Leader Phone

Customer Select

Customer-definable audio conferencing rates offer traditional features *plus* Web 2.0

Traditionally, audio conferencing offered few options because the underlying technology was built for telecom billing convenience, not for user *productivity and flexibility*. Leader Technologies® changed all that when it was awarded a patent for its Digital Leaderboard® Web 2.0 technology in late 2005.

More services. Higher quality. Lower cost. Greater flexibility. Any time.

A rich blend of rating and features options that customers deserve has eluded a traditional audio conferencing due to the limitations of the technology "box" that supports the call. Leader's phone Web 2.0 innovations changed everything. Now you can have your cake and eat it too!

Web 2.0 Innovations

Web 2.0 is a trend in the use of World Wide Web technology and web design that aims to facilitate e-socially information sharing, and most notably, collaboration among users.

Call center agents can now be trained to use the Leader Phone Web 2.0 interface to provide a more personalized and efficient service to their customers. The Leader Phone Web 2.0 interface is designed to be user-friendly and easy to use, allowing agents to quickly access and manage customer information.

For more information, visit www.leader.com.

4 1/2¢ per minute per participant

Access dialing rates:

4 1/2¢ toll

Web 2.0 features vary with rate

9 1/2¢ toll-free

Popular Web 2.0 features:

FOR IMMEDIATE RELEASE

Large Minnesota School District Applauds Alerting System *"Much quicker and more cost-effective"*

COLUMBUS, OHIO (November 3, 2008): After using its health and safety alerting system for nine months, Roseville Area Schools, a Minnesota school district comprising more than 6,400 students, has declared Leader Alert® to be a key communication tool for connecting with parents, says Leader Technologies Chairman Mike McKibben.

Karen Schaub, Director of Community Education and Public Relations for Roseville Area Schools, described how the district utilized the product in a tense situation.

"Our middle school used Leader Alert to quickly notify parents of a precautionary lock-down which was put in place to diffuse a potential confrontation by students from another school."

Graphics: www.leader.com/credits.htm

Schaub continued, "Leader Alert allowed us to dispel the rumors which inevitably would have perpetuated from such an event. This was a much quicker, more cost-effective communication solution than the traditional methods we have used in the past."

Leader Alert enables schools to use any combination of voice, texting, and email to send simultaneous messages to hundreds or thousands of staff and parents in just minutes, making it ideal for use by schools in situations ranging from lurking predator to weather emergencies.

For example, said Schaub, Roseville used Leader Alert to quickly notify 400 parents of the need to reschedule an outdoor field trip at the last minute, due to a forecast of severe weather the next day.

"In the past, this situation would have called for hours of phone calls by teachers and office staff," Schaub noted. "Leader Alert allows our staff to spend their time doing what's important – educating students!"

“Our goal is to provide schools with a system that offers superior Web 2.0 technology, ease of use, and low cost,” said Leader Chairman McKibben, noting that the product was made available to Roseville through local Minnesota company and Leader affiliate Tyda, headed by former Jostens reps Scott and Mark Anderson.

While in widespread use within the academic community, Leader Alert has many other applications. It has been used in terrorist attack simulations and as an early warning system by harbor masters in the event of a hurricane.

Leader Technologies of Columbus, Ohio, also markets sister product Leader Phone, which was used for internal and external communication by the Louisiana state government in the aftermath of Hurricane Katrina, after most of its state communications systems had gone down.

* * *

About Roseville Area Schools

The Roseville Area School District is located just north of the City of St. Paul and east of the City of Minneapolis comprising all or portions of seven communities within the district boundaries - Arden Hills, Falcon Heights, Little Canada, Lauderdale, Maplewood, Roseville, and Shoreview. Roseville Area Schools are an E-12 district and have an enrollment of 6,400 students K-12 and also serve several hundred pre-school and adult students. The district is mission driven and goal-centered focused on a mission statement of "Quality Teaching and Learning for All." For more information, go online to <http://www.roseville.k12.mn.us/>

About Tyda

Tyda, whose founders boast more than sixty-five years of serving schools in the Greater Twin City area, is located in Elk River, Minnesota, and offers Leader Alert and other “added value” programs and products to schools in Minnesota and Wisconsin. For more information, contact Scott or Mark Anderson at (763) 633-2255 or go online to www.tyda4u.com

About Leader®

Leader Technologies® Incorporated is headquartered in Columbus, Ohio. Leader® develops and markets a new communications framework based on its patented **Digital Leaderboard®** system – U.S. Patent No. 7139761. Within this framework, Leader offers **Leader Phone®** and **Leader Dialog®** for toll-free and toll audio conferencing, **Leader Alert®** alerting, and **Leader Meeting™** web conferencing to commerce, education and government. Of special note was Leader’s provision of major disaster response communications services to the Governor of the State of Louisiana and all state and federal agencies following Hurricane Katrina and its support of the United States Departments of Homeland Security and Defense at the Terrorex ’04 terror threat simulation in Las Vegas. For more information, contact John Needham, (614) 890-1986 or go online to www.leader.com

EXHIBIT G-3

Leader Meeting™

Practical, Affordable Web Conferencing

Leader Meeting™ 8.1.1 Quick Start Guide

This guide provides the basic information necessary to start a Leader Meeting™ Web Conference. Please review the system requirements to ensure you have everything you need to get started. If you need additional assistance getting started or if you do not yet have an account, contact Leader Meeting™ support at **1.888.463.0612** or support@leader.com.

System Requirements

Systems must meet the following requirements when using the Leader Meeting™ service:

- Internet connection with HTTP and HTTPS access to the Leader Meeting™ service
- Internet connection speed of 128 Kbps or higher - see bandwidth considerations below
- Microsoft Windows 2000/XP/Vista/Server2003
- Internet Explorer 6.0, Netscape 7.0, Firefox 1.0+ browser
- Mac OS X with Firefox or Apple Safari 1.1
- Linux, Unix, or Solaris with Netscape 7.0+ or Mozilla 1.0+
- Macromedia Flash 8.0 or higher (required only when using Audiocasting or Recording – see bandwidth considerations below)
- Cookies and Scripting enabled in browser

Host Videocasting Requirements:

- Web Camera
- Microsoft Windows, Microsoft IE, and Unyte Conference Plug-In for Microsoft Windows
- Microsoft Windows, Firefox, and Unyte Conference Plug-In for Microsoft Windows
- Apple Mac OS, Apple Safari, and Java™ 1.5+

Participant Videocasting Requirements:

- Microsoft Windows, Microsoft IE, and Unyte Conference Plug-In for Microsoft Windows
- Microsoft Windows, Firefox, and Unyte Conference Plug-In for Microsoft Windows
- Linux, Firefox, and Java 1.5+
- Linux, Firefox, and Flash 8.0+
- Apple Mac OS, Apple Safari, and Java 1.5+
- Apple Mac OS, Apple Safari, Flash 8.0+

Network Bandwidth Requirements

Network Bandwidth Requirements Guidelines

Audiocasting	136 Kbps
Application Sharing	240 Kbps <i>(Note: Using Auto setting with typical UI update rates)</i>
Published Documents	Download rate of slide presentation content is proportional to the available bandwidth. The basic 128 Kbps requirement will provide reasonable performance.
Videocasting	50 to 300Kbps (ideal)

Host a Meeting: Feature Requirements

Application Sharing

In addition to the above general system requirements, a conferencing plug-in is required to share applications. Application and Desktop Sharing are only supported on Windows platforms with the Internet Explorer or Firefox browsers. If the Sharing plug-in is not already on your system prior to starting Application Sharing you will be prompted to download. If your system security settings prevent you from downloading the plug-in, it can be installed manually with the Options Kit.

For viewing shared desktops or applications you must either have the Sharing plug-in or a Java Virtual Machine (JVM). Please note that the Microsoft VM is not supported.

Audiocasting and Recording

When using the Audiocasting and Recording features, computer speakers or headphones are needed to hear the audio.

Participate in a meeting: Feature Requirements

Audiocasting

When using the Audiocasting feature, computer speakers or headphones are needed to hear the audio.

Logging In

Begin using your Leader Meeting™ account by opening the Login page at <http://www.LeaderMeeting.com>. There are separate login options for hosts and for participants. To host a conference, click the radio button that indicates you are a "Host" and complete the "Host Login" form, represented in Figure A, using the Host PIN you received at registration.

The screenshot shows the Leader Meeting website interface. At the top, the text reads "Web Conferencing" and "Leader Meeting". Below this, a question asks "Will you be logging in as the Host or as a Participant?" with two radio buttons: "Host" (selected) and "Participant". Underneath, the "Host Login" section contains four input fields: "Host PIN", "Name", "Company", and "E-Mail". A "Log In" button is positioned below these fields. To the right of the "E-Mail" field, there is a small icon of a person with a plus sign, labeled "Required".

Below the form, there are several links and instructions:

- > [Click here for Help](#)
- > [Click here to perform a System Compatibility Check](#) (if this is your first Leader Meeting)
- > [Click here to download an Advanced Feature Kit](#) (if you need advanced functionality)
- > [Click here to download a Quick Start Guide](#) (for step by step conferencing instructions)

Questions about your meeting? Contact your meeting host.

If you wish to subscribe for a Leader Meeting™ account, click Sign Up. You will be directed to a companion audio conferencing service, Leader Phone®, sign up. Complete your sign up; then you will receive an email with your Leader Meeting™ account information and user guides.

Figure A. Host Login

Host (Presenter) Controls

After you have successfully logged in, you are presented with a conference window. At the top of the conference window is a toolbar (Figure C) containing buttons used to conduct and manage Web conferences.

Starting a Web Conference

Since Leader Meeting™ Web Conferencing does not require pre-planning or scheduling, once you have logged into your account, you can immediately start a conference.

To start a conference:

1. Click the **START** button on the toolbar. A dialog window opens displaying instructions for inviting participants to join the conference.

Figure C. Toolbar (Host controls) prior to starting conference

Figure D. Toolbar (Host controls) after conference has been started

2. Instruct participants to visit the Conference Entry page (<http://www.LeaderMeeting.com>) and to complete the "Participant Login" option using the Participant PIN that you provide them.
3. As each user logs in to the conference, the user's name appears in the Roster.

***Note:** Participants will be unable to join a conference until the Host has started the conference.

Publishing a Document

Once you have logged in to your Leader Meeting™ account you can either start a Web conference or you can prepare for a conference by publishing Microsoft® PowerPoint®, Word, or Excel documents.

Figure E. Document Publishing Sub-menu

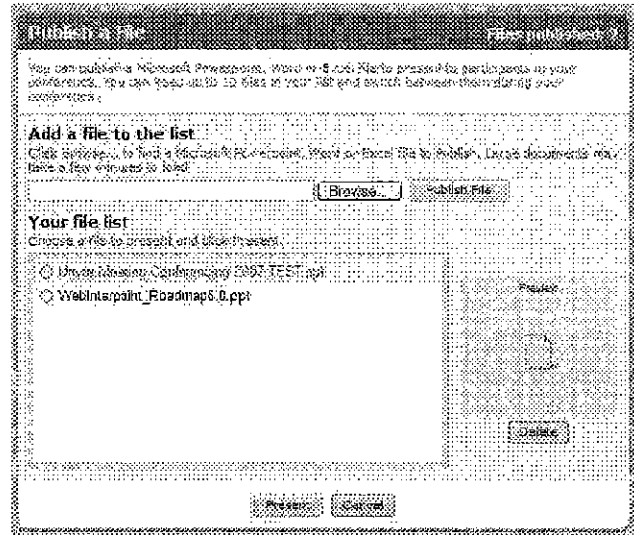

Figure F. Document Publishing "Publish a File" Window

Publishing documents:

1. Click the **PUBLISH** button on the presenter toolbar
2. Click **BROWSE** from the "Publish a File" dialog window
3. Select a document file path using the file explorer window
4. Click the **PUBLISH FILE** button in the Publish a File dialog window

After you complete these steps, your document is automatically copied and converted into a Leader Meeting™ presentation and saved into the presentation library. A status bar indicates the publishing progress. Once publishing is complete, the first page of your document appears in the conference window.

Presenting previously published documents:

1. Click on the **PUBLISH** button on the presenter toolbar
2. The Publish a file window will appear, click the radio button next to the file you wish to present from the titles in "Your file list"
3. Click the **PRESENT** button

Or

1. Click the Document Publishing sub-menu  located on the **PUBLISH** button on the presenter toolbar. A Drop Down menu will appear. (Figure E.)

©1997-2008, Leader Technologies Incorporated. U.S. Patent No. 7139761. All Rights Reserved.

2. Click the Thumbnail of the file you wish to present
3. The first slide of presentation will appear on the presenter and participant windows

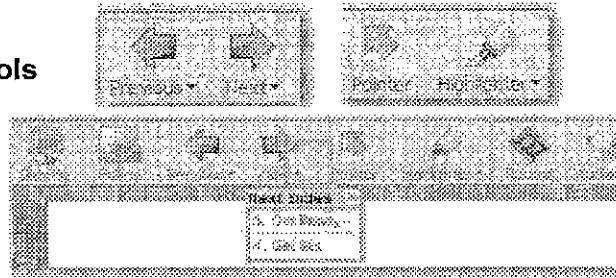

Deleting a Presentation

You may choose to delete a presentation anytime in the future using the **PUBLISH** feature.

To delete a published document:

1. Click the **PUBLISH** button on the toolbar
2. Select the presentation in the Published Documents list
3. Click the **DELETE** button

Using Presentation Tools

To Use Navigation Tools:

Use the **PREVIOUS** and **NEXT** buttons on the toolbar to index slide by slide through a presentation, document sections or worksheets.

- Use the "Next Slide" and "Previous Slide" submenu(s) to jump directly to a specific slide.

To Use Annotation Tools:

Use the **POINTER** button to toggle the Pointer tool on and off when you want to highlight the content of your presentation.

- To turn off the pointer, click the **POINTER** button again.
- Pointers can be "stamped" on slides by clicking the pointer on the slide.
- To clear stamped pointers, advance to the next slide.

Use the **HIGHLIGHTER** button when you want to annotate the content of your presentation in real time.

- Choose from 15 marker colors by clicking on the down arrow on the **HIGHLIGHTER** button.
- To turn off the Marker, click on the **HIGHLIGHTER** button again.

©1997-2008, Leader Technologies Incorporated. U.S. Patent No. 7139761. All Rights Reserved.

- To clear the highlighted annotation, advance to the next slide.

Application Sharing

The **SHARE** button allows you to share specific applications or your entire desktop, thereby enabling your participants to view changes as you make them and to see applications unique to your desktop. Once you click the **SHARE** button you will receive a dialog box that shows a list of your currently running applications (Figure H).

Note: The Application Sharing feature requires the host to receive a conferencing plug-in component. If this is your first time using Application Sharing, please read the System requirements section of this Quick Start guide.

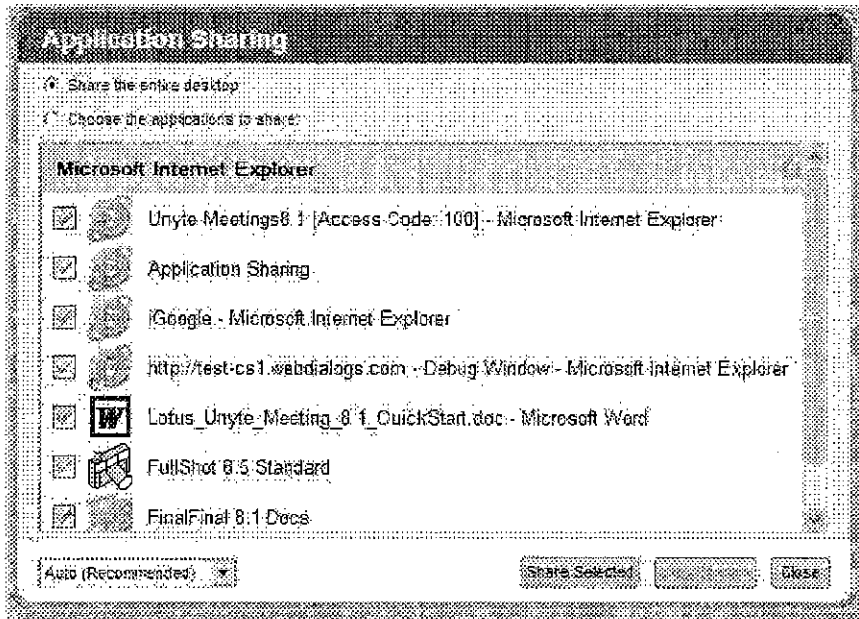

Figure H. Application Sharing Window the host may choose to share the entire desktop or specific applications

To share an individual application:

1. Select one or more applications from the list by selecting the box next to the active application(s)
2. Select the "Choose the applications to share" button
3. Click **SHARE SELECTED**

To share all applications:

1. Click the "Share the entire desktop" button
2. Click **SHARE SELECTED**

To stop sharing:

©1997-2008, Leader Technologies Incorporated. U.S. Patent No. 7139761. All Rights Reserved.

1. Open/restore the Leader Meeting™ application window
 2. Click the **CANCEL** button
- Or
1. Double click the icon for Application Sharing in the system tray
 2. Select **STOP SHARING**
- Or
1. Click the orange **SHARED** button on the title bar of the window that is being shared

Allowing Control of your desktop

If you would like to allow a participant to make changes to your shared application, you must give control to that participant.

To transfer control to a participant:

1. Click the Participant's name in the Roster
2. Select **GIVE CONTROL**

To regain control of the application:

1. Click the Participant's name in the Roster and choose **DISABLE CONTROL**

***NOTE:** The **Performance Setting** option allows you to optimize application sharing performance and quality. The options are as follows:

- **Auto (Recommended)** - Auto adjust setting from low to high depending upon bandwidth responsiveness.
- **High Quality** - This setting has true color, the best appearance, and requires the most bandwidth. May cause delays on slower connections.
- **Best Speed** - Fastest transfer speed but 16 colors and some reduction in image quality. This setting is ideal for slower connections such as dial-up.

Scheduling a Conference with Outlook

Leader Meeting™ Microsoft Outlook™ Integration allows a Host to schedule web conferences using Microsoft Outlook. Adding web conferencing to an Outlook meeting is as simple as clicking the **LEADER MEETING WEB CONFERENCE** button in a Microsoft Outlook Calendar Appointment or Meeting Request.

To schedule a conference using Outlook:

1. Install the Outlook Add-On by downloading and installing the Leader Meeting™ Options Kit and selecting the "Outlook Add-On" option during installation. ***Note:** You must temporarily close Outlook while installing this feature.
2. Access the scheduling feature of Outlook. From the calendar feature in Microsoft Outlook, open a calendar appointment or Meeting Request. You may do so by selecting the

©1997-2008, Leader Technologies Incorporated, U.S. Patent No. 7139761. All Rights Reserved.

FILE menu, next select **NEW**, and then **APPOINTMENT** or **MEETING REQUEST**. You may also create a new appointment by double clicking on a specific date and time on your calendar. An Outlook Appointment or Meeting Request dialog window will open.

3. Click the **INVITE ATTENDEES** button on the toolbar. Insert e-mail addresses and meeting details just as you would through the Meeting feature of Outlook.
4. Set a Reminder for your web conference so you will be able to login before the conference is scheduled to begin.
5. Click the **LEADER MEETING WEB CONFERENCE** button at the upper left-hand corner of the Outlook appointment window. This will open a Web Conference Details window. A dialog window will open with a tab for web and audio conference details.
6. Ensure that your Web conference account information is correct in the fields provided. You may also assign one or two memos if you require them for post conference reporting, and audio bridge dial in information if needed.
7. Click the **OK** button, which will insert the meeting link and dial-in information into the body of your meeting request. **Note:** Participants invited through Outlook do not require an access code as they are invited to the conference individually.
8. At meeting time, the Host then clicks the embedded link, which opens the log in page for the conference. To login, the Host inserts his or her credentials. **Note:** In order to allow participants to join, the Host must login before the meeting is scheduled to begin.

Ending a Conference

When you are finished with your meeting:

1. Click the **STOP** button on the toolbar to conclude the conference and disconnect all participants. At this point, you are still logged in and can start a new conference.
2. If you are finished, you can log out of your account using the **SIGN OUT** button on the toolbar. For additional help, access the online help through **HELP** button on your Leader Meeting™ toolbar.

PRESS RELEASE

Ohio School Board endorses Leader Alert® *School health and safety alerting...*

Columbus, Ohio (April __, 2008) -- The Ohio School Board Association announced today its endorsement of Leader Alert, a health and safety alerting product, for the HOW MANY [question in to Amanda] Ohio secondary schools that comprise its membership.

Leader Alert, the creation of Leader Technologies of Columbus, Ohio, makes it possible for a school to quickly and simultaneously alert thousands of parents and staff by telephone, texting, and email in case of emergencies ranging from lurking predators to snow days.

According to OSBA Assistant Executive Director Robert Delane: "Unfortunate events happening across the country have made the need to send out emergency update alerts almost a necessity. Schools need an easy and effective way to notify parents and staff members about incidents that may arise during the school year."

Delane noted that OSBA study and testing pinpointed three key reasons for their choice of Leader Alert. "One, it was easy to use. Two, schools can use it with their current technologies, and three, it can effectively notify large numbers of individuals almost simultaneously."

Delane stressed the benefits that the endorsement provides for member schools. "School boards count on OSBA to do the appropriate research before lending its name to a particular product or service. OSBA's research indicates that Leader Alert is superior to other alerting systems and cost effective for school districts."

As Delane pointed out: "The OSBA is very selective about its endorsements and will not endorse a product or service unless it meets certain criteria." He called Leader Alert "reliable and effective", adding "we also see a significant benefit for use in our disaster planning efforts."

Leader's alerting and audio conferencing services were used extensively in the wake of Hurricane Katrina, after many of Louisiana's other communications systems had failed there. Leader Alert has diverse applications ranging from terrorist attack simulations to early storm warnings to boat owners, and it is currently in use as a health and safety alerting tool on school and college campuses across the United States.

About Leader

Leader Technologies Incorporated is a software development and marketing company specializing in unified communications. Its technology framework, named the **Digital Leaderboard®** system – U.S. Patent No. 7,139,761 – provides an array of communications services to commerce, education and government. Leader's current brands include **Leader Phone®** and **Leader Dialog®** for audio conferencing, **Leader Alert®** for alerting services, and **Leader News®** for alerting with news services. Leader provided the primary communications and collaboration system for the Governor of Louisiana in the state's Hurricane Katrina disaster response. Leader has also provided counterterrorism support to the Departments of Homeland Security and Defense, including alerting technologies to *Terrorex '04* in Las Vegas. Following the Virginia Tech tragedy, **Leader Alert®** is now deployed with increasing frequency within secondary and higher education for school safety and security applications. For additional information, contact (614) 890-1986.
