E Discovery: Pharmaceutical and Biotech

Practical Solutions and Proactive Guidelines for an Evolving Environment

November 30 - December 1, 2006 · Park Hyatt Philadelphia, Philadelphia, PA

Benefits of Attending

Why should I attend?

IQPC produces more than 1500 events each year across 6 continents. **E Discovery** has emerged as one of our most sought after programs. Based on marketplace demand, we are pleased to present our **E Discovery** event focused on [Pharmaceutical and Biotech](#).

As members of a highly regulated industry, you face unique E Discovery challenges. It is critical that in-house counsel remain actively engaged in the overall management of electronic information. Learn how to proactively manage documents and minimize risks. Find out what you need to know, when you need to know it.

Who will I meet and who is speaking?

- [Daniel M. Hawke](#), District Administrator, Philadelphia Office, **U.S. Securities And Exchange Commission**

This conference was excellent! Very professionally run yet jammed with information. Very impressed with the high quality of speakers.

Document Manager, Novartis Pharmaceuticals

This is a very distinguished and comprehensive program! Very thorough, very impressive.

Senior Counsel, Mayer, Brown, Rowe & Maw, LLP

This is a seminar that should not be missed!

U.S. Magistrate Judge

Well organized. Good mix of speakers with excellent knowledge and background. Great job! Well done. I look forward to the next conference!

digIT is a proven technology designed for the effective and defensible management of electronically stored information (ESI) regardless of location, language or file format. digIT was developed specifically to assist corporations in the preservation and collection of electronically stored information throughout the enterprise. Laptops? digIT can get to them. Remote servers? Not a problem. Various file formats and storage systems? Yes. Foreign languages? digIT has the ability to search up to 34 different languages. digIT is the one software solution that truly addresses litigation readiness. Legal teams now have an application that can help identify areas of risk, respond to litigation more effectively and with greater accountability. Once information is indexed, legal teams can search the data using concepts, keywords, or both helping lawyers assess each case early in the cycle – and determine a realistic case budget. Save time. Save money. Reduce Risk. Can you digIT?

Sponsors

Since 1987 **Electronic Evidence Discovery®** has been the global leader in comprehensive E Discovery solutions for corporations and law firms. EED offers a complete suite of services ranging from data collection through processing conversion. EED's Class A data hosting facility and award winning native review application, DiscoveryPartner®, enables attorneys from anywhere in the world to cost effectively participate in evidence review. EED's services are not, however, limited to centralized data processing and review hosting. EED's consulting team can be onsite anywhere in the world to help organizations prepare for litigation, execute collection orders and implement data reduction strategies. Through the EED Mobilized™ service, EED consultants leveraging the EED Discovery® software system can deliver and support comprehensive onsite data processing, review and evidence production — giving an

organization complete control over their data.

LegisDiscovery

LegisDiscovery, LLC is the leading service provider of digital forensics, electronic discovery, data recovery, network and regulatory compliance audits, corporate investigations and hosting of electronic data. Our technical and legal experts are former law enforcement officers who helped establish the best practices in these areas. We acquire and deliver data from any environment, including deleted, encrypted and password protected files, search, analyze and process data, and present results to you in a searchable database load file for your review application or by hosting data on our ASP; we present the results of forensic investigations in database review or report form, as is most appropriate, and our experts, experienced in testifying, are available for testimony in court or elsewhere. Our legal experts both advise you as to the best and most efficient practices and work with our analysts to anticipate and render moot legal challenges.
