OBAMA IN U.S.A.

Presidency is totally illegal

This shocking 1987 photo shows the future President, second from left in the back row, with relatives in Kenya

Political experts say Obama's presidency will crumble if bombshell revelations about his birth records are accurate

some people believe it offers more proof that the President was born in his father's African homeland.

No escaping

"This is the picture that will haunt Obama," predicts the insider. "There is no escaping the claims he was born in Kenya. His family lives there. He visits there. There is no U.S. birth certificate. It's a big problem."

Back in January 2009, GLOBE reported a Kenyan birth certificate shows Obama was born in Mombassa's Coast Provincial

General Hospital at 7:24 p.m. on Aug. 4, 1961. But hospital officials there have, so far, refused to admit the document exists.

Adding fuel to the firestorm, Obama's granny, Sarah Hussein Obama, claims she was "in the delivery room in Kenya" when the President was born.

In an effort to kill the controversy when Obama's citizenship was first challenged, his staffers produced a Hawaiian Certificate of Live Birth to prove his eligibility to hold the highest office in the land. But critics question

its validity – and if there is no official birth certificate to back up the form, as Adams insists, it MUST be a forgery and a fraud, say insiders.

But Hawaii State Department of Health Director Dr. Chiyome Fukino says she checked the official records and can verify that Obama is a natural born citizen. And the state's Republican Gov. Linda Lingle claims the birth certificate says Obama was born at Kapi'olani hospital.

Meantime, Adams' boss Glen Takahashi, administrator of the Honolulu City Clerk's Office,

disputes Adams' contention that he had access to birth records.

But Adams, now a graduate teaching assistant at Western Kentucky University, insists that as a senior supervisory clerk, he DID have access to the documents.

"Of course, officials in Hawaii are going to go out of their way to discredit this guy," says the insider about Adams. "But no matter what the White House tries to do, this whole thing just won't go away.

"It's ugly and it promises to keep getting worse."

Hawaiian state records clerk reveals:

NO PROOF WAS BORN

Now his critics insist president

A FORMER Hawaii records official is sending shock waves through Washington, D.C., by revealing there is absolutely no birth certificate for Barack Obama!

The bombshell revelation backs up long-standing claims that Obama — who insists he was born in a Honolulu hospital — really took his first breath in Kenya and, as a result, violates the U.S. Constitution's requirements for the President to be a "natural born" American.

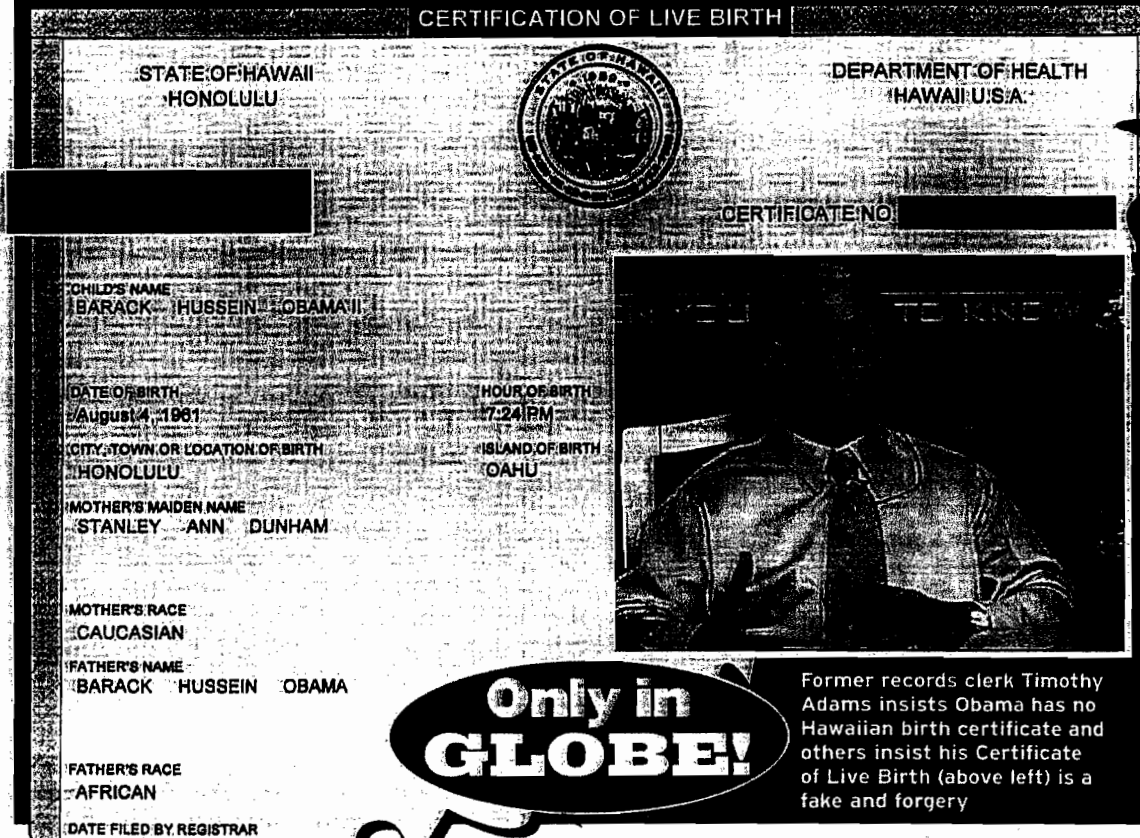

Direct access

"I had direct access to the Social Security database, the national crime computer, state driver's license information, international passport information, basically just about anything you can imagine to get someone's identity," says Timothy Adams, who served as senior government records clerk in Honolulu in 2008. "There is no birth certificate. I was informed by my boss that we did not have Obama's birth record."

America's current Commander-in-Chief, 48, has not only refused to produce his official birth certificate but has gone to great lengths — and expense — to seal records from his past, according to sources. He once mistakenly named two different hospitals where he was supposed to be born — and his paternal grandmother insists she witnessed his birth in Kenya!

As questions about the REAL land of Obama's birth began pouring in during the 2008 presidential campaign, Adams says he asked two local hospitals to provide the Democratic candidate's birth certificate — and was told no such record existed!

"Neither hospital has a document that a doctor signed off on saying they were present at this man's birth," notes Adams. "It's like an open secret. Everyone

in the government knows this."

The repercussions of Adams' stunning disclosure could bring Obama's presidency to an untimely and disastrous end, warn experts.

"This is HUGE, and it's got a lot of people in Washington worried," a Beltway insider tells GLOBE. "If these comments turn out to be the smoking gun everyone has been talking about from the beginning,

Obama will have some very serious problems on his hands."

Experts say Obama wouldn't qualify to be President if he was born in Kenya because his late father, Barack Obama Sr., was not a U.S. citizen. Other constitutional technicalities would also make his time in the Oval Office illegal, experts say.

Adams, who was employed by the elections office in Hawaii, maintains he was just doing his job checking the validity of voters'

Former records clerk Timothy Adams insists Obama has no Hawaiian birth certificate and others insist his Certificate of Live Birth (above left) is a fake and forgery

registrations and citizenship when he made the shocking discovery.

"It was my job to verify the voters' identity, and in my professional opinion, Obama definitely was NOT born in Hawaii," he declares. "I can say that without a shadow of a doubt because there is no legal record of him being born there."

"And the things I've said, I don't mind testifying about in court."

Coming on the heels of Adams' charges, a damning photo of Obama in Kenya with relatives has surfaced. Snapped in 1987,
