7 UNITED STATES DISTRICT COURT  
8 SOUTHERN DISTRICT OF CALIFORNIA

9  
10 SPH AMERICA, LLC,  
11 Plaintiff,

Case No.: 13-CV-2323-CAB-KSC

12 v.

**ORDER DISMISSING CASE FOR  
LACK OF STANDING**

13 HUAWEI TECHNOLOGIES, CO., LTD.,  
14 FUTUREWEI TECHNOLOGIES, INC.,  
15 HUAWEI DEVICE USA, INC.

16 Defendants.  
17

18 On December 2, 2016, the Court entered an order requiring Plaintiff SPH America,  
19 LLC (“SPH America”) to show cause as to why it has standing to bring this lawsuit. Both  
20 sides filed written responses to the order, and the Court held a hearing on January 17, 2017.  
21 For the reasons set forth below, the Court finds that SPH America does not have standing.

22 **I. Background**

23 This is a patent infringement lawsuit in which SPH America alleges that Defendants  
24 Huawei Technologies, Co., Ltd., Futurewei Technologies, Inc., and Huawei Device USA,  
25 Inc., (collectively Defendants or “Huawei”) infringe nine United States Patents, Nos.: RE  
26 40,385; RE 40,253; 5,960,029; 8,121,173; RE 44,507; RE 44,530; 8,565,346; 8,532,231;  
27  
28

1 and 7,443,906.<sup>1</sup> These patents are all owned by the Electronics and Telecommunications  
2 Research Institute (“ETRI”), a South Korean research organization. In 2006, ETRI entered  
3 into an agreement to license certain patents and their family members to SPH, a Korean-  
4 based entity. [Doc. No. 266-2.] On or about February 27, 2007, the license rights were  
5 transferred from the Korean-based SPH to plaintiff SPH America. [Doc. No. 266-6 at 3.<sup>2</sup>]  
6 The patents at issue in this litigation are subject to the terms of that agreement and its  
7 amendments. [Doc. Nos. 266-2; 266-4; 266-6; and 266-8.]

8 The question of subject matter jurisdiction came to the attention of the Court as a  
9 result of a discovery dispute between the parties. The patents at issue were also asserted  
10 by SPH America in a related lawsuit against Samsung, Case No. 14-CV-1474-CAB-KSC.  
11 Huawei requested documentation between SPH America and Samsung regarding the terms  
12 of a license agreement (the “Samsung License”) reached in settlement of that litigation.  
13 [Doc. No. 244-3.] SPH America responded that ETRI, the owner of the patents, conducted  
14 the licensing discussions and that SPH America had no direct email communications with  
15 Samsung prior to signing Samsung License. [Id.] SPH America did not provide any  
16 documents evidencing that it directed ETRI’s negotiations, and the documents provided  
17 indicated that ETRI simply sent the final agreement to SPH America for signature when  
18 the deal was completed. These circumstances raised concerns about SPH America’s true  
19 role as a licensee and the intentions of ETRI and SPH America regarding their contractual  
20 arrangement.

21 These concerns were further heightened by a public statement prepared by ETRI’s  
22 legal department [see Doc. No. 276-3, at 3-4], and issued in 2010 [Doc. No. 262-11],  
23 explaining the relationship between ETRI and SPH America. ETRI described SPH  
24 America as its litigation agent, acting on ETRI’s behalf according to ETRI’s will, to  
25

---

26  
27 <sup>1</sup> On May 13, 2015, the Court entered an order invalidating the ‘906 patent as indefinite. [Doc. No. 93].  
28 That order is nullified by this subsequent determination that SPH America did not have standing to bring  
an infringement lawsuit on the patents at issue, including the ‘906 patent.

<sup>2</sup> Page references of docket entries are to the page numbers assigned by CM/ECF.

1 enforce ETRI's patents in the United States for a portion of any recovery. In other words,  
2 ETRI admitted the arrangement is "effectively [the] grant [of] a 'hunting license,' solely  
3 for the purpose of litigation, in the form of a *pro forma* exclusive license." *Prima Tek II*,  
4 *LLC v. A-Roo Co.*, 222 F.3d 1372, 1381 (Fed. Cir. 2000). Such an arrangement would not  
5 provide SPH America with standing to sue. Consequently the Court issued an order to  
6 show cause ("OSC") to SPH America to demonstrate it has standing.

## 7 **II. The Terms of the License Arrangement**

8 In summary, the ETRI-SPH America agreement and its amendments purport to grant  
9 an exclusive license to SPH America to use the licensed patents, including to sublicense  
10 them to third parties and bring infringement actions. SPH America, however, is obligated  
11 use its best efforts to make licensing and litigation decisions that protect the interests of  
12 ETRI. SPH bears all the expense of any litigation and is required to pay ETRI between  
13 50% to 70% of any third-party royalties and any litigation proceeds SPH America collects.  
14 SPH America has guaranteed minimum payments to ETRI that increase from  
15 approximately \$268 million per year in 2007, to \$896 million per year from 2016 and  
16 thereafter.

17 ETRI retains title to the patents. SPH America cannot transfer any of its rights or  
18 obligations under the agreement to a third party without consent of ETRI, and SPH  
19 America remains liable to ETRI for the activities of a third party transferee unless those  
20 activities are approved by ETRI, but such consent and approval cannot be unreasonably  
21 withheld by ETRI. All the license rights revert to ETRI if SPH America breaches the  
22 agreement or becomes unable to perform due to bankruptcy, insolvency or any other  
23 similar event. Certain of the licensed patents (the WiFi patents) are deemed to be returned  
24 to ETRI if SPH America fails to make guaranteed royalty payments.

25 In light of the rights conveyed to SPH America, the rights retained by ETRI under  
26 the agreements, and the conduct of the parties evidencing their intentions surrounding the  
27 conveyance, the Court must determine whether SPH America had substantial rights to each  
28

1 of the patents at issue at the time the complaint was filed to have standing to sue in its own  
2 name.

### 3 **III. Legal Standards**

4 “Before a court may exercise jurisdiction over a patent infringement action, it must  
5 be satisfied that, ‘in addition to Article III standing, the plaintiff also possess[e] standing  
6 as defined by § 281 of the Patent Act.’” *Drone Techs., Inc. v. Parrot S.A.*, 838 F.3d 1283,  
7 1292 (Fed. Cir. 2016) (quoting *Alps S., LLC v. Ohio Willow Wood Co.*, 787 F.3d 1379,  
8 1382 (Fed. Cir. 2015)).

9 Article III standing must be present at the time the suit is brought. *Sicom Sys., Ltd.*  
10 *v. Agilent Techs., Inc.*, 427 F.3d 971 975-76 (Fed. Cir. 2005). If a plaintiff lacks standing  
11 at that time, the Court lacks subject matter jurisdiction and the case must be dismissed  
12 pursuant to Rule 12(b)(1). The party “bringing the action bears the burden of establishing  
13 that it has standing.” *Id.* at 976.

14 The party bringing suit has to have a legally protected interest in the patent created  
15 by the Patent Act, so that it would suffer legal injury from an act of infringement, to satisfy  
16 Article III standing. *Propat Int’l Corp. v. RPost, Inc.*, 473 F.3d 1187, 1193 (Fed. Cir.  
17 2007). “A party ... that has the right to exclude others from making, using, and selling an  
18 inventions described in the claims of a patent is constitutionally injured by another entity  
19 that makes, uses, or sells the invention.” *Intellectual Prop. v. TCI Cablevision*, 248 F.3d  
20 1333, 1346 (Fed. Cir. 2001). Thus, if a party has the exclusive right to decide to license or  
21 not to license (i.e., exclude) others from practicing the invention, its interest in the patent  
22 can satisfy the requirement for Article III standing. *See Prima Tek II*, 222 F.3d at 1379  
23 (implicit in the right to exclude is the ability to waive that right, i.e., to license activities  
24 that would otherwise be excluded.)

25 However, even a licensee with a legally protected interest in the patent for  
26 constitutional standing to sue still may not have sufficient interest in the patent to sue alone  
27 in its own name and may need to join the patent owner. *See Propat*, 473 F.3d at 1193. The  
28 Court must assess whether a transfer of rights under a patent conveyed “all substantial

1 rights in the patent to the transferee” and therefore effects a transfer of ownership for  
2 standing purposes. *Id.* at 1189. To do so, the Court must “examine whether the agreement  
3 transferred all substantial rights to the patent” and “whether the surrounding circumstances  
4 indicated an intent to do so.” *Asymmetrx, Inc. v. Biocare Medical, LLC*, 582 F.3d 1314,  
5 1319 (Fed Cir. 2009) (citing *Vaupel Textilmaschinen KG v. Meccanica Euro Italia S.P.A.*,  
6 944 F.2d 870, 874 (Fed. Cir. 1991)).

7 Although there is no definitive list of rights that determine whether a patentee has  
8 transferred away sufficient rights to render a transferee the owner of a patent for standing  
9 purposes, the Federal Circuit has identified certain rights that should be examined:

- 10 (1) The exclusive right to make, use, and sell products or services under  
11 the patent;
- 12 (2) The scope of the transferee’s right to sublicense;
- 13 (3) The nature of provisions regarding reversion of rights to the transferor;
- 14 (4) The right of the transferor to receive a portion of the recovery in  
15 infringement suits brought by the transferee;
- 16 (5) The duration of the rights granted to the transferee;
- 17 (6) The ability of the transferor to supervise and control the transferee’s  
18 activities;
- 19 (7) The obligation of the transferor to continue paying patent maintenance  
20 fees; and
- 21 (8) The nature of any limits on the transferee’s right to assign its interests  
22 in the patent.

23 *See Alfred E. Mann Foun. For Science v. Cochlear Corp.*, 804 F.3d 1354, 1360-61 (Fed.  
24 Cir. 2010). Among these, the exclusive right to make, use and sell products or services  
25 under the patent “is vitally important to an assignment,” while the nature and scope of the  
26 right of the transferee to bring suit and any retained right of the transferor to sue is “the  
27 most important consideration.” *Id.* at 1361.

#### 28 **IV. Discussion**

##### **A. SPH America Lacks Article III Standing**

SPH America’s standing with regard to the ETRI patents was challenged in a motion  
to dismiss in prior litigation, *SPH America LLC v. Acer, Inc. et al.* Civil No. 09cv2525.  
[Doc. No. 266-9.] In its response to this Court’s OSC, SPH America relies heavily on the

1 district court's order in that earlier litigation that SPH America had standing as dispositive  
2 of this issue. [Doc. No. 266-10.] Unlike the previous court, however, this Court finds that  
3 the requirement that SPH America act in ETRI's best interests is a significant restriction  
4 on SPH America's rights. The surrounding circumstances of the transfer of rights,  
5 discussed *infra*, indicate that the intent was for ETRI to retain very substantial control over  
6 the patents. That intention is expressly described in ETRI's public statement interpreting  
7 the contract's "best efforts" restriction and SPH America's role as a licensee in light of that  
8 restriction. The license agreement primarily makes SPH America ETRI's litigation agent  
9 acting on ETRI's behalf. [Doc. No. 262-11.]

10 It is undisputed that ETRI is the owner of each of the patents at issue. Title to each  
11 patent remains in ETRI's name. ETRI's license agreement gives SPH America an  
12 exclusive license to use each of the asserted patents. Defined in that "use" is SPH  
13 America's right to make and sell the patented inventions,<sup>3</sup> as well as to sublicense and  
14 enforce the patents. This right to use however is not an exclusive right.

15 First, ETRI retained the right to use the inventions of the patents to prosecute  
16 continuation, continuation-in-part, and divisional applications of the licensed patents, in its  
17 own name as the owner of the issued patents. *See Asymmetrx*, 582 F.3d at 1320 (retention  
18 of the right by the licensor to use the patented inventions to apply for and prosecute further  
19 patents is inconsistent with the grant of an exclusive right to practice to invention); *Propat*,  
20 473 F.3d at 1190 (retention of the right to seek new patents on the underlying invention is  
21 an implicit retention of the right to use the invention).

---

22  
23  
24 <sup>3</sup> The agreement provides that SPH America is required to pay ETRI 2.5% of the total proceeds from its  
25 manufacture and sale of products using the licensed patents. This provision however is illusory. SPH  
26 America does not make or sell any products. SPH America's counsel acknowledged that SPH America is  
27 a licensing/litigation entity. [See Doc. No. 283 at 10-11, "SPH's revenue stream is derived entirely –  
28 almost entirely from licensing. ... So it doesn't have another way to make money other than pursuing  
action."] ETRI's commercial arrangement with SPH America is essentially the retention of a contingency-  
based legal counsel company. [Doc. No. 262-11.] SPH America bears all the burden and expense of  
enforcing ETRI's patents while ETRI gets 50-70% of the proceeds without the inconvenience and risk of  
protecting its own patents in a foreign forum.

1 Second, SPH America's rights are significantly encumbered and constrained by its  
2 contractual obligation to act in ETRI's best interests coupled with its substantial guarantee  
3 of annual payments to ETRI of proceeds from the sublicensing and enforcement of ETRI's  
4 patents.<sup>4</sup> With its tremendous annual financial obligation to ETRI for the proceeds from  
5 the use of the patented inventions, SPH America cannot realistically choose to exclude any  
6 potential sublicensee. *See generally Abbott Laboratories v. Diamedix Corp.*, 47 F.3d 1128,  
7 1132 (Fed. Cir. 1995) (it is not an exclusive right to sue if it is subject to an obligation not  
8 to prejudice or impair the patent rights in connection with prosecution or settlement).

9 ETRI even summarized this relationship as substantially a contingency fee-based  
10 agreement with important decisions made per ETRI's will so its rights as patentee are  
11 sufficiently protected. [See Doc. No. 262-11 at 4.] *Propat*, 473 F.3d at 1190 (an agreement  
12 that gives the licensee the responsibility to license the patent to third parties, to enforce the  
13 licensing agreements and to sue infringers in exchange for a defined percentage share of  
14 the proceeds of licensing royalties and any judgment or settlement arising out of litigation  
15 did not transfer all substantial rights). Indeed, SPH America has little, if any, right to act  
16 independently or in its own interests, if those interests diverge from ETRI's. *See id.* at  
17 1191 (retention of a substantial share of the proceeds from commercial exploitation is  
18 consistent with the retention of ownership rights in the patent, while allocating to the  
19 licensee the duty to provide licensing and enforcement services); *VirnetX, Inc. v. Microsoft*  
20 *Corp.*, No. 6:07 CV 80, 2008 WL 8894682 at \*5 (E.D. Tex. Jun. 4, 2008) (35% right to net  
21 litigation proceeds and the obligation to protect that equity interest did not support an  
22 exclusive right to sue).

23 The Court is not persuaded by the argument that SPH America and ETRI necessarily  
24 have common interests so the economic reality of this restraint on SPH America's ability  
25

---

26  
27 <sup>4</sup> It cannot reasonably be argued that it was ever the intention or expectation of the parties that the payment  
28 guarantees would be met in whole or in part by SPH America selling products. SPH America's license  
rights can be terminated if it does not meet its guaranteed payments, and it can only make those payments  
by licensing and enforcing the patents on behalf of ETRI.

1 to act independently is inconsequential. Although ETRI has given SPH America the right  
2 to select targets for licenses and litigation, the agreement requires SPH America to do so  
3 in ETRI's best interests protecting the significant equity interest ETRI reserved to itself.  
4 Such rights to sue and grant licenses may accord SPH America "broad authority to act as  
5 [ETRI's] agent for purposes of licensing and litigation" but does not transfer substantial  
6 rights to the patents. *Propat*, 473 F.3d at 1192; *Prima Tek II*, 222 F.3d at 1379 (Fed. Cir.  
7 2000) (a license to license falls short of transferring all substantial rights to the patents).  
8 Moreover, ETRI may want SPH America to pursue an infringer for royalties, but the cost  
9 of such litigation (borne solely by SPH America) may outweigh any benefit to SPH  
10 America. Pursuant to the license agreement, however, it would be a breach for SPH  
11 America to decline to pursue litigation based on costs that would be born entirely by SPH  
12 America.<sup>5</sup>

13 That SPH America does not actually have substantial rights in the patents is reflected  
14 in ETRI's retention of control of licensing decisions with respect to the settlement of the  
15 lawsuit SPH America filed against Samsung. ETRI, not SPH America, negotiated the  
16 Samsung License, which included the patents purportedly exclusively held by SPH  
17 America, without evidence of any direction or input from SPH America. An email  
18 communication from ETRI to Samsung attaches a term sheet "reflecting the discussion  
19 exchanged so far between the two organizations."<sup>6</sup> What it also reflects is that SPH  
20 America is not included in the communication.

21 The term sheet with Samsung stated that it covered patents "ETRI (including  
22 exclusive licensees or licensing agencies of ETRI) may assign the license to a third party,"  
23

---

24  
25 <sup>5</sup> The agreement provides that SPH America controls litigation decisions at SPH America's sole expense,  
26 for a portion of any litigation recovery. Such decisions while left to SPH America, must protect ETRI's  
27 interests. The intention, as unequivocally stated by ETRI, was to license SPH America, an "expert legal  
28 counsel company," because it has the experience to manage litigation to protect ETRI's rights as the  
patentee in legal proceedings. [Doc. No. 244-2, at 4.]

<sup>6</sup> This document produced to the Defendants by SPH America, was submitted to the Court during the oral  
argument and subsequently filed under seal. [Hrg. Transcript, Doc. No. 283 at 17-20; Doc. No. 286.]

1 indicating ETRI is licensing patents to which SPH America claims exclusive control. The  
2 term sheet further stated that Samsung must make a separate agreement with SPH America  
3 for certain patents (the 3G patents)<sup>7</sup> at an amount specified by ETRI. Nothing about this  
4 communication suggests that ETRI was acting simply as a conduit on SPH America’s  
5 behalf to relay terms set by SPH America to Samsung. To the contrary, it corroborates  
6 SPH America’s discovery response that ETRI negotiated the license to the patents  
7 purportedly held by SPH America. [Doc. No. 244-3.]

8 In sum, SPH American cannot act in a manner contrary to ETRI’s interests without  
9 being subject to a breach of contract claim and loss of the license arrangement. *See Propat*,  
10 473 F.3d at 1192 (patent owner’s right to terminate the licensee’s rights to the patents if it  
11 fails to perform up to the specified benchmarks is an indication of retention of significant  
12 ownership interest in the patent). Thus, although ETRI has made SPH America its agent  
13 for licensing and litigation, ETRI has not transferred substantial ownership of the patents  
14 to SPH America. *Id.* (“A patent owner may give another responsibility to select targets for  
15 suit – a power of attorney, in effect – without surrendering ownership of the patent. The  
16 same principle applies to [the] right to select licensees. While the rights to sue and grant  
17 licenses accord ... broad authority to act as the [patentee’s] agent for purposes of licensing  
18 and litigation, they do not transfer ownership.”). As a result, SPH America lacks Article  
19 III standing to sue for infringement.

20 **B. Because SPH America Lacks Article III Standing, Joinder of**  
21 **ETRI Would Be Futile**

22 SPH America argued should the Court find it does not have standing to sue alone, it  
23 be allowed join ETRI in the litigation to correct that deficiency. “[A]n exclusive licensee

---

24  
25 <sup>7</sup> Notably, the term sheet did not indicate that a separate agreement with SPH America must be entered  
26 for the WiFi Patents (‘346 patent and ‘231 patent). These are the patents that were subject to being  
27 “deemed to have been returned” to ETRI if SPH America failed to make annual guaranteed royalty  
28 payments. [Doc No. 266-6 at 5.] It is undisputed SPH America has not met the guaranteed payments. The  
term sheet prepared by ETRI supports the conclusion that it deems those patents returned and no longer  
subject to the requirement of even a *pro forma* separate agreement with SPH America for ETRI to license  
them.

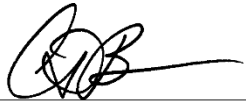

1 having fewer than all substantial patent rights (that is not subject to an exception) that seeks  
2 to enforce its rights in a patent generally must sue jointly with the patent owner.  
3 *Intellectual Prop.*, 248 F.3d at 1347–48. In this case, however, despite the labels used by  
4 SPH America and ETRI, SPH America is not an exclusive licensee. SPH America is  
5 merely ETRI’s agent to enter into licenses and litigate on ETRI’s behalf. SPH America  
6 does not have an exclusive license to any patent rights because: (1) SPH America is  
7 required to act to protect ETRI’s interests; (2) ETRI retained title to the patents; (3) ETRI  
8 retained use of the inventions to further its portfolio; (4) ETRI has the dominant equity  
9 interest in the proceeds of the inventions; and (5) ETRI controls licensing negotiations.  
10 ETRI’s grant of a “hunting license” is not a proprietary interest or exclusive license in the  
11 patents. Because SPH America does not have a proprietary interest in the patents, it does  
12 not suffer any injury in fact fairly traceable to infringement of the patents. *Cf. Lujan v.*  
13 *Defenders of Wildlife*, 504 U.S. 555, 560-61 (1992). SPH America, therefore, lacks Article  
14 III standing meaning it cannot even be a co-plaintiff in an infringement action under the  
15 ETRI patents. Accordingly, SPH America’s request it be permitted to amend to add the  
16 patent owner and continue the action is denied.

17 **V. Conclusion**

18 In light of the foregoing, the Court finds that SPH America has not satisfied its  
19 burden to establish standing to bring this lawsuit. Accordingly, the lawsuit is **DISMISSED**  
20 for lack of Article III standing.<sup>8</sup>

21 It is **SO ORDERED**.
