IN THE UNITED STATES DISTRICT COURT  
FOR THE DISTRICT OF COLORADO

Civil Action No. 13-CV-02111-MSK-MJW

JERALD A. BOVINO,

Plaintiff,

v.

AMAZON.COM, INC.,

Defendant.

---

PLAINTIFF BOVINO'S CLAIM 1 ELEMENTS

---

**CLAIMS IN 6,977,809 PATENT**

1. A portable **computer** comprising:

an **openable case** defining an **exterior surface for holding the computer**; and

a plurality of **resilient ribs** positioned on said **exterior surface** of said case wherein said **resilient ribs** protects said **computer from wear and tear during the transporting and use of the computer**.

2. The computer of claim 1 wherein the resilient **ribs are comprised of a material selected from the group of rubber, urethane or nylon**.

3. The computer of claim 1 wherein a retractable carrying strap is positioned in a retractor mechanism that is connected to the case wherein the strap can be extended from the retractor mechanism and secured to a clasp means on the case to form a carrying strap to assist in carrying the computer and the strap can be retracted into the retractor means when the carrying strap is not being used to transport the computer.

4. The **computer** of claim 1 wherein said plurality of **resilient ribs** are **positioned on the case** in locations to absorb impacts that can effect the operation or functioning of the **computer**.

5. The computer of claim 1 wherein a pocket is positioned on the exterior surface of the case to receive identification information for the computer.

6. A portable **computer** comprising:

an **openable case** defining an **exterior surface for holding the computer**;

a plurality of resilient **ribs positioned on the exterior surface of said case**, and

a resilient material positioned on at least a portion of the exterior surface of the case, the resilient material and resilient ribs protect the computer from wear and tear during the transporting and use of the computer.

7. The computer of claim 6 wherein the resilient material covers substantially the entire exterior surface of the case.

8. The computer of claim 6 wherein the resilient material is comprised of a material selected from the group of rubber urethane or nylon.

9. The computer of claim 6 wherein a retractable carrying strap is positioned in a retractor mechanism that is connected to the case wherein the strap can be extended from the retractor mechanism and secured to a clasp means on the case to form a carrying strap to assist in carrying the computer and the strap can be retracted into the retractor means when the carrying strap is not being used to transport the computer.

10. The computer case of claim 6 where the plurality of resilient ribs extend above the resilient material on the exterior surface of the case.
