4 **UNITED STATES DISTRICT COURT**  
5 **NORTHERN DISTRICT OF CALIFORNIA**  
6 **SAN JOSE DIVISION**

7  
8 NETCHOICE, LLC, d/b/a NetChoice

Case No. 22-cv-08861-BLF

9 Plaintiff,

10 v.

**ORDER GRANTING MOTION FOR  
PRELIMINARY INJUNCTION**

11 ROB BONTA, Attorney General of the State  
of California, in his official capacity,

[Re: ECF 29]

12 Defendant.

United States District Court  
Northern District of California

13  
14 This suit challenges the enforceability of the California Age-Appropriate Design Code Act  
15 (“the CAADCA” or “the Act”), which was recently enacted for the stated purpose of affording  
16 protections to children when they access the internet. *See* Cal. Civ. Code § 1798.99.29.<sup>1</sup> The Act  
17 applies to for-profit businesses that collect consumers’ personal information and satisfy other  
18 criteria relating to business size and revenue. *See* CAADCA § 30; Cal. Civ. Code § 1798.140.  
19 Effective July 1, 2024, the Act imposes a number of requirements on any covered business that  
20 “provides an online service, product, or feature likely to be accessed by children.” CAADCA §  
21 31.

22 Plaintiff NetChoice, LLC (“NetChoice”) “is a national trade association of online  
23 businesses that share the goal of promoting free speech and free enterprise on the Internet.”  
24 Compl. ¶ 5, ECF 1. NetChoice’s members include Google, Amazon, Meta, TikTok and many  
25 other companies with strong online presences. NetChoice sues Defendant Rob Bonta, Attorney  
26

27  
28 <sup>1</sup> The CAADCA is codified at California Civil Code §§ 1798.99.28–1798.99.40. When citing to  
the Act, the Court will cite to the statute’s abbreviated title and last two digits. For example, the  
Court will cite to Cal. Civil Code § 1798.99.31 as “CAADCA § 31.”

1 General of the State of California (“the State”), for declaratory and injunctive relief related to the  
2 CAADCA, which it asserts is both facially unconstitutional and preempted by federal statute.

3 NetChoice moves for preliminary injunction based on its claims that the CAADCA  
4 violates the First Amendment and the dormant Commerce Clause of the United States  
5 Constitution, and is preempted by both the Children’s Online Privacy Protection Act (“COPPA”),  
6 15 U.S.C. §§ 6501–6506, and Section 230 of the Communications Decency Act, 47 U.S.C. § 230.  
7 *See Mot.*, ECF 29. The State opposes the motion, arguing that the CAADCA regulates conduct—  
8 the collection and use of children’s personal information—that does not implicate the First  
9 Amendment. *See Opp’n*, ECF 51. The State also contends that the CAADCA does not violate the  
10 dormant Commerce Clause and is not preempted by either COPPA or Section 230. *See id.*

11 Mindful that the CAADCA was enacted with the unanimous support of California’s  
12 Legislature and Governor, the Court has given careful consideration to the motion, the State’s  
13 opposition, NetChoice’s reply, the supplemental briefs filed by both parties, the briefs filed by  
14 seven sets of amici curiae, and the oral arguments presented at the hearing on July 27, 2023. The  
15 Court finds that although the stated purpose of the Act—protecting children when they are  
16 online—clearly is important, NetChoice has shown that it is likely to succeed on the merits of its  
17 argument that the provisions of the CAADCA intended to achieve that purpose do not pass  
18 constitutional muster. Specifically, the Court finds that the CAADCA likely violates the First  
19 Amendment. The motion for preliminary injunction is GRANTED on that basis.

## 20 **I. BACKGROUND**

21 The internet has become indispensable to the exchange of information. Many online  
22 providers allow users to view content and access services without creating an account, while  
23 others require the creation of a free account to access services, and still others require users to pay  
24 fees. *See Cairella Decl.* ¶¶ 4–8, ECF 22; *Masnack Decl.* ¶¶ 5–6, ECF 29; *Roin Decl.* ¶¶ 7–9, ECF  
25 25; *Paolucci Decl.* ¶ 2, ECF 28. Online providers generally rely on advertising to earn revenue  
26 that supports the content and services they offer. *See Cairella Decl.* ¶¶ 4, 21; *Roin Decl.* ¶ 10.  
27 Advertisements are targeted to users based on their interests, which are gleaned from data  
28 collected from the users while they are online. *See Egelman Decl.* ¶¶ 13–14, ECF 51-1. Such data

1 also is used by online providers to tailor content to individual users. *See* Cairella Decl. ¶ 8; Roin  
2 Decl. ¶¶ 2–6. In addition, online providers may sell user data to third parties. *See* Egelman Decl.  
3 ¶ 11.

4 Users can manage their online privacy by reading privacy policies before engaging with  
5 the provider’s services. *See* Egelman Decl. ¶ 24. Users also may change their privacy settings to  
6 block or delete “cookies,” which are data that websites store in consumers’ web browsers, which  
7 are then transmitted back to websites when visited again. *See id.* ¶ 29. However, privacy policies  
8 can be difficult to understand and privacy settings are not always user friendly. *See id.* ¶¶ 24–30.

9 These privacy concerns have become increasingly relevant to children, because their  
10 internet use has grown dramatically in recent years. *See* Radesky Decl. ¶¶ 21–25, ECF 51-5.  
11 During the COVID-19 pandemic, children’s access to digital technology and time online went up  
12 significantly. *See id.* ¶ 26. Children’s time online increased approximately 52% during the  
13 pandemic, and heavier technology use habits have persisted. *See id.* Children depend on the  
14 internet for both educational and entertainment purposes. *See id.* ¶¶ 26-29. Unplugging is not a  
15 viable option. *See id.* ¶ 29.

16 A federal child privacy law, COPPA, limits the ability of online providers to collect  
17 personal information from children. *See* 15 U.S.C.A. §§ 6501–06. COPPA makes it “unlawful  
18 for an operator of a website or online service directed to children, or any operator that has actual  
19 knowledge that it is collecting personal information from a child, to collect personal information  
20 from a child in a manner that violates the regulations prescribed” under the statute. 15 U.S.C. §  
21 6502(a)(1). “Child” is defined as an individual under the age of 13. 15 U.S.C. § 6501(1). The  
22 applicable regulations require the operator to obtain parental consent prior to any collection, use,  
23 or disclosure of personal information from children. *See* 16 C.F.R. § 312.3(b).

24 The California Consumer Privacy Act (“CCPA”) imposes limits on the collection of  
25 personal information from users generally, requiring among other things that online providers  
26 inform users of the categories of personal information to be collected and the purposes of such  
27 collection. *See* Cal. Civ. Code § 1798.100(a)(1). The CCPA defines “personal information” to  
28 include any information that “relates to, describes, is reasonably capable of being associated with,

1 or could reasonably be linked, directly or indirectly, with a particular consumer or household.”  
2 Cal. Civ. Code § 1798.140(v).

3 It is against this backdrop that the CAADCA was enacted. The CAADCA goes far beyond  
4 the scope of protections offered by COPPA and the CCPA. Whereas COPPA limits the collection  
5 of user data by operators of websites and services “directed to children,” 15 U.S.C. § 6502(a)(1),  
6 the CAADCA “declares that children should be afforded protections not only by online products  
7 and services specifically directed at them but by all online products and services they are likely to  
8 access,” CAADCA § 29. COPPA protects children under the age of 13, *see* 15 U.S.C. § 6501(1),  
9 while the CAADCA protects children under the age of 18, *see* CAADCA § 30(b)(1). COPPA  
10 gives parents authority to make decisions about use of their children’s personal information, *see*  
11 16 C.F.R. § 312.3(b), and the CCPA gives users authority to make decisions about their own  
12 personal information, *see* Cal. Civ. Code § 1798.135. In contrast, the CAADCA requires online  
13 providers to create a Data Protection Impact Assessment (“DPIA”) report identifying, for each  
14 offered online service, product, or feature likely to be accessed by children, any risk of material  
15 detriment to children arising from the provider’s data management practices. *See* CAADCA §  
16 30(a)(1). Providers must create a “timed plan to mitigate or eliminate” the risks identified in the  
17 DPIA “before the online service, product, or feature is accessed by children,” *id.* § 30(a)(2), and  
18 must provide the DPIA reports to the California Attorney General upon written request, *see id.* §  
19 30(a)(2). The CAADCA also requires that online providers comply with a list of enumerated  
20 mandates and prohibitions, discussed in detail below. *See id.* § 31(a)–(b).

21 Covered businesses must complete the required DPIA reports and satisfy related  
22 requirements by July 1, 2024, and continue to do so on an ongoing basis. *See* CAADCA §§ 31,  
23 33. The CAADCA authorizes the California Attorney General to bring a civil enforcement action  
24 against any business that fails to comply with the Act’s requirements. *See id.* § 35. Violators are  
25 subject to civil penalties of \$2,500 per child for each negligent violation and \$7,500 for each  
26 intentional violation. *See id.*

27 NetChoice filed this suit on December 14, 2022, challenging the CAADCA as facially  
28 unconstitutional and preempted by federal statute. The complaint asserts the following claims:

1 (1) violation of the First and Fourteenth Amendments to the U.S. Constitution, and Article I,  
 2 Section 2(a) of the California Constitution; (2) violation of the Fourth Amendment to the U.S.  
 3 Constitution; (3) void for vagueness under the First Amendment and Due Process Clause of the  
 4 U.S. Constitution, and Article I, Section 7(a) of the California Constitution; (4) violation of the  
 5 dormant Commerce Clause of the U.S. Constitution; (5) preemption by COPPA; and (6)  
 6 preemption by Section 230. Compl. ¶¶ 76–122. The complaint requests declaratory and  
 7 injunctive relief prohibiting enforcement of the CAADCA.

8 NetChoice now seeks a preliminary injunction enjoining enforcement of the CAADCA  
 9 pending disposition of the suit.

## 10 **II. LEGAL STANDARD**

11 “Courts consider four factors in deciding whether to grant a preliminary injunction: the  
 12 plaintiff’s likelihood of success on the merits; her likelihood of suffering irreparable harm in the  
 13 absence of preliminary relief; whether the balance of equities tips in her favor; and whether an  
 14 injunction is in the public interest.” *Garcia v. City of Los Angeles*, 11 F.4th 1113, 1118 (9th Cir.  
 15 2021) (citing *Winter v. Nat. Res. Def. Council, Inc.*, 555 U.S. 7, 20 (2008)).

16 In this circuit, “[l]ikelihood of success on the merits is the most important factor.”<sup>2</sup>  
 17 *Apartment Ass’n of L.A. Cnty., Inc. v. City of Los Angeles*, 10 F.4th 905, 912 (9th Cir. 2021)  
 18 (quoting *California v. Azar*, 911 F.3d 558, 575 (9th Cir. 2018)). “It is well-established that the  
 19 first factor is especially important when a plaintiff alleges a constitutional violation and injury.”  
 20 *Baird v. Bonta*, --- F.4th ---, 2023 WL 5763345, at \*3 (9th Cir. Sept. 7, 2023). “If a plaintiff in  
 21 such a case shows he is likely to prevail on the merits, that showing usually demonstrates he is  
 22 suffering irreparable harm no matter how brief the violation.” *Id.* Finally, “[w]hen, like here, the  
 23 nonmovant is the government, the last two *Winter* factors merge.” *Id.* at \*2 (quotation marks and  
 24 citation omitted).

25 \_\_\_\_\_  
 26 <sup>2</sup> Where the plaintiff cannot show a likelihood of success on the merits, “‘serious questions going  
 27 to the merits’ and a hardship balance that tips sharply toward the plaintiff can support issuance of  
 28 an injunction, assuming the other two elements of the *Winter* test are also met.” *All. for the Wild  
 Rockies v. Cottrell*, 632 F.3d 1127, 1132 (9th Cir. 2011). The Court need not apply this alternative  
 formulation of the *Winter* test here because, as discussed below, NetChoice makes a strong  
 showing on likelihood of success and on the other *Winter* factors.

1 **III. DISCUSSION**

2 **A. Likelihood of Success on the Merits**

3 NetChoice argues that it is likely to succeed on the merits of its claims that the Act violates  
4 free speech rights under the First Amendment (Claims 1 and 3), violates the dormant Commerce  
5 Clause (Claim 4), and is preempted by both COPPA (Claim 5) and Section 230 (Claim 6). *See*  
6 *Mot. 1; Compl. ¶¶ 76–122.*

7 **1. First Amendment (Claims 1 and 3)**

8 Claim 1 asserts that the CAADCA violates the First Amendment because it is an unlawful  
9 prior restraint on protected speech, is unconstitutionally overbroad, and regulates protected  
10 expression but fails strict scrutiny or any lesser standard of scrutiny that may apply. *See Compl.*  
11 *¶¶ 76–88.* Claim 3 asserts that the CAADCA is void for vagueness under the First Amendment.  
12 *See id. ¶¶ 93–103.* NetChoice argues that it is likely to succeed on its First Amendment claims  
13 because the CAADCA: (1) is an unlawful prior restraint; (2) is unconstitutionally overbroad; (3)  
14 is void for vagueness; and (4) is subject to and fails strict scrutiny. *Mot. 7–22.*

15 Before taking up these arguments, the Court notes that both parties appear to have accepted  
16 the relaxed standard for standing in a First Amendment facial challenge. That is, although the  
17 general rule of standing is that a party may not challenge a statute’s constitutionality “on the  
18 ground that it may conceivably be applied unconstitutionally to others,” *Broadrick v. Oklahoma*,  
19 413 U.S. 601, 610 (1973), a party making a First Amendment claim has standing to challenge the  
20 impact of a regulation on both “its own expressive activities, as well as those of others,” *S.O.C.*  
21 *Inc. v. County of Clark*, 152 F.3d 1136, 1142 (9th Cir. 1998). Accordingly, the parties have  
22 made—and the Court will consider—arguments about the CAADCA’s alleged impact on the  
23 expressive activities of individuals and entities who are not NetChoice members.

24 Turning to NetChoice’s four First Amendment arguments on likelihood of success, the  
25 Court first addresses the argument that the Act regulates protected expression and fails the  
26 applicable level of scrutiny. Because the argument is dispositive, the Court need not address  
27 NetChoice’s additional First Amendment arguments based on prior restraint, overbreadth, and  
28 vagueness.

**a. Legal Framework re Scrutiny for Regulations of Speech**

“The First Amendment generally prevents government from proscribing speech, [] or even expressive conduct, [] because of disapproval of the ideas expressed.” *R.A.V. v. City of St. Paul*, 505 U.S. 377, 382 (1992) (internal citations omitted). A law compelling speech is no less subject to First Amendment scrutiny than a law prohibiting speech. *Frudden v. Pilling*, 742 F.3d 1199, 1203 (9th Cir. 2014) (citing *W. Va. State Bd. Of Educ. v. Barnette*, 319 U.S. 624, 633–34 (1943)).

The threshold question in a free speech analysis is whether the challenged law invokes the First Amendment at all. *See Int’l Franchise Ass’n v. City of Seattle*, 803 F.3d 389, 408 (9th Cir. 2015). “All manner of speech—from ‘pictures, films, paintings, drawings, and engravings,’ to ‘oral utterance and the printed word’—qualify for the First Amendment’s protections; no less can hold true when it comes to speech . . . conveyed over the Internet.” *303 Creative LLC v. Elenis*, 600 U.S. —, 143 S. Ct. 2298, 2312 (2023) (citations omitted). That is, the First Amendment’s protections apply not only to written or verbal speech, but to any expressive conduct. *See, e.g., Ward v. Rock Against Racism*, 491 U.S. 781, 790 (1989) (“Music, as a form of expression and communication, is protected under the First Amendment.”). In determining whether a law regulates protected expression, courts evaluate “whether [activity] with a ‘significant expressive element’ drew the legal remedy or the ordinance has the inevitable effect of ‘singling out those engaged in expressive activity.’” *Int’l Franchise*, 803 F.3d at 408 (quoting *Arcara v. Cloud Books, Inc.*, 478 U.S. 697, 706–07 (1986)). For example, a tax on paper and ink that in effect “single[s] out the press for special treatment” regulates protected expression, although the application of a general sales tax to newspapers does not. *See Minneapolis Star & Tribune Co. v. Minn. Comm’r of Revenue*, 460 U.S. 575, 581–82 (1983). A regulation that restricts conduct without a “significant expressive element” is not subject to any level of First Amendment scrutiny. *See HomeAway.com, Inc. v. City of Santa Monica*, 918 F.3d 676, 684 (9th Cir. 2019); *see also Sorrell v. IMS Health Inc.*, 564 U.S. 552, 567 (2011) (“[T]he First Amendment does not prevent restrictions directed at commerce or conduct from imposing incidental burdens on speech.”).

If a court finds that a challenged law regulates some manner of protected expression, it must then “determine the scope of the [regulated] speech” in order to apply the appropriate level

1 of scrutiny. *Yim v. City of Seattle*, 63 F.4th 783, 791 (9th Cir. 2023). There are several levels of  
 2 scrutiny that may apply, depending on the type of expression at issue.

3 **i. Strict Scrutiny**

4 If the challenged regulation restricts only non-commercial speech, the level of scrutiny  
 5 depends on whether the law is content based or content neutral. “Government regulation of  
 6 speech is content based if a law applies to particular speech because of the topic discussed or the  
 7 idea or message expressed,” that is, if the regulation “draws distinctions based on the message a  
 8 speaker conveys.” *Reed v. Town of Gilbert*, 576 U.S. 155, 163 (2015) (citations omitted). A law  
 9 is also content based if, even though facially neutral, it “cannot be justified without reference to  
 10 the content of the regulated speech, or . . . were adopted by the government because of  
 11 disagreement with the message the speech conveys.” *Id.* at 164 (internal punctuation marks and  
 12 citation omitted). If the court determines a law is content based, it applies strict scrutiny,  
 13 “regardless of the government’s benign motive, content-neutral justification, or lack of ‘animus  
 14 toward the ideas contained’ in the regulated speech.” *Porter v. Martinez*, 68 F.4th 429, 439 (9th  
 15 Cir. 2023) (citations omitted). Strict scrutiny “requires the Government to prove that the  
 16 restriction furthers a compelling interest and is narrowly tailored to achieve that interest.” *Reed*,  
 17 576 U.S. at 171; *see also Berger v. City of Seattle*, 569 F.3d 1029, 1050 (9th Cir. 2009) (“Under  
 18 that standard [of strict scrutiny], the regulation is valid only if it is the least restrictive means  
 19 available to further a compelling government.”) (citing *United States v. Playboy Ent. Grp., Inc.*,  
 20 529 U.S. 803, 813 (2000)).

21 **ii. Intermediate Scrutiny**

22 “By contrast, a content-neutral regulation of [non-commercial] expression must meet the  
 23 less exacting standard of intermediate scrutiny.” *Porter*, 68 F.4th at 439 (citation omitted). Under  
 24 this lower standard, “a regulation is constitutional ‘if it furthers an important or substantial  
 25 governmental interest; if the governmental interest is unrelated to the suppression of free  
 26 expression; and if the incidental restriction on alleged First Amendment freedoms is no greater  
 27 than is essential to the furtherance of that interest.’” *Id.* (quoting *United States v. O’Brien*, 394  
 28 U.S. 367, 377 (1968)).

1 **iii. Commercial Speech Scrutiny**

2 If a statute regulates only commercial speech—i.e., “expression related solely to the  
3 economic interests of the speaker and its audience” that “does no more than propose a  
4 commercial transaction,” *Am. Acad. of Pain Mgmt. v. Joseph*, 353 F.3d 1099, 1106 (9th Cir. 2004)  
5 (citations omitted)—the court applies commercial speech scrutiny<sup>3</sup> as established by *Central*  
6 *Hudson Gas & Electric Corp. v. Public Service Commission of New York*, 447 U.S. 557 (1980).  
7 First, commercial speech is not entitled to any First Amendment protection if it is misleading or  
8 related to illegal activity. *Cent. Hudson*, 447 U.S. at 563–64; *see also, e.g., Thompson v. W. States*  
9 *Med. Ctr.*, 535 U.S. 357, 367 (2002). For all other commercial speech, the court asks “whether the  
10 asserted governmental interest is substantial,” “whether the regulation directly advances the  
11 governmental interest,” and “whether [the regulation] is not more extensive than is necessary to  
12 serve that interest.” *Retail Digital Network, LLC v. Prieto*, 861 F.3d 839, 844 (9th Cir. 2017)  
13 (quoting *Cent. Hudson*, 447 U.S. at 566). The regulation is constitutional only if the answer to all  
14 three questions is “yes.” *See id.* This analysis applies to commercial speech regardless of  
15 whether the regulation is content based or content neutral. *Yim*, 63 F.4th at 793 n.14 (citing *Valle*  
16 *Del Sol, Inc. v. Whiting*, 709 F.3d 808, 820 (9th Cir. 2013)).

17 **iv. Scrutiny where Commercial and Non-Commercial**  
18 **Speech is Inextricably Intertwined**

19 Finally, if a law regulates expression that “inextricably intertwines” commercial and non-  
20 commercial components, the court does not “apply[] one test to one phrase and another test to  
21 another phrase,” but instead treats the entire expression as non-commercial speech and applies the  
22 appropriate level of scrutiny. *Riley v. Nat’l Fed’n of the Blind of N.C., Inc.*, 487 U.S. 781, 796  
23 (1988) (applying strict scrutiny to content-based regulation of solicitation of charitable  
24 contributions by professional fundraisers while assuming professional fundraiser’s financial  
25 motivation for solicitation intertwined commercial interest with non-commercial advocacy).

26 With these principles in mind, the Court now assesses whether NetChoice has shown that it

27 \_\_\_\_\_  
28 <sup>3</sup> The Court will use the phrase “commercial speech scrutiny” in this order to refer to the  
“intermediate scrutiny standard codified in *Central Hudson*.” *Yim*, 63 F.4th at 793.

1 is likely to succeed both in establishing that the CAADCA regulates protected expression, and in  
2 establishing that the CAADCA fails the applicable level of scrutiny.

3 **b. Protected Expression or Non-Expressive Conduct**

4 NetChoice argues that the CAADCA regulates speech by requiring internet content  
5 providers to take various actions to protect minors from harmful messages, such as making  
6 content-based assessments about potential harm to minors in order to comply with the DPIA  
7 requirement, and necessarily reviewing content to adhere to the Act’s content policy enforcement  
8 provision. *See* Mot. 19–21. The State argues that the Act merely regulates business practices  
9 regarding the collection and use of children’s data, so that its restrictions are only of nonexpressive  
10 conduct that is not entitled to First Amendment protection. *See* Opp’n 10–12. The State further  
11 contends that the Act does not restrict speech because it does not prevent any particular content  
12 from being shown to a minor—even if the content provider knows it would be harmful—as long  
13 as the content provider does not use the minor’s personal information to do so. *See id.* at 12.

14 In evaluating whether the CAADCA regulates protected expression, the Court first notes  
15 that determining whether the statute applies to a business will often require viewing the content of  
16 the online service, product, or feature to evaluate whether it is “likely to be accessed by children”  
17 because, for example, it contains “advertisements marketed to children.” CAADCA §§  
18 29(b)(4)(C), 31(a). But having to view content to determine whether the statute applies does not  
19 by itself mean that the statute regulates speech. *See, e.g., Am. Soc’y of Journalists & Authors, Inc.*  
20 *v. Bonta*, 15 F.4th 954, 960–61 (9th Cir. 2021) (finding law classifying workers as employees or  
21 independent contractors based on criteria including whether worker’s output was “to be  
22 appreciated primarily or solely for its imaginative, aesthetic, or intellectual content” did not  
23 regulate speech) (citing Cal. Labor Code § 2778(b)(2)(F)(ii)). The question is whether the law at  
24 issue regulates expression “because of its message, its ideas, its subject matter, or its content.” *Id.*  
25 at 960 (quoting *Reed*, 576 U.S. at 163). The Court will evaluate this question first with respect to  
26 those portions of the statute that prohibit certain actions, *see* CAADCA § 31(b), and then turn to  
27 the sections of the statute mandating specific acts, *see id.* § 31(a).

1 **i. The Act’s Prohibitions (CAADCA § 31(b))**

2 The CAADCA’s prohibitions forbid the for-profit entities covered by the Act from  
 3 engaging—with some exceptions—in the collection, sale, sharing, or retention of children’s  
 4 personal information, including precise geolocation information, for profiling or other purposes.  
 5 *See generally id.* § 31(b). The State argues that the CAADCA’s regulation of “collection and use  
 6 of children’s personal information” is akin to laws that courts have upheld as regulating economic  
 7 activity, business practices, or other conduct without a significant expressive element. Opp’n 11–  
 8 12 (citations omitted). There are two problems with the State’s argument. First, none of the  
 9 decisions cited by the State for this proposition involved laws that, like the CAADCA, restricted  
 10 the collection and sharing of information. *See id.*; *Rumsfeld v. Forum for Acad. & Inst. Rights,*  
 11 *Inc.*, 547 U.S. 47, 66 (2006) (statute denying federal funding to educational institutions restricting  
 12 military recruiting did not regulate “inherently expressive” conduct because expressive nature of  
 13 act of preventing military recruitment necessitated explanatory speech); *Roulette v. City of Seattle,*  
 14 97 F.3d 300, 305 (9th Cir. 1996) (ordinance prohibiting sitting or lying on sidewalk did not  
 15 regulate “forms of conduct integral to, or commonly associated with, expression”); *Int’l*  
 16 *Franchise*, 803 F.3d at 397–98, 408 (minimum wage increase ordinance classifying franchisees as  
 17 large employers “exhibit[ed] nothing that even the most vivid imagination might deem uniquely  
 18 expressive”) (citation omitted); *HomeAway.com*, 918 F.3d at 680, 685 (ordinance regulating forms  
 19 of short-term rentals was “plainly a housing and rental regulation” that “regulate[d] nonexpressive  
 20 conduct—namely, booking transactions”); *Am. Soc’y of Journalists & Authors*, 15 F.4th at 961–62  
 21 (law governing classification of workers as employees or independent contractors “regulate[d]  
 22 economic activity rather than speech”).

23 Second, in a decision evaluating a Vermont law restricting the sale, disclosure, and use of  
 24 information about the prescribing practices of individual doctors—which pharmaceutical  
 25 manufacturers used to better target their drug promotions to doctors—the Supreme Court held the  
 26 law to be an unconstitutional regulation of speech, rather than conduct. *Sorrell*, 564 U.S. at 557,  
 27 562, 570–71. The Supreme Court noted that it had previously held the “creation and  
 28 dissemination of information are speech within the meaning of the First Amendment,” 564 U.S. at

1 570 (citing *Bartnicki v. Vopper*, 532 U.S. 514, 527 (2001); *Rubin v. Coors Brewing Co.*, 514 U.S.  
2 476, 481 (1995); *Dun & Bradstreet, Inc. v. Greenmoss Builders, Inc.*, 472 U.S. 749, 759 (1985)  
3 (plurality opinion)), and further held that even if the prescriber information at issue was a  
4 commodity, rather than speech, the law’s “content- and speaker-based restrictions on the  
5 availability and use of . . . identifying information” constituted a regulation of speech, *id.* at 570–  
6 71; *see also id.* at 568 (“An individual’s right to speak is implicated when information he or she  
7 possesses is subject to ‘restraints on the way in which the information might be used’ or  
8 disseminated.”) (quoting *Seattle Times Co. v. Rhinehart*, 467 U.S. 20, 32 (1984)).

9         The State argues that *Sorrell* does not necessitate the conclusion that the CAADCA’s  
10 prohibitions regulate speech because *Sorrell* (1) does not hold that a business has a right to collect  
11 data from individuals, and (2) is generally distinguishable on the facts because the physicians  
12 described in *Sorrell*, whose information was collected, were willing participants in the data  
13 generation who had the power to restrict the use of their information. *See* July 27, 2023 Hr’g Tr.  
14 (“Tr.”) 27:16–31:13; Opp’n 11–12; *see also id.* 1 (“Plaintiff’s members do not have a First  
15 Amendment right to children’s personal information.”). As for the first point, the State is correct  
16 that *Sorrell* does not address any general right to collect data from individuals. In fact, the  
17 Supreme Court noted that the “capacity of technology to find and publish personal information . . .  
18 presents serious and unresolved issues with respect to personal privacy and the dignity it seeks to  
19 secure.” *Sorrell*, 564 U.S. at 579–80. But whether there is a general right to collect data is  
20 independent from the question of whether a law restricting the collection and sale of data regulates  
21 conduct or speech. Under *Sorrell*, the unequivocal answer to the latter question is that a law  
22 that—like the CAADCA—restricts the “availability and use” of information by some speakers but  
23 not others, and for some purposes but not others, is a regulation of protected expression. *Id.* at  
24 570–71. The State’s attempt to distinguish *Sorrell* based on the physicians’ ability to prevent their  
25 information from being collected, *see* Tr. 31:7–10, is not persuasive because the Supreme Court  
26 concluded that the law at issue regulated speech based on its restrictions on the use of the  
27 information after it was collected, without including any reasoning about the nature of the source  
28 of the information. *See Sorrell*, 564 U.S. at 570–71.

1 Accordingly, the Court finds that NetChoice is likely to succeed in showing that the Act’s  
 2 prohibitions—which restrict covered business from “[c]ollect[ing], sell[ing], shar[ing], or  
 3 retain[ing] any personal information” for most purposes, *see, e.g.*, CAADCA § 31(b)(3)—limit the  
 4 “availability and use” of information by certain speakers and for certain purposes and thus regulate  
 5 protected speech.

6 **ii. The Act’s Mandates (CAADCA § 31(a))**

7 The Act’s ten statutory mandates are more varied than the prohibitions. *See generally*  
 8 CAADCA §§ 31(a)(1)–(10). One of the main requirements of the Act is that companies create  
 9 DPIA reports identifying, for each offered online service, product, or feature likely to be accessed  
 10 by children, any risk of material detriment to children arising from the business’s data  
 11 management practices. *Id.* §§ 31(a)(1)–(4). For example, a DPIA report must assess whether the  
 12 “design of the online service, product, or feature could harm children, including by exposing  
 13 children to harmful, or potentially harmful, content on the online service, product, or feature.” *Id.*  
 14 § 31(a)(1)(B). Each business must then create a “timed plan to mitigate or eliminate” the risks  
 15 identified in the DPIA “before the online service, product, or feature is accessed by children,” *id.* §  
 16 31(a)(2), and provide a list of all DPIA reports and the reports themselves to the state Attorney  
 17 General upon written request, *id.* § 31(a)(3)–(4).

18 The State contended at oral argument that the DPIA report requirement merely “requires  
 19 businesses to consider how the product’s use design features, like nudging to keep a child engaged  
 20 to extend the time the child is using the product” might harm children, and that the consideration  
 21 of such features “has nothing to do with speech.” Tr. 19:14–20:5; *see also id.* at 23:5–6 (“[T]his is  
 22 only assessing how your business models . . . might harm children.”). The Court is not persuaded  
 23 by the State’s argument because “assessing how [a] business model[] . . . might harm children”  
 24 facially requires a business to express its ideas and analysis about likely harm. It therefore appears  
 25 to the Court that NetChoice is likely to succeed in its argument that the DPIA provisions, which  
 26 require covered businesses to identify and disclose to the government potential risks to minors and  
 27 to develop a timed plan to mitigate or eliminate the identified risks, regulate the distribution of  
 28 speech and therefore trigger First Amendment scrutiny. *See Reply 2*, ECF 60; *Sorrell*, 564 U.S. at

1 570 (“This Court has held that the creation and dissemination of information are speech within the  
2 meaning of the First Amendment.”) (citations omitted).

3 Several sections require businesses to affirmatively provide information to users, and by  
4 requiring speech necessarily regulate it. *See* CAADCA § 31(a)(7) (requiring businesses  
5 “[p]rovide any privacy information . . . concisely, prominently, and using clear language suited to  
6 the age of children likely to access that online service, product, or feature”); *id.* § 31(a)(8)  
7 (requiring that businesses “provide an obvious signal to [a] child” if the child is being tracked or  
8 monitored by a parent or guardian via an online service, product, or feature); *id.* § 31(a)(10)  
9 (“Provide prominent, accessible, and responsive tools to help children . . . exercise their privacy  
10 rights and report concerns.”); *see also, e.g., Rubin*, 514 U.S. at 481 (holding “information on beer  
11 labels” constitutes speech). The CAADCA also requires a covered business to enforce its  
12 “published terms, policies, and community standards”—*i.e.*, its content moderation policies.  
13 CAADCA § 31(a)(9). Although the State argues that the policy enforcement provision does not  
14 regulate speech because businesses are free to create their own policies, it appears to the Court that  
15 NetChoice’s position that the State has no right to enforce obligations that would essentially press  
16 private companies into service as government censors, thus violating the First Amendment by  
17 proxy, is better grounded in the relevant binding and persuasive precedent. *See* Mot. 11; *Playboy*  
18 *Ent. Grp.*, 529 U.S. at 806 (finding statute requiring cable television operators providing channels  
19 with content deemed inappropriate for children to take measures to prevent children from viewing  
20 content was unconstitutional regulation of speech); *NetChoice, LLC v. Att’y Gen., Fla.*  
21 (*“NetChoice v. Fla.”*), 34 F.4th 1196, 1213 (11th Cir. 2022) (“When platforms choose to remove  
22 users or posts, deprioritize content in viewers’ feeds or search results, or sanction breaches of their  
23 community standards, they engage in First-Amendment-protected activity.”); *Engdahl v. City of*  
24 *Kenosha*, 317 F. Supp. 1133, 1135–36 (E.D. Wis. 1970) (holding ordinance restricting minors  
25 from viewing certain movies based on ratings provided by Motion Picture Association of America  
26 impermissibly regulated speech).

27 The remaining two sections of the CAADCA require businesses to estimate the age of  
28 child users and provide them with a high default privacy setting, or forgo age estimation and

1 provide the high default privacy setting to all users. CAADCA §§ 31(a)(5)–(6). The State argues  
 2 that “[r]equiring businesses to protect children’s privacy and data implicates neither protected  
 3 speech nor expressive conduct,” and notes that the provisions “say[] nothing about content and  
 4 do[] not require businesses to block any content for users of any age.” Opp’n 15. However, the  
 5 materials before the Court indicate that the steps a business would need to take to sufficiently  
 6 estimate the age of child users would likely prevent both children and adults from accessing  
 7 certain content. *See* Amicus Curiae Br. of Prof. Eric Goldman (“Goldman Am. Br.”) 4–7  
 8 (explaining that age assurance methods create time delays and other barriers to entry that studies  
 9 show cause users to navigate away from pages), ECF 34-1; Amicus Curiae Br. of New York  
 10 Times Co. & Student Press Law Ctr. (“NYT Am. Br.”) 6 (stating age-based regulations would  
 11 “almost certain[ly] [cause] news organizations and others [to] take steps to prevent those under the  
 12 age of 18 from accessing online news content, features, or services”), ECF 56-1. The age  
 13 estimation and privacy provisions thus appear likely to impede the “availability and use” of  
 14 information and accordingly to regulate speech. *Sorrell*, 564 U.S. at 570–71.

15 The Court is keenly aware of the myriad harms that may befall children on the internet,  
 16 and it does not seek to undermine the government’s efforts to resolve internet-based “issues with  
 17 respect to personal privacy and . . . dignity.” *See Sorrell*, 564 U.S. at 579; Def.’s Suppl. Br. 1  
 18 (“[T]he ‘serious and unresolved issues’ raised by increased data collection capacity due to  
 19 technological advances remained largely unaddressed [in *Sorrell*].”). However, the Court is  
 20 troubled by the CAADCA’s clear targeting of certain speakers—*i.e.*, a segment of for-profit  
 21 entities, but not governmental or non-profit entities—that the Act would prevent from collecting  
 22 and using the information at issue. As the Supreme Court noted in *Sorrell*, the State’s arguments  
 23 about the broad protections engendered by a challenged law are weakened by the law’s application  
 24 to a narrow set of speakers. *See Sorrell*, 564 U.S. at 580 (“Privacy is a concept too integral to the  
 25 person and a right too essential to freedom to allow its manipulation to support just those ideas the  
 26 government prefers”).

27 For the foregoing reasons, the Court finds that NetChoice is likely to succeed in showing  
 28 that the CAADCA’s prohibitions and mandates regulate speech, so that the Act triggers First

1 Amendment scrutiny.

2 **c. The Type of Speech Regulated by the CAADCA**

3 Because the Court has found the CAADCA likely regulates protected speech, it must now  
 4 determine what type of speech is at issue in order to apply the appropriate level of scrutiny. As  
 5 described above, *see* Part III(A)(1)(a), strict scrutiny applies to a law regulating non-commercial  
 6 speech in a content-based manner, meaning the law “target[s] speech based on its communicative  
 7 content.” *Reed*, 576 U.S. at 163. To survive strict scrutiny, the “the Government [must] prove  
 8 that the restriction furthers a compelling interest and is narrowly tailored to achieve that interest.”  
 9 *Id.* at 171. A content-neutral regulation of non-commercial speech, on the other hand, “is  
 10 constitutional as long as it withstands intermediate scrutiny—i.e., if: (1) ‘it furthers an important  
 11 or substantial government interest’; (2) ‘the governmental interest is unrelated to the suppression  
 12 of free expression’; and (3) ‘the incidental restriction on alleged First Amendment freedoms is no  
 13 greater than is essential to the furtherance of that interest.’” *Jacobs v. Clark Cnty. Sch. Dist.*, 526  
 14 F.3d 419, 434 (9th Cir. 2008) (quoting *Turner Broad. Sys., Inc. v. FCC*, 512 U.S. 622, 661–62  
 15 (1994)). And if the speech at issue is commercial, courts apply intermediate scrutiny under the  
 16 four-part test articulated by the Supreme Court in *Central Hudson*, which the Ninth Circuit has  
 17 described as follows:

18 (1) [I]f “the communication is neither misleading nor related to unlawful activity,”  
 19 then it merits First Amendment scrutiny as a threshold matter; [and] in order for the  
 20 restriction to withstand such scrutiny, (2) “[t]he State must assert a substantial  
 21 interest to be achieved by restrictions on commercial speech;” (3) “the restriction  
 must directly advance the state interest involved;” and (4) it must not be “more  
 extensive than is necessary to serve that interest.”

22 *Metro Lights, L.L.C. v. City of Los Angeles*, 551 F.3d 898, 903 (9th Cir. 2009) (quoting *Cent.*  
 23 *Hudson*, 447 U.S. at 564–66); *see also Junior Sports Mags. Inc. v. Bonta*, --- F.4th ----, 2023 WL  
 24 5945879, at \*4 (9th Cir. Sept. 13, 2023).

25 NetChoice argues that the CAADCA regulates non-commercial speech because the speech  
 26 at issue goes beyond proposing a commercial transaction, Reply 10, and that the speech is  
 27 “content-based in many obvious respects” because its “very premise [is] that providers must  
 28 prioritize content that promotes the ‘well-being’ of minors,” Mot. 19. Accordingly, NetChoice

1 contends that the Act is subject to strict scrutiny. *See* Mot. 19–21; Reply 9–10. The State  
2 counters that any protected expression regulated by the Act is at most commercial speech, so that  
3 the Act is subject to the lower level of scrutiny described in *Central Hudson*. Opp’n 19. The State  
4 argues that the Act affects how businesses persuade consumers to engage with their products—  
5 such as by posting policies that aid consumers in deciding whether to engage with certain  
6 products—and that consumer engagement in turn drives the regulated businesses’ revenue. *Id.*  
7 Based on this revenue model, the State concludes that “there can be no doubt that regulated  
8 businesses have ‘an economic motive for engaging in the [alleged] speech’ with regard to the  
9 specific products—services likely to be accessed by children—that the Act regulates.” *Id.*  
10 (quoting *Am. Acad. of Pain Mgmt.*, 353 F.3d at 1106).

11       Based on the record before it, the Court finds it difficult to determine whether the Act  
12 regulates only commercial speech. NetChoice argues in fairly conclusory fashion that the Act  
13 “regulates speech that does far more than ‘propose a commercial transaction’” and that the for-  
14 profit nature of a website “does not render [its] content commercial speech” because many  
15 covered businesses rely on advertisements to support the expressive content and services they  
16 provide. Reply 10; *see* Mot. 2, 19–21. NetChoice provides some support for the latter argument.  
17 *See, e.g.*, Roin Decl. ¶ 10 (stating that the Goodreads application earns the vast majority of its  
18 revenue from advertising, including personalized advertisements targeted to registered users).  
19 However, the Court notes that some sections of the CAADCA, such as those prohibiting the sale  
20 of personal information, *see generally* CAADCA § 31(b), may well be analyzed as regulating only  
21 commercial speech. *See, e.g., Hunt v. City of Los Angeles*, 638 F.3d 703, 715–16 (9th Cir. 2011)  
22 (finding speech commercial because it was “directed to their products and why a consumer should  
23 buy them” and not “inextricably intertwined” with non-commercial speech). Ultimately, the Court  
24 finds that NetChoice has not provided sufficient material to demonstrate that it is likely to succeed  
25 in showing that the Act regulates either purely non-commercial speech or non-commercial speech  
26 that is inextricably intertwined with commercial speech. It is NetChoice’s burden to make that  
27 showing in order to trigger application of strict scrutiny. *See, e.g., Yim*, 63 F.4th at 793 (“The  
28 parties on appeal dispute whether the Ordinance regulates commercial speech and calls for the

1 application of intermediate scrutiny, or whether the Ordinance regulates [content-based] non-  
2 commercial speech and is subject to strict scrutiny review.”).

3 However, as the Ninth Circuit reasoned in *Yim*, the Court “need not decide that question, . . .  
4 . because [it] conclude[s] that the [Act] does not survive the intermediate scrutiny standard of  
5 review” for commercial speech. *Id.*; see also *Junior Sports Mags.*, 2023 WL 5945879, at \*4 (“We  
6 need not decide this issue because ‘the outcome is the same whether a special commercial speech  
7 inquiry or a stricter form of judicial scrutiny is applied.’”) (quoting *Sorrell*, 564 U.S. at 571).  
8 Accordingly, the Court will assume for the purposes of the present motion that only the lesser  
9 standard of intermediate scrutiny for commercial speech applies because, as shown below, the  
10 outcome of the analysis here is not affected by the Act’s evaluation under the lower standard of  
11 commercial speech scrutiny.

12 **d. Application of Commercial Speech Scrutiny to the CAADCA**

13 Under the standard for commercial speech scrutiny, if the regulation restricts speech that is  
14 neither misleading nor related to unlawful activity, it is the State’s burden to show “at least that  
15 the statute directly advances a substantial governmental interest and that the measure is drawn to  
16 achieve that interest.” *Sorrell*, 564 U.S. at 572 (citations omitted); *Junior Sports Mags.*, 2023 WL  
17 5945879, at \*5 (“Under *Central Hudson*, a state seeking to justify a restriction on commercial  
18 speech bears the burden to prove that its law directly advances that [substantial] interest to a  
19 material degree.”). That is, “the restriction must directly advance the state interest involved,” and  
20 it must not be “more extensive than is necessary to serve that interest.” *Cent. Hudson*, 447 U.S. at  
21 66. These “last two steps of the *Central Hudson* analysis basically involve a consideration of the  
22 fit between the legislature’s ends and the means chosen to accomplish those ends.” *Hunt*, 638  
23 F.3d at 717 (quoting *Rubin*, 514 U.S. at 786) (internal quotation marks omitted). The government  
24 need not employ the least restrictive means to advance its interest, but the means employed may  
25 not be “substantially excessive.” *Id.* (quoting *Bd. of Trs. of State Univ. of N.Y. v. Fox*, 492 U.S.  
26 469, 479 (1989)).

27 **i. Substantial State Interest**

28 There is no dispute that the CAADCA regulates speech that is neither misleading nor

1 related to unlawful activity. The Court thus turns directly to the question of whether the State can  
 2 show a substantial state interest to which the CAADCA is geared. The State asserts a substantial<sup>4</sup>  
 3 interest in “protecting the physical, mental, and emotional health and well-being of minors.”  
 4 Def.’s Suppl. Br. 1–2; *see also* Opp’n 20 (describing substantial state interest in ““safeguarding  
 5 the physical and psychological well-being of a minor”); Tr. 71:6–13 (accord); *id.* at 74:25–75:3  
 6 (“[T]he government has a compelling interest [in] the nature of online space for children.”).  
 7 NetChoice does not dispute that “the well-being of children is a compelling interest in the  
 8 abstract,” but argues that the CAADCA does not identify a sufficiently concrete harm that the law  
 9 addresses. Mot. 21–22. However, the State has presented evidence that children are currently  
 10 harmed by lax data and privacy protections online. *See* Radesky Decl. ¶¶ 45–47 (privacy settings  
 11 often allow unwanted contact), ¶¶ 64–68 (profiling leads to children being targeted with ads for  
 12 monetization and extreme dieting). In light of this evidence, and given that the Supreme Court has  
 13 repeatedly recognized a compelling interest in “protecting the physical and psychological well-  
 14 being of minors,” the Court finds that NetChoice is not likely to show that the State has not  
 15 satisfied its burden of showing a substantial interest under the commercial speech scrutiny  
 16 standard. *Sable Comm’cns of Cal., Inc. v. FCC*, 492 U.S. 115, 126 (1989); *see also New York v.*  
 17 *Ferber*, 458 U.S. 747, 756 (1982) (“It is evident beyond the need for elaboration that a State’s  
 18 interest in ‘safeguarding the physical and psychological well-being of a minor’ is ‘compelling.’”) (quoting  
 19 *Globe Newspaper Co. v. Super. Ct.*, 457 U.S. 596, 607 (1982)).

## 20 ii. Means-Ends Fit

21 After the State shows a substantial interest, the Court evaluates the commercial speech  
 22 regulation under the last two prongs of the *Central Hudson* analysis, *i.e.*, whether the “restriction .  
 23 . . directly advance[s] the state interest involved” and whether it is not “more extensive than is  
 24 necessary to serve that interest.” *Metro Lights, L.L.C.*, 551 F.3d at 903 (quoting *Cent. Hudson*,  
 25 447 U.S. at 564–66). As noted above, the “last two steps of the *Central Hudson* analysis basically  
 26

27 <sup>4</sup> Because the State argues that the CAADCA satisfies both strict scrutiny and commercial speech  
 28 scrutiny, it occasionally describes its interest as “compelling,” rather than “substantial.” *See, e.g.*,  
 Opp’n 19–20. The Court treats those arguments as supporting the State’s position that it has a  
 substantial state interest as required by the commercial speech scrutiny standard.

1 involve a consideration of the fit between the legislature’s ends and the means chosen to  
2 accomplish those ends.” *Hunt*, 638 F.3d at 717 (citation omitted). Once again, it is the State’s  
3 burden to show that the statute satisfies the standards set forth by *Central Hudson*. *Junior Sports*  
4 *Mags.*, 2023 WL 5945879, at \*4 (citations omitted); *see also Sorrell*, 564 U.S. at 572.

5 NetChoice argues that certain provisions of the CAADCA—namely, CAADCA §§  
6 31(a)(1)–(7), 31(a)(9), 31(b)(1)–(4), and 31(b)(7)—fail commercial speech scrutiny, and that the  
7 entire statute must be enjoined because the invalid provisions are not severable from the otherwise  
8 valid remainder.<sup>5</sup> *See* Pl.’s Suppl. Br. in Supp. of Mot. for Prelim. Inj. (“Pl.’s Suppl. Br.”), ECF  
9 71, at 2–7. The State argues that all of the mandates and prohibitions of the CAADCA satisfy  
10 commercial speech scrutiny because each provision is appropriately tailored to the State’s  
11 substantial interest in protecting the physical, mental, and emotional health and well-being of  
12 minors. *See* Def.’s Suppl. Br. 2–7. The Court will first address whether the specific provisions of  
13 the Act challenged by NetChoice survive commercial speech scrutiny before turning to the issue  
14 of severability.

15 (1) DPIA Report Requirement (CAADCA § 31(a)(1)-(4))

16 The State contends that the CAADCA’s DPIA report requirement furthers its substantial  
17 interest in protecting children’s safety because the provisions will cause covered businesses to  
18 proactively assess “how their products use children’s data and whether their data management  
19 practices or product designs pose risks to children,” so that “fewer children will be subject to  
20 preventable harms.” Def.’s Suppl. Br. 2–3. According to the State’s expert, “[c]hildren’s digital  
21 risks and opportunity are shaped by the *design* of digital products, services, and features,” and  
22 businesses currently take a reactive approach by removing problematic features only after harm is  
23 discovered. *See* Radesky Decl. ¶ 40 (emphasis added). For example, the mobile application  
24 Snapchat ended the use of a speed filter after the feature was linked to dangerous incidents of  
25 reckless driving by adolescents. *Id.* ¶ 41.

26  
27  
28 <sup>5</sup> The Court refers to those portions of the Act not challenged by NetChoice as a “valid remainder”  
for the purposes of its decision on the motion for preliminary injunction, but does not intend to  
suggest it has conducted an analysis and found those unchallenged provisions to be legally valid.

1           Accepting the State’s statement of the harm it seeks to cure, the Court concludes that the  
2 State has not met its burden to demonstrate that the DPIA provisions in fact address the identified  
3 harm. For example, the Act does not require covered businesses to assess the potential harm of  
4 product *designs*—which Dr. Radesky asserts cause the harm at issue—but rather of “the risks of  
5 material detriment to children that arise from the *data management practices* of the business.”  
6 CAADCA § 31(a)(1)(B) (emphasis added). And more importantly, although the CAADCA  
7 requires businesses to “create a timed plan to mitigate or eliminate the risk before the online  
8 service, product, or feature is accessed by children,” *id.* § 31(a)(2), there is no actual requirement  
9 to adhere to such a plan. *See generally id.* § 31(a)(1)-(4); *see also* Tr. 26:9–10 (“As long as you  
10 write the plan, there is no way to be in violation.”), ECF 66.

11           “A restriction ‘directly and materially advances’ the government’s interests if the  
12 government can show ‘the harms it recites are real and that its restriction will in fact alleviate them  
13 to a material degree.’” *Yim*, 63 F.4th at 794 (quoting *Fla. Bar v. Went For It, Inc.*, 515 U.S. 618,  
14 626 (1995)). Because the DPIA report provisions do not require businesses to assess the potential  
15 harm of the design of digital products, services, and features, and also do not require actual  
16 mitigation of any identified risks, the State has not shown that these provisions will “in fact  
17 alleviate [the identified harms] to a material degree.” *Id.* The Court accordingly finds that  
18 NetChoice is likely to succeed in showing that the DPIA report provisions provide “only  
19 ineffective or remote support for the government’s purpose” and do not “directly advance” the  
20 government’s substantial interest in promoting a proactive approach to the design of digital  
21 products, services, and feature. *Id.* (citations omitted). NetChoice is therefore likely to succeed in  
22 showing that the DPIA report requirement does not satisfy commercial speech scrutiny. *See*  
23 *Junior Sports Mags.*, 2023 WL 5945879, at \*4 (“Because California fails to satisfy its burden to  
24 justify the proposed speech restriction, [Plaintiff] is likely to prevail on the merits of its First  
25 Amendment claim.”).

26           (2)     Age Estimation (CAADCA § 31(a)(5))

27           The CAADCA requires that covered businesses “[e]stimate the age of child users with a  
28 reasonable level of certainty appropriate to the risks that arise from the data management practices

1 of the business or apply the privacy and data protections afforded to children to all consumers.”  
 2 CAADCA § 31(a)(5). The State argues that CAADCA § 31(a)(5) promotes the well-being of  
 3 children by requiring covered businesses to “provide data and privacy protections to users based  
 4 on estimated age or, if the business does not estimate age, apply child-appropriate data and privacy  
 5 protections to all users.”<sup>6</sup> Def.’s Suppl. Br. 3. This argument relies on the state legislature’s  
 6 finding that greater data privacy “necessarily means greater security and well-being.” *Id.* (quoting  
 7 AB 2273 § 1(a)(4)). NetChoice counters that the age estimation provision does not directly  
 8 advance the State’s substantial interest in children’s well-being because the practical process of  
 9 such estimation involves further information collection that is itself invasive. *See* Reply 5–6;  
 10 Goldman Am. Br. 2–4.

11 As described above, for the Act to survive commercial speech scrutiny, the State must  
 12 show that the CAADCA’s challenged provisions directly advance a substantial government  
 13 interest by materially alleviating real harms. *See Yim*, 63 F.4th at 794; *Junior Sports Mags.*, 2023  
 14 WL 5945879, at \*5. Based on the materials before the Court, the CAADCA’s age estimation  
 15 provision appears not only unlikely to materially alleviate the harm of insufficient data and  
 16 privacy protections for children, but actually likely to exacerbate the problem by inducing covered  
 17 businesses to require consumers, including children, to divulge additional personal information.  
 18 The State argues that age estimation is distinct from the more onerous exercise of age verification,  
 19 that the statute requires only a level of estimation that is appropriate to the risk presented by a  
 20 business’s data management practices, and that there are “minimally invasive” age estimation  
 21 tools, some of which are already used by NetChoice’s member companies. *See* Opp’n 15–16. But  
 22 even the evidence cited by the State about the supposedly minimally invasive tools indicates that  
 23 consumers might have to permit a face scan, or that businesses might use “locally-analyzed and  
 24 stored biometric information” to signal whether the user is a child or not. *See id.* at 16 (citing  
 25

---

26 <sup>6</sup> The Court notes that the age estimation provision does not itself require any specific protections;  
 27 the required data and privacy protections for either minors (if the business estimates age) or all  
 28 users (if the business does not estimate age) are set forth in the remainder of the statute, and  
 especially at CAADCA §§ 31(b)(1)–(8).

1 Radesky Decl. ¶ 96); *see also* Radesky Decl. ¶ 96(b) & n.92 (noting Google’s use of facial age-  
 2 estimation software),<sup>7</sup> ¶ 96(d) (noting businesses receive signals from hardware devices based on  
 3 “locally-analyzed and stored biometric information” that indicate whether a user is a child).  
 4 Further, as noted in Professor Goldman’s amicus brief, age estimation is in practice quite similar  
 5 to age verification, and—unless a company relies on user self-reporting of age, which provides  
 6 little reliability—generally requires either documentary evidence of age or automated estimation  
 7 based on facial recognition. *See* Goldman Am. Br. 3–4. Such measures would appear to counter  
 8 the State’s interest in increasing privacy protections for children. For these reasons, the State has  
 9 not met its burden under *Central Hudson* and thus NetChoice is likely to succeed in showing that  
 10 the age estimation clause does not satisfy commercial speech scrutiny. *See Yim*, 63 F.4th at 794  
 11 (“[A] statute cannot meaningfully advance the government’s stated interests if it contains  
 12 exceptions that ‘undermine and counteract’ those goals.”) (quoting *Rubin*, 514 U.S. at 489).

13 If a business does not estimate age, it must “apply the privacy and data protections  
 14 afforded to children to all consumers.” CAADCA § 31(a)(5). Doing so would clearly advance the  
 15 government’s interest in increasing data and privacy protections for children. NetChoice argues,  
 16 however, that the effect of this requirement would be to restrain a great deal of protected speech.  
 17 *See* Mot. 13–14, Reply 12. The Court is indeed concerned with the potentially vast chilling effect  
 18 of the CAADCA generally, and the age estimation provision specifically. The State argues that  
 19 the CAADCA does not prevent any specific content from being displayed to a consumer, even if  
 20 the consumer is a minor; it only prohibits a business from profiling a minor and using that  
 21 information to provide targeted content. *See, e.g.*, Opp’n 16. Yet the State does not deny that the  
 22 end goal of the CAADCA is to reduce the amount of harmful content displayed to children. *See*  
 23 *id.* (“[T]he Act prevents businesses from attempting to increase their profits by using children’s  
 24 data to deliver them things they do not want and have not asked for, such as ads for weight loss  
 25 supplements and content promoting violence and self-harm.”); Def.’s Suppl. Br. 6 (“Children are

---

26  
 27 <sup>7</sup> Although Dr. Radesky states that Google’s current system involves facial recognition only by  
 28 adults who have been placed in “child mode” through a machine-learning analysis, Radesky Decl.  
 ¶ 96(b), there is nothing to suggest that companies would not request all consumers to undergo  
 such a process.

1 unable to avoid harmful unsolicited content—including extreme weight loss content and gambling  
2 and sports betting ads—directed at them based on businesses’ data collection and use practices.”).

3 Putting aside for the moment the issue of whether the government may shield children  
4 from such content—and the Court does not question that the content is in fact harmful—the Court  
5 here focuses on the logical conclusion that data and privacy protections intended to shield children  
6 from harmful content, if applied to adults, will also shield adults from that same content. That is,  
7 if a business chooses not to estimate age but instead to apply broad privacy and data protections to  
8 all consumers, it appears that the inevitable effect will be to impermissibly “reduce the adult  
9 population ... to reading only what is fit for children.” *Butler v. Michigan*, 352 U.S. 380, 381, 383  
10 (1957). And because such an effect would likely be, at the very least, a “substantially excessive”  
11 means of achieving greater data and privacy protections for children, *see Hunt*, 638 F.3d at 717  
12 (citation omitted), NetChoice is likely to succeed in showing that the provision’s clause applying  
13 the same process to all users fails commercial speech scrutiny.

14 For these reasons, even accepting the increasing of children’s data and privacy protections  
15 as a substantial governmental interest, the Court finds that the State has failed to satisfy its burden  
16 to justify the age estimation provision as directly advancing the State’s substantial interest in  
17 protecting the physical, mental, and emotional health and well-being of minors, so that NetChoice  
18 is likely to succeed in arguing that the provision fails commercial speech scrutiny. *See Junior*  
19 *Sports Mags.*, 2023 WL 5945879, at \*4.

20 (3) High Default Privacy Settings (CAADCA § 31(a)(6))

21 CAADCA § 31(a)(6) requires covered businesses to “[c]onfigure all default privacy  
22 settings provided to children . . . to settings that offer a high level of privacy, unless the business  
23 can demonstrate a compelling reason that a different setting is in the best interests of children.”  
24 The State argues that high privacy settings “demonstrably keep children safe.” Def.’s Suppl. Br.  
25 3–4 (citing Radesky Decl. ¶¶ 57–60). The evidence before the Court indicates that lower default  
26 privacy settings may quickly lead to individuals perceived as adolescents “receiv[ing] direct  
27 messages from accounts they did not follow, including being added to group chats with strangers  
28 and contacts from marketers of detrimental material such as pornography and diet products.”

1 Radesky Decl. ¶ 59. Accordingly, the Court finds that the State is likely to establish a real harm,  
2 as required under commercial speech scrutiny. *See Yim*, 63 F.4th at 794.

3 The instant provision, however, does not make clear whether it applies only to privacy  
4 settings on accounts created by children—which is the harm discussed in the State’s materials,  
5 *see, e.g.*, Radesky Decl. ¶ 59—or if it applies, for example, to any child visitor of an online  
6 website run by a covered business. NetChoice has provided evidence that uncertainties as to the  
7 nature of the compliance required by the CAADCA is likely to cause at least some covered  
8 businesses to prohibit children from accessing their services and products altogether. *See, e.g.*,  
9 NYT Am. Br. 5–6 (asserting CAADCA requirements that covered businesses consider various  
10 potential harms to children would make it “almost certain that news organizations and others will  
11 take steps to prevent those under the age of 18 from accessing online news content, features, or  
12 services”). Although the State need not show that the Act “employs . . . the least restrictive  
13 means” of advancing the substantial interest, the Court finds it likely, based on the evidence  
14 provided by NetChoice and the lack of clarity in the provision, that the provision here would serve  
15 to chill a “substantially excessive” amount of protected speech to the extent that content providers  
16 wish to reach children but choose not to in order to avoid running afoul of the CAADCA. *See*  
17 *Hunt*, 638 F.3d at 717 (citation omitted). Accordingly, the State has not met its burden under  
18 *Central Hudson* of showing “a reasonable fit between the means and ends of the regulatory  
19 scheme,” *Junior Sports Mags.*, 2023 WL 5945879, at \*7 (quoting *Lorillard Tobacco Co. v. Reilly*,  
20 533 U.S. 525, 561 (2001)), so that NetChoice is likely to succeed in showing the restriction fails  
21 commercial speech scrutiny.

22 (4) Age-Appropriate Policy Language (CAADCA § 31(a)(7))

23 The CAADCA next requires covered businesses to “[p]rovide any privacy information,  
24 terms of service, policies, and community standards concisely, prominently, and using clear  
25 language suited to the age of children likely to access that online service, product, or feature.”  
26 CAADCA § 31(a)(7). The State argues this provision “protects the safety and well-being of  
27 minors” by “giving children the tools to make informed decisions about the services with which  
28 they interact.” Def.’s Suppl. Br. 4.

1           The evidence submitted by the State indicates that the harm it seeks to address is a lack of  
2 consumer understanding of websites’ privacy policies. *See id.* (citing Egelman Decl.); *see also*  
3 Egelman Decl. ¶ 52. The State has shown that internet users generally do not read privacy  
4 policies, and that the reason may be that such policies are often “written at the college level and  
5 therefore may not be understood by a significant proportion of the population (much less  
6 children).” Egelman Decl. ¶ 27; *see id.* ¶ 24. The Court notes that the research-based claims in  
7 Dr. Egelman’s declaration do not appear to be based on studies involving minors and the impact of  
8 policy language on their use of online services. *See id.* at, e.g., ¶¶ 18–19, 24–27, 52.

9           Even accepting that the manner in which websites present “privacy information, terms of  
10 service, policies, and community standards,” CAADCA § 31(a)(7), constitutes a real harm to  
11 children’s well-being because it deters children from implementing higher privacy settings, the  
12 State has not shown that the CAADCA’s policy language provision would directly advance a  
13 solution to that harm. The State points only to a sentence in Dr. Egelman’s declaration stating that  
14 he “believe[s] the [Act] addresses this issue [of lack of consumer understanding of privacy  
15 policies] by requiring the language to be understandable by target audiences (when their online  
16 services are likely to be accessed by children).” Egelman Decl. ¶ 52; *see* Def.’s Suppl. Br. 4  
17 (citing same). Nothing in the State’s materials indicates that the policy language provision would  
18 materially alleviate a harm to minors caused by current privacy policy language, let alone by the  
19 terms of service and community standards that the provision also encompasses. NetChoice is  
20 therefore likely to succeed in showing that the provision fails commercial speech scrutiny. *See*  
21 *Yim*, 63 F.4th at 794.

22           (5)     Internal Policy Enforcement (CAADCA § 31(a)(9))

23           CAADCA § 31(a)(9) requires covered businesses to “[e]nforce published terms, policies,  
24 and community standards established by the business, including, but not limited to, privacy  
25 policies and those concerning children.” As an initial matter, although the State argues that  
26 “businesses have to be accountable for the commitments they make to [] consumers” for “children  
27 and parents to make informed decisions about the products children access,” Def.’s Suppl. Br. 5,  
28 the State fails to establish a concrete harm. The State points to Dr. Radesky’s declaration, which

1 asserts that “[s]tudies have shown that businesses are not enforcing their privacy policies,”  
2 “mak[ing] it challenging for consumers to make informed decisions about whether they want to  
3 join different online communities [without] knowing whether stated policies and standards will be  
4 followed.” Radesky Decl. ¶ 93; *see* Def.’s Suppl. Br. 5. The State has not provided anything  
5 remotely nearing a causal link between whether a business consistently follows its “published  
6 terms, policies, and community standards”—or even children’s difficulty in making better-  
7 informed decisions about whether to use online services—and some harm to children’s well-being.  
8 On this basis alone, NetChoice is likely to succeed in showing that the policy enforcement  
9 provision fails commercial speech scrutiny. *See Yim*, 63 F.4th at 794 (noting the government must  
10 show that “the harms it recites are real”) (citation omitted).

11 Further, even if the State is able to show a concrete harm to children’s well-being, the  
12 provision on its face goes beyond enforcement of policies related to children, or even privacy  
13 policies generally. *See* CAADCA § 31(a)(9) (requiring enforcement of terms “including, but not  
14 limited to, privacy policies and those concerning children”). The lack of any attempt at tailoring  
15 the proposed solution to a specific harm suggests that the State here seeks to force covered  
16 businesses to exercise their editorial judgment in permitting or prohibiting content that may, for  
17 instance, violate a company’s published community standards. The State argues that businesses  
18 have complete discretion to set whatever policies they wish, and must merely commit to following  
19 them. *See* Opp’n 14; Def.’s Suppl. Br. 5. It is that required commitment, however, that flies in  
20 the face of a platform’s First Amendment right to choose in any given instance to permit one post  
21 but prohibit a substantially similar one. *See NetChoice v. Fla.*, 34 F.4th at 1204–05, 1228 (finding  
22 content moderation restrictions impinged on business’s protected curation of content).

23 Lastly, the Court is not persuaded by the State’s argument that the provision is necessary  
24 because there is currently “no law holding online businesses accountable for enforcing their own  
25 policies,” Def.’s Suppl. Br. 5, as the State itself cites to a Ninth Circuit case permitting a lawsuit to  
26 proceed where the plaintiff brought a breach of contract suit against an online platform for failure  
27 to adhere to its terms. *See id.*; *Barnes v. Yahoo!, Inc.*, 570 F.3d 1096, 1108–09 (9th Cir. 2009).

28 For the multiplicity of reasons described above, Court finds that the State has not met its

1 burden of justifying the policy enforcement provision, and that NetChoice is therefore likely to  
2 succeed in showing that the provision fails commercial speech scrutiny.

3 (6) Knowingly Harmful Use of Children’s Data (CAADCA § 31(b)(1))

4 As previously noted, CAADCA § 31(a) contains the Act’s mandates, and CAADCA §  
5 31(b) enumerates its prohibitions. The first of these prohibitions forbids a covered business from  
6 “[using] the personal information of any child in a way that the business knows, or has reason to  
7 know, is materially detrimental to the physical health, mental health, or well-being of a child.”  
8 CAADCA § 31(b)(1).

9 The Third Circuit’s decision in *ACLU v. Mukasey* is instructive here. In *Mukasey*, which  
10 went up to the Supreme Court twice and was finally decided by the Court of Appeals, the court  
11 held that a law prohibiting the transmission of “material that is harmful to minors” was not  
12 narrowly tailored because it required evaluation of a wide range of material that was not in fact  
13 harmful, and because the law’s definition of a “minor” as anyone under 17 years of age would  
14 cause “great uncertainty in deciding what minor could be exposed to” the material. *ACLU v.*  
15 *Mukasey*, 534 F.3d 181, 191, 193 (3d Cir. 2008) (cert. denied). The Third Circuit also rejected the  
16 government’s affirmative defense that regulated companies could use age verification techniques  
17 to achieve greater certainty as to what material was prohibited to a given user. *Id.* at 196–97.

18 The CAADCA does not define what uses of information may be considered “materially  
19 detrimental” to a child’s well-being, and it defines a “child” as a consumer under 18 years of age.  
20 *See* CAADCA § 30. Although there may be some uses of personal information that are  
21 objectively detrimental to children of any age, the CAADCA appears generally to contemplate a  
22 sliding scale of potential harms to children as they age. *See, e.g.*, Def.’s Suppl. Br. 3, 4  
23 (describing Act’s requirements for “age-appropriate” protections). But as the Third Circuit  
24 explained, requiring covered businesses to determine what is materially harmful to an “infant, a  
25 five-year old, or a person just shy of age seventeen” is not narrowly tailored. *Mukasey*, 534 F.3d  
26 at 191. Although the law in *Mukasey* was evaluated under a strict scrutiny standard, the Court  
27 finds the same concerns apply here, so that the State has not met its burden of showing the instant  
28 provision is reasonably tailored to the State’s substantial interest, and thus NetChoice is likely to

1 succeed in showing that the provision fails commercial speech scrutiny. NetChoice has provided  
 2 evidence that covered businesses might well bar all children from accessing their online services  
 3 rather than undergo the burden of determining exactly what can be done with the personal  
 4 information of each consumer under the age of 18. *See, e.g.*, NYT Am. Br. 5–6 (asserting  
 5 CAADCA requirements that covered businesses consider various potential harms to children  
 6 would make it “almost certain that news organizations and others will take steps to prevent those  
 7 under the age of 18 from accessing online news content, features, or services”). The provision at  
 8 issue would likely “burden substantially more speech than is necessary to further the government’s  
 9 legitimate interests,” and therefore NetChoice is likely to succeed in demonstrating that it fails  
 10 commercial speech scrutiny. *See Yim*, 63 F.4th at 795–96 (quoting *Fox*, 492 U.S. at 478).

11 (7) Profiling Children by Default (CAADCA § 31(b)(2))

12 CAADCA § 31(b)(2) prevents a covered business from “[p]rofil[ing] a child by default  
 13 unless” (1) the business “can demonstrate it has appropriate safeguards in place to protect  
 14 children” and (2) either of the following conditions is met: (a) the profiling is “necessary to  
 15 provide the online service, product, or feature requested and only with respect to the aspects of the  
 16 online service, product, or feature with which the child is actively engaged” or (b) the business can  
 17 “demonstrate a compelling reason that profiling is in the best interests of children.” The State  
 18 argues this provision protects children’s well-being because businesses commonly profile children  
 19 by default and place them into target audience categories for products related to harmful content  
 20 such as smoking, gambling, alcohol, or extreme weight loss. Def.’s Suppl. Br. 5–6; Radesky Decl.  
 21 ¶ 66. The Court accepts the State’s assertion of a concrete harm to children’s well-being, *i.e.*, the  
 22 use of profiling to advertise harmful content to children, and turns to the issue of tailoring.

23 NetChoice has provided evidence indicating that profiling and subsequent targeted content  
 24 can be beneficial to minors, particularly those in vulnerable populations. For example, LGBTQ+  
 25 youth—especially those in more hostile environments who turn to the internet for community and  
 26 information—may have a more difficult time finding resources regarding their personal health,  
 27 gender identity, and sexual orientation. *See Amicus Curiae Br. of Chamber of Progress, IP*  
 28 *Justice, & LGBT Tech Inst.* (“LGBT Tech Am. Br.”), ECF 42-1, at 12–13. Pregnant teenagers are

1 another group of children who may benefit greatly from access to reproductive health information.  
2 *Id.* at 14–15. Even aside from these more vulnerable groups, the internet may provide children—  
3 like any other consumer—with information that may lead to fulfilling new interests that the  
4 consumer may not have otherwise thought to search out. The provision at issue appears likely to  
5 discard these beneficial aspects of targeted information along with harmful content such as  
6 smoking, gambling, alcohol, or extreme weight loss.

7 The State argues that the provision is narrowly tailored to “prohibit[] profiling by default  
8 when done solely for the benefit of businesses, but allows it . . . when in the best interest of  
9 children.” Def.’s Suppl. Br. 6. But as amici point out, what is “in the best interest of children” is  
10 not an objective standard but rather a contentious topic of political debate. *See* LGBT Tech Am.  
11 Br. 11–14. The State further argues that children can still access any content online, such as by  
12 “actively telling a business what they want to see in a recommendations profile – e.g., nature,  
13 dance videos, LGBTQ+ supportive content, body positivity content, racial justice content, etc.”  
14 Radesky Decl. ¶ 89(b). By making this assertion, the State acknowledges that there are wanted or  
15 beneficial profile interests, but that the Act, rather than prohibiting only certain targeted  
16 information deemed harmful (which would also face First Amendment concerns), seeks to prohibit  
17 likely beneficial profiling as well. NetChoice’s evidence, which indicates that the provision would  
18 likely prevent the dissemination of a broad array of content beyond that which is targeted by the  
19 statute, defeats the State’s showing on tailoring, and the Court accordingly finds that State has not  
20 met its burden of establishing that the profiling provision directly advances the State’s interest in  
21 protecting children’s well-being. NetChoice is therefore likely to succeed in showing that the  
22 provision does not satisfy commercial speech scrutiny. *See Yim*, 63 F.4th at 794 (noting  
23 regulation that burdens substantially more speech than is necessary or undermines and counteracts  
24 the state’s interest fails commercial speech scrutiny).

25 (8) Restriction on Collecting, Selling, Sharing, and Retaining Children’s Data  
26 (CAADCA § 31(b)(3))

27 CAADCA § 31(b)(3) states that a covered business shall not “[c]ollect, sell, share, or retain  
28 any personal information that is not necessary to provide an online service, product, or feature

1 with which a child is actively and knowingly engaged . . . unless the business can demonstrate a  
 2 compelling reason that [such an action] is in the best interests of children likely to access the  
 3 online service, product, or feature.” The State argues that “[e]xcessive data collection and use  
 4 undoubtedly harms children” because children are “unable to avoid harmful unsolicited content—  
 5 including extreme weight loss content and gambling and sports betting ads—directed at them” due  
 6 to the data collection. Def.’s Suppl. Br. 6. As with the previous provision prohibiting profiling,  
 7 this restriction throws out the baby with the bathwater. In seeking to prevent children from being  
 8 exposed to “harmful unsolicited content,” the Act would restrict neutral or beneficial content,  
 9 rendering the restriction poorly tailored to the State’s goal of protecting children’s well-being.  
 10 And—in light of the State’s admission that it seeks to prevent children from consuming particular  
 11 content—the Court emphasizes that the compelling and laudable goal of protecting children does  
 12 not permit the government to shield children from harmful content by enacting greatly  
 13 overinclusive or underinclusive legislation. *See, e.g., Brown v. Ent. Merchants Ass’n*, 564 U.S.  
 14 786, 802–04 (2011) (holding California law prohibiting sale or rental of violent video games to  
 15 minors failed strict scrutiny). For the same reasons described above, *see supra*, at Part  
 16 III(A)(1)(a)(iv)(9), CAADCA § 31(b)(3) NetChoice is likely to succeed in showing the provision  
 17 fails commercial speech scrutiny.

18 (9) Unauthorized Use of Children’s Personal Information (CAADCA §  
 19 31(b)(4))

20 CAADCA § 31(b)(4) prohibits a covered business from using a child’s “personal  
 21 information for any reason other than a reason for which that personal information was collected,  
 22 unless the business can demonstrate a compelling reason that use of the personal information is in  
 23 the best interests of children.” The State clarifies this fairly circular restriction with an example:  
 24 “a business that uses a child’s IP address solely to provide access to its platform cannot also use  
 25 the IP address to sell ads.” Def.’s Suppl. Br. 6. However, the State provides no evidence of a  
 26 harm to children’s well-being from the use of personal information for multiple purposes. *See id.*  
 27 To the extent the harm is the same profiling concern discussed in the prior two sections, the State  
 28 has not met its burden to show that the instant provision is not similarly overbroad. *See supra*, at

1 Parts III(A)(1)(a)(iv)(7)–(8). Because the State has not established a real harm that the provision  
2 materially alleviates, NetChoice will likely succeed in showing that the provision fails commercial  
3 speech scrutiny. *See Yim*, 63 F.4th at 794.

4 (10) Use of Dark Patterns (CAADCA § 31(b)(7))

5 The last CAADCA provision challenged by NetChoice prohibits the “[u]se [of] dark  
6 patterns to lead or encourage children to provide personal information beyond what is reasonably  
7 expected to provide that online service, product, or feature[,] to forego privacy protections, or to  
8 take any action that the business knows, or has reason to know, is materially detrimental to the  
9 child’s physical health, mental health, or well-being.” CAADCA § 31(b)(7). Dark patterns are  
10 design features that “nudge” individuals into making certain decisions, such as spending more  
11 time on an application. Def.’s Suppl. Br 7; *see also* Opp’n 9 (describing dark patterns as  
12 “interfaces designed or manipulated with the substantial effect of subverting or impairing user  
13 autonomy, decision-making, or choice”); Radesky Decl. ¶ 54 (“[D]esign features that manipulate  
14 or nudge the user in a way that meets the technology developer’s best interests – at the expense of  
15 the user’s interests (i.e., time, money, sleep) – have been termed ‘dark patterns.’”). The State  
16 argues that businesses use dark patterns to “nudge children into making decisions that are  
17 advantageous to businesses,” and that “dark patterns can make it difficult or impossible for  
18 children to avoid harmful content.” Def.’s Suppl. Br. 7. NetChoice contends that the term “dark  
19 patterns” has also been “construed by scholars to reach commonplace features that simplify and  
20 improve user experience, such as standard ‘autoplay’ and ‘newsfeed’ functions that recommend  
21 personalized content.” Mot. 6 (citation omitted).

22 The instant provision can be analytically divided into three parts. It first prohibits the use  
23 of dark patterns to encourage children to “provide personal information beyond what is reasonably  
24 expected to provide that online service, product, or feature.” CAADCA § 31(b)(7). This  
25 prohibition is similar to the profiling restrictions discussed above in that (1) the State has not  
26 shown a harm resulting from the provision of more personal information “beyond what is  
27 reasonably expected” for the covered business to provide its online service, product, or feature,  
28 and (2) to the extent the harm is the use of profiling information to present harmful content to a

1 child, the State has not shown that the instant provision is sufficiently tailored to survive  
2 commercial speech scrutiny. *See supra*, at Parts III(A)(1)(a)(iv)(7)–(9).

3 Second, the provision prohibits the use of dark patterns to encourage a child to “forego  
4 privacy protections.” CAADCA § 31(b)(7). However, the State has not shown that dark patterns  
5 causing children to forego privacy protections constitutes a real harm. *See Yim*, 63 F.4th at 794.  
6 Many of the examples of dark patterns cited by the State’s experts—such as making it easier to  
7 sign up for a service than to cancel it or creating artificial scarcity by using a countdown timer,  
8 Egelman Decl. ¶ 51, or sending users notifications to reengage with a game or auto-advancing  
9 users to the next level in a game, Radesky Decl. ¶ 55—are not causally connected to an identified  
10 harm. *See Brown*, 564 U.S. at 799 (finding lack of “direct causal link between violent video  
11 games and harm to minors” showed government had not identified “actual problem in need of  
12 solving,” so that law failed strict scrutiny); *Yim*, 63 F.4th at 794 (noting commercial speech  
13 scrutiny requires government to show “the harms it recites are real”)

14 The most concrete potential harm the Court can find is in Dr. Radesky’s assertion that  
15 “[m]anipulative dark patterns are known to cause monetary harm to children,” based on a March  
16 2023 FTC complaint requiring a game developer to pay \$245 million “as a penalty for the use of  
17 dark patterns to manipulate users into making purchases.” Radesky Decl. ¶ 56. The State does  
18 not, however, suggest that the CAADCA is an attempt to address monetary harms to children. *See*  
19 *generally* Opp’n; Def.’s Suppl. Br. Similarly, although the State points to an existing federal law  
20 limiting the practice of making it inconvenient for users to prevent their data from being sold or  
21 shared, *see* Def.’s Suppl. Br. 7 (citing 16 CFR § 312.7), the State does not show how this law  
22 indicates a harm to minors caused by the sale of personal information. *See generally id.*; Radesky  
23 Decl.; Egelman Decl. To the extent the harm is the use of data to profile users, including children,  
24 the State has not shown that the provision is appropriately tailored to survive commercial speech  
25 scrutiny for the same reasons described above. *See supra*, at Parts III(A)(1)(a)(iv)(7)–(9). The  
26 Court accordingly finds that the State is not likely to show a harm in dark patterns causing  
27 children to forego privacy protections, so that NetChoice is likely to succeed in showing that this  
28 restriction fails commercial speech scrutiny. *See Junior Sports Mags.*, 2023 WL 5945879, at \*7

1 (reversing denial of preliminary injunction and reasoning that “[i]n the end, California spins a web  
2 of speculation—not facts or evidence—to claim that its restriction on speech will significantly  
3 curb” an alleged harm).

4 The last of the three prohibitions of CAADCA § 31(b)(7) concerns the use of dark patterns  
5 to “take any action that the business knows, or has reason to know, is materially detrimental” to a  
6 child’s well-being. The State here argues that dark patterns cause harm to children’s well-being,  
7 such as when a child recovering from an eating disorder “must both contend with dark patterns  
8 that make it difficult to unsubscribe from such content and attempt to reconfigure their data  
9 settings in the hope of preventing unsolicited content of the same nature.” Def.’s Suppl. Br. 7; *see*  
10 *also* Amicus Curiae Br. of Fairplay & Public Health Advocacy Inst. (“Fairplay Am. Br.”) 4  
11 (noting that CAADCA “seeks to shift the paradigm for protecting children online,” including by  
12 “ensuring that children are protected from manipulative design (dark patterns), adult content, or  
13 other potentially harmful design features.”) (citation omitted), ECF 53-1. The Court is troubled by  
14 the “has reason to know” language in the Act, given the lack of objective standard regarding what  
15 content is materially detrimental to a child’s well-being. *See supra*, at Part III(A)(1)(a)(iv)(7).  
16 And some content that might be considered harmful to one child may be neutral at worst to  
17 another. NetChoice has provided evidence that in the face of such uncertainties about the statute’s  
18 requirements, the statute may cause covered businesses to deny children access to their platforms  
19 or content. *See* NYT Am. Br. 5–6. Given the other infirmities of the provision, the Court declines  
20 to wordsmith it and excise various clauses, and accordingly finds that NetChoice is likely to  
21 succeed in showing that the provision as a whole fails commercial speech scrutiny.

### 22 **iii. Conclusion re Commercial Speech Scrutiny**

23 For the foregoing reasons, the Court finds that NetChoice is likely to succeed in showing  
24 that the CAADCA’s challenged mandates and prohibitions fail commercial speech scrutiny and  
25 therefore are invalid.

### 26 **e. Severability**

27 NetChoice argues that the CAADCA must be enjoined in its entirety because the  
28 challenged provisions of the CAADCA—which are likely invalid—cannot be severed from the

1 Act’s remaining prohibitions and mandates, or from other provisions related to the CAADCA’s  
2 application, penalties, and compliance. Pl.’s Suppl. Br. 6–7 (discussing CAADCA § 31(a)(8),  
3 31(a)(10), 31(b)(5)–(6), 31(b)(8), 32, 33, and 35). The State argues that almost every provision is  
4 severable, and urges the Court to sustain any provisions not found invalid. Def.’s Suppl. Br. 2.

5 “Severability is a matter of state law.” *Sam Francis Found. v. Christies, Inc.*, 784 F.3d  
6 1320, 1325 (9th Cir. 2015) (quoting *Leavitt v. Jane L.*, 518 U.S. 137, 139 (1996)) (alterations  
7 omitted). Under California law, the severability of the invalid parts of a statute depends on  
8 whether such provisions are grammatically, functionally, and volitionally severable from the valid  
9 remainder. *See Calfarm Ins. Co. v. Deukmejian*, 48 Cal. 3d 805, 821–22 (1989) (en banc).  
10 Putting aside the CAADCA provisions setting forth the statute’s title, findings, and definitions,  
11 CAADCA §§ 28–30, the valid remainder of the statute involve: restrictions on monitoring  
12 children’s online behavior and tracking location, CAADCA § 31(a)(8); the provision of responsive  
13 tools for children to exercise their privacy rights and report concerns, *id.* § 31(a)(10); the  
14 collection of precise geolocation data, *id.* §§ 31(b)(5)–(6); the use of age-estimation information,  
15 *id.* § 31(b)(8); the creation of a working group to deliver a report on best practices under the  
16 CAADCA, *id.* § 32; the July 1, 2024 deadline for covered businesses to complete DPIA reports,  
17 *id.* § 33; and the penalties for violations of the CAADCA, *id.* § 35. *See* Pl.’s Suppl. Br. 6–7.

18 The Court first notes that there is no severability clause in the CAADCA that would create  
19 a presumption in favor of “sustaining the valid part” of the statute. *See Garcia*, 11 F.4th at 1120  
20 (citing *Cal. Redevelopment Ass’n v. Matosantos*, 53 Cal. 4th 231, 270 (2011)). Turning to the  
21 question of functional severability, the Court finds dispositive the status of the DPIA provisions.  
22 As noted by NetChoice, the CAADCA provides that the State shall not initiate an action for any  
23 violation of the statute without providing written notice to a covered business identifying specific  
24 provisions of the Act that are alleged to have been violated. CAADCA § 35(c); *see* Pl.’s Suppl.  
25 Br. 7. The Court’s determination that NetChoice is likely to succeed in showing that the DPIA  
26 report requirement is invalid, *see supra*, at Part III(A)(1)(d)(ii)(1), similarly renders likely invalid  
27 a condition precedent for enforcement of the remainder of the statute. Because the CAADCA is  
28 not capable of “separate enforcement” without the DPIA requirement, the DPIA provisions are not

1 functionally severable from the otherwise valid portions of the statute. *People’s Advocate, Inc. v.*  
2 *Super. Ct.*, 181 Cal. App. 3d 316, 332 (1986) (“The remaining provisions must stand on their own,  
3 unaided by the invalid provisions nor rendered vague by their absence nor inextricably connected  
4 to them by policy considerations. They must be capable of separate enforcement.”).

5 Although the Court need not review the severability of any other provision in light of the  
6 DPIA report requirement’s impact on the entire CAADCA, it notes that the age estimation  
7 provision, CAADCA § 31(a)(5), is the linchpin of most of the CAADCA’s provisions, which  
8 specify various data and privacy protections for children. *See id.* §§ 31(a)(6), (b)(1)–(8). The  
9 State concedes only that CAADCA § 31(b)(8)—which prevents the use of personal information  
10 collected to estimate age for any other purpose—is rendered obsolete if the age estimation  
11 provision is deemed unconstitutional. Def.’s Suppl. Br. 3. However, compliance with the  
12 CAADCA’s requirements would appear to generally require age estimation to determine whether  
13 each user is in fact under 18 years old. The age estimation provision is thus also not functionally  
14 severable from the remainder of the statute. *See People’s Advocate*, 181 Cal. App. at 1332.

15 The futility of severance is apparent when one considers the outcome if the Court were to  
16 preliminarily enjoin only the challenged provisions that NetChoice has shown are likely violative  
17 of the First Amendment. The Act would consist of the provisions setting forth the statute’s title,  
18 findings, and definitions; two mandates; three prohibitions; and provisions establishing a working  
19 group, DPIA report deadlines, and penalties for violating the Act. *See* CAADCA §§ 28–30,  
20 31(a)(8), 31(a)(10), 31(b)(5)–(6), 31(b)(8), 32–33, 35. The DPIA report deadline, *id.* § 33, is  
21 meaningless without a DPIA report requirement. Five of the six required recommendations of the  
22 working group track provisions of the Act that are likely invalid. *See id.* § 32(d)(1)–(5). Further,  
23 even the State agrees that one of the three remaining prohibitions—that on collecting age  
24 estimation data, *id.* § 31(b)(8)—“would be made obsolete” in the absence of § 31(a)(5), which  
25 NetChoice has shown is likely invalid. Def.’s Suppl. Br. 3. Accordingly, the only meat left of the  
26 Act would be four unchallenged mandates and prohibitions that together would require covered  
27 businesses to provide children with obvious tracking signals and prominent and responsive tools to  
28 exercise their privacy rights, and to refrain from collecting children’s precise geolocation data.

1 See CAADCA §§ 31(a)(8), 31(a)(10), 31(b)(5)–(6). All of these provisions require businesses to  
 2 know their users’ ages, but the Court has found NetChoice will likely succeed in showing the age  
 3 estimation provision does not pass commercial speech scrutiny. And none of the provisions can  
 4 be enforced without the penalty provision, *id.* § 35, which, as described above, is hamstrung if the  
 5 State cannot determine whether a covered business is in substantial compliance with the likely-  
 6 invalid DPIA report requirement. These interdependencies indicate how intertwined with—and  
 7 thus inseverable from—the challenged provisions are with respect to the valid remainder.

8 Given that multiple provisions of the CAADCA will be preliminarily enjoined by this  
 9 order, and the Court’s determination that these provisions are not functionally severable from the  
 10 presumably valid remainder of the statute, the Court concludes that it cannot sever the likely  
 11 invalid portions from the statute and sustain the remainder. *See Acosta v. City of Costa Mesa*, 718  
 12 F.3d 800, 820 (9th Cir. 2013) (refusing to “rewrite[e] the ordinance in order to save it”) (internal  
 13 alterations and citation omitted).

14 **f. Conclusion re First Amendment Arguments (Claims 1 and 3)**

15 Based on the foregoing, the Court concludes that NetChoice has demonstrated a likelihood  
 16 of success on Claim 1, which asserts that the CAADCA violates the First Amendment because the  
 17 Act’s “speech restrictions . . . fail strict scrutiny and also would fail a lesser standard of scrutiny.”  
 18 Compl. ¶ 82. As noted above, *see supra*, at Part III(A)(1), the Court need not and does not here  
 19 address NetChoice’s likelihood of success on its allegations of additional First Amendment  
 20 violations in Claims 1 and 3.

21 **2. Other Claims**

22 NetChoice has demonstrated a likelihood of success on the merits of Claim 1 brought  
 23 under the First Amendment and, as discussed below, has satisfied the remaining *Winter* factors  
 24 with respect to Claim 1. NetChoice is entitled to preliminary injunctive relief on that basis. Under  
 25 these circumstances, the Court must determine whether it is necessary or advisable to address the  
 26 likelihood of success of NetChoice’s other claims for relief at this time: Claim 4, asserting that  
 27 the CAADCA violates the dormant Commerce Clause; Claim 5, asserting that the CAADCA is  
 28 preempted by COPPA; and Claim 6, asserting that the CAADCA is preempted by Section 230.

1           Once a plaintiff demonstrates that a preliminary injunction is warranted based on the  
2 likelihood of success on one claim, district courts in this circuit generally do not consider whether  
3 the same injunctive relief could be granted based on other claims. *See, e.g., Shawarma Stackz*  
4 *LLC v. Jwad*, No. 21-CV-01263-BAS-BGS, 2021 WL 5827066, at \*19 (S.D. Cal. Dec. 8, 2021)  
5 (“The Court need not reach the merits of the remaining state torts claims that SSL raises because  
6 the Lanham Act claim and the UCL claim are sufficient to sustain a preliminary injunction.”);  
7 *Seiko Epson Corp. v. Nelson*, No. 5:21-cv-00320-JWH-SPx, 2021 WL 5033486, at \*3 (C.D. Cal.  
8 Mar. 31, 2021) (“The Court therefore finds that Plaintiffs have demonstrated a likelihood of  
9 success on the merits with respect to their first claim for relief. Plaintiffs have thus satisfied the  
10 preliminary injunction standard; the Court need not analyze Plaintiffs’ other two claims for  
11 relief.”); *Faison v. Jones*, 440 F. Supp. 3d 1123, 1136 n.3 (E.D. Cal. 2020) (“Because the Court  
12 finds Plaintiffs are likely to succeed on the merits of their viewpoint discrimination theory, the  
13 Court need not and does not address Plaintiffs’ remaining theories.”); *Medina v. Becerra*, No.  
14 3:17-CV-03293 CRB, 2017 WL 5495820, at \*12 (N.D. Cal. Nov. 16, 2017) (“As Medina has  
15 shown a likelihood of success on the merits for his First Amendment claim, this Court need not  
16 address Medina’s other claims for relief.”). This Court sees no reason to depart from the approach  
17 adopted by other district courts in the Ninth Circuit.

18           Deferring consideration of NetChoice’s Commerce Clause claim is particularly appropriate  
19 here, because the claim presents thorny constitutional issues that the parties briefed prior to  
20 receiving the Supreme Court’s latest guidance in *Nat’l Pork Producers Council v. Ross*, 598 U.S.  
21 356 (2023).<sup>8</sup> *Ross* provides a comprehensive review of case law on the dormant Commerce  
22 Clause, emphasizing that “the Commerce Clause prohibits the enforcement of state laws driven by  
23 economic protectionism—that is, regulatory measures designed to benefit in-state economic  
24 interests by burdening out-of-state competitors,” and clarifying that this “antidiscrimination  
25 principle lies at the ‘very core’ of the Court’s dormant Commerce Clause jurisprudence.” *Id.*

---

26  
27  
28 <sup>8</sup> The motion and opposition were filed before *Ross* issued. The reply was filed approximately one week after *Ross* was decided, and *Ross* is cited once therein as secondary authority for an assertion made in the brief. *See* Reply 13.

1 (quotation marks, alterations, and citation omitted). The decision may call into question the  
2 dormant Commerce Clause’s application where, as here, the state law at issue does not  
3 discriminate against out-of-state competitors but does have an extraterritorial effect. *Ross*  
4 observes that “[i]n our interconnected national marketplace, many (maybe most) state laws have  
5 the ‘practical effect of controlling’ extraterritorial behavior,” and concludes that extraterritorial  
6 effects alone are insufficient to implicate the dormant Commerce Clause. *See id.* at 1156–57. In  
7 the Court’s view, it would be imprudent to engage in an analysis of NetChoice’s dormant  
8 Commerce Clause claim where such analysis is unnecessary to a ruling on the present motion and  
9 the Court does not have the benefit of the parties’ views on the impact of *Ross*.

10 With respect to NetChoice’s preemption claims, the Court’s initial view is that neither  
11 would support the requested preliminary injunction. Claim 5 asserts that the CAADCA is  
12 preempted by COPPA, which contains a preemption clause providing, “No State or local  
13 government may impose any liability for commercial activities or actions by operators in interstate  
14 or foreign commerce in connection with an activity or action described in this chapter that is  
15 *inconsistent* with the treatment of those activities or actions under this section.” 15 U.S.C.A. §  
16 6502(d) (emphasis added). NetChoice claims that the CAADCA is “inconsistent” with COPPA in  
17 the following respects: the CAADCA applies broadly to services “likely to be accessed” by  
18 children, whereas COPPA applies only to online services “directed” to children; the CAADCA  
19 imposes privacy obligations that are not required by COPPA; and the CAADCA imposes  
20 substantive obligations that far exceed those imposed by COPPA. *See id.* ¶¶ 114–16. NetChoice  
21 additionally claims that the statutes are inconsistent because the CAADCA prohibits conduct that  
22 is permitted under COPPA, including profiling a child by default and using dark patterns to  
23 encourage children to provide personal information. *See id.* ¶ 117.

24 The Ninth Circuit recently held in *Jones v. Google LLC*, 73 F.4th 636, 642 (9th Cir. 2023),  
25 that a state law is not “inconsistent” with COPPA for preemption purposes unless the state law  
26 contains requirements that contradict those of COPPA or “stand as obstacles to federal objectives”  
27 embodied in COPPA. A state law that supplements or requires the same thing as COPPA is not  
28 inconsistent with COPPA. *See id.* In the Court’s view, it is not clear that the cited provisions of

1 the CAADCA contradict, rather than supplement, those of COPPA. Nor is it clear that the cited  
2 provisions of the CAADCA would stand as an obstacle to enforcement of COPPA. An online  
3 provider might well be able to comply with the provisions of both the CAADCA and COPPA,  
4 with the possible exception of the CAADCA provisions identified in paragraph 117 of the  
5 complaint. However, a determination whether those are inconsistent with COPPA for preemption  
6 purposes would require a careful and nuanced analysis. It would make little sense to engage in  
7 such analysis at this stage of the proceedings in light of the fact that NetChoice is entitled to the  
8 requested injunctive relief based on its First Amendment claims.

9 Claim 6 asserts that the CAADCA is preempted by Section 230. Section 230 “protects  
10 certain internet-based actors from certain kinds of lawsuits.” *Barnes*, 570 F.3d at 1099. As  
11 relevant here, Section 230(c)(1) provides that “[n]o provider or user of an interactive computer  
12 service shall be treated as the publisher or speaker of any information provided by another  
13 information content provider.” 47 U.S.C. § 230(c)(1). Section 230(c)(2) provides that “[n]o  
14 provider or user of an interactive computer service shall be held liable on account of . . . any action  
15 voluntarily taken in good faith to restrict access to or availability of material that the provider or  
16 user considers to be . . . objectionable[.]” 47 U.S.C. § 230(c)(2)(A). NetChoice contends that the  
17 CAADCA’s requirement that online providers enforce their “published terms, policies, and  
18 community standards,” CAADCA § 31(a)(9), and restrictions on the use of minors’ personal  
19 information, CAADCA § 31(b)(1), (3), (4), (7), are inconsistent with Section 230. NetChoice  
20 claims that those inconsistencies result in preemption of the CAADCA under § 230(e), which  
21 provides that “[n]o cause of action may be brought and no liability may be imposed under any  
22 State or local law that is inconsistent with this section.” 47 U.S.C. § 230(e)(3). Section 230 may  
23 be implicated by an online provider’s enforcement of its policies and other acts in compliance with  
24 the CAADCA, but it is difficult (if not impossible) to make that determination without knowing  
25 what policies or acts are at issue. For that reason, it is the Court’s view that a facial challenge to  
26 the CAADCA is not the appropriate context in which to consider the applicability of § 230.

27 Accordingly, the Court need not and does not determine whether NetChoice is likely to  
28 succeed on the merits of its claims grounded in the dormant Commerce Clause, COPPA, and

1 Section 230. The Court limits its consideration of the remaining *Winter* factors to Claim 1 under  
2 the First Amendment, namely, irreparable harm, the balance of equities, and the public interest.

3 **B. Irreparable Harm**

4 “The loss of First Amendment freedoms, for even minimal periods of time, unquestionably  
5 constitutes irreparable injury.” *Elrod v. Burns*, 427 U.S. 347, 373 (1976); *see also Baird*, 2023  
6 WL 5763345, at \*3. Loss of free speech rights resulting from a threat of enforcement rather than  
7 actual enforcement constitutes irreparable harm. *See Cuvillo v. City of Vallejo*, 944 F.3d 816,  
8 833 (9th Cir. 2019). Consequently, “[i]rreparable harm is relatively easy to establish in a First  
9 Amendment case.” *CTIA - The Wireless Ass’n v. City of Berkeley*, 928 F.3d 832, 851 (9th Cir.  
10 2019). “[A] party seeking preliminary injunctive relief in a First Amendment context can  
11 establish irreparable injury . . . by demonstrating the existence of a colorable First Amendment  
12 claim.” *Id.* (quotation marks and citation omitted). As discussed above, NetChoice has done more  
13 than merely assert a colorable First Amendment claim; it has established a likelihood of success  
14 on the merits of its claim that the CAADCA violates the First Amendment.

15 The Court finds unpersuasive the State’s argument that the threat of enforcement is  
16 insufficient to establish irreparable injury because the Act’s challenged provisions do not take  
17 effect until July 1, 2024. That date is less than a year away. “One does not have to await the  
18 consummation of threatened injury to obtain preventive relief. If the injury is certainly impending,  
19 that is enough.” *Pac. Gas & Elec. Co. v. State Energy Res. Conservation & Dev. Comm’n*, 461  
20 U.S. 190, 201 (1983) (citation omitted). Moreover, NetChoice presents evidence that businesses  
21 already are expending time and funds preparing for enforcement of the CAADCA. *See Roin Decl.*  
22 ¶¶ 20, 24–25; *Cairella Decl.* ¶¶ 14, 19–22; *Masnack Decl.* ¶¶ 12, 14–19; *Paolucci Decl.* ¶¶ 16–18;  
23 *Szabo Decl.* ¶¶ 5–7, 12–17. Requiring businesses to proceed with such preparations without  
24 knowing whether CAADCA is valid “would impose a palpable and considerable hardship” on  
25 them. *See Pac. Gas & Elec.*, 461 U.S. at 201–02 (“To require the industry to proceed without  
26 knowing whether the moratorium is valid would impose a palpable and considerable hardship on  
27 the utilities[.]”).

28 The Court has no difficulty finding that NetChoice has established a likelihood of

1 irreparable harm absent issuance of the requested preliminary injunction.

2 **C. Balance of Equities / Public Interest**

3 “Where the government is a party to a case in which a preliminary injunction is sought, the  
4 balance of the equities and public interest factors merge.” *Roman v. Wolf*, 977 F.3d 935, 940-41  
5 (9th Cir. 2020); *see also Baird*, 2023 WL 5763345, at \*2. As discussed above, NetChoice has  
6 demonstrated a likelihood of success in proving that the CAADCA violates the First Amendment.  
7 “[I]t is always in the public interest to prevent the violation of a party’s constitutional rights.”  
8 *Melendres v. Arpaio*, 695 F.3d 990, 1002 (9th Cir. 2012) (quotation marks and citation omitted).  
9 Moreover, the State “cannot reasonably assert that it is harmed in any legally cognizable sense by  
10 being enjoined from constitutional violations.” *Zepeda v. U.S. I.N.S.*, 753 F.2d 719, 727 (9th Cir.  
11 1983).

12 The State cites *Maryland v. King*, 567 U.S. 1301, 1303 (2012), for the proposition that  
13 “[a]ny time a State is enjoined by a court from effectuating statutes enacted by representatives of  
14 its people, it suffers a form of irreparable injury.” *King* did not involve a motion for preliminary  
15 injunction, but rather Maryland’s application for a stay of a state appellate court’s decision  
16 overturning King’s rape conviction pending disposition of Maryland’s petition for writ of  
17 certiorari. *See id.* at 1301. The state appellate court had determined that Maryland’s DNA  
18 collection statute, which had authorized law enforcement officers to collect King’s DNA sample,  
19 violated the Fourth Amendment. *See id.* The Supreme Court found that a stay was warranted  
20 based on its determination that there was a reasonable probability it would grant certiorari. *See id.*  
21 at 1302. It was in that context that the Supreme Court discussed the harm to the State of Maryland  
22 flowing from its inability to effectuate its DNA collection statute. *See id.* at 1303. The quoted  
23 language has no application here, where (unlike the State of Maryland) the State of California has  
24 not made a showing that the challenged statute passes constitutional muster.

25 The Court finds that NetChoice has established that the last two factors, the balance of  
26 equities and the public interest, favor issuance of the requested injunction.

27 **D. Conclusion**

28 In conclusion, the Court finds that all of the *Winter* factors favor granting the requested

1 preliminary injunction. With respect to the first and most important factor, likelihood of success  
2 on the merits, NetChoice has demonstrated that it is likely to succeed on at least one of its First  
3 Amendment theories set forth in Claim 1 of the complaint. NetChoice also has satisfied the  
4 second factor by demonstrating a likelihood that it will suffer irreparable injury if the requested  
5 preliminary injunction does not issue. Finally, NetChoice has satisfied the third and fourth factors  
6 by showing that the balance of the equities and the public interest favor issuance of the requested  
7 preliminary injunction.

8 “If a movant makes a sufficient demonstration on all four *Winter* factors (three when as  
9 here the third and fourth factors are merged), a court must not shrink from its obligation to enforce  
10 his constitutional rights, regardless of the constitutional right at issue.” *Baird*, 2023 WL 5763345,  
11 at \*3 (quotation marks, citation, and brackets omitted). “It may not deny a preliminary injunction  
12 motion and thereby allow constitutional violations to continue simply because a remedy would  
13 involve intrusion into an agency’s administration of state law.” *Id.* (quotation marks and citation  
14 omitted).

15 NetChoice’s motion for preliminary injunction is GRANTED.

#### 16 **E. Security**

17 Federal Rule of Civil Procedure 65(c) provides that “[t]he court may issue a preliminary  
18 injunction or a temporary restraining order only if the movant gives security in an amount that the  
19 court considers proper to pay the costs and damages sustained by any party found to have been  
20 wrongfully enjoined or restrained.” Fed. R. Civ. P. 65(c). The Ninth Circuit has “recognized that  
21 Rule 65(c) invests the district court with discretion as to the amount of security required, *if any.*”  
22 *Jorgensen v. Cassidy*, 320 F.3d 906, 919 (9th Cir. 2003) (internal quotation marks and citation  
23 omitted) (italics in original). Thus, the district court has discretion to dispense with the filing of a  
24 bond altogether, or to require only a nominal bond. *See id.* (“The district court may dispense with  
25 the filing of a bond when it concludes there is no realistic likelihood of harm to the defendant from  
26 enjoining his or her conduct.”); *see also Save Our Sonoran, Inc. v. Flowers*, 408 F.3d 1113, 1126  
27 (9th Cir. 2005) (“The district court has discretion to dispense with the security requirement, or to  
28 request mere nominal security, where requiring security would effectively deny access to judicial

1 review.”) (citation omitted).

2           Neither party addresses the issue of security in its briefing. NetChoice’s proposed order,  
3 filed with its motion for preliminary injunction, provides that the requested injunctive relief will  
4 issue without the requirement of any security bond because NetChoice has shown a likelihood of  
5 success and the State will not suffer any harm from maintaining the status quo. *See* Proposed  
6 Order, ECF 29-31. The State argues, as a reason to deny injunctive relief altogether, that issuance  
7 of the injunction “would inflict irreparable harm upon California by preventing enforcement of a  
8 statute enacted by representatives of the people.” Opp’n at 30. The State’s argument gives no  
9 indication, however, whether the State believes a bond should be required in the event a  
10 preliminary injunction issues, or the appropriate amount of such bond. *See id.*

11           The Court finds it appropriate to issue the preliminary injunction without requiring security  
12 based on NetChoice’s showing that it is likely to prevail on its claim that enforcement of the  
13 CAADCA violates the First Amendment—and thus could not be lawfully enforced by the State—  
14 and the absence of any argument that a security bond should be required.

**IV. ORDER**

- (1) Plaintiff NetChoice’s motion for preliminary injunction is GRANTED as follows:
- (a) Rob Bonta, Attorney General of the State of California, and anyone acting in concert with his office are ENJOINED from enforcing the California Age-Appropriate Design Code Act;
  - (b) This preliminary injunction shall issue without the requirement of a security bond; and
  - (c) This preliminary injunction shall take effect immediately and shall remain in effect until otherwise ordered by the Court.
- (2) This order terminates ECF 29.

Dated: September 18, 2023
