GoDaddy.com is the world's No. 1 ICANN-accredited domain name registrar for .COM, .NET, .ORG, .INFO, .BIZ and .US

Copyright © 1999 - 2011 GoDaddy.com, Inc. All rights reserved.

Although it often appears "WHOIS" or "Whols", the term is not an acronym. It means literally "Who is", referring to the searchable database registered on the Internet. Think of the WHOIS database as the "white pages" of the Internet neighborhood.

Search the **GoDaddy.com** WHOIS database whenever you want to know who a particular Web site belongs to. You may even be able to find the individual who holds the registration on that domain. If the registration is private, specific information such as the holder's name, address and phone number is not viewable.

There are a number of reasons why you might want to use the **GoDaddy.com** WHOIS database:

- If you're a domainer, you might have your eye on a particular domain name(s) and want to know when it expires in the hopes of registering it with a private purchase offer.
- If you are the legal owner of a copyrighted name and you find someone else has registered a domain with that name in it, you'll want to take action to stop "cyber-squatting" on your Internet territory.
- If you come across your own original content reproduced without permission on another Web site, you may want to look up the name of the person responsible against him or her. This federal act makes it illegal for anyone to produce or distribute another's original material on the Internet.

Law enforcement agencies use the WHOIS database to support national and international efforts including copyright protection and anti-spam. At least the host or registrar - of every domain name registered today. Legal infractions that can't be traced to an individual or business can be traced to the registrar may warn the site owner or shut down the Web site altogether.

**GoDaddy.com** has been active in combating Internet crime and abuse. **GoDaddy.com** lawyers have testified before the U.S. House Judiciary Committee about the rapid proliferation of illegitimate pharmacies and child pornography on the Internet. In fact, the company had a hand in the passage of the Consumer Protection Act, named after a California teenager who died from an overdose of a drug he bought online.
