'214 Patent Infringement Contentions

Motorola’s infringing products (“Accused Devices”) include mobile devices, such as smartphones, associated software, and components thereof. The Accused Devices include Motorola’s Android based phones which include, but are not limited to, the Motorola Droid X, Droid 2, Droid 2 Global, Cliq 2, Defy, Bravo, Droid Pro, Droid 2 R2-D2, Droid X 2, Charm, Droid, Flipside, Flipout, Atrix, Droid Bionic, Xoom, Devour A555, Backflip, Cliq/Dext, Cliq XT/Quench, Citrus, Spice, i1 and other Motorola Android based phones incorporating hardware and/or software that is substantially similar. The figures and illustrations in the infringement chart below display exemplary devices.

U.S. Patent No. 7,024,214 (‘214 Patent)	Accused Devices
<p>1. In a network that includes a first computer system having a first data store and second computer system having a second data store, a method for synchronizing the first and second data stores in a flexible manner considering the circumstances that exist at the time of synchronization, the method comprising the following:</p>	<p>Each Accused Device, such as, for example, the DROID 2 or DROID X model, is a first computer system, that operates in a network. Such network includes at least each Accused Device and a second computer system, which can be, for example, an email or calendar server. Such email or calendar server can be, for example, a Microsoft Exchange Server, Gmail server, or Google calendar server.</p> <p>Each Accused Device has a first data store, which can be on-board memory (e.g., 8 GB in DROID 2 and DROID X), SD memory (e.g., 8 GB in DROID 2, or 2 GB in DROID X), SIM card, and/or other memory (e.g., removable memory) for storing data items such as email, calendar data and contact information. <i>See, e.g.,</i> DROID 2 by Motorola – Android Phone – Tech Specs, http://www.motorola.com/Consumers/US-EN/Consumer-Product-and-Services/Mobile-Phones/ci.Motorola-DROID-2-US-EN.alt (visited Feb. 16, 2011):</p>

U.S. Patent No. 7,024,214 (‘214 Patent)	Accused Devices
	<p>Secure Personal Information—Your mobile device can store personal information in various locations including your SIM card, memory card, and phone memory. Be sure to remove or clear all personal information before you recycle, return, or give away your device. You can also backup your personal data to transfer to a new device.</p> <p>The second computer system (which can be, for example, an email or calendar server) has a second data store for storing data items such as email, calendar data and contact information.</p> <p>As set forth below, each Accused Device comprises a method for synchronizing the calendar, email, and contact information of the first data store of each Accused Device and second data store of the second computer system. <i>See, e.g., DROID 2 by Motorola – Android Phone – Tech Specs:</i></p> <div style="text-align: center;">  </div> <p>BLUETOOTH® TECHNOLOGY⁵ Stereo Bluetooth Class 2, Version 2.1 + EDR (support profiles, A2DP, AVRCP, HFP, HID, HSP, OPP, PBAP)</p> <p>WEB BROWSER Android HTML Webkit, Adobe® Flash® Player 10.1 Mobile browsing with a new processor and Verizon’s 3G network</p> <p>SOFTWARE UPDATES (FOTA)</p> <p>SYNCHRONIZATION Support for Corporate calendar, email and contacts (Exchange 2003, 2007 and 2010), Google contacts, calendar and Gmail™, Facebook™ contacts</p> <p>WIFI 802.11 b,g, n</p> <p>WIRELESS LOCAL AREA NETWORK (WLAN)</p> <p><i>See also DROID X by Motorola – Android phone – HD phone – Tech Specs:</i></p>

U.S. Patent No. 7,024,214 (‘214 Patent)	Accused Devices
--	------------------------

CONNECTIVITY

BLUETOOTH® TECHNOLOGY⁵
Stereo Bluetooth Class 1.5, Version 2.1 + EDR
(support profiles, A2DP, AVRCP, HFP, HID, HSP, OPP, PBAP)

WEB BROWSER
Android HTML Webkit, Adobe® Flash® Player
(available via software update late summer 2010)

SYNCHRONIZATION
Support for Corporate calendar, email and contacts (Exchange 2003 and 2007), Google contacts, calendar and Gmail™ contacts

WIFI
802.11 n

3G MOBILE HOT SPOT¹
Be a mobile hot spot for up to 5 other devices

DATA ACCESS⁶
Yes

As set forth below, this synchronization of the first and second data stores is accomplished in a flexible manner considering the circumstances existing at the time of synchronization.

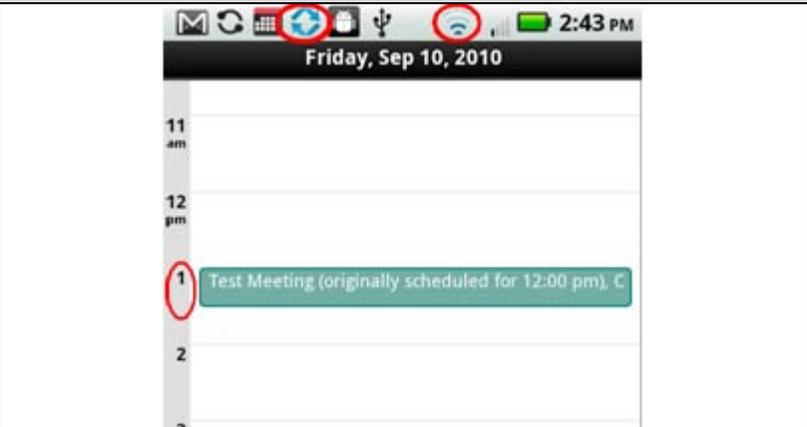

an act of the first computer system determining that a data item is to be synchronized;

Each Accused Device determines that a data item (e.g., email, calendar data and contact information) is to be synchronized. *See, e.g., DROID 2 User Guide at 10; Screenshot 1.1:*

	Bluetooth® active		network (full signal)
	GPS active		network (roaming)
	Wi-Fi® active		3G (fastest data)
	downloading		airplane mode
	vibrate		sync active
	silent		alarm set
	mute call		battery (charging)
	speakerphone active		battery (full charge)

U.S. Patent No. 7,024,214 ('214 Patent)

Accused Devices

Screenshot 1.1: status icon indicates a synchronization is active – each Accused Device determined that a data item was to be synchronized

Furthermore, each Accused Device can determine that a data item is to be synchronized by either "pushing " data or "fetching" data on a predetermined schedule.

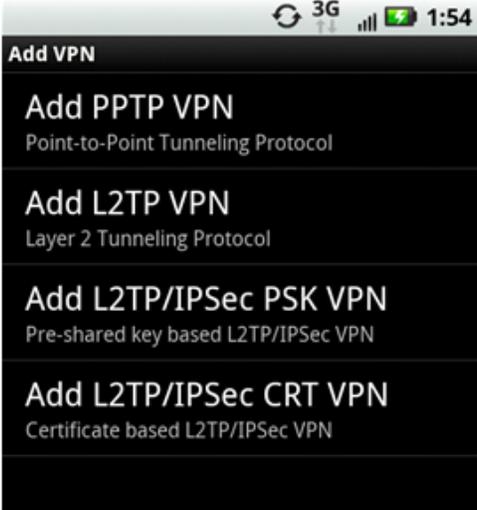

Also, each Accused Device will immediately determine that a data item is to be synchronized when a new item is created or an old item is edited.

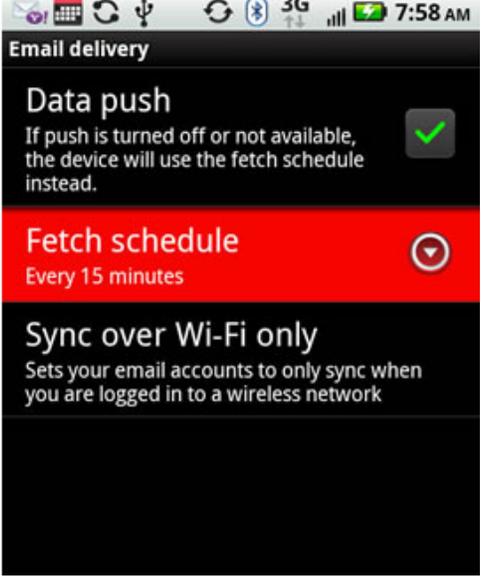

an act of the first computer system identifying which of a plurality of synchronization mechanisms, including one or more hardwired or wireless communication connections, are available to use for synchronization;

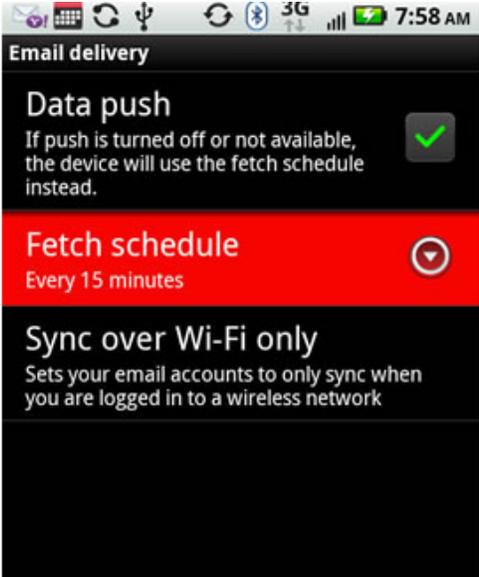

Each Accused Device identifies which of a plurality synchronization mechanisms, including one or more hardwired or wireless communication connections, are available to use for synchronization.

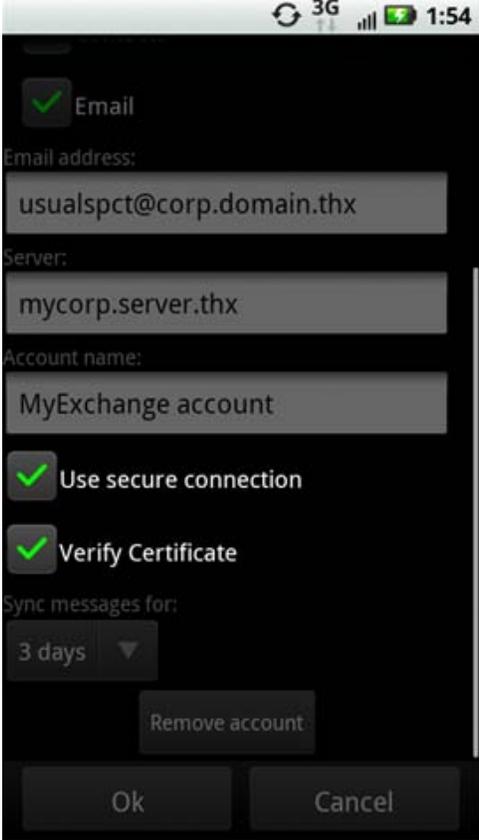

Such wireless communication connections for synchronization can be, for example, 3G, Wi-Fi, and Bluetooth connections. *See, e.g., DROID 2 User Guide at 10:*

	Bluetooth® active		network (full signal)
	GPS active		network (roaming)
	Wi-Fi® active		3G (fastest data)
	downloading		airplane mode
	vibrate		sync active
	silent		alarm set
	mute call		battery (charging)
	speakerphone active		battery (full charge)

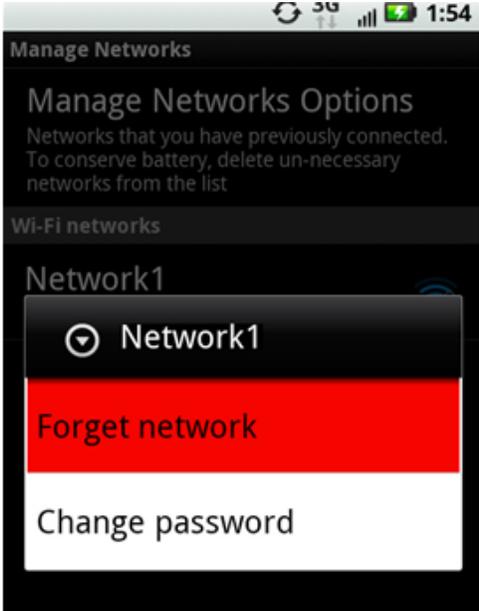

U.S. Patent No. 7,024,214 ('214 Patent)	Accused Devices
	<p>The hardwired communication connection can be, for example, a USB connection. <i>See, e.g., DROID 2 User Guide at 48:</i></p> <p>1 With a memory card inserted, and your phone showing the home screen, connect a Motorola micro USB data cable from your phone's micro USB port to a USB port on your computer. Your phone should show  in the status bar.</p> <p>Other synchronization mechanisms can be “push” or “fetch.” For the former, the second computer system (for example, an email or calendar server, e.g., Microsoft Exchange Server, Gmail server, or Google calendar server) can “push” a data item (e.g., email, calendar data and contact information) to each Accused Device. For the latter, each Accused Device fetches a data item from the second computer system.</p> <p>Another synchronization mechanism can be a Virtual Private Network (VPN). <i>See, e.g., Add a Virtual Private Network – Motorola DROID X MB810, http://support.vzw.com/clc/devices/knowledge_base.html?id=34245 (visited Feb. 23, 2011):</i></p> 
<p>an act of the first computer system consulting a set of one or more flexible selection rules to select a synchronization mechanism, the set of one or more flexible rules taking into consideration</p>	<p>Each Accused Device consults a set of one or more flexible selection rules to select a synchronization mechanism (e.g., wireless 3G or Wi-Fi; hardwired USB; fetch or pull synchronization).</p> <p>Each Accused Device can be flexibly configured such that, for example, it synchronizes emails by fetch or push</p>

U.S. Patent No. 7,024,214 ('214 Patent)	Accused Devices
<p>value, from having access to synchronized data, relative to at least one of (i) an economic cost for synchronization using each available synchronization mechanism, (ii) network security for each available synchronization mechanism, (iii) security of the second computer system, or (iv) value of data being synchronized and thereby selecting an available synchronization mechanism appropriate for the data item given the one or more flexible selection rules; and</p>	<p>synchronization, whereas it synchronizes social applications only via Wi-Fi.</p> <p><i>See, e.g., Gmail Synchronization – Motorola Droid 2, http://support.vzw.com/clc/devices/knowledge_base.html?id=31337 (visited Feb. 16, 2011):</i></p>  <p>The set of one or more flexible rules takes into consideration value, from having access to synchronized data (e.g., email, calendar data and contact information), relative to at least one of (i) an economic cost for synchronization using each available synchronization mechanism (e.g., wireless 3G or Wi-Fi; hardwired USB; fetch or pull synchronization), (ii) network security for each available synchronization mechanism, (iii) security of the second computer system (for example, an email or calendar server, e.g., Microsoft Exchange Server, Gmail server, or Google calendar server), or (iv) value of data being synchronized and thereby selecting an available synchronization mechanism appropriate for the data item given the one or more flexible selection rules.</p> <p>For example, each Accused Device can fetch data on a pre-determined schedule, or the second computer system can automatically push data to each Accused Device, or. This is a flexible choice that takes into account at least the value of the data.</p>

U.S. Patent No. 7,024,214 ('214 Patent)	Accused Devices
	<p>As another example, each Accused Device can be flexibly configured to synchronize social applications only via a Wi-Fi mechanism, while email is set to be synchronized via "push" synchronization. Such flexible rule takes into account at least the value of the data and cost of synchronizing using the various synchronization mechanisms.</p> <p><i>See, e.g.,</i> Gmail Synchronization – Motorola Droid 2, http://support.vzw.com/clc/devices/knowledge_base.html?id=31337 (visited Feb. 16, 2011):</p>  <p>As yet another example, each Accused Device can be flexibly configured to use a secure connection when synchronizing email. This flexible rule takes into account the security of the synchronization mechanism.</p> <p><i>See, e.g.,</i> Configure Corporate Email (Exchange ActiveSync) – Motorola DROID X MB810, http://support.vzw.com/clc/devices/knowledge_base.html?id=34193 (visited Feb. 16, 2011):</p>

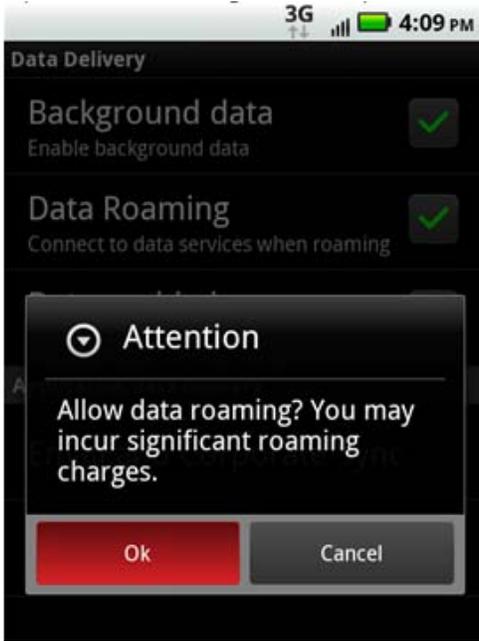

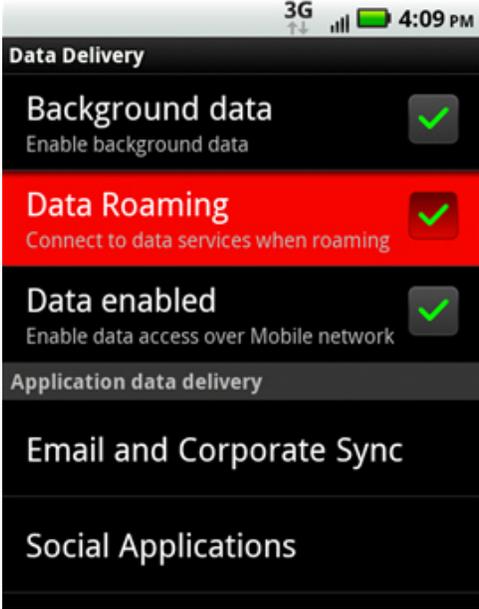

U.S. Patent No. 7,024,214 ('214 Patent)	Accused Devices
	 <p data-bbox="613 1241 1357 1415">As another example, each Accused Device can be flexibly configured to use a Virtual Private Network (VPN). Choosing to use a Virtual Private Network for synchronization is a rule that considers the security of the synchronization mechanism.</p> <p data-bbox="613 1461 1390 1598"><i>See, e.g.,</i> Add a Virtual Private Network – Motorola DROID X MB810, http://support.vzw.com/clc/devices/knowledge_base.html?id=34245 (visited Feb. 23, 2011):</p>

U.S. Patent No. 7,024,214 ('214 Patent)	Accused Devices
	 <p data-bbox="613 869 1365 1299">As still another example, each Accused Device can be flexibly configured to choose between a Wi-Fi mechanism and a 3G mechanism when synchronizing data. Each Accused Device uses a 3G mechanism until it is flexibly authorized to use a particular Wi-Fi mechanism. This rule considers the network security of unauthorized Wi-Fi mechanisms. Once one or more available Wi-Fi mechanisms have been authorized, each Accused Device prefers user-authorized Wi-Fi mechanisms to a 3G mechanism. This rule considers the economic cost due to the fact that using a Wi-Fi mechanism is less likely lead to additional user fees.</p> <p data-bbox="613 1346 1136 1377"><i>See, e.g., DROID 2 User Guide at 35-36:</i></p> <p data-bbox="721 1419 834 1446">Connect</p> <p data-bbox="721 1457 1284 1535">Your phone uses the mobile phone network (over the air) or a Wi-Fi connection to automatically access the Web.</p> <p data-bbox="727 1589 1284 1646">Note: Your service provider may charge to surf the Web or download data.</p> <p data-bbox="613 1654 1084 1686"><i>See also DROID 2 User Guide at 46:</i></p> <p data-bbox="724 1724 1263 1801">Tip: When you are in range and Wi-Fi is on, you will automatically reconnect to available networks you've connected to before.</p> <p data-bbox="613 1814 1398 1883">Each Accused Device can be flexibly configured to remove a particular Wi-Fi mechanism from the list of authorized Wi-</p>

U.S. Patent No. 7,024,214 ('214 Patent)	Accused Devices
	<p>Fi mechanisms, and each Accused Device will thereafter prefer a 3G mechanism to the de-authorized Wi-Fi mechanism. This can be done by selecting "Forget network" from the "Manage Networks" settings screen.</p> <p><i>See, e.g.,</i> Remove WiFi Connection – Motorola Droid 2 (A955), http://support.vzw.com/clc/devices/knowledge_base.html?id=34876 (visited Feb. 16, 2011):</p>  <p>Alternatively, each Accused Device can flexibly override the preference for <i>all</i> user-authorized Wi-Fi mechanisms by clearing the "Wi-Fi" checkbox on the "Wireless and network settings" screen. This will result in each Accused Device preferring a 3G mechanism to all Wi-Fi mechanisms, including user-authorized Wi-Fi mechanisms.</p> <p><i>See, e.g.,</i> WiFi On/Off – Motorola Droid 2 (A955), http://support.vzw.com/clc/devices/knowledge_base.html?id=31315 (visited Feb. 16, 2011):</p>

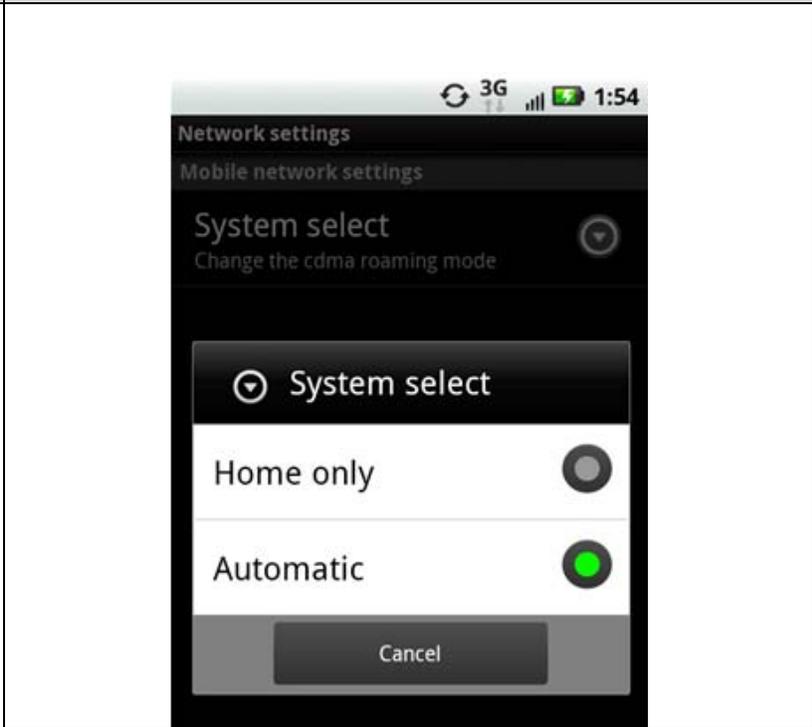

U.S. Patent No. 7,024,214 ('214 Patent)	Accused Devices
	 <p>As another example, each Accused Device can be flexibly configured to allow "roaming," or alternatively to allow synchronizations only using the "home" carrier's synchronization mechanisms. This flexible rule considers the cost of synchronizing using the various synchronization mechanisms.</p> <p><i>See, e.g.,</i> Data Roaming – Motorola DROID X MB810, http://support.vzw.com/clc/devices/knowledge_base.html?id=33954 (visited Feb. 23, 2011):</p>

<p>U.S. Patent No. 7,024,214 ('214 Patent)</p>	<p>Accused Devices</p>
	
<p>23. A method in accordance with claim 22, wherein the act of receiving instructions to change the set of flexible selection rules comprises the following: an act of receiving instructions to change the set of flexible selection rules from a user of the first computer system.</p>	<p>Each Accused Device, such as, for example, the DROID 2 and DROID X models, can receive instructions to change the set of flexible rules from a user of the first computer system (<i>i.e.</i> each Accused Device) and can change the set of flexible rules in response to the instruction.</p> <p>For example, each Accused Device can receive an instruction to change the set of flexible selection rules such that emails are only synchronized if they are more recent than one day, two days, three days, one week, two weeks, or one month old; or so that emails are synchronized without such a restraint. Each Accused Device can change the set of selection rules in response to such instruction. <i>See</i> Screenshot 23.1.</p>

U.S. Patent No. 7,024,214 ('214 Patent)	Accused Devices
	 <p>Screenshot 23.1: receiving an instruction to change the flexible rule that dictates the age of emails that are synchronized</p> <p>As another example, each Accused Device can receive an instruction to change the set of flexible selection rules such that social applications synchronize only via a Wi-Fi mechanism, while email is set to be synchronized via "push" synchronization. Alternatively, each Accused Device can receive an instruction to change the set of flexible selection rules such that social applications are not restricted in this way. Either way, each Accused Device can change the set of selection rules in response to the instruction.</p> <p><i>See, e.g.,</i> Gmail Synchronization – Motorola Droid 2, http://support.vzw.com/clc/devices/knowledge_base.html?id=31337 (visited Feb. 16, 2011):</p>

<p>U.S. Patent No. 7,024,214 ('214 Patent)</p>	<p>Accused Devices</p>
---	-------------------------------

27. A method in accordance with claim 26, wherein the act of changing the set of selection rules in response to the instruction, comprises the following: an act of fulfilling the instructions received from the network administrator of the second computer system to the extent that there is a conflict between the instructions received from the network administrator of the second computer system and the instructions received from the user of the first computer system.

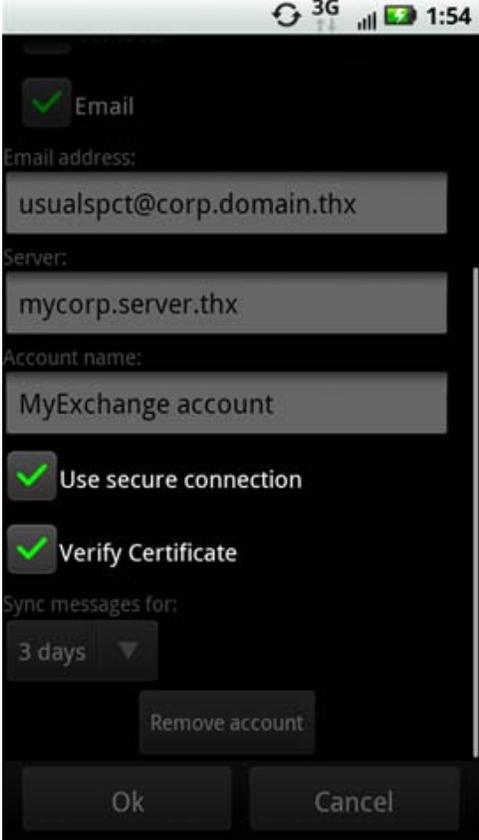

Each Accused Device fulfils the instructions received from the network administrator of the second computer system to the extent that there is a conflict between the instructions received from the network administrator of the second computer system and the instructions received from the user of the first computer system.

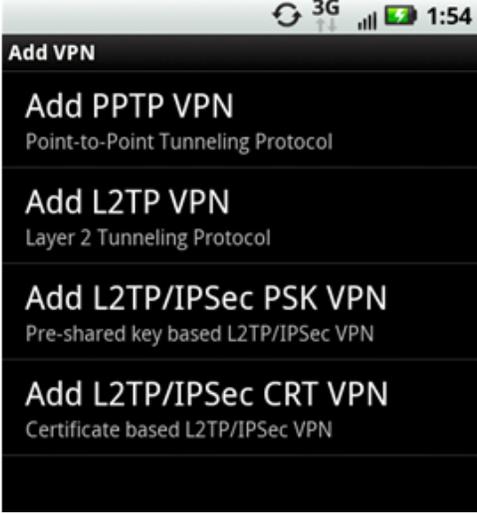

For example, if each Accused Device receives an instruction from the network administrator to disable synchronization of email attachments, and the user gives an instruction to synchronize an email attachment by clicking on an attachment to an email message, each Accused Device will not allow the attachment synchronization.

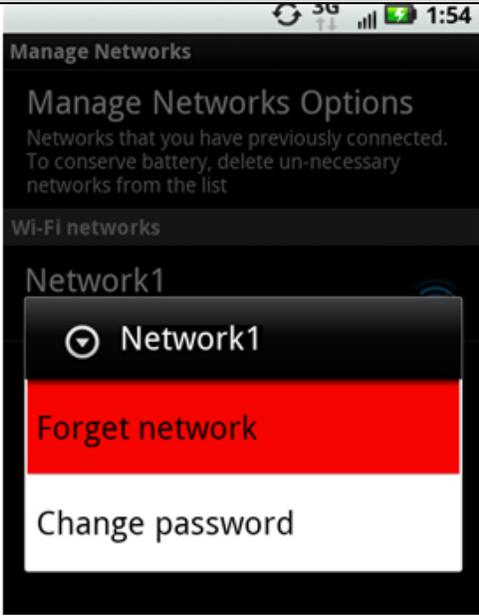

As a further example, if each Accused Device receives an instruction from the network administrator to disable synchronization of email attachments greater than a certain size, and the user gives an instruction to synchronize an email attachment that exceeds that size by clicking on an attachment to an email message, each Accused Device will

U.S. Patent No. 7,024,214 ('214 Patent)	Accused Devices
	<p>not allow the attachment synchronization.</p> <p>As a further example, if each Accused Device receives an instruction from the network administrator to synchronize only email items received more recently than a certain age, each Accused Device will not allow the user to synchronize older email items.</p> <p>As a further example, if each Accused Device receives an instruction from the network administrator to synchronize only calendar items more recent than a certain age, each Accused Device will not allow the user to synchronize older calendar items.</p> <p><i>See, e.g.,</i> http://www.sysadminlab.net/activesync/android-2-2-and-activesync-policies-a-complete-guide-what-works (accessed April 12, 2011)</p>
<p>28. A method in accordance with claim 1, wherein the act of the first computer system consulting a set of flexible selection rules comprises the following: an act of the first computer system selecting one of the available synchronization mechanisms without synchronous intervention from a user of the first computer system.</p>	<p>Each Accused Device can consult the set of flexible selection rules by selecting one of the available synchronization mechanisms without synchronous intervention from a user of the first computer system (<i>i.e.</i> each Accused Device).</p> <p>For example, without synchronous intervention from a user, each Accused Device can synchronize emails by fetch or push synchronization.</p> <p><i>See, e.g.,</i> Gmail Synchronization – Motorola Droid 2, http://support.vzw.com/clc/devices/knowledge_base.html?id=31337 (visited Feb. 16, 2011):</p>

This rule considers the security of a network associated with the synchronization mechanism (e.g., an authorized Wi-Fi network).</p>
<p>38. A method in accordance with claim 1, wherein the act of consulting a set of flexible selection rules to select one of the available synchronization mechanisms comprises the following: an act of selecting the synchronization mechanism at least based on the location of the user of the first computer system.</p>	<p>Each Accused Device can select the synchronization mechanism at least based on the location of the first computer system.</p> <p>As an example, each Accused Device can be flexibly configured to choose between a Wi-Fi mechanism and a 3G mechanism when synchronizing data. Each Accused Device uses a 3G mechanism until it is flexibly authorized to use a particular Wi-Fi mechanism. Once one or more available Wi-Fi mechanisms have been authorized, each Accused Device prefers user-authorized Wi-Fi mechanisms to a 3G mechanism when the first computer system is located within range of the Wi-Fi mechanism. This rule considers the location of the first computer system.</p> <p><i>See, e.g., DROID 2 User Guide at 35-36:</i></p>

<p>U.S. Patent No. 7,024,214 ('214 Patent)</p>	<p>Accused Devices</p>
	<p>Connect</p> <p>Your phone uses the mobile phone network (over the air) or a Wi-Fi connection to automatically access the Web.</p> <p>Note: Your service provider may charge to surf the Web or download data.</p> <p><i>See also</i> DROID 2 User Guide at 46:</p> <p>Tip: When you are in range and Wi-Fi is on, you will automatically reconnect to available networks you've connected to before.</p> <p>As another example, each Accused Device can be flexibly configured to allow "roaming," or alternatively to allow synchronizations only using the "home" carrier's synchronization mechanisms. This rule considers the location of the first computer system.</p> <p><i>See, e.g.,</i> Data Roaming – Motorola DROID X MB810, http://support.vzw.com/clc/devices/knowledge_base.html?id=33954 (visited Feb. 23, 2011):</p>

	 <p>The screenshot shows an Android phone's 'Data Delivery' settings screen. At the top, the status bar displays '3G', signal strength, battery level, and the time '4:09 PM'. Below the title 'Data Delivery', there are two settings: 'Background data' with a green checkmark and the text 'Enable background data', and 'Data Roaming' with a green checkmark and the text 'Connect to data services when roaming'. A modal dialog box titled 'Attention' is overlaid on the screen, containing the text 'Allow data roaming? You may incur significant roaming charges.' and two buttons: 'Ok' (in a red box) and 'Cancel' (in a grey box).</p> <p><i>See also</i> System Select – Motorola Droid 2 (A955), http://support.vzw.com/clc/devices/knowledge_base.html?id=31420 (visited Feb. 23, 2011):</p>

<p align="center">U.S. Patent No. 7,024,214 ('214 Patent)</p>	<p align="center">Accused Devices</p>
	
<p>39. A method in accordance with claim 1, wherein the act of consulting a set of flexible selection rules to select one of the available synchronization mechanisms comprises the following: an act of determining that there are no current synchronization mechanisms that are selectable based on the flexible set of rules; an act of reevaluating the flexible selection rules at a later time; and an act of repeating the reevaluation until at least one of the available synchronization mechanisms is selectable based on the flexible selection rules.</p>	<p>Each Accused Device can determine that there are no current synchronization mechanisms that are selectable based on the flexible set of rules, reevaluate the flexible selection rules at a later time, and repeat the reevaluation until at least one of the available synchronization mechanisms is selectable based on the flexible selection rules.</p> <p>For example, each Accused Device can be flexibly configured to synchronize social applications only via a Wi-Fi mechanism, while email is set to be synchronized via "push" synchronization. In such situation, if a social application data item is to be synchronized, but a Wi-Fi connection is not available, each Accused Device will determine that there are no current synchronization mechanisms that are selectable based on the flexible set of rules. Each Accused Device will reevaluate the flexible selection rules at a later time and repeat the reevaluation until at least one of the available synchronization mechanisms is selectable based on the flexible selection rules (for example, until the rule that social applications are synchronized only via Wi-Fi changes, or until a Wi-Fi connection becomes available).</p>
<p>41. A method in accordance</p>	<p>Each Accused Device can determine that a data item is to be</p>

<p>U.S. Patent No. 7,024,214 ('214 Patent)</p>	<p>Accused Devices</p>
<p>with claim 1, wherein the act of the first computer system determining that a data item is to be synchronized comprises the following: an act of the first computer system determining whether to synchronize a data item by consulting a set of flexible selection rules; and an act of the first computer system synchronize the data item with the second computer if the first computer system determines that the data item is to be synchronized.</p>	<p>synchronized by consulting a flexible set of selection rules and synchronizing the data item with the second computer if the first computer (<i>i.e.</i> each Accused Device) determines that the data item is to be synchronized.</p> <p>For example, each Accused Device can determine that a data item is to be synchronized by consulting a flexible set of selection rules that dictate that emails are only synchronized if they are more recent than one day, two days, three days, one week, two weeks, or one month old; or that emails are synchronized without such a restraint. Each Accused Device will synchronize emails if it determines that the data item is to be synchronized. <i>See</i> Screenshot 41.1.</p> <div data-bbox="764 888 1243 1734" data-label="Image"> </div> <p>Screenshot 41.1: determining that a data item is to be synchronized by consulting a flexible rule that specifies the age of emails that are synchronized</p>

U.S. Patent No. 7,024,214 ('214 Patent)	Accused Devices
<p>42. A computer program product for use in a network that includes a first computer system having a first data store and second computer system having a second data store, the computer program product for implementing a method for synchronizing the first and second data stores in a flexible manner considering the circumstances that exist at the time of synchronization, the computer program product comprising one or more computer-readable media having stored thereon the following:</p>	<p>Each Accused Device, such as, for example, the DROID 2 or DROID X model, is a first computer system and includes a computer program product (which may include or be part of, but is not limited to), the Android operating system) for use in a network. Such network includes at least each Accused Device and a second computer system, which can be, for example, an email or calendar server. Such email or calendar server can be, for example, a Microsoft Exchange Server, Gmail server, or Google calendar server.</p> <p>Each Accused Device has a first data store, which can be on-board memory (e.g., 8 GB in DROID 2 and DROID X), SD memory (e.g., 8 GB in DROID 2, or 2 GB in DROID X), SIM card, and/or other memory (e.g., removable memory) for storing data items such as email, calendar data and contact information.</p> <p><i>See, e.g., DROID 2 by Motorola – Android Phone – Tech Specs, http://www.motorola.com/Consumers/US-EN/Consumer-Product-and-Services/Mobile-Phones/ci.Motorola-DROID-2-US-EN.alt (visited Feb. 16, 2011):</i></p> <div data-bbox="792 1163 1198 1717" data-label="Image"> <p>TECHNOLOGY</p> <p>MEMORY⁹ up to 8 GB on board, 8 GB microSD pre-installed, expandable up to 32 GB</p> <p>PROCESSOR 1 GHz processor</p> <p>ACCELEROMETER Yes</p> <p>NETWORKS⁴ CDMA 1X 800/1900, EVDO rev. <p>U.S. Patent No. 7,024,214 ('214 Patent)</p>	<p>Accused Devices</p>
	<div data-bbox="760 310 1242 739" data-label="Image"> <p>The screenshot shows an Android calendar application on Friday, Sep 10, 2010. The time is 2:43 PM. The status bar at the top contains several icons, including a red circle around a synchronization icon. The calendar view shows a meeting titled 'Test Meeting (originally scheduled for 12:00 pm)' at 12:00 pm.</p> </div> <p>Screenshot 42.1: status icon indicates a synchronization is active – each Accused Device determined that a data item was to be synchronized</p> <p>Furthermore, each Accused Device can determine that a data item is to be synchronized by either "pushing " data or "fetching" data on a predetermined schedule.</p> <p>Also, each Accused Device will immediately determine that a data item is to be synchronized when a new item is created or an old item is edited.</p>
<p>computer-executable instructions for identifying which of a plurality of synchronization mechanisms, including one or more hardwired or wireless communication connections, are available to use for synchronization;</p>	<p>Certain computer-executable instructions (which may include or be part of, but is not limited to, the Android operating system) on each Accused Device are for identifying which of a plurality synchronization mechanisms, including one or more hardwired or wireless communication connections, are available to use for synchronization.</p> <p>Such wireless communication connections for synchronization can be, for example, 3G, Wi-Fi, and Bluetooth connections. <i>See, e.g., DROID 2 User Guide at 10:</i></p>

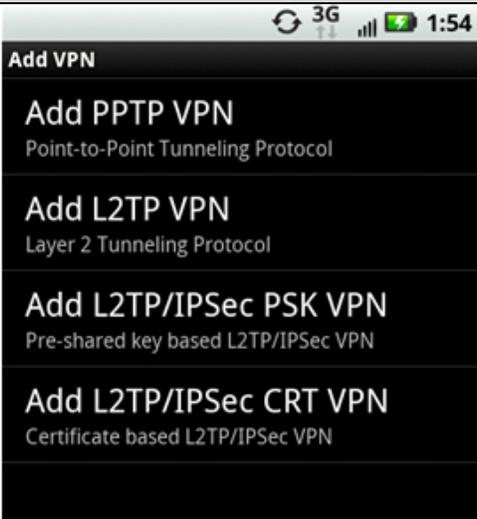

U.S. Patent No. 7,024,214 ('214 Patent)	Accused Devices			
	 Bluetooth® active		network (full signal)	
	 GPS active		network (roaming)	
	 Wi-Fi® active	3G	3G (fastest data)	
	 downloading		airplane mode	
	 vibrate		sync active	
	 silent		alarm set	
	 mute call		battery (charging)	
	 speakerphone active		battery (full charge)	
	<p>The hardwired communication connection can be, for example, a USB connection. <i>See, e.g., DROID 2 User Guide at 48:</i></p>			
	<p>¹ With a memory card inserted, and your phone showing the home screen, connect a Motorola micro USB data cable from your phone's micro USB port to a USB port on your computer. Your phone should show  in the status bar.</p>			
<p>Other synchronization mechanisms can be “push” or “fetch.” For the former, the second computer system (for example, an email or calendar server, e.g., Microsoft Exchange Server, Gmail server, or Google calendar server) can “push” a data item (e.g., email, calendar data and contact information) to each Accused Device. For the latter, each Accused Device fetches a data item from the second computer system.</p>				
<p>Another synchronization mechanism can be a Virtual Private Network (VPN). <i>See, e.g., Add a Virtual Private Network – Motorola DROID X MB810, http://support.vzw.com/clc/devices/knowledge_base.html?id=34245 (visited Feb. 23, 2011):</i></p>				

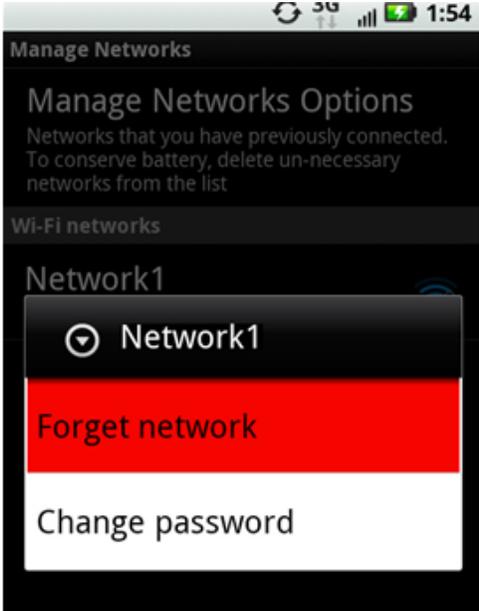

<p>U.S. Patent No. 7,024,214 ('214 Patent)</p>	<p>Accused Devices</p>
	
<p>computer-executable instructions for consulting a set of one or more flexible selection rules to select a synchronization mechanism, the set of one or more flexible rules taking into consideration value, from having access to synchronized data, relative to at least one of (i) an economic cost for synchronization using each available synchronization mechanism, (ii) network security for each available synchronization mechanism, or (iii) security of the second computer system, or (iv) value of data being synchronized, and thereby selecting an available synchronization mechanism appropriate for the data item given the one or more flexible selection rules; and</p>	<p>Certain computer-executable instructions (which may include or be part of, but is not limited to, the Android operating system) on each Accused Device are for consulting a set of one or more flexible selection rules to select a synchronization mechanism (e.g., wireless 3G or Wi-Fi; hardwired USB; fetch or pull synchronization).</p> <p>Each Accused Device can be flexibly configured such that, for example, it synchronizes emails by fetch or push synchronization, whereas it synchronizes social applications only via Wi-Fi.</p> <p><i>See, e.g.,</i> Gmail Synchronization – Motorola Droid 2, http://support.vzw.com/clc/devices/knowledge_base.html?id=31337 (visited Feb. 16, 2011):</p>

U.S. Patent No. 7,024,214 ('214 Patent)	Accused Devices
	 <p>The set of one or more flexible rules takes into consideration value, from having access to synchronized data (e.g., email, calendar data and contact information), relative to at least one of (i) an economic cost for synchronization using each available synchronization mechanism (e.g., wireless 3G or Wi-Fi; hardwired USB; fetch or pull synchronization), (ii) network security for each available synchronization mechanism, (iii) security of the second computer system (for example, an email or calendar server, e.g., Microsoft Exchange Server, Gmail server, or Google calendar server), or (iv) value of data being synchronized and thereby selecting an available synchronization mechanism appropriate for the data item given the one or more flexible selection rules.</p> <p>For example, each Accused Device can fetch data on a pre-determined schedule, or the second computer system can automatically push data to each Accused Device, or. This is a flexible choice that takes into account at least the value of the data.</p> <p>As another example, each Accused Device can be flexibly configured to synchronize social applications only via a Wi-Fi mechanism, while email is set to be synchronized via "push" synchronization. Such flexible rule takes into account at least the value of the data and cost of synchronizing using the various synchronization</p>

U.S. Patent No. 7,024,214 ('214 Patent)	Accused Devices
	<p>mechanisms.</p> <p><i>See, e.g.,</i> Gmail Synchronization – Motorola Droid 2, http://support.vzw.com/clc/devices/knowledge_base.html?id=31337 (visited Feb. 16, 2011):</p>  <p>As yet another example, each Accused Device can be flexibly configured to use a secure connection when synchronizing email. This flexible rule takes into account the security of the synchronization mechanism.</p> <p><i>See, e.g.,</i> Configure Corporate Email (Exchange ActiveSync) – Motorola DROID X MB810, http://support.vzw.com/clc/devices/knowledge_base.html?id=34193 (visited Feb. 16, 2011):</p>

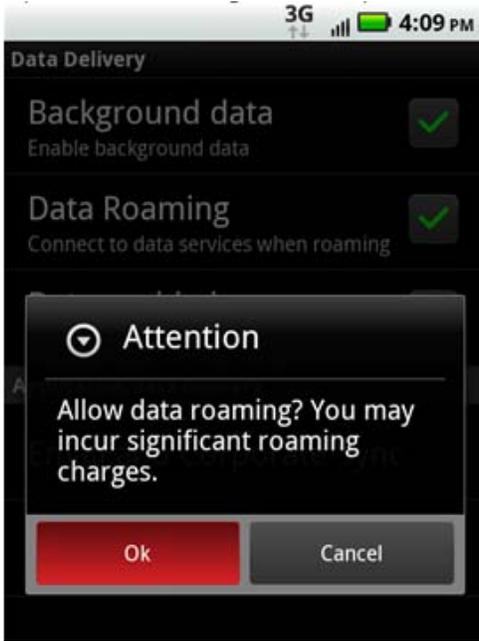

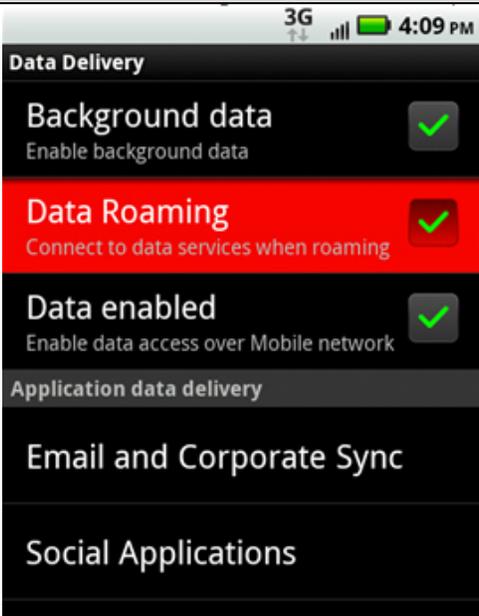

U.S. Patent No. 7,024,214 ('214 Patent)	Accused Devices
	 <p data-bbox="613 1241 1357 1415">As another example, each Accused Device can be flexibly configured to use a Virtual Private Network (VPN). Choosing to use a Virtual Private Network for synchronization is a rule that considers the security of the synchronization mechanism.</p> <p data-bbox="613 1461 1390 1598"><i>See, e.g.,</i> Add a Virtual Private Network – Motorola DROID X MB810, http://support.vzw.com/clc/devices/knowledge_base.html?id=34245 (visited Feb. 23, 2011):</p>

U.S. Patent No. 7,024,214 ('214 Patent)	Accused Devices
	 <p>As still another example, each Accused Device can be flexibly configured to choose between a Wi-Fi mechanism and a 3G mechanism when synchronizing data. Each Accused Device uses a 3G mechanism until it is flexibly authorized to use a particular Wi-Fi mechanism. This rule considers the network security of unauthorized Wi-Fi mechanisms. Once one or more available Wi-Fi mechanisms have been authorized, each Accused Device prefers user-authorized Wi-Fi mechanisms to a 3G mechanism. This rule considers the economic cost due to the fact that using a Wi-Fi mechanism is less likely lead to additional user fees.</p> <p><i>See, e.g., DROID 2 User Guide at 35-36:</i></p> <p>Connect Your phone uses the mobile phone network (over the air) or a Wi-Fi connection to automatically access the Web.</p> <p>Note: Your service provider may charge to surf the Web or download data.</p> <p><i>See also DROID 2 User Guide at 46:</i></p> <p>Tip: When you are in range and Wi-Fi is on, you will automatically reconnect to available networks you've connected to before.</p> <p>Each Accused Device can be flexibly configured to remove a particular Wi-Fi mechanism from the list of authorized Wi-</p>

U.S. Patent No. 7,024,214 ('214 Patent)	Accused Devices
	<p>Fi mechanisms, and each Accused Device will thereafter prefer a 3G mechanism to the de-authorized Wi-Fi mechanism. This can be done by selecting "Forget network" from the "Manage Networks" settings screen.</p> <p><i>See, e.g.,</i> Remove WiFi Connection – Motorola Droid 2 (A955), http://support.vzw.com/clc/devices/knowledge_base.html?id=34876 (visited Feb. 16, 2011):</p>  <p>Alternatively, each Accused Device can flexibly override the preference for <i>all</i> user-authorized Wi-Fi mechanisms by clearing the "Wi-Fi" checkbox on the "Wireless and network settings" screen. This will result in each Accused Device preferring a 3G mechanism to all Wi-Fi mechanisms, including user-authorized Wi-Fi mechanisms.</p> <p><i>See, e.g.,</i> WiFi On/Off – Motorola Droid 2 (A955), http://support.vzw.com/clc/devices/knowledge_base.html?id=31315 (visited Feb. 16, 2011):</p>

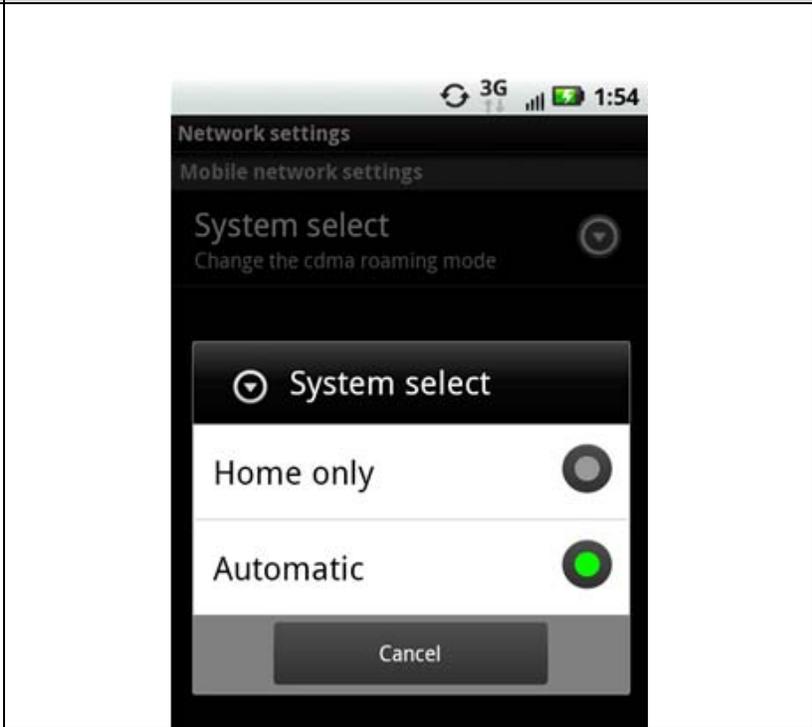

U.S. Patent No. 7,024,214 ('214 Patent)	Accused Devices
	 <p>As set forth below, this synchronization of the first and second data stores is accomplished in a flexible manner considering the circumstances existing at the time of synchronization.</p>
<p>an act of the first computer system determining whether to synchronize a data item by consulting a set of one or more flexible selection rules, the set of one or more flexible rules taking into consideration value, from having access to synchronized data, relative to at least one of (i) an economic cost for synchronization using each available synchronization mechanism, (ii) network security for each available synchronization mechanism, or (iii) security of the second</p>	<p>Each Accused Device determines whether to synchronize a data item (e.g., email, calendar data and contact information) by consulting a set of one or more flexible selection rules.</p> <p>For example, each Accused Device consults a flexible selection rule to determine whether to synchronize an email message based on the age of the email. <i>See</i> Screenshots 44.1-44.3.</p>

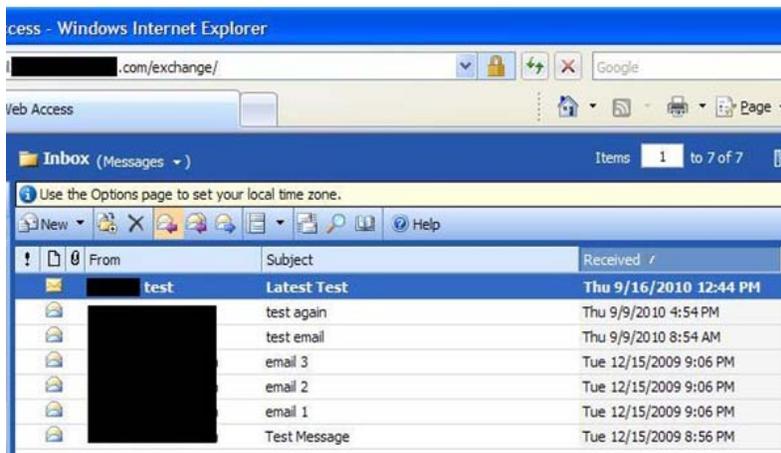

**U.S. Patent No. 7,024,214
('214 Patent)**

Accused Devices

computer system, or (iv) value of data being synchronized, and thereby also determining an available synchronization mechanism appropriate for the data item given the one or more flexible selection rules; and

Screenshot 44.1: a flexible rule dictates that only emails from the past month should be synchronized

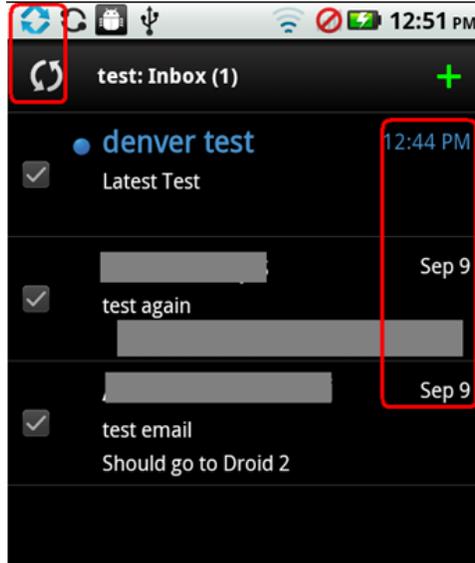

Screenshot 44.2: the second data store contains 7 emails,

**U.S. Patent No. 7,024,214
('214 Patent)**

Accused Devices

but only 3 are from the past month

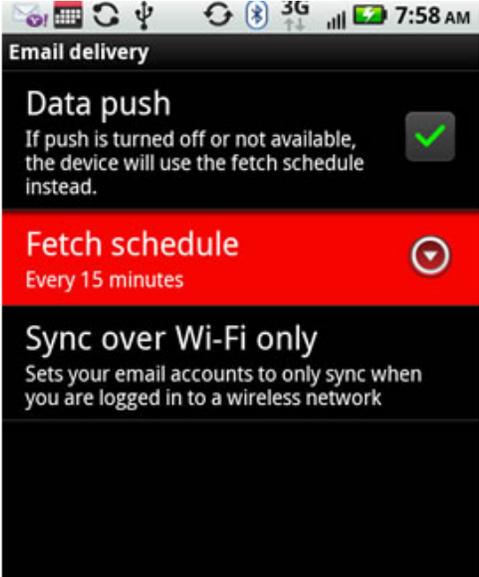

Screenshot 44.3: only the 3 emails from the past month are synchronized to each Accused Device's first data store

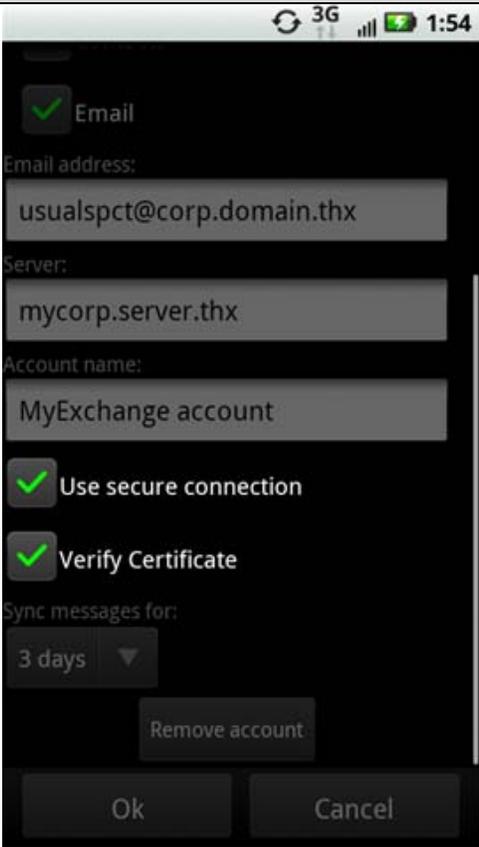

Various synchronization mechanisms may be available to use for synchronization by each Accused Device. Such synchronization mechanisms can include wireless and hardwired communication connections.

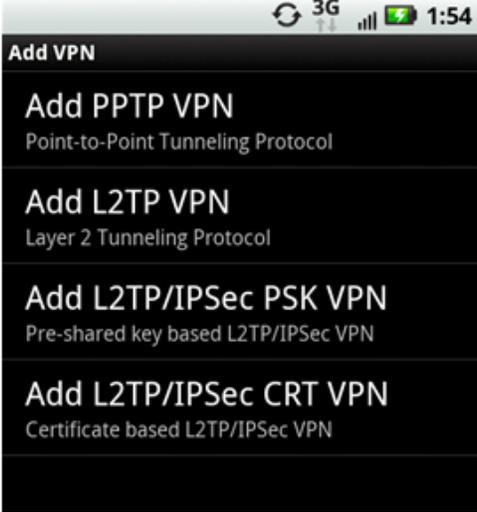

Wireless communication connections for synchronization can be, for example, 3G, Wi-Fi, and Bluetooth connections. *See, e.g., DROID 2 User Guide at 10:*

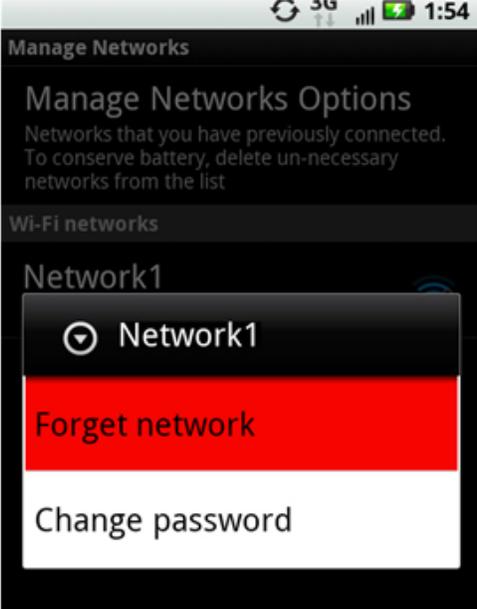

U.S. Patent No. 7,024,214 ('214 Patent)	Accused Devices			
	 Bluetooth® active		network (full signal)	
	 GPS active		network (roaming)	
	 Wi-Fi® active	3G	3G (fastest data)	
	 downloading		airplane mode	
	 vibrate		sync active	
	 silent		alarm set	
	 mute call		battery (charging)	
	 speakerphone active		battery (full charge)	
	<p>The hardwired communication connection can be, for example, a USB connection. <i>See, e.g., DROID 2 User Guide at 48:</i></p>			
	<p>1 With a memory card inserted, and your phone showing the home screen, connect a Motorola micro USB data cable from your phone's micro USB port to a USB port on your computer. Your phone should show  in the status bar.</p>			
<p>Other synchronization mechanisms can be “push” or “fetch.” For the former, the second computer system (for example, an email or calendar server, e.g., Microsoft Exchange Server, Gmail server, or Google calendar server) can “push” a data item (e.g., email, calendar data and contact information) to each Accused Device. For the latter, each Accused Device fetches a data item from the second computer system.</p>				
<p>Another synchronization mechanism can be a Virtual Private Network (VPN). <i>See, e.g., Add a Virtual Private Network – Motorola DROID X MB810, http://support.vzw.com/clc/devices/knowledge_base.html?id=34245 (visited Feb. 23, 2011):</i></p>

Each Accused Device can change the set of selection rules in response to such instruction.</p> <p><i>See, e.g.,</i> http://www.sysadminlab.net/activesync/android-2-2-and-activesync-policies-a-complete-guide-what-works (accessed April 12, 2011)</p>
<p>50. A method in accordance with claim 49, wherein the act of receiving instructions to change the set of flexible selection rules from an agent of the second computer system comprises the following: an act of receiving instructions to change the set of flexible selection rules from a network administrator of trusted network that includes the second computer system.</p>	<p>Each Accused Device, such as, for example, the DROID 2 and DROID X models, can receive instructions to change the set of flexible rules from a network administrator of a network that includes the second computer system and can change the set of flexible rules in response to the instruction.</p> <p>For example, each Accused Device can receive an instruction from a network administrator of a network that includes the second computer system to change the set of flexible selection rules such that calendar items are only synchronized if they are newer than two weeks old. Each Accused Device can change the set of selection rules in response to such an instruction.</p> <p>As another example, each Accused Device can receive an instruction from a network administrator of a network that includes the second computer system to change the set of flexible selection rules such that emails are only synchronized if they are more recent than one day, two days, three days, one week, two weeks, or one month old; or so that emails are synchronized without such a restraint. Each Accused Device can change the set of selection rules in response to such instruction.</p> <p>As a further example, each Accused Device can receive an instruction from a network administrator of a network that includes the second computer system to change the set of flexible selection rules such that attachments to emails are not synchronized, or are only synchronized if they are smaller than a given size. Each Accused Device can change</p>

U.S. Patent No. 7,024,214 ('214 Patent)	Accused Devices
	<p>the set of selection rules in response to such instruction.</p> <p><i>See, e.g.,</i> http://www.sysadminlab.net/activesync/android-2-2-and-activesync-policies-a-complete-guide-what-works (accessed April 12, 2011)</p>
<p>51. A method in accordance with claim 50, further comprising the following: an act of receiving instructions to change the set of flexible selection rules from a user.</p>	<p>Each Accused Device, such as, for example, the DROID 2 and DROID X models, can receive instructions to change the set of flexible rules from a user of the first computer system (<i>i.e.</i> each Accused Device) and can change the set of flexible rules in response to the instruction.</p> <p>For example, each Accused Device can receive an instruction to change the set of flexible selection rules such that emails are only synchronized if they are more recent than one day, two days, three days, one week, two weeks, or one month old; or so that emails are synchronized without such a restraint. Each Accused Device can change the set of selection rules in response to such instruction. <i>See</i> Screenshot 23.1.</p>

**U.S. Patent No. 7,024,214
('214 Patent)**

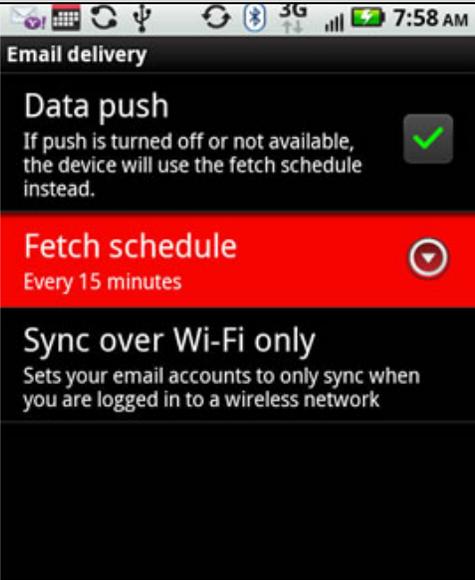

Accused Devices

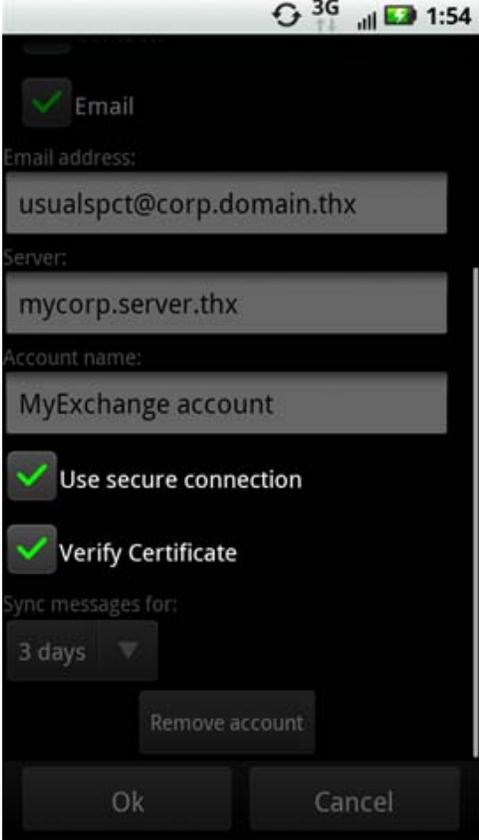

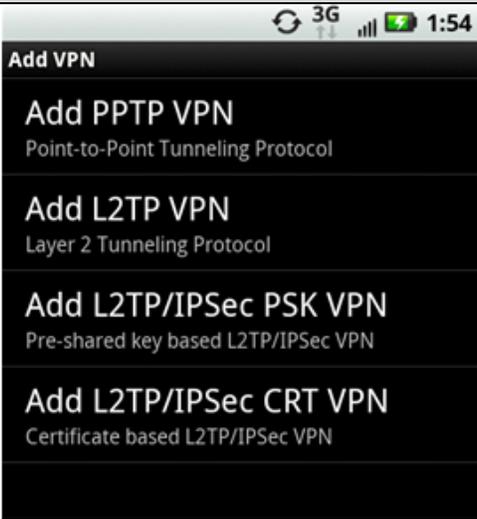

Screenshot 23.1: receiving an instruction to change the flexible rule that dictates the age of emails that are synchronized

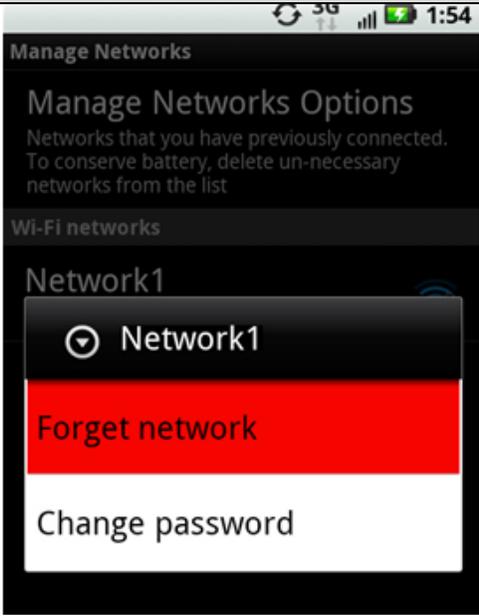

As another example, each Accused Device can receive an instruction to change the set of flexible selection rules such that social applications synchronize only via a Wi-Fi mechanism, while email is set to be synchronized via "push" synchronization. Alternatively, each Accused Device can receive an instruction to change the set of flexible selection rules such that social applications are not restricted in this way. Either way, each Accused Device can change the set of selection rules in response to the instruction.

U.S. Patent No. 7,024,214 ('214 Patent)	Accused Devices
	 <p>The image is a screenshot of an iPhone's 'Network settings' menu. It shows the 'Mobile network settings' section with a 'System select' option. Below this, there are two radio button options: 'Home only' and 'Automatic'. The 'Automatic' option is selected, indicated by a green dot. A 'Cancel' button is visible at the bottom of the selection menu. The status bar at the top shows 3G signal, full battery, and the time 1:54.</p>
<p>52. A method in accordance with claim 51, wherein the act of changing the set of flexible selection rules in response to the instruction, comprises the following: an act of fulfilling the instructions received from the network administrator of the second computer system to the extent that there is a conflict between the instructions received from the network administrator of the second computer system and the instructions received from the user at the first computer system.</p>	<p>Each Accused Device fulfils the instructions received from the network administrator of the second computer system to the extent that there is a conflict between the instructions received from the network administrator of the second computer system and the instructions received from the user of the first computer system.</p> <p>For example, if each Accused Device receives an instruction from the network administrator to disable synchronization of email attachments, and the user gives an instruction to synchronize an email attachment by clicking on an attachment to an email message, each Accused Device will not allow the attachment synchronization.</p> <p>As a further example, if each Accused Device receives an instruction from the network administrator to disable synchronization of email attachments greater than a certain size, and the user gives an instruction to synchronize an email attachment that exceeds that size by clicking on an attachment to an email message, each Accused Device will</p>

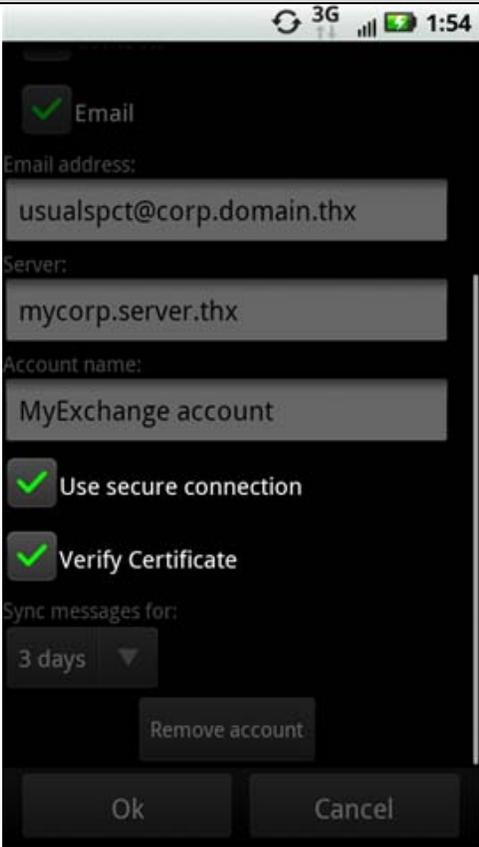

U.S. Patent No. 7,024,214 ('214 Patent)	Accused Devices
	<p>not allow the attachment synchronization.</p> <p>As a further example, if each Accused Device receives an instruction from the network administrator to synchronize only email items received more recently than a certain age, each Accused Device will not allow the user to synchronize older email items.</p> <p>As a further example, if each Accused Device receives an instruction from the network administrator to synchronize only calendar items more recent than a certain age, each Accused Device will not allow the user to synchronize older calendar items.</p> <p><i>See, e.g.</i>, http://www.sysadminlab.net/activesync/android-2-2-and-activesync-policies-a-complete-guide-what-works (accessed April 12, 2011)</p>
<p>54. A method in accordance with claim 44, wherein the act of the first computer system synchronize the data item with the second computer comprises the following:</p>	<p>Each Accused Device comprises a method wherein the act of the first computer system to synchronize the data item with the second computer comprises the following:</p>
<p>an act of the first computer system identifying which of a plurality of synchronization mechanisms are available to use for synchronization;</p>	<p>Each Accused Device identifies which of a plurality of synchronization mechanisms are available to use for synchronization.</p> <p>Such synchronization mechanisms can be, for example, 3G, Wi-Fi, and Bluetooth connections. <i>See, e.g.</i>, DROID 2 User Guide at 10:</p>

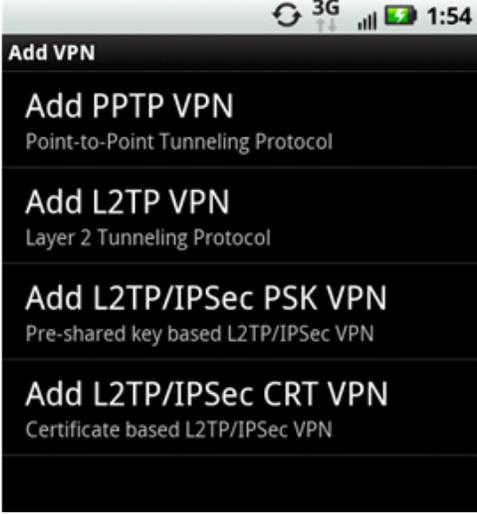

U.S. Patent No. 7,024,214 (‘214 Patent)	Accused Devices			
	 Bluetooth® active		network (full signal)	
	 GPS active		network (roaming)	
	 Wi-Fi® active	3G	3G (fastest data)	
	 downloading		airplane mode	
	 vibrate		sync active	
	 silent		alarm set	
	 mute call		battery (charging)	
	 speakerphone active		battery (full charge)	
	<p>Such synchronization mechanisms can further be, for example, a USB connection. <i>See, e.g., DROID 2 User Guide at 48:</i></p>			
	<p>1 With a memory card inserted, and your phone showing the home screen, connect a Motorola micro USB data cable from your phone’s micro USB port to a USB port on your computer. Your phone should show  in the status bar.</p>			
<p>Other synchronization mechanisms can be “push” or “fetch.” For the former, the second computer system (for example, an email or calendar server, e.g., Microsoft Exchange Server, Gmail server, or Google calendar server) can “push” a data item (e.g., email, calendar data and contact information) to each Accused Device. For the latter, each Accused Device fetches a data item from the second computer system.</p>				
<p>Another synchronization mechanism can be a Virtual Private Network (VPN). <i>See, e.g., Add a Virtual Private Network – Motorola DROID X MB810, http://support.vzw.com/clc/devices/knowledge_base.html?id=34245 (visited Feb. 23, 2011):</i></p>				

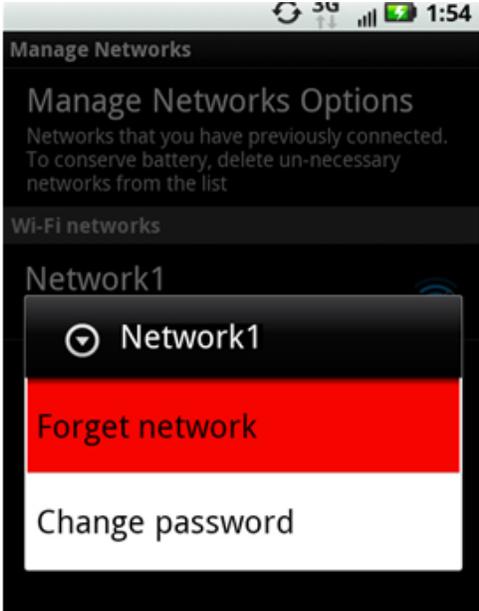

U.S. Patent No. 7,024,214 ('214 Patent)	Accused Devices
	
<p>an act of the first computer system consulting a set of flexible selection rules to select one of the available synchronization mechanisms; and</p>	<p>Each Accused Device consults a set of one or more flexible selection rules to select a synchronization mechanism (e.g., wireless 3G or Wi-Fi; hardwired USB; fetch or pull synchronization).</p> <p>For example, each Accused Device can be flexibly configured such that, for example, it synchronizes emails by fetch or push synchronization, whereas it synchronizes social applications only via Wi-Fi.</p> <p><i>See, e.g.,</i> Gmail Synchronization – Motorola Droid 2, http://support.vzw.com/clc/devices/knowledge_base.html?id=31337 (visited Feb. 16, 2011):</p>

U.S. Patent No. 7,024,214 ('214 Patent)	Accused Devices
	 <p>The set of one or more flexible rules takes into consideration value, from having access to synchronized data (e.g., email, calendar data and contact information), relative to at least one of (i) an economic cost for synchronization using each available synchronization mechanism (e.g., wireless 3G or Wi-Fi; hardwired USB; fetch or pull synchronization), (ii) network security for each available synchronization mechanism, (iii) security of the second computer system (for example, an email or calendar server, e.g., Microsoft Exchange Server, Gmail server, or Google calendar server), or (iv) value of data being synchronized and thereby selecting an available synchronization mechanism appropriate for the data item given the one or more flexible selection rules.</p> <p>For example, each Accused Device can fetch data on a pre-determined schedule, or the second computer system can automatically push data to each Accused Device, or. This is a flexible choice that takes into account at least the value of the data.</p> <p>As another example, each Accused Device can be flexibly configured to synchronize social applications only via a Wi-Fi mechanism, while email is set to be synchronized via "push" synchronization. Such flexible rule takes into account at least the value of the data and cost of synchronizing using the various synchronization</p>

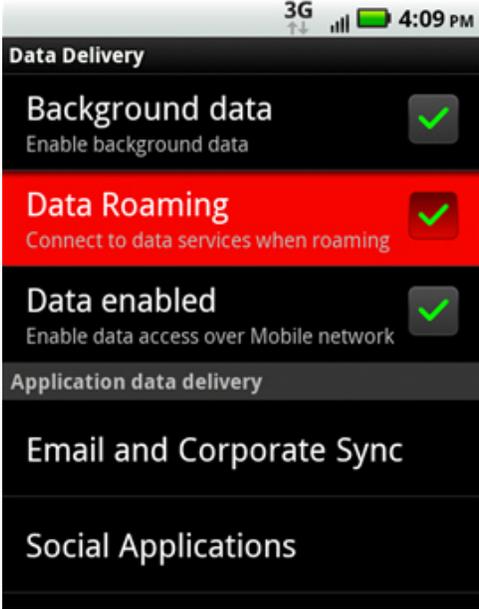

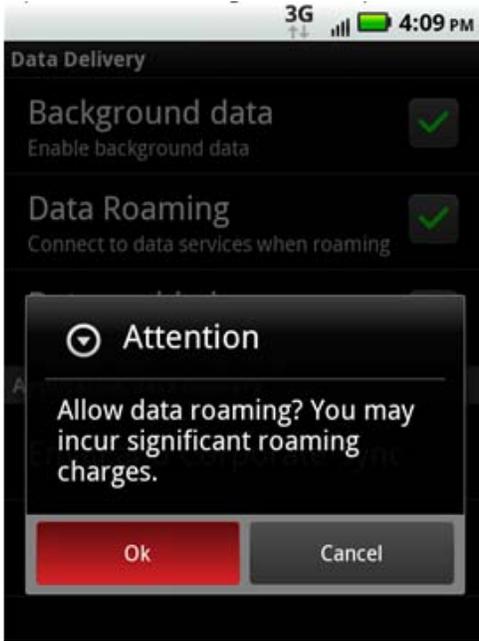

U.S. Patent No. 7,024,214 ('214 Patent)	Accused Devices
	<p>mechanisms.</p> <p><i>See, e.g.,</i> Gmail Synchronization – Motorola Droid 2, http://support.vzw.com/clc/devices/knowledge_base.html?id=31337 (visited Feb. 16, 2011):</p>  <p>As yet another example, each Accused Device can be flexibly configured to use a secure connection when synchronizing email. This flexible rule takes into account the security of the synchronization mechanism.</p> <p><i>See, e.g.,</i> Configure Corporate Email (Exchange ActiveSync) – Motorola DROID X MB810, http://support.vzw.com/clc/devices/knowledge_base.html?id=34193 (visited Feb. 16, 2011):</p>

U.S. Patent No. 7,024,214 ('214 Patent)	Accused Devices
	 <p data-bbox="613 1241 1357 1415">As another example, each Accused Device can be flexibly configured to use a Virtual Private Network (VPN). Choosing to use a Virtual Private Network for synchronization is a rule that considers the security of the synchronization mechanism.</p> <p data-bbox="613 1461 1390 1598"><i>See, e.g.,</i> Add a Virtual Private Network – Motorola DROID X MB810, http://support.vzw.com/clc/devices/knowledge_base.html?id=34245 (visited Feb. 23, 2011):</p>

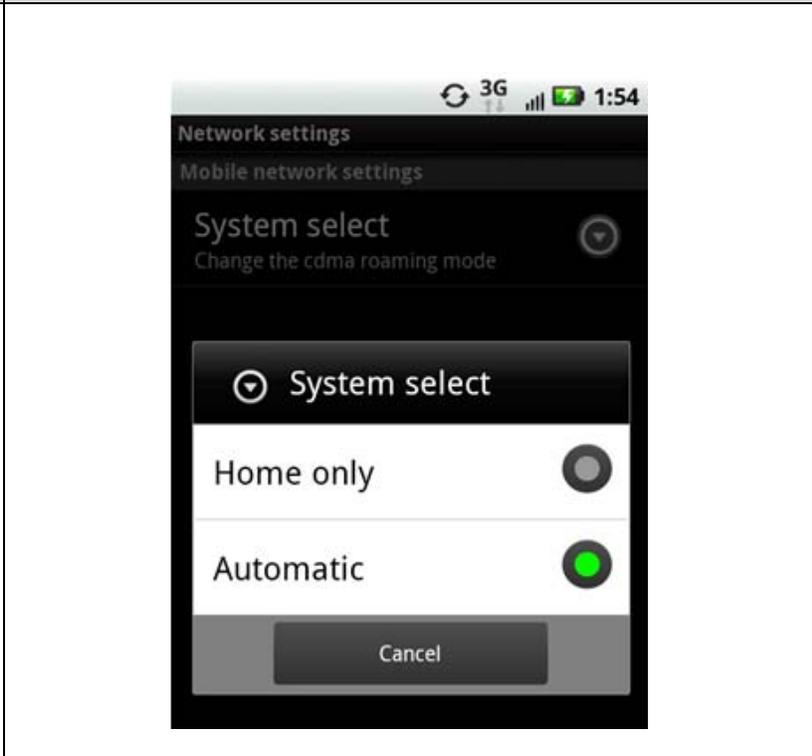

U.S. Patent No. 7,024,214 ('214 Patent)	Accused Devices
	 <p>As still another example, each Accused Device can be flexibly configured to choose between a Wi-Fi mechanism and a 3G mechanism when synchronizing data. Each Accused Device uses a 3G mechanism until it is flexibly authorized to use a particular Wi-Fi mechanism. This rule considers the network security of unauthorized Wi-Fi mechanisms. Once one or more available Wi-Fi mechanisms have been authorized, each Accused Device prefers user-authorized Wi-Fi mechanisms to a 3G mechanism. This rule considers the economic cost due to the fact that using a Wi-Fi mechanism is less likely lead to additional user fees.</p> <p><i>See, e.g., DROID 2 User Guide at 35-36:</i></p> <p>Connect Your phone uses the mobile phone network (over the air) or a Wi-Fi connection to automatically access the Web.</p> <p>Note: Your service provider may charge to surf the Web or download data.</p> <p><i>See also DROID 2 User Guide at 46:</i></p> <p>Tip: When you are in range and Wi-Fi is on, you will automatically reconnect to available networks you've connected to before.</p> <p>Each Accused Device can be flexibly configured to remove a particular Wi-Fi mechanism from the list of authorized Wi-</p>

U.S. Patent No. 7,024,214 ('214 Patent)	Accused Devices
	<p>Fi mechanisms, and each Accused Device will thereafter prefer a 3G mechanism to the de-authorized Wi-Fi mechanism. This can be done by selecting "Forget network" from the "Manage Networks" settings screen.</p> <p><i>See, e.g.,</i> Remove WiFi Connection – Motorola Droid 2 (A955), http://support.vzw.com/clc/devices/knowledge_base.html?id=34876 (visited Feb. 16, 2011):</p>  <p>Alternatively, each Accused Device can flexibly override the preference for <i>all</i> user-authorized Wi-Fi mechanisms by clearing the "Wi-Fi" checkbox on the "Wireless and network settings" screen. This will result in each Accused Device preferring a 3G mechanism to all Wi-Fi mechanisms, including user-authorized Wi-Fi mechanisms.</p> <p><i>See, e.g.,</i> WiFi On/Off – Motorola Droid 2 (A955), http://support.vzw.com/clc/devices/knowledge_base.html?id=31315 (visited Feb. 16, 2011):</p>

U.S. Patent No. 7,024,214 ('214 Patent)	Accused Devices
	 <p>As another example, each Accused Device can be flexibly configured to allow "roaming," or alternatively to allow synchronizations only using the "home" carrier's synchronization mechanisms. This flexible rule considers the cost of synchronizing using the various synchronization mechanisms.</p> <p><i>See, e.g.,</i> Data Roaming – Motorola DROID X MB810, http://support.vzw.com/clc/devices/knowledge_base.html?id=33954 (visited Feb. 23, 2011):</p>

U.S. Patent No. 7,024,214 ('214 Patent)	Accused Devices
	<p>Motorola DROID X MB810, http://support.vzw.com/clc/devices/knowledge_base.html?id=34245 (visited Feb. 23, 2011):</p>  <p>The set of one or more flexible rules takes into consideration value, from having access to synchronized data (e.g., email, calendar data and contact information), relative to at least one of (i) an economic cost for synchronization using each available synchronization mechanism (e.g., wireless 3G or Wi-Fi; hardwired USB; fetch or pull synchronization), (ii) network security for each available synchronization mechanism, (iii) security of the second computer system (for example, an email or calendar server, e.g., Microsoft Exchange Server, Gmail server, or Google calendar server), or (iv) value of data being synchronized and thereby selecting an available synchronization mechanism appropriate for the data item given the one or more flexible selection rules.</p> <p>For example, each Accused Device can fetch data on a pre-determined schedule, or the second computer system can automatically push data to each Accused Device. This is a flexible choice that takes into account at least the value of the data.</p>

U.S. Patent No. 7,024,214 ('214 Patent)	Accused Devices
	<p>As another example, each Accused Device can be flexibly configured to synchronize social applications only via a Wi-Fi mechanism, while email is set to be synchronized via "push" synchronization. Such flexible rule takes into account at least the value of the data and cost of synchronizing using the various synchronization mechanisms.</p> <p>See, e.g., Gmail Synchronization – Motorola Droid 2, http://support.vzw.com/clc/devices/knowledge_base.html?id=31337 (visited Feb. 16, 2011):</p>  <p>As yet another example, each Accused Device can be flexibly configured to use a secure connection when synchronizing email. This flexible rule takes into account the security of the synchronization mechanism.</p> <p>See, e.g., Configure Corporate Email (Exchange ActiveSync) – Motorola DROID X MB810,</p>

U.S. Patent No. 7,024,214 ('214 Patent)	Accused Devices
	<p data-bbox="610 319 1390 386">http://support.vzw.com/clc/devices/knowledge_base.html?id=34193 (visited Feb. 16, 2011):</p>  <p data-bbox="610 1369 1357 1545">As another example, each Accused Device can be flexibly configured to use a Virtual Private Network (VPN). Choosing to use a Virtual Private Network for synchronization is a rule that considers the security of the synchronization mechanism.</p> <p data-bbox="610 1583 1390 1730">See, e.g., Add a Virtual Private Network – Motorola DROID X MB810, http://support.vzw.com/clc/devices/knowledge_base.html?id=34245 (visited Feb. 23, 2011):</p>

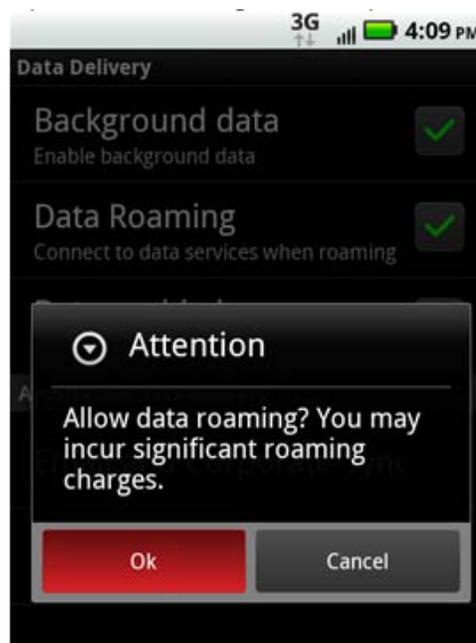

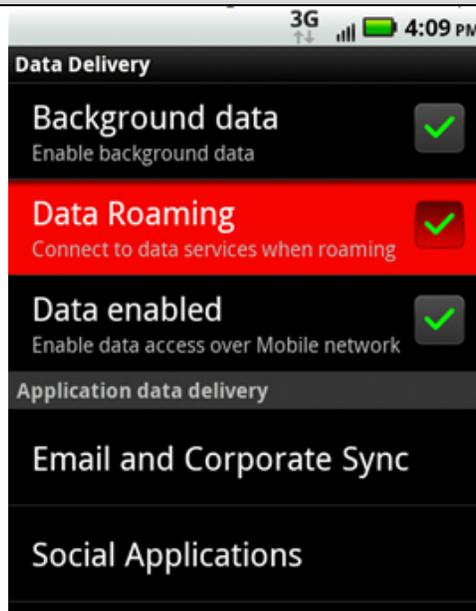

U.S. Patent No. 7,024,214 ('214 Patent)	Accused Devices
	 <p>As still another example, each Accused Device can be flexibly configured to choose between a Wi-Fi mechanism and a 3G mechanism when synchronizing data. Each Accused Device uses a 3G mechanism until it is flexibly authorized to use a particular Wi-Fi mechanism. This rule considers the network security of unauthorized Wi-Fi mechanisms. Once one or more available Wi-Fi mechanisms have been authorized, each Accused Device prefers user-authorized Wi-Fi mechanisms to a 3G mechanism. This rule considers the economic cost due to the fact that using a Wi-Fi mechanism is less likely lead to additional user fees.</p> <p>See, e.g., DROID 2 User Guide at 35-36:</p> <p>Connect Your phone uses the mobile phone network (over the air) or a Wi-Fi connection to automatically access the Web.</p> <p>Note: Your service provider may charge to surf the Web or download data.</p> <p>See also DROID 2 User Guide at 46:</p> <p>Tip: When you are in range and Wi-Fi is on, you will automatically reconnect to available networks you've connected to before.</p> <p>Each Accused Device can be flexibly configured to remove a</p>

U.S. Patent No. 7,024,214 ('214 Patent)	Accused Devices
	<p>particular Wi-Fi mechanism from the list of authorized Wi-Fi mechanisms, and each Accused Device will thereafter prefer a 3G mechanism to the de-authorized Wi-Fi mechanism. This can be done by selecting "Forget network" from the "Manage Networks" settings screen.</p> <p>See, e.g., Remove WiFi Connection – Motorola Droid 2 (A955), http://support.vzw.com/clc/devices/knowledge_base.html?id=34876 (visited Feb. 16, 2011):</p>  <p>Alternatively, each Accused Device can flexibly override the preference for all user-authorized Wi-Fi mechanisms by clearing the "Wi-Fi" checkbox on the "Wireless and network settings" screen. This will result in each Accused Device preferring a 3G mechanism to all Wi-Fi mechanisms, including user-authorized Wi-Fi mechanisms.</p> <p>See, e.g., WiFi On/Off – Motorola Droid 2 (A955), http://support.vzw.com/clc/devices/knowledge_base.html?id=31315 (visited Feb. 16, 2011):</p>

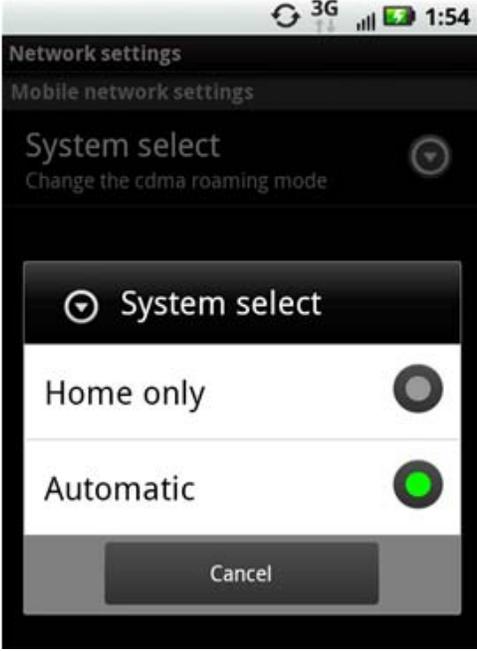

U.S. Patent No. 7,024,214 ('214 Patent)	Accused Devices
	 <p data-bbox="613 1192 1377 1402">As another example, each Accused Device can be flexibly configured to allow "roaming," or alternatively to allow synchronizations only using the "home" carrier's synchronization mechanisms. This flexible rule considers the cost of synchronizing using the various synchronization mechanisms.</p> <p data-bbox="613 1514 1390 1619">See, e.g., Data Roaming – Motorola DROID X MB810, http://support.vzw.com/clc/devices/knowledge_base.html?id=33954 (visited Feb. 23, 2011):</p>

<p>U.S. Patent No. 7,024,214 ('214 Patent)</p>	<p>Accused Devices</p>
	
<p>computer-executable instructions for synchronizing the data item with the second computer if the first computer system determines that the data item is to be synchronized based on the one or more flexible selection rules and each available synchronization mechanism, including one or more hardwired or wireless communication connections.</p>	<p>Certain computer-executable instructions (which may be part of, but not limited to, the Android operating system) on each Accused Device are for synchronizing the data item (e.g., email, calendar data and contact information) with the second computer (for example, an email or calendar server, e.g., Microsoft Exchange Server, Gmail server, or Google calendar server) if the first computer system (e.g., Accused Device) determines that the data item is to be synchronized based on the one or more flexible selection rules and each available synchronization mechanism, including one or more hardwired or wireless communication connections.</p> <p>The wireless communication connections for synchronization can be, for example, 3G, Wi-Fi, and Bluetooth connections. <i>See, e.g., DROID 2 User Guide at 10:</i></p>

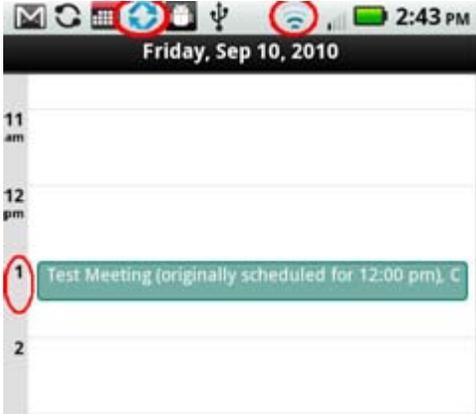

U.S. Patent No. 7,024,214 (‘214 Patent)	Accused Devices
--	------------------------

	Bluetooth® active		network (full signal)
	GPS active		network (roaming)
	Wi-Fi® active		3G (fastest data)
	downloading		airplane mode
	vibrate		sync active
	silent		alarm set
	mute call		battery (charging)
	speakerphone active		battery (full charge)

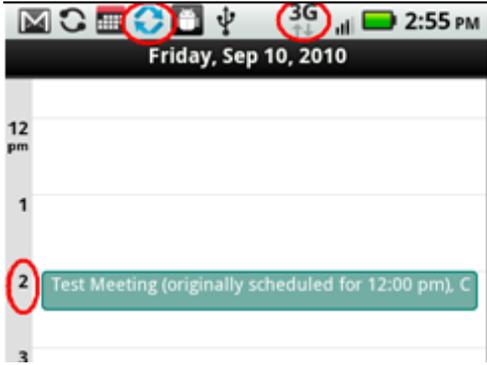

The hardwired communication connection can be, for example, a USB connection. *See, e.g., DROID 2 User Guide at 48:*

- 1 With a memory card inserted, and your phone showing the home screen, connect a Motorola micro USB data cable from your phone’s micro USB port to a USB port on your computer. Your phone should show  in the status bar.

The Android operating system on the Motorola Android synchronizes the data item with the second computer if each Accused Device determines that the data item is to be synchronized. *See, e.g., Screenshot 55.4; Screenshot 55.5,* which show a successful synchronization using first a Wi-Fi synchronization mechanism and then a 3G synchronization mechanism.

Screenshot 55.4: synchronization taking place using a Wi-Fi

U.S. Patent No. 7,024,214 ('214 Patent)	Accused Devices
	<p style="text-align: center;">synchronization mechanism</p>  <p>Screenshot 55.5: synchronization taking place using a 3G synchronization mechanism</p>
<p>56. A computer program product in accordance with claim 55, wherein the one or more computer-readable media comprise physical storage media.</p>	<p>The computer-readable media in each Accused Device comprise physical storage media, which can be on-board memory (e.g., 8 GB in DROID 2 and DROID X), SD memory (e.g., 8 GB in DROID 2, or 2 GB in DROID X), SIM card, and/or other memory (e.g., removable memory).</p>
