13 While the stay may last longer than November 2022 given that the duration of the *ex parte*  
14 reexamination of the '273 Patent is difficult to predict, the Court agrees with other courts that have  
15 found the “delay inherent in the reexamination process does not constitute, by itself, undue  
16 prejudice.” *PersonalWeb*, 69 F.Supp.3d at 1029. Further, regarding Brazos’s argument for the  
17 21–cv–7561 case involving the '990 Patent, the Court has already addressed this above.

18 Accordingly, the Court finds that the status of review proceedings weighs against a finding  
19 of undue prejudice.

#### 20 **4. Relationship of the Parties**

21 Under the fourth subfactor, the Court considers whether the relationship between the parties  
22 indicates that a stay would prejudice Brazos. *Uniloc*, 2019 WL 1905161, at \*5. Juniper argues that  
23 the relationship of the parties favors a stay because Brazos is a non-practicing entity and does not  
24 compete with Juniper, so monetary damages would adequately compensate Brazos and a stay would  
25 only delay realization of those damages. *See* Motion, ECF No. 117 at 9. In support of its argument,  
26 Juniper cites Brazos’s failure to seek a preliminary injunction. *See id.* Brazos fails to rebut Juniper’s  
27 arguments about the relationship between the parties. *See* Opposition, ECF No. 118 at 8–10.

28 The Court agrees with Juniper. The fact that the parties are not competitors and that Brazos

1 failed to seek a preliminary injunction indicates that monetary damages would adequately  
2 compensate Brazos. *See, e.g., PersonalWeb*, 2014 WL 116340, at \*5 (“[C]onsidering the parties  
3 are not competitors, any harm from the temporary halt in enforcing Plaintiffs’ rights in the asserted  
4 patents can be addressed through a final damages award.”). Accordingly, the only potential  
5 prejudice at issue is a delay in obtaining monetary damages. Since delay alone is insufficient to  
6 show undue prejudice, this subfactor strongly supports that a stay would not unduly prejudice  
7 Brazos. *See Evolutionary Intelligence, LLC v. Sprint Nextel Corp.*, No. C-13-04513,  
8 2014 WL 4802426, at \*6 (N.D. Cal. Sep. 26, 2014) (finding non-practicing entity plaintiff will not  
9 suffer undue prejudice from a stay where it “can be fully restored to the *status quo ante* with  
10 monetary relief”); *Evolutionary Intelligence*, 2014 WL 93954, at \*3 (granting stay of non-practicing  
11 entity case).

12 \* \* \*

13 Since all of the subfactors weigh against a finding that Brazos would be unduly prejudiced  
14 by a stay, the Court finds that the undue prejudice factor strongly supports granting Juniper’s stay  
15 request.

#### 16 **D. Balancing of the Factors**

17 As outlined above, for the cases involving the ’998, ’273, ’656, and ’140 Patents, all three  
18 factors weigh in favor of staying the cases pending post-grant review. For the 21-cv-7561 case  
19 involving the ’990 Patent, the stage of litigation and simplification factors somewhat favor a stay,  
20 while the undue prejudice factor is either neutral or in favor of a stay. Accordingly, the Court finds  
21 that on balance, the factors support a stay as to all five of Brazos’s related cases against Juniper.

#### 22 **IV. ORDER**

23 For the foregoing reasons, as to the 21-cv-07557, 21-cv-07558, 21-cv-07560, 21-cv-07561,  
24 and 21-cv-07562 cases, IT IS HEREBY ORDERED that:

- 25 • Juniper’s motion to stay pending post-grant review of the ’998, ’273, ’656, and ’140  
26 Patents is hereby GRANTED;
- 27 • the cases are hereby STAYED during the pendency of *inter partes* review  
28 proceedings as to the ’998, ’656, and ’140 Patents and the *ex parte* reexamination

1  
2  
3
