10

Plaintiff filed suit on September 22, 2011, alleging infringement of two of its patents: U.S. Patent No. 6,326,199, "Gapped 2' Modified Oligonucleotides" ("199 Patent") and U.S. Patent No. 6,066,500 "Antisense Modulation of Beta Catenin Expression" ("500 Patent"). (ECF No. 1.) Both the '199 Patent and the '500 Patent cover methods and compounds related to the modification of genetic material.

7 Ribonucleic acid, or RNA, is a single-stranded molecule that carries genetic 8 instructions. Messenger RNA, or mRNA, carries genetic instructions from a cell's nucleus to the cell's cytoplasm, where it provides instructions for the production of proteins. Nucleotides from the basic structural unit of nucleic acids like mRNA.

The '199 Patent covers the synthesis and use of short strands of nucleotides 11 12 called oligonucleotides, antisense molecules, or – very broadly – macromolecules. The 13 '199 Patent claims a method whereby antisense molecules are hybridized with complimentary strands of mRNA in a target cell to modify the target cell's behavior in 14 15 some way.

To ensure successful hybridization, the antisense molecules covered by the '199 16 Patent possess features that make degradation of the molecule less likely and that make 17 binding with the complimentary strand more likely. 18

If successfully hybridized, the antisense molecule modifies the target cell to, for 19 example, decrease production of a certain protein. Indeed, the '500 Patent covers the 20 21 synthesis and use of an antisense molecule that specifically reduces production of the protein Beta catenin – a protein whose overproduction has been tied to certain cancers. 22

23 Plaintiff alleges in its Complaint that Defendants have used the molecules claimed by the '199 Patent, and the method of contacting cells with those molecules 24 also claimed in the '199 Patent, to "identify [gene] targets and/or to screen gapmer ... 25 antisense molecules for activity inhibiting a target." Plaintiff alleges Defendants sell 26 and offer for sale in the U.S. the patented methods of the '199 Patent. Plaintiff further 27 alleges that Defendants have infringed the '500 Patent by offering for sale and selling 28

1 antisense compounds that inhibit Beta catenin production.

Plaintiff bases its infringement contentions on four agreements between 2 Defendants and various U.S. pharmaceutical companies: a January 4, 2011 agreement 3 with Pfizer, Inc.; a July 27, 2006 agreement with Enzon Pharmaceuticals, Inc.; an 4 5 August 24, 2009 agreement with Shire PLC; and a December 19, 2007 agreement with GlaxoSmithKline. Plaintiff alleges each of the agreements infringe the '199 Patent 6 (and that the Enzon agreement also infringes the '500 Patent) because the agreements 7 require Defendants to supply the above pharmaceutical companies with antisense 8 molecules that are covered by the '199 and '500 Patents for use in connection with 9 therapeutic targets identified by the pharmaceutical companies. 10

On December 8, 2011, Defendants filed an answer and counterclaims against
Plaintiff. (ECF No. 12.) On December 12, 2011, Plaintiff filed a reply to Defendants'
counterclaims. (ECF NO. 14.)

Thereafter, before a case management conference was held (and thus before
discovery commenced), Defendants filed a motion for summary judgment. (ECF No.
17.) Defendants asserted they are entitled to judgment as a matter of law pursuant to
the safe harbor provision set forth in 35 U.S.C. § 271(e)(1).¹ Defendants claimed their
use of the antisense technology falls within the safe harbor provision because the only
purpose for Defendants' use of the technology is to develop antisense drugs that target
conditions that have already been identified by Defendants' pharmaceutical partners

21

22

23

24

¹ Section 271(e)(1) provides: "It shall not be an act of infringement to make, use, offer to sell, or sell within the United States or import into the United States a patented invention . . . solely for uses reasonably related to the development and submission of information under a Federal law which regulates the manufacture, use, or sale of drugs[.]"

The safe harbor provision applies "where a drugmaker has a reasonable basis for believing that a patented compound may work, through a particular biological process, to produce a physiological effect, and uses the compound in research that, if successful, would be appropriate to include in a submission to the FDA, the use is 'reasonably related' to the 'development and submission for information . . . under federal law.'" <u>Merck KGaA v. Integra Lifesciences I, Ltd</u>, 545 U.S. 193, 207 (2005).

The safe harbor provision does not apply when a biological compound is used to perform "basic scientific research" or as a "research tool." <u>Id.</u> at 205-06.

in the U.S. That is, Defendants claimed their use of the antisense technology falls within the safe harbor provision because Defendants' pharmaceutical partners ultimately use Defendants' work in connection with seeking FDA approval of antisense drugs.

4

5 On September 19, 2012, prior to the case's transfer to this Court, Judge Moskowitz denied Defendants' Motion for Summary Judgment without prejudice. 6 (ECF No. 53.) Judge Moskowitz found Defendants had offered insufficient evidence 7 as to Defendants' specific uses of the infringing compounds, methods, and processes. 8 Judge Moskowitz further found a dispute of material fact as to whether Defendants do 9 not perform any antisense technology work until a therapeutic target has already been 10 identified by a pharmaceutical partner. Judge Moskowitz concluded, stating, "To the 11 12 extent [Defendants] [are] selling and/or licensing infringing 'platform' technology so 13 that another company can 'discover and develop' drug candidates-rather than developing and/or licensing/selling specific drug candidates itself—[Defendants] could 14 be using or selling patented technology to perform 'basic scientific research." And 15 such use, of course, would not fall within the safe harbor. 16

In denying Defendants' Motion for Summary Judgment, Judge Moskowitz
permitted the parties 120 days to conduct limited discovery related to the issues raised
by Defendants' safe harbor defense. Judge Moskowitz further granted Defendants
leave to re-file a motion for summary judgment on the safe harbor issue within 30 days
following close of the limited discovery period. In a separate order, Judge Moskowitz
stayed all discovery and disclosure obligations unrelated to the Defendants' safe harbor
defense until January 16, 2012. (ECF No. 54.)

Judge Crawford held a CMC on July 20, 2012, and issued a case management
conference order on July 26, 2012 ("First Scheduling Order"). (ECF Nos. 41, 42.) The
First Scheduling Order set a deadline of August 20, 2012, to file "[a]ny motion to join
other parties, to amend the pleadings, or to file additional pleadings." (ECF No. 42.)
On October 12, 2012, the case was transferred to this Court. (ECF No. 57.)

On January 31, 2013, Judge Crawford found good cause to vacate the First 2 Scheduling Order. (ECF No. 94.) Judge Crawford gave Plaintiff until February 1, 2013 to file a motion for leave to file a first amended complaint, continued the stay 3 limiting discovery to the safe harbor issue until April 5, 2013, and informed the parties 4 5 that a new briefing scheduling on Defendants' safe harbor summary judgment motion would be set following this Court's ruling on Plaintiff's motion for leave to amend. 6 Plaintiff thereafter filed the instant motion. 7

1

DISCUSSION

I. Legal Standard

10 Leave to amend a complaint after a responsive pleading has been filed "shall be freely given when justice so requires." Fed. R. Civ. P. 15(a). Granting leave to amend 11 rests in the sound discretion of the trial court. Int'l Ass'n of Machinists & Aerospace 12 13 Workers v. Republic Airlines, 761 F.2d 1386, 1390 (9th Cir. 1985). This discretion must be guided by the strong federal policy favoring the disposition of cases on the 14 merits and permitting amendments with "extreme liberality." DCD Programs Ltd. v. 15 Leighton, 833 F.2d 183, 186 (9th Cir. 1987). "Amendments seeking to add claims are 16 17 to be granted more freely than amendments adding parties." Union Pacific R.R. Co. v. Nevada Power Co., 950 F.2d 1429, 1432 (9th Cir. 1991). 18

Courts should consider five factors in determining whether a plaintiff ought to 19 be granted leave to amend: undue delay, bad faith or dilatory motive, failure to cure 20 21 deficiencies by amendments previously allowed, prejudice to the opposing party, and futility of amendment. Foman v. Davis, 371 U.S. 178, 182 (1962). "Absent prejudice, 22 or a strong showing of any of the remaining Foman factors, there exists a presumption 23 under Rule 15(a) in favor of granting leave to amend." Eminence Capital, LLC v. 24 25 Aspeon, Inc., 316 F.3d 1048, 1052 (9th Cir. 2003) (emphasis added).

II. Analysis 26

27 Plaintiff seeks to amend its Complaint by: (1) adding an allegation of direct infringement under 35 U.S.C. § 271(b); (2) expand the factual allegation of direct 28

infringement to include new information on Defendants' previously undisclosed relationship with a third party; and (3) add a third cause of action for Defendants' infringement of U.S. Patent No. 6,440,739 ("'739 Patent"). 3

1

2

Plaintiff argues it should be granted leave to amend because all of the Foman 4 factors tip in its favor. Plaintiff asserts it has not unduly delayed in seeking leave to 5 amend because Plaintiff was not aware of the facts underlying its proposed 6 amendments until November 2012. Plaintiff further asserts it is seeking leave to amend 7 in good faith and that its amendments are not futile. Plaintiff argues its amendments 8 will not prejudice Defendants because of the relatively early stage of these 9 proceedings: discovery has only proceeded on a limited basis, no full scheduling order 10 has issued, and the parties have not yet begun complying with the many requirements 11 12 found in the Patent Local Rules. Plaintiff lastly argues that Judge Crawford's January 13 31, 2013 order vacating the First Scheduling Order provides further support for Plaintiff's request for leave to amend. 14

Defendants argue in response that Plaintiff has unduly delayed in seeking leave 15 to amend because Plaintiff had knowledge of the facts underlying its proposed 16 17 amendments at the time Plaintiff filed its initial complaint and because Plaintiff was not diligent with respect to adding its proposed claim for infringement of the '739 Patent. 18 Defendants argue Plaintiff's amendments would prejudice Defendants by (1) 19 potentially delaying the end of this litigation, as Defendants' safe harbor summary 20 21 judgment motion will be dispositive of the entire case; and (2) expanding discovery into the activities of several third parties. Defendants argue that, at a minimum, 22 Plaintiff should be denied leave to amend without prejudice and allowed to re-file the 23 motion after this Court's ruling on Defendants' renewed summary judgment motion. 24

25 The Court first notes that Defendants do not argue Plaintiff's proposed amendments are futile or sought in bad faith; thus, the Court does not consider those 26 factors. As to delay, the Court finds Plaintiff did not unduly delay in seeking leave to 27 file a first amended complaint. Given the complexity of this case and the number of 28

6

1	document	s produced in the limited discovery that has occurred thus far, the Court finds
2	any delay	by Plaintiff was reasonable. The Court further finds Defendants have not
3	demonstra	ated they would be significantly prejudiced by Plaintiff's proposed
4	amendme	nts given the relatively early stage of these proceedings. The Court therefore
5	concludes	that Defendants have not made a showing sufficient to overcome the
6	"presumption under Rule 15(a) in favor of granting leave to amend." <u>See Eminence</u>	
7	<u>Capital</u> , 316 F.3d at 1052.	
8		<u>CONCLUSION</u>
9	Aft	er a careful review of the parties' submissions and the records in this matter,
10	and for the foregoing reasons, IT IS HEREBY ORDERED that:	
11	1.	Plaintiff's Motion for Leave to File a First Amended Complaint, (ECF
12		No. 95), is GRANTED ;
13	2.	The hearing on Plaintiff's Motion for Leave to File a First Amended
14		Complaint, currently set for April 26, 2013, is VACATED;
15	3.	Plaintiff shall file its First Amended Complaint on or before April 26,
16		2013;
17	4.	The limited discovery period having concluded on April 5, 2013, all
18		discovery and disclosure obligations are STAYED pending this Court's
19		decision on Defendant's renewed motion for summary judgment on the
20		safe harbor issue;
21	5.	Notwithstanding Judge Crawford's instructions to contact her chambers
22		to set a status conference, (see ECF No. 94 at \P 5), Defendants' counsel
23		is instead directed to contact this Court's chambers on or before April 26,
24		2013, to obtain a hearing date for Defendants' renewed motion for
25		summary judgment on the safe harbor issue.
26	DATED:	April 23, 2013
27		HON. GONZALO P. CURIEL
28		United States District Judge
