II.

DEFENSES

In addition to the defenses described below, Apple expressly reserves the right to allege additional defenses as they become known through the course of discovery.

FIRST DEFENSE – FAILURE TO STATE A CLAIM

60. The Complaint fails to state a claim upon which relief can be granted because Apple has not performed any act or thing and is not proposing to perform any act or thing in violation of any rights validly belonging to Motorola Mobility

SECOND DEFENSE – NONINFRINGEMENT

61. Apple does not infringe and has not infringed, either directly, indirectly, contributorily or by inducement, any claims of the Asserted Patents, either literally or under the doctrine of equivalents, willfully or otherwise.

THIRD DEFENSE – PATENT INVALIDITY

62. Motorola Mobility's alleged claims for infringement of the Asserted Patents are barred because each and every claim of the Asserted Patents is invalid for failure to comply with the requirements of Title 35 of the United States Code, including but not limited to Sections 102,

103 and/or 112.

FOURTH DEFENSE – LACHES

63. Motorola Mobility’s claims for relief are barred in whole or in part by the equitable doctrine of laches.

FIFTH DEFENSE – ESTOPPEL

64. Motorola Mobility’s claims for relief are barred in whole or in part by the doctrine of equitable estoppel.

SIXTH DEFENSE – STATUTE OF LIMITATIONS

65. To the extent Motorola Mobility seeks damages for alleged infringement more than six years prior to filing of this action, the relief sought by Motorola Mobility is barred by 35 U.S.C. § 286.

SEVENTH DEFENSE – ABSOLUTE INTERVENING RIGHTS

66. To the extent Motorola Mobility seeks damages for alleged infringement of claims 25-27 of the ’006 patent before January 12, 2010, the date of issue for the reexamination certificate of the ’006 patent, the relief sought by Motorola Mobility is barred by 35 U.S.C. § 252.

EIGHTH DEFENSE – EQUITABLE INTERVENING RIGHTS

67. To the extent Motorola Mobility seeks damages for alleged infringement of claims 25-27 of the ’006 patent after January 12, 2010, the date of issue for the reexamination certificate of the ’006 patent, the relief sought by Motorola Mobility is barred by 35 U.S.C. § 252.

NINTH DEFENSE – NOTICE

68. To the extent Motorola Mobility seeks damages for alleged infringement prior to its giving actual or constructive notice of the ’987, ’119, ’006, ’737, ’531 and ’161 patents to Apple, the relief sought by Motorola Mobility is barred by 35 U.S.C. § 287.

TENTH DEFENSE – PROSECUTION HISTORY ESTOPPEL

69. Motorola Mobility is estopped from construing the claims of the ’987, ’119, ’006,

'737, '531 and '161 patents in such a way as may cover any of Apple's products or processes by reasons of statements made to the U.S. Patent and Trademark Office ("Patent Office") during the prosecution of the applications that led to the issuance of the '987, '119, '006, '737, '531 and '161 patents.

ELEVENTH DEFENSE – PATENT EXHAUSTION/IMPLIED LICENSE

70. The relief sought by Motorola Mobility is barred in whole or in part by the doctrines of patent exhaustion and/or implied license.

TWELFTH DEFENSE – LACK OF STANDING

71. Motorola Mobility lacks standing to bring this suit because, as shown on the faces of the '987, '119, '006, '737, '531 and '161 patents, Motorola Mobility is not the assignee of those patents. In addition, essential parties are not named in this action.

THIRTEENTH DEFENSE – NO INJUNCTIVE RELIEF

72. To the extent Motorola Mobility seeks injunctive relief for alleged infringement, the relief sought by Motorola Mobility is unavailable because any alleged injury to Motorola Mobility is not immediate or irreparable and because Motorola Mobility has an adequate remedy at law for any alleged injury.

FOURTEENTH DEFENSE – INEQUITABLE CONDUCT

73. The '006 patent is unenforceable under the doctrine of inequitable conduct. On information and belief, prior to the issuance of the '006 patent, at least two of the inventors named on that patent, Gene Eggleston and Mitch Hansen, as well as the attorney who prosecuted the '006 patent, Terri S. Hughes, were aware of material information, including prior art, but withheld, concealed and/or mischaracterized that information with the intent to deceive the Patent Office. This information includes, without limitation, the inventions disclosed in U.S. Patent No. 5,513,126 to Harkins et al. ("Harkins"), filed on October 4, 1993 and issued on April 30, 1996. A copy of Harkins is attached as Exhibit A hereto.

74. Upon information and belief, the named inventors of the '006 patent had knowledge of Harkins at least by April 24, 1997, during the pendency of U.S. Patent Application

No. 08/574,541 (“the ’541 application”), and more than two years and five months before the issuance of the ’006 patent. Named inventors Eggleston and Hansen are also the named inventors on U.S. Patent Application No. 08/574,537 (“the ’537 application”), entitled “Method and Apparatus for Prestage Filtering Communications” and filed on December 19, 1995. Eggleston and Hansen learned of Harkins at least by April 24, 1997, when the examiner reviewing the ’537 application issued an office action rejecting all claims and identifying Harkins as relevant to the prosecution of that application in the Notice of References Cited. *See* Exhibit B, at 9. Harkins is one of only six references listed on the examiner’s Notice of References Cited. *See id.*

75. Upon information and belief, the attorney responsible for prosecuting the ’006 patent, as well as the named inventors of the ’006 patent, had knowledge of Harkins at least by April 15, 1998, during the pendency of U.S. Patent Application No. 08/574,541, and more than one year and five months before the issuance of the ’006 patent. Hughes is the sole prosecuting attorney named on the ’006 patent, and one of two prosecuting attorneys named on the ’531 patent. In addition, Eggleston and Hansen are the named inventors on the ’531 patent. Upon information and belief, on April 15, 1998, Eggleston and Hansen submitted, and Hughes signed, an Information Disclosure Statement (“IDS”) disclosing Harkins to the examiner as a reference “which may be material to the examination of” the ’531 patent. Exhibit C, at 5.

76. Upon information and belief, Eggleston, Hansen and Hughes knew that Harkins was material prior art to the ’541 application and ’006 patent because Harkins discloses a “Network Having Selectively Accessible Recipient Prioritized Communication Channel Profiles.” In particular, Harkins teaches automatic filtering of communications sent by a sender to a receiver as defined by a receiver profile. *See* Exhibit A, at Abstract. “The receiver profile establishes the properties and mode for receipt of information for receivers on the network Receivers have additional control over network senders by defining an information filter which further controls sender channel access (to a receiver) by defining some channels as having priority of access such as direct or delayed access, as well as selectively permitting senders to

override the receiver profile.” *Id.* Upon information and belief, Eggleston, Hansen and Hughes further knew that Harkins was material prior art because they identified Harkins to the Patent Office during prosecution of the ’531 patent. *See* ¶ 75 above; Exhibit C, at 5.

77. Harkins is highly material prior art to the ’006 patent. The ’006 is currently undergoing its second *ex parte* reexamination. *See* Exhibit D. The reexamination examiner determined that “Harkins raises a substantial new question of patentability regarding claims 24 and 25” of the ’006 patent because it provides “new and non-cumulative teachings that a reasonable examiner would consider important in determining patentability of the claims.” *Id.* at

10. Claim 24 (and dependent claim 25) as originally issued include the following limitation:

a data transfer manager, coupled with the user parameter store, adapted to control communication of data units between the communication unit and the host server including receiving individually filtered data units from the host server based on at least one user-definable filter parameters to identify whether a data unit is a qualifying or non-qualifying data unit, wherein for qualifying data units, a summary part and an additional part is received and for non-qualifying data units, the summary part without the additional part is received, and providing the communication unit with the summary part and the additional part for qualifying data units and providing the communication unit with the summary part without the additional part for non-qualifying data units.

The only alteration to this claim limitation after the first *ex parte* reexamination was correction of a grammatical error through replacing with word “parameters” with the word “parameter.” *See* Exhibit 3 to Motorola Mobility’s Complaint, at 20-21. As explained by the second reexamination examiner, the above quoted limitation is the “distinguishing feature” of claims 24 and 25 that rendered those claims patentable. Exhibit D, at 10-11. Harkins is material to claims 24 and 25 of the ’006 patent because it reads on this “distinguishing feature”:

Harkins raises a substantial new question by providing teachings that are relevant to the distinguishing feature of claims 24 and 25. For example, Harkins suggests receiving individually filtered data units from the host server based on at least one user-definable filter parameter to identify whether a data unit is a qualifying or non-qualifying data unit by teaching a device server and Communication Channel Admin Server applying filtering parameters before passing the data to the communication unit.

Id. at 11 (citing Harkins, col. 12; ll. 6-11; col. 7, ll. 52-54).

78. Harkins is not cumulative to any references disclosed during prosecution of the '006 Patent. None of the references cited to the Patent Office describe the inventions claimed in Harkins, which anticipate and/or render obvious the '006 patent for the reasons identified above and in Exhibit D.

79. Upon information and belief, Eggleston, Hansen and Hughes failed to disclose Harkins during prosecution of the '006 patent with an intent to deceive the Patent Office. As explained in Paragraph 76 above, although Eggleston, Hansen and Hughes disclosed Harkins to the Patent Office in conjunction with prosecution of the '531 patent in April 1998, they did not disclose Harkins in conjunction with prosecution of the '006 patent, even though prosecution of that patent was ongoing in April 1998.

80. Harkins qualifies as prior art to the '006 patent under 35 U.S.C. § 102(e)(2). The United States patent application that issued as Harkins, U.S. Patent Application No. 08/130,828, was filed on October 4, 1993, more than two years prior to the December 19, 1995 filing date of the '541 application. In addition, Harkins issued on April 30, 1996, nearly three-and-a-half years before issuance of the '006 patent.

81. Upon information and belief, the examiner did not consider Harkins during prosecution of the '006 patent.

82. The acts of fraud on the Patent Office committed during the prosecution of the '006 patent renders the '006 patent unenforceable.
