Standards Incorporated by Reference (SIBR) Database Home Page

The **Standards Incorporated by Reference (SIBR) Database** includes the voluntary consensus standards, government unique standards, private industry standards, and international standards referenced in the Code of Federal Regulations (CFR).

The Code of Federal Regulations (CFR) is the codification of the general and permanent rules published in the Federal Register by the executive departments and agencies of the Federal Government. It is divided into 50 titles that represent broad areas subject to Federal regulation. Each volume of the CFR is updated once each calendar year and is issued on a quarterly basis. More data on the CFR can be found at the GPO Access Home Page.

In this database, Regulatory Standards Incorporated by Reference are sometimes referred to as R-SIBR.

The SIBR Database is provided as a public service for informational purposes only and is compiled by NIST to monitor the implementation of the National Technology Transfer and Advancement Act within the US Government. While NIST makes every effort to continuously update the SIBR Database to reflect changes to standards referenced in the CFR, NIST cannot guarantee the accuracy or completeness of the SIBR Database. You are encouraged to consult the current revision of the CFR, available at the GPO Access Home Page. If you find any errors or omissions in the SIBR Database, please notify the SIBR Administrator using the Contact Us form.

To begin using the SIBR Database select a Quick Link, either one of the Regulatory, or Help tabs, or one of these Regulatory, or Help links.

The Standards Incorporated by Reference (SIBR) Database Administration System is a Department of Commerce (DOC) system managed and operated by the National Institute of Standards and Technology (NIST) and any unauthorized use is prohibited.

Standards.gov is maintained and operated by the National Institute of Standards and Technology (NIST).
