**AFFIDAVIT OF BRAD WALKER**

---

The Affiant, Brad Walker, being duly sworn and competent to be a witness in this case, testifies as follows:

1. I have reviewed the Analytical Pesticide Technology Laboratories, Inc.'s November 26, 2008 study entitled *Determination of Glyphosate/AMPA in Soil, Wheat & Millet Leaf Tissue*. I am familiar with the testing procedures used. I have also spoken with APT Laboratories regarding their study. The leaf tissue samples are destroyed in the process of that study.

2. Per Steven Stupp, the study monitor at APT Labs, the sample tissues he received in November of 2008 were less than 30 grams the lab normally uses when they run an analysis for Glyphosate. This smaller sample size affects the detection limit.

FURTHER, THE AFFLIANT SAYETH NOT.
