Re: In Re Seroquel Products Liability Litigation: MDL-1769

Dear Mr. Jaffe:

Enclosed please find a portable hard drive containing documents for AstraZeneca's eleventh custodian production in the above referenced matter. As explained in Tony Winchester's email of May 11, 2007, you will note two features particular to this production. First, as this is the largest single production to date, AstraZeneca's production vendor has arranged and grouped the custodian folders according to "sets." Without such groupings, the folders would have been too large to easily open, and too unwieldy to easily upload. Second, consistent with AstraZeneca's continuing duty to produce documents as they are discovered, through additional quality control and repair of documents containing technical flaws combined with creation of privilege logs, a small number of documents belonging to the initial 8 Custodians were subsequently determined to be relevant and not privileged. These documents are included on this hard drive in a separate folder labeled by our vendor "First 8 Final".

Accordingly, this hard drive contains seven folders, each with multiple custodians contained therein, and one folder corresponding to the additional initial 8 custodians. The contents of the sets and the corresponding bates ranges are:
