Wiand's departure from Fowler White comes about nine months after he became the court-appointed receiver in the SEC case against Nadel, a Sarasota hedge fund manager accused of running a \$400 million Ponzi scheme.

The receivership has been lucrative for Wiand and Fowler White as the complex investment scheme is dissected and assets are gathered in an attempt to return some money to defrauded investors.

Federal court records show Wiand has received nearly \$160,000 in fees for his receivership activities. Fowler White has received \$757,000 for the firm's representation of Wiand in various receivership issues.
