Subject: Apple/Motorola (FL): interrogatory supplementation

Hi Cathleen,

Just confirming that we meant all of the rogs in Apple's third set (Nos. 16-22), not just Nos. 20 & 22. In particular, for some of these, Motorola merely identified "the source code produced by Counterclaim Defendants in this case" without providing a narrative explanation or identifying specific file names, as requested by the interrogatory.

Best regards,
Jill
