

IN THE UNITED STATES DISTRICT COURT  
FOR THE NORTHERN DISTRICT OF FLORIDA  
PENSACOLA DIVISION

JUSTIN GATLIN

Plaintiff

v.

CASE NO. 3:08cv241/LAC/EMT

UNITED STATES TRACK AND  
FIELD ASSOCIATION;  
UNITED STATES OLYMPIC COMMITTEE;  
UNITED STATES ANTI-DOPING AGENCY;  
INTERNATIONAL ATHLETIC  
ASSOCIATION FEDERATION;

Defendants.

AFFIDAVIT OF EUGENE R. HERSHORIN, M.D.

Before me, the undersigned authority, personally appeared Eugene Hershoin, M.D., known to me, who being by me first duly sworn, deposes and says on oath as follows:

1. I am over the age of 18 and have personal knowledge of the following facts and if called as a witness would testify to the following items:
2. I am a resident of Miami, Florida and am 57 years of age.
3. Currently, I am a practicing medical doctor licensed in the State of Florida and Board Certified in Pediatrics with a boarded sub specialty in Developmental and Behavioral Pediatrics, as well as a mini-fellowship in psychotropic pharmacology from the Neuroscience Education Institute.
4. My curriculum vitae is attached to this affidavit as Exhibit one.

5. I currently am serving as an Associate Professor of Clinical Pediatrics at the University of Miami Miller School of Medicine.
6. I have staff privileges at 3 hospitals in Miami: Jackson Memorial Hospital, Baptist Hospital of Miami and South Miami Hospital.
7. In 1976, I graduated from the Milton S. Hershey Medical Center of the Pennsylvania State University with a Medical Doctorate Degree.
8. I completed my internship, residency, and Assistant Chief Residency at Children's Hospital in Philadelphia, Pennsylvania.
9. I currently serve as the Chief of the General Pediatric Division here at the University of Miami Miller School of Medicine and also serve as Associate Chair for the Community Outreach Program.
10. For 25 years, I have been involved in the diagnosis and treatment of patients suffering from Attention Deficit/Hyperactivity Disorder.
11. My experience has provided me the opportunity to observe the long term effect of both AD/HD and effects of Adderall® on this disability.
12. AD/HD is a condition which causes problems with attention and distractibility and sometimes impulsivity and overactivity. AD/HD is a biological, brain condition that often leads to poor academic performance, poor social relationships and sometimes a feeling of low self-esteem.
13. AD/HD has been shown to be effectively treated with prescription drugs that contain stimulants. These drugs include well known brands such as Ritalin® (methylphenidate) and Adderall® (amphetamine).

14. As part of my work on this matter, I have reviewed the following documents: Declaration of Eric Bennett, M.D.; Justin's medical records from Dr. Bennett; 2002 Stipulation of Facts between Justin and United States Anti-Doping Agency ("USADA") and a USADA form titled "TUE Requirements for ADD and ADHD." I have also completed a review of the medical literature available which discusses sporting issues and this disability.

15. After my review of the items listed above and with my own professional training and experience, I have the following opinions:

- a. Justin is suffering from AD/HD.
- b. Justin's AD/HD is a form of this disease that substantially affects his attentiveness, learning and comprehension.
- c. Justin was deriving benefit through his use of Adderall® while he was a student at the University of Tennessee.
- d. The type of AD/HD that Justin suffers impedes his ability to be attentive to directives that are not directed to him or his disability.
- e. This disability would most likely prevent Justin from appreciating vague and/or subtle procedures.
- f. AD/HD would also most likely present substantial difficulties for carrying out a procedure that requires multiples stages and forms.
- g. Without an explicit directive, the TUE procedures and forms utilized in 2001 by USADA would most likely have provided a substantial compliance obstacle for Justin.

- h. Justin, without his medication, would likely suffer from an increase in stress, and distractions and a lowering of mood.
- i. Justin's use of Adderall® would help to regulate his neurotransmitters (or neurochemicals) so as to make his brain more like those unaffected by this condition.
- j. I have conducted a through search for medical literature discssuing the affects of Adderall on athletic competiion. Thus far, I have been unable to find any articles linking Adderall to an enhanced athletic performance compared to a person without this disability.

Eugene Hershorin, M.D.

STATE OF FLORIDA:

COUNTY OF DADE:

worn to and subscribed before me this 12 day of June, 2008, by  
Eugene Hershorin, who are personally known to me

and have produced \_\_\_\_\_, as identification and who did  
take on oath.

*Georgina Gomez*
