Supplemental Status Report

**SUPPLEMENTAL STATUS REPORT ON
MICROSOFT'S COMPLIANCE WITH THE FINAL JUDGMENTS**

Microsoft hereby files its Monthly Supplemental Status Report regarding its compliance with the Final Judgments.

I. Technical Documentation

As reported to the Court in the last Joint Status Report, the schedule agreed to by the parties between now and May 2011 is as follows:

Date	Event	Status
July 1, 2010	Deadline for deciding on document re-writes	Completed
September 1, 2010	Deadline for Microsoft completion of document re-writes	
October 1, 2010	Open TDIs over 180 days reduced to 25% of level of April 30, 2010	
January 1, 2011	Open TDIs over 90 days reduced to 15% of level of April 30, 2010	
January 1, 2011	TC stops submitting TDIs	
March 15, 2011	Open TDIs reduced to 15% of level of April 30, 2010	

March 15, 2011	Open Priority 1 + Priority 2 TDIs reduced to 15% of level of April 30, 2010	
March 15, 2011	Open TDIs over 90 days reduced to 5% of level of April 30, 2010	
April 15, 2011	Open TDIs reduced to 5% of level of April 30, 2010	
April 15, 2011	Open Priority 1 + Priority 2 TDIs reduced to 5% of level of April 30, 2010	

A. *Microsoft's Progress in Resolving Technical Documentation Issues ("TDIs") through June 30, 2010*

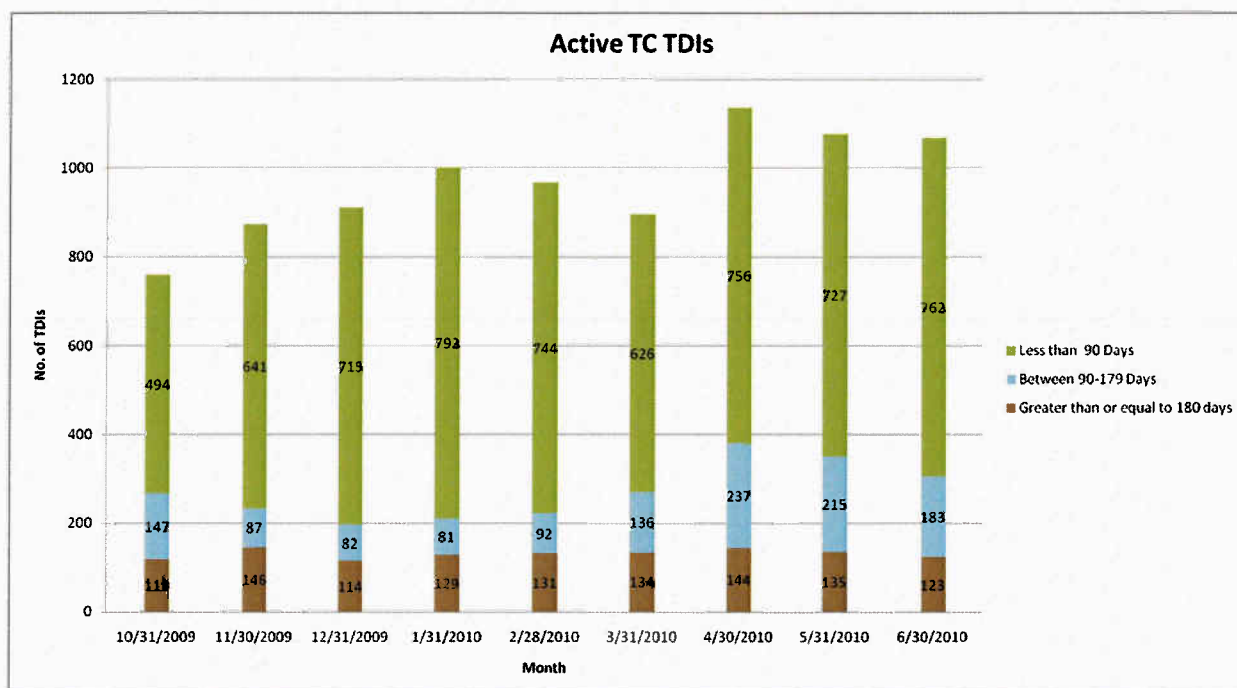

The current status of TDIs identified in the MCPP documentation through June 30, 2010 is noted in the chart below.¹

¹ The May TDI numbers reported in this chart differ slightly from the numbers provided in the previous Joint Status Report because the dynamic nature of tracking TDIs in multiple databases occasionally results in categorization and exact TDI closure dates changing after the previous reporting period.

	As of 5/31/2010	Period Ended 6/30/2010
Priority 1 TDIs Submitted by the TC		
Submitted this period	636	95
Closed this period		190
Outstanding		541
Priority 2 TDIs Submitted by the TC		
Submitted this period	915	243
Closed this period		343
Outstanding		815
Priority 3 TDIs Submitted by the TC		
Submitted this period	561	159
Closed this period		268
Outstanding		452
Total TDIs Submitted by the TC		
TC Submitted	2112	497
TC Closed		801
<i>TC Outstanding</i>		1808
TDIs Identified by Microsoft		
Identified this period	141	187
Closed this period		68
<i>Microsoft Outstanding TDIs</i>		260
TDIs Identified by Licensees		
Identified this period	19	20
Closed this period		17
<i>Licensee Outstanding TDIs</i>		22
TOTAL OUTSTANDING TDIs	2272	2090
<i>TC TDIs Resolved Pending Publication</i>	1035	740
Total Active TDIs (Outstanding minus Resolved Pending Publication)²	1237	1350

Below is a chart reflecting the total number of TC TDIs that have been open for less than three months, between three and six months, and more than six months.

² In addition, because Microsoft's publication cycle and the Court's reporting cycle do not coincide exactly, there will be a small subset of TDIs in each status report classified as resolved pending publication and verification by the TC that will not be formally closed until the publication cycle after the upcoming publication cycle.

II. Technical Documentation Testing and Licensee Support

Microsoft completed its testing of the new and revised Windows 7 documentation on schedule.

Microsoft continues to make various resources available to assist licensees in using the technical documentation, including by providing access to support engineers and through user forums. In addition, Microsoft's Interoperability Lab remains open and available for use by licensees.

Microsoft is working with the Storage Networking Industry Association (SNIA) to help plan the "SNIA 2010 Storage Developer Conference." The event is being scheduled for September 2010 and will be held in Santa Clara, California. Interoperability will be a primary focus of this event. Microsoft is also working with the Samba development team to host an interoperability lab following the SNIA conference.

III. Technical Documentation Team Staffing

Robert Muglia, the President for Microsoft's Server and Tools Business, continues to

manage the documentation effort along with additional senior product engineering team managers.

Approximately 500 Microsoft employees and contingent staff are involved in work on the MCPP technical documentation. Given the substantial overlap between the MCPP and the European Work Group Server Protocol Program, all of these individuals' work relates to both programs or is exclusive to the MCPP. Of these, approximately 234 product team engineers and program managers are actively involved in the creation and review of the technical content of the documentation, including periodic work on TDI resolution as well as developing new content for the next version of Windows Client and Windows Server. Because of varying areas of expertise, not all of these product team employees are working on the documentation at any given time. For example, many of the MCPP documents currently do not have any associated TDIs. In other months, these same product teams may have multiple TDIs to resolve and/or additional content to draft and spend most or all of their time on projects relating to the protocol documentation.

In addition, there are approximately 28 full-time employees and approximately 67 contingent staff working as technical writers, editors, and production technicians. Further, as the protocol testing effort continues, approximately 40 full-time employees and approximately 110 contingent and vendor staff work as software test designers, test engineers, and test architects. Microsoft will continue to apply the resources necessary to ensure compliance with the Final Judgments. Significant attention to and involvement in the technical documentation and the MCPP extend through all levels of the Microsoft organization and draw upon the resources of numerous product engineering, business, technical, and legal groups, as well as company management.
