Subject: Yesterday in CWC (Monday, 11/25/2002)

GENERAL:

o Yesterday, Mike had a meeting with Boston Scientific; he was demo'ing L2L functionality for senior staff members. They had a list of functionality that they are looking for in a tool to support their national clinical testing, etc. They are in need of a very secure system that will support full document management functions, provide varied levels of access to content, support local and distributed access, support search for content, support collaborative meetings/conferences in a nut-shell, they are looking for L2L.

*** Mike called after the meeting, he was very excited and said that the demo 'was flawless, not one glitch, and I didn't have to tap dance at any point they are going to buy;

Mike said that they are to put together a plan (proposal) over the next two weeks that lays out how/when they would bring L2L into BSC.
