*"Many people assume that celebrities who have babies after 40 must have undergone expensive fertility treatment. That is simply not true. I am a well-known celebrity and conceived naturally after 40. A woman's reproductive system does not know whether or not she is famous. Our bodies are just the same as those of non-celebrities. Some of us will conceive easily the natural way and others may need a little help. All the fame and money in the world will not have any influence on the outcome, whether natural or assisted."*
