# Hangouts

Bring your conversations to life with photos, emoji, and even group video calls for free.

Download for\*

Group conversations are better than ever

Send photos or emoji, see when people are engaged in the Hangout and message friends anytime, even if they're not connected right now.

Get together over Video and Voice

Turn any Hangout into a live video call with up to 10 friends or simply search for a contact to start a voice call from your computer.

All your friends can use Hangouts

Hangouts works on computers, Android and Apple devices, so you can connect with everyone, and no one gets left out.

## Group conversations are better than ever

### Share photos and emoji for more lively conversations

Whether you're talking just with that special someone or figuring out Friday night plans with the whole gang, Hangouts are like real-life conversations. You can show photos and share how you're feeling with emoji.

Download Hangouts:

[Google Play](#) | [iTunes App Store](#) | [For your computer](#)

### Have more engaging conversations

See when your friends have read your messages and when they're typing back. If a friend isn't available when you try to reach them, they'll see an alert next time they connect, keeping your conversations alive.

### Easily go back to any of your Hangouts

Finding your ongoing conversations across devices and picking them back up is simple. And you can scroll back through past Hangouts to relive what you talked about — from those epic trip photos to that nice note from a friend when you were home sick.

## Get together over Video and Voice

Be together from anywhere

Sometimes you just need to laugh out loud. Turn any Hangout into a live video call with up to 10 friends or simply choose a contact to start a phone call from your computer. Who says you can't be together even when you're not?

#### One touch to see the whole family

With one touch, you can start a video call with one friend or a whole bunch. Video calls ring everywhere your friends have Hangouts. Whether they're on their computer, phone or tablet, they'll know you're calling. If they're not around or can't pick up, Hangouts will let them know you were trying to reach them.

#### Call phones right from your computer

From Hangouts on your computer, just type in a phone number or pick one of your contacts. Once you're talking, it's easy to add more people and start a conference call, turn your conversation into a video call, or add fun sound effects. Best of all, calls placed to the US and Canada are free, and calls to other countries have super low rates.

## All your friends can use Hangouts

### Everyone is invited

Don't worry about what kinds of computers and phones your friends use. Hangouts works across computers and on Android phones and tablets, iPhone, iPad and iPod Touch. So you can connect with everyone, and no one gets left out.

Download Hangouts:

[Google Play](#) | [iTunes App Store](#) | [For your computer](#)

### Hangouts + Gmail

Hangouts works right inside of Gmail. Take a break from email and send some emoji or call your friends. You can upgrade Chat to Hangouts by clicking on your photo icon in Gmail's chat list.

### Hangouts on Apple devices, for the first time

You and your friends can now message each other with Google on your Apple devices. Hangouts works great across iPhone, iPad and iPod touch. [Download the app](#)

The screenshot shows a Gmail inbox interface. On the left, there's a sidebar with navigation options like 'Compose', 'Inbox', 'Starred', 'Important', 'Sent Mail', 'Drafts', 'Circles', and 'More'. The main area displays a list of emails. A circular 'New Hangout' overlay is positioned in the center-left, showing a list of participants: 'Tim', 'College buddies', 'Gaurav, Carlos, Ian', 'Jeroen Jillissen', 'Bryan Logan', and 'Jeroen Jillissen'. The email list includes subjects like 'Google - Google.com', 'Let's go kayaking!', 'Purple vs. Green Couches', 'Dish rack?', 'Party party party', 'Did you get the purple couches', 'Need a small bookcase?', 'Moving company?', 'Let's go for a little jog?', 'Cupcakepalooza', 'Weekend Plans', 'Staircase hike in Berkeley this', 'Promotion celebration!', and 'Surfing!'. A 'College buddies' chat window is open on the right, showing messages like 'Let's go again?' and 'Whoa, isn't that a bit too cold? It's only May!'.
