About Us **How Natura Pet Products is Different**

Philosophy

No pet food company in the world makes natural pet foods like Natura. We use only ingredients you'd eat yourself: quality meats, whole grains, fresh fruits and vegetables, and complete vitamin and mineral supplements. For us humans, a diet of natural, wholesome food is essential to living a long healthy life. We believe this fundamental principle is true for your pet, too.

Manufacturing

News

All of our human grade dog and cat foods are carefully cooked and tested to ensure consistent nutrient quality and enjoyable texture and taste. All of the ingredients used in our pet foods are tested to make sure they are hormone, antibiotic and pesticide-free. And we never add artificial ingredients, chemical additives, by-products or fillers of any kind.

About Us Our Pet Nutrition Philosophy

Philosophy

Natura Pet Products was founded in 1989 by John and Ann Rademakers and Peter Atkins in Santa Clara, California. Dissatisfied with the unhealthy ingredients in the pet foods on the market, they consulted with veterinary nutrition experts to determine the best sources for **pet food ingredients**. Working with caring pet professionals - veterinarians, breeders and nutritionists - Natura asked one key question: *"How do you make the healthiest pet food in the world?"*

Manufacturing

News

Contact Us

What they learned won't surprise you. Dogs and cats are healthiest when they eat the whole, natural foods we would eat ourselves: USDA-inspected chicken, turkey and lamb, whole grain rice and barley, fresh fruits and vegetables, and Grade A dairy products. Based on information from this research, Natura's Nutritional Philosophy was developed:

I. Use Only Dog and Cat Food Ingredients Which I Would Feel Comfortable Eating Myself

The bottom line: If I wouldn't eat it, why would I want to feed it to my pet? It is important to understand that the pet food industry is the primary outlet for human by-products. There are ingredients which are allowed to be used in pet foods that are, at best, scary.

II. Use Whole Pet Food Ingredients That Are Nutrient Rich and Unaltered

Mother Nature made the grain in its whole state. As such, it includes nutritious protein, fats, carbohydrates, fiber, vitamins and minerals. Other pet food companies use fractionated grains, which do not include this balance of natural nutrition.

III. Use Highly Controlled Cooking Methods to Preserve Natural Levels of Nutrients

Quality control and process management are critical in making a **nutritious pet food**. All Natura foods undergo over 121 different quality control checks before being shipped.

IV. Use No Artificial Preservatives, Colors or Additives

Natura will not add anything to the food unless it is nutritious and healthy for your cat or dog.

V. Formulate Using Pet Food Ingredients That Provide the Optimum Nutritional Profile for Skin and Coat

Getting a good skin and coat is no big secret. It's just very expensive to do. You have to use more meat, higher quality sources of fats and oils, and high levels of vitamins and other nutrients. Natura has a large investment in quality - we've made the commitment. Other dog food and cat food companies try to take shortcuts by using vegetable protein fillers and cheaper sources of fats.

VI. Continue Extensive Testing and Monitoring to Assure Optimal Health and Longevity of Your Pet

Natura Pet Products will stay on the leading edge of pet health care. As new information is developed, Natura will adjust formulas to ensure that our diets stay the healthiest in the world!

A Difference You and Your Pet Can Appreciate

We all know how much dogs and cats like to eat human food. Because the taste of Natura pet foods comes from high-quality ingredients, we don't have to add artificial flavors or colors. All our foods are free from chemical additives of any kind, including preservatives such as Ethoxyquin and BHA/BHT, which are

NUTRITIONAL PHILOSOPHY

frequently found in pet foods but are banned from human use in many countries.

By eliminating the cheap filler ingredients and low-grade proteins that are so common in commercial pet foods, Natura creates foods that are more dense, richer in nutrients without added bulk. This means your pet gets more nutrition from less food, with calories and fats in each formula balanced to fit the needs of your specific dog or cat.

Choosing a Pet Food

Your pet's health is just as important as your own. A pet's diet, the biggest health variable controlled by its owner, is crucial to its well-being. That's why selecting a **tasty and healthy pet food** is the most loving choice you can make for your pet.

It's not always an easy choice to make. With so many different pet food products to choose from, it has become increasingly difficult to determine which pet foods are actually "healthy" for your pet.

By committing to our Nutritional Philosophy, we believe that we have created the **healthiest dog and cat foods** in the world. With a variety of flavors and formulas available, we are sure that you can find one that suits your animal's individual needs.

Natura has made the decision easier with our [How to Choose a Healthful Pet Food](#) downloadable chart. It outlines which ingredients are best for your pet and which ingredients you should avoid.

Contact Us

Natura Pet Products has received certifications from the following four organizations:

American Institute of Baking(AIB) Superior rating certification - "...high AIB ratings confirm a manufacturer's commitment to excellence," - WDJ February, 2006.

USDA Organic Production Certification - A National Organic Program certifier has approved the facility and its procedures through rigorous inspection and auditing. (Natura's baking facility is certified by OneCert)

USDA APHIS (Animal and Plant Health Inspection Service) Registered - APHIS registry certifies that Natura purchases all of our meats from USDA registered suppliers who follow all USDA regulations for safe meat handling.

ISO Quality Management System 9001: 2000 compliant: - An internationally recognized and highly respected system of quality management.

In addition to our accreditations, Natura employs our own standards of quality. Before any of our pet food is shipped, it must pass 121 quality-control checks.

This isn't just pet food. This is the foundation for your pet's long-term health. We want to be sure we provide him or her with the best pet food on the market, manufactured in the best way possible.

NUTRITIONAL PHILOSOPHY

EVO Grain-Free, Human Grade Pet Food

While all Natura Pet Products use high-quality meat as the main pet food ingredient, **EVO dog and cat food** is completely grain-free. In fact, EVO has the highest protein content of any meat-based dry pet food on the market and uses whole, fresh meat sources such as turkey, chicken and herring meal!

About Us **How Natura Pet Products is Different**

Philosophy

No pet food company in the world makes natural pet foods like Natura. We use only ingredients you'd eat yourself: quality meats, whole grains, fresh fruits and vegetables, and complete vitamin and mineral supplements. For us humans, a diet of natural, wholesome food is essential to living a long healthy life. We believe this fundamental principle is true for your pet, too.

Manufacturing

All of our human grade dog and cat foods are carefully cooked and tested to ensure consistent nutrient quality and enjoyable texture and taste. All of the ingredients used in our pet foods are tested to make sure they are hormone, antibiotic and pesticide-free. And we never add artificial ingredients, chemical additives, by-products or fillers of any kind.

About Us Our Pet Nutrition Philosophy

Philosophy

Natura Pet Products was founded in 1989 by John and Ann Rademakers and Peter Atkins in Santa Clara, California. Dissatisfied with the unhealthy ingredients in the pet foods on the market, they consulted with veterinary nutrition experts to determine the best sources for **pet food ingredients**. Working with caring pet professionals - veterinarians, breeders and nutritionists - Natura asked one key question: *"How do you make the healthiest pet food in the world?"*

Manufacturing

News

Contact Us

What they learned won't surprise you. Dogs and cats are healthiest when they eat the whole, natural foods we would eat ourselves: USDA-inspected chicken, turkey and lamb, whole grain rice and barley, fresh fruits and vegetables, and Grade A dairy products. Based on information from this research, Natura's Nutritional Philosophy was developed:

I. Use Only Dog and Cat Food Ingredients Which I Would Feel Comfortable Eating Myself

The bottom line: If I wouldn't eat it, why would I want to feed it to my pet? It is important to understand that the pet food industry is the primary outlet for human by-products. There are ingredients which are allowed to be used in pet foods that are, at best, scary.

II. Use Whole Pet Food Ingredients That Are Nutrient Rich and Unaltered

Mother Nature made the grain in its whole state. As such, it includes nutritious protein, fats, carbohydrates, fiber, vitamins and minerals. Other pet food companies use fractionated grains, which do not include this balance of natural nutrition.

III. Use Highly Controlled Cooking Methods to Preserve Natural Levels of Nutrients

Quality control and process management are critical in making a **nutritious pet food**. All Natura foods undergo over 121 different quality control checks before being shipped.

IV. Use No Artificial Preservatives, Colors or Additives

Natura will not add anything to the food unless it is nutritious and healthy for your cat or dog.

V. Formulate Using Pet Food Ingredients That Provide the Optimum Nutritional Profile for Skin and Coat

Getting a good skin and coat is no big secret. It's just very expensive to do. You have to use more meat, higher quality sources of fats and oils, and high levels of vitamins and other nutrients. Natura has a large investment in quality - we've made the commitment. Other dog food and cat food companies try to take shortcuts by using vegetable protein fillers and cheaper sources of fats.

VI. Continue Extensive Testing and Monitoring to Assure Optimal Health and Longevity of Your Pet

Natura Pet Products will stay on the leading edge of pet health care. As new information is developed, Natura will adjust formulas to ensure that our diets stay the healthiest in the world!

A Difference You and Your Pet Can Appreciate

We all know how much dogs and cats like to eat human food. Because the taste of Natura pet foods comes from high-quality ingredients, we don't have to add artificial flavors or colors. All our foods are free from chemical additives of any kind, including preservatives such as Ethoxyquin and BHA/BHT, which are

OWNER
TESTIMONIALS

NUTRITIONAL
PHILOSOPHY

frequently found in pet foods but are banned from human use in many countries.

By eliminating the cheap filler ingredients and low-grade proteins that are so common in commercial pet foods, Natura creates foods that are more dense, richer in nutrients without added bulk. This means your pet gets more nutrition from less food, with calories and fats in each formula balanced to fit the needs of your specific dog or cat.

Choosing a Pet Food

Your pet's health is just as important as your own. A pet's diet, the biggest health variable controlled by its owner, is crucial to its well-being. That's why selecting a **tasty and healthy pet food** is the most loving choice you can make for your pet.

It's not always an easy choice to make. With so many different pet food products to choose from, it has become increasingly difficult to determine which pet foods are actually "healthy" for your pet.

By committing to our Nutritional Philosophy, we believe that we have created the **healthiest dog and cat foods** in the world. With a variety of flavors and formulas available, we are sure that you can find one that suits your animal's individual needs.

Natura has made the decision easier with our [How to Choose a Healthful Pet Food](#) downloadable chart. It outlines which ingredients are best for your pet and which ingredients you should avoid.

[About Us](#) **Manufacturing**

Philosophy **Pet Food Safety and Quality Control**

Manufacturing Because we use only the **highest quality human-grade pet food ingredients** in our **dog and cat foods**, we apply the highest quality manufacturing guidelines to our production process. There are no shortcuts here. We follow the strictest of pet food manufacturing guidelines to ensure we deliver a product that sets the benchmark in the industry. That's what your pet deserves.

[Quality Control Summary](#)
[Independent Test Results](#)

News

Contact Us

Natura Pet Products has received certifications from the following four organizations:

American Institute of Baking(AIB) Superior rating certification - "...high AIB ratings confirm a manufacturer's commitment to excellence," - WDJ February, 2006.

USDA Organic Production Certification - A National Organic Program certifier has approved the facility and its procedures through rigorous inspection and auditing. (Natura's baking facility is certified by OneCert)

USDA APHIS (Animal and Plant Health Inspection Service) Registered - APHIS registry certifies that Natura purchases all of our meats from USDA registered suppliers who follow all USDA regulations for safe meat handling.

ISO Quality Management System 9001: 2000 compliant: - An internationally recognized and highly respected system of quality management.

In addition to our accreditations, Natura employs our own standards of quality. Before any of our pet food is shipped, it must pass 121 quality-control checks.

This isn't just pet food. This is the foundation for your pet's long-term health. We want to be sure we provide him or her with the best pet food on the market, manufactured in the best way possible.

NUTRITIONAL PHILOSOPHY

Innova Holistic Cat and Dog Food

Just as dieticians recommend following the U.S. Department of Agriculture food pyramid for our own dietary needs, **Innova** applies this same principle when creating foods for our animal friends. Every Innova pet product incorporates elements from the five food pyramid groups - meat, dairy, vegetables, fruit and grain - plus essential fats and oils to deliver supreme nutrition for the overall health of your dog or cat.
