6	**$192** USD

CLOSED

Project ID: 408105   **Project Type:** Fixed
Budget: $30-$250 USD

Project Description:

Hi there,

I need someone to promote a free file hosting site as itself and its affiliate program.

I need link to my sites appears on appropriate sites,forums,blogs and so on - without spamming!

You could put site url in signature,or to mentioned our affiliate program.
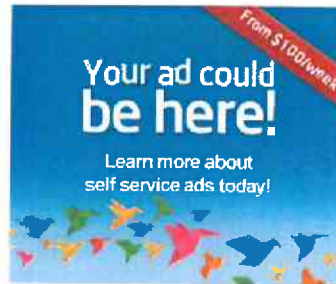

Also you could upload some stuff and to put download links in appropriate forums and sites.
Our goal is to reach people who are interested in this kind of business, and to find good uploaders.

We also offer an affiliate program which pays up to $10 per 1k download of files to the file owner. So with all these features its very easy to promote this site, for someone who knows it where to do it.

Skills required: Internet Marketing, Link Building

See more: file hosting affiliate, affiliate file host, free file hosting affiliate, promote file hosting, promote file hosting site, promote link file hosting, unique file hosting business, affiliate file hosting, affiliate program file hosting, file hosting affiliates, promoting file hosting website, online file storage sites affiliate program, free file host affiliate, file hosting affiliate program, promoting click file hosting site, affiliate delivery file hosting, free signupd, file hosting, per affiliate, signature link forums, business forums, need promote business, business signature, web hosting sites, business owner

Hi! I can do the work. Please let me know. Rate can be negotiable. Thanks & Regards!
over 2 years ago

ButcherBoy
Just to clarify what is our goal:

1 Uploading some stuff-mp3,videos,applications,games on our file host and spread these links over forums like pornbb.org (for videos) and like http://www.zona-musical.com/forum1.html (for mp3) and other forums where download links are posted (to games,applications and so on).
You have to be familiar with such a sites and postings!

2. Promote our affiliate program in webmaster forums,online biz,affiliate forums,money make forums and so on.
You have to make regular no-spam postings and put in your signature or just to mentioned our affiliate program. We'll give you special url-so it wont be considered as referral spam.
You must post in big forums,where a lot of webmaster read/post.
Such a forums you can read about
here:
http://www.doshdosh.com/26-affiliate-marketing-and-webmaster-forums-to-help-you-make-money-online/

Also we need this job to be done in one week term

Good luck!

Agree.Please check the download speed.Hardly see people finish downloading 200MB links.

ButcherBoy	04-08-2009 06:37 AM

I was asked by few webmasters that their download/upload speed is slow.
We're upgrade our current servers and installed batch of new ones, so I believe things will be
NORMAL for every user.
We did some tests for download speed from different country locations and it's true for some
countries there is slow speed detected.

But we dont put or change anything in our policy!

Please, apologize us for this inconvenience!

Man how do you remote upload from rapidshare it always says **upload failed**. Either I put direct link or by using this

http://username:password@sitename.com

Please reply I need to remote upload some stuff there.

---

tekkaman75   04-09-2009 09:13 AM

how it's going?

After 10 days of using hotfile service, my statistics are not very good.
Although the only restriction seems to be 15 minutes wait for free users, number of downloads are way too low.
If I compare uploading.com downloads in first 10 days, they were around 4-5 times bigger than hotfile.
Now the only explanation for this big difference is that there is some kind of bug in counting, or there is some filter by IP address.
Please tell here what is your experience and if you notice the same..

ButcherBoy   04-09-2009 11:12 AM

Hello!
We talked on ICQ and tried to explain that we dont have any limitations for free user, except 15 min wait. We dont have daily download limit, and we count premium/free downloads in difference from uploading .com
About counting downloads we did dozen of tests, even hire 10 people from different countries to test it, and there weren't problems with counting.
Please notice - you think you send same traffic,same people, but this is idealistic situation.
There is no rule 5000 visitors will make 1000 downloads (for example).Depends of

files,country origin,people as surfers.
Ofcourse if uploadingcom works better for you I cant say anything, but just wanted to explain
we dont have problems with counting downloads.

about this difference, i guess is because
1. the file size
in uploadingcom you can only upload files less than 100m, but in hotfile, in order to get the
maximum payrate we usually upload files over 100mb. it is much easyer to download small

files so it seems ul has a better statistic
i used a 48mb file to test, using both ul and hf link in same thread and it actually make 2 more dls from hf
2 the premium dls
hf only count 1 for each premium member no matter how many files he download from you and ul count every dls i think

it is just my guess
for me i earned $25 in 2 weeks, which is almost same from ul

Actually it's on the way :)
Also I dont think I'm posting like crazy here?
I dont have dozens of threads or bump-answers...

ButcherBoy

04-11-2009 09:00 AM

Hello,highrate!
Thanks for your reply!

Uploading com have 100MB daily limit for free download - we dont!
This means there is almost no free user choice! If a user wants for example to download movie or mp3 album over 100MB - he must pay! So this is no free host.

About free downloads it's written here and our site:
"We count every successfully completed download, but if a premium user downloads a file more than once, that will be counted as a single download. This doesnt apply for free users downloads - their downloads are counted without limitations (multiple downloads for a file from same IP are counted)."

So, we count premium download just once (from one IP!)
but we count free downloads from one IP!
Also we dont have any adverts.

About how uploading counts - I'm not sure, cause I cant find such an info on their site.

We try to make money only from premium accounts.
That's the reason we don't share premium signups.
We don't have adverts and will never have.

T.Panneerselvam

04-12-2009 01:00 PM

15 minutes wait for free user is too high..

Hman14325

Is HotFile better then Uploading.com?

mejoseph01

UL dont count downloads from premium.(not even one)But they give % of sales they make.I use hf as mirrors with ul so those cant download from ul can download from hf.I think hf is a great service.Also butcherboy,put some ads on your page,not too many or popups,just banners or textlinks.that wont hurt.relying on premium sales only is not a good idea.

Quote:

> Originally Posted by **Hman14325** (Post 33123)

I think they are evenly matched.I like both of them.
ul gives more downloads,but they pay different for different countries.hf pays same amount for all accepted countries.

Dont mind royjohn.He is the worst member in history of linkbucks forum.Hey douche bag = royjohn,you go create your own forum for your useless and stupid threads and posts.

mayau

4th payment from hotfile.com

Thanks a lot hotfile.com.:)

CrucifynDi3

getting bored..... links are taking forever, to become live
alwayz in processing...........

ButcherBoy

Please,notice that when there are servers pick - a thousands of remote upload request by webmasters, it's not so easy to make all request at once!
I tried other filehosts which support remote upload, and some of them are simply not processed requests...stay 'processed' for 3 days and that's not for 400 MB file (as we accept) but for 5MB mp3...
So my apologies for inconvenience, we work hard to improve this.
Otherwise we have to switch off FTP and remote upload and give them only when webmaster make request and so on...But our goal is to give to EVERY webmaster a chance,not only to big players.

Thanks for your attention!

and i found one important thing hf has not is file description
every other hosting service has it. plz add it on, because we can write
such as "more download please go to xxx.com" on the file description to advertis our own blog
or website to get more downloads

ButcherBoy

That's a good idea and we will implement it!
But how it should work-to make possibility to put traffic back url for each different download
link, or just to put one link back to all your download links?

Thanks! :)

Hi-Tech
04-16-2009 03:54 AM

HotFile can not change files name,others can:confused:Pls add it soon.And it's hard to remoteupload from rapidshare(i has premium Rapidshare acc,but i can't do it with hotfile althought i did like FAQ)

Remote upload works great for me and i don't need any account at Rapidshare, just put Rapidshare links at remote upload box and click upload, some minutes after you have all the files in your account.

wheelbarrow
04-19-2009 05:48 PM

Is it possible to delete files? I uploaded a few files that haven't gotten any downloads and I don't want to waste server space by keeping them.

HyPn0sE

and I don't want to waste server space by keeping them.

It is possible to delete files, but only 1 by 1... click at the file you want to delete, a new window open with the download codes for that file, the last code is the delete code, copy that code and past it into your browser address bar... press enter and the file will be deleted.

---

ButcherBoy

<div style="text-align:right">04-20-2009 10:54 AM</div>

Hello!
I checked many messages about remote upload failure and finaly I just discovered that 90% of all bad uploads are caused by one simply reason:

First, it's obvious you must have PREMIUM rapidshare acc (so you dont have wait to start download) and
Second (most important): you MUST PUT DIRECT DOWNLOAD link!

Example:

Regular RS link:
http://rapidshare.com/files/19308218...DRip.part4.rar

Direct download link:
http://rs439tg.rapidshare.com/files/...DRip.part4.rar

You can use 3rd party sites to convert regular RS links to direct download links: good one I found is http://www.rapidshoot.com/ but you can use whatever you want or simply use direct download link option in your premium RS acc.

In short: to use remote upload you must always use direct download links, not link to download page (this is a must for rs and every similiar file host)

RS works great. What about netload -> Hotfile?

highrate

04-23-2009 12:46 AM

i cant remote upload from netload today!
it shows Unable to connect to netload.in all the time
maybe netload banned the hotfile server ips
please communicate with netload
before, we can remote from netload not even need a premium account or direct links, that
was great! but now...
please fix it asap
thank you!

CrucifynDi3

04-23-2009 08:53 PM

hmm soo far still gud, no complaints yet from my users and download/upload speed are still
gud as much as our earnings.
uploadbox and uploading seems to hav completely ruined their rep and all ex
uploading/uploadbox users seems to be shifting to hotfile day by day ;)
anywayz keep it up guyz.

CrucifynDi3

04-24-2009 12:34 AM

btw i forgot to add, when r u gonna add the mass delete option? the current delete system is
too tedious....
another thing is the rename function......if its gonna be added or not?

highrate

i asked this before in this thread;) these are important tools for file management
and file description as well
ButcherBoy please add these! thank you!

ButcherBoy

04-27-2009 06:52 AM

Hello to all!
File management is almost done, just make final tests.
About remote upload - we implement some new specifications:

Every webmaster can use remote upload, but depending of webmaster's results-upload can be capped to 5GB/daily,10GB/daily or more.

What I mean with 'webmaster's results'?
- it's about how much resources use webmaster-some webmaster just use remote upload, uploads LOTS of gigabytes, but don't promote their files.
So these kind of webmasters use our server resources,upload resources, bandwidth,diskspace and at final they make our service to work slow for webmaster who works active with us.

For webmasters who just uploads but his files are never downloaded or are downloaded very bad - we put this upload quotta. So, they can still use remote upload, but it's limited to 5GB daily.
Also for such a webmaster - on their links (download page) will be increased time wait for each and between downloads. Normal free surfer should wait 60 sec to download file and 15 min for next download.

I know some of you won't be glad, but we try to keep balance - between uploaders,user and our interest and I'm sure most of you will be glad in long term. Because we just started and reach 500k/daily visitors and our plans and goals are much,much higher.

In every webmaster page (when logged) will be displayed info about remote upload...

I'll be glad to answer all your questions and to discuss what you think is important for both of the sides :)

mayau   04-27-2009 07:54 AM

Hi.Can you increase the free user download speed?I saw people start complaining about the speed.

ButcherBoy
04-27-2009 01:15 PM

We just installed few MEGA servers and all remote upload delays will be gone, also download speed will be increased. About free user download we capped it to max 128kb. Right now our tests shows that free users download with 40-50kb average. Our goal is to reach stable 128kb and with these new servers I believe we will do it.

Quote:

tekkaman75
04-27-2009 02:30 PM

Download speed seems okay to me.
I have seen download page has changed and banners have been added.
Problem is that download counter is now 180 seconds, which is not good at all.
Also, it's 45 minutes to wait for next download.
I am afraid hotfile is starting to do the same as uploading and uploadbox, slowly putting restrictions :(

CrucifynDi3
04-27-2009 02:43 PM

what the hell... One file per 15-45 minutes

also the "free download" button is crossed...doesn't allow free download when i click the link.

are you guys not allowing specific countries to download at all?

also butcherboy can you please remove my account remote upload limit to 10GB or more? this 5GB limit is killing me :(

And also you need to provide real RS account ID (only digits!), not login. It works.

@getronit I got most time silver and gold rank and I get over $10 per 1000 downloads. It's not cheap.

Earn money spreading links in your site!
Get 5% commission of all premium accounts sold through your site.

For every referrer that comes from your site and buys premium you will get 5% of the account's price. No matter if download link is yours or you find it in other place! Post interesting download links in your site, blog or forum and earn big money.

Please check our Affiliate page for more info.

Regards,

dduck

haha ....hotfile keeps messing with the ppl who made them this far.

It was only a theory that uploader's status is bound for how much premiums he sell. Nobody could see that information because you were hiding it.

Now, one site will take all the prize for all the links. No matter if the owner of that site uploaded all those files. What a nice way to fck with small army of ppl who were spreading your links.

But anyway, this shows only one thing. **You are aware that you made mistake with your new rules.** That's why you need sites to promote your **old links**, because you are left with only few ppl who keep uploading new files on your servers.

I would really like to see how much money will owner of the biggest pr0n and wrz board get from you for selling premiums. 'Cause you are well known for hidding that information.

Only sites who force their users to use code tags will not 'proffit' from that, 'cause users would still need to copy-past links in browsers.

Earn $$$ Uploading files to Uploadline.com!!!

Printable View

---

rudeturk   Mar 25th 2009, 8:19 pm

Earn $$$ Uploading files to Uploadline.com!!!

Earn easy $$$ Uploading your files to Uploadline.com!
We have launched a new point system where you can earn cash for your points, we give out 1 point per
unique download from any country!
Why is this different from Uploading.com or any other program such as Uploadbox?
Because unlike there sites, people like using out service and they can download there files easily your links will
be downloaded more often than other ones and our links are not banned on any forums. We have high
network connections so you can fetch files from your rapidshare account, also you can upload at up to 1gbps.

We are kind of under beta stages but are 100% stable so we are not going anywhere.

Payments will be made through Paypal only and soon Alertpay!
For more info click here, http://www.uploadline.com/earn.html

---

egoldzone   Mar 25th 2009, 10:07 pm

Thanks for your info
why so cheap rate per download..?
Do you have another plan to increase your pay rate soon..?

---

rudeturk   Mar 26th 2009, 4:44 am

Yes we have a plan to increase pay rate, but how can we pay more if we dont earn more? lol.
As soon as we see this program working we will definately increase into a nice price rate.

Kerosene   Mar 26th 2009, 6:24 am

Is this correct:

$1 USD for 1000 downloads at Uploadline.com ($20 USD for 20,000)
vs
$10 for 1000 downloads at Uploading.com

I hate to be a wet blanket, but why would I use your service over Uploading.com?

"No other steps **realy**" is misspelled on your 'earn.html' page :p ;)

---

hbl   Mar 26th 2009, 6:40 am

Sounds interesting, Checking it out now

Alright,
Uploading.com is a website where you will get less download conversions.
Uploadline is realy easy to use even as a first time user and if you upload any file smaller then 50mb we don't even ask your users anything before they download there downloads start right away.
The links you share with users will not be liked by everyone.
They stick tons of limits and advertisements on free users.
Minimum payment is $30 with Uploading, our one is 20$ + You will be paid through paypal within 3 days of your request.
I have tons of reasons for you to use Uploadline instead of Uploading and im sure the users which download your files will prefer Uploadline.

hash1   Mar 27th 2009, 12:57 pm

Will give it a go. Already upload alot and was looking for a new host like this.

houck   Mar 27th 2009, 7:35 pm

I have worked with Uploading.com for sometime, so I will try out your service.

The thing I do like is any country download. This is something I would have to admit Uploading.com has lack, not only not paying for some types of countries, but also banning them from even downloading. I also like your less than 50mb wait.

I'm working on a CPA offer at the moment, but when I get sometime, I might try using you as a host for a new download site I was thinking of creating.

But one question, Do you allow adult content to be uploaded?

rudeturk   Mar 28th 2009, 12:43 pm

Good to hear :).
As long as the adult content is legal it is allowed.

viatorek   Mar 28th 2009, 12:52 pm

so you guys paying for all country download?
any % for selling premium account like in uploading.com?

rudeturk   Mar 28th 2009, 1:12 pm

Quote:

Originally Posted by **viatorek** View Post

Not yet, Look we are nothing like Uploading.com try downloading from us as a free user and see if you can
download from them as a free user the same file and see which ones easier to download with Uploading you
will get less download conversions and they earn more from the downloads your files get but with us you get
high ammount of download conversions per visit to the link although we dont earn as much as uploading.

viatorek   Mar 28th 2009, 5:36 pm

what about hotfile.com (see my siggy for info)? its have better conversation and just started too
i just registered to bought (uploadingline.com) and testing conversation
we will see

shareminator   Mar 29th 2009, 6:44 am

HI, i am interested in part: "you can fetch files from your rapidshare account" it is nice, i like it, but can i, if i
have a premium account, download any RS files to my UL account?, if no, this feature can be very succesful
for your company, many people have RS premium and can use it for their UL account for uploading files.

p.s. Sorry for my english, i believe that you understand, what i mean :)

ForumDesire   Mar 29th 2009, 7:40 am

for me the uploading is not working!

rudeturk   Mar 29th 2009, 7:44 am

Yes shareminator, You can login to your account visit http://www.uploadline.com/?op=my_account And modify
the Rapidshare account settings section so You can fetch your files in your rapidshare account or any
rapidshare link direct to your account! :D.
We currently allow 5 fetches for free users and 20 for premium per day to stop the service from being abused.

Also note that you will be able to fetch from rapidshare at 16mb/s when i sort some settings out (thats the max rapidshare allows) from other sites its up to 1gbps!

Please do not upload split archives, we have a larger upload limit compared to other websites for a reason All websites you mentioned do not allow users to stream videos or mp3 files which are uploaded they dont have an easy user interface for downloading Hotfile only allows 1 download per 15 minutes if im correct and they have just launched have you been paid by them yet? We have been running since november 2006 under beta stages check web archive if you like.

Try now, Today we are reinstalling ul1 server (without any loss of users files) due to some security problems so downloads from there will not be possible in the next 9 hours we have to move over 400gb back.

The main upload server is working though let me know if you have any other problems.

ForumDesire   Mar 29th 2009, 7:51 am

yes now is working . I want to ask if you have a ssystem that count the number of viewes that has a video.

---

rudeturk   Mar 29th 2009, 8:16 am

Video views count as downloads as long as they are unique.

ForumDesire   Mar 29th 2009, 8:21 am

Can you make an embed option to player? or to change it?

---

rudeturk   Mar 29th 2009, 8:24 am

I cant make an embed option for a player, why you may ask?
if a video is 500mb or 700mb etc, a user embeds it to there site and even if 1000 people view it its 500-700gb per day thats 70mbps constantly in use and we make no profit from it.

ForumDesire   Mar 29th 2009, 8:30 am

i want to upload 200-400 mb videos for a tv shows site.

---

rudeturk   Mar 29th 2009, 8:31 am

You can just make an image explaining users what to click to view video and they click it to view the video.

Hello!
As our site is mentioned here I'd like to give you some info:

We're new site, but we got a lot of other sites long time before 2006!
Also-we pay always on time and there are proofs in forums and members from this forum too!
Also-we allow open videos or mp3 directly in browser. But to stream directly - you answered yourself.
We dont have any adverts, dont have captcha, and so on, also despite fact you're from 2006 your stats on alexa is not so good for you, comparing to us ;)

---

roughsoul   Mar 30th 2009, 10:43 am

Well this is not at all a lucrative offer.
20$ for 20000 point
well then whatz wrong with easy-share then pay much more as their point system is much diverse and quite good.

Kinkyjoe   Mar 30th 2009, 2:13 pm

I already tried this method with uploading but with no success I might try yours lol

---

Like i said, its hard to download from the sites you mention, they do not have the features Uploadline has do they?
We start from 20$ per 20,000 downloads that is 1$ per 1000 downloads which would be easily achived for you.
Soon we will double the price per point or even triple if you would like to us to start filtering downloads?

Premium Point Counter Error...!!!

I have account in your site... i uploaded many files and shared them on forums... by my files your site got lots of traffic but from last 12 hours or so your premium points counter stuck at 1660... still user can download files...

Right now total downloads i count and its near about **2888**... while your premium points counter show 1660...

What to do now ?? i have to remove files from your server ?? because its not fair... u only pay after 20,000 premium points... and like this i think i cant collect those points next 5 years... if your premium points stuck like this...

Let me know what i do...

The files under 50mb do not give premium points anymore if you wish to upload files over 50mb you can recieve premium points easily like you did, Also please note we are not an image host but we will soon launch

our image hosting service which may also pay for uploads ;)

Right now we have tons of free space on the server and bandwidth all we need is promoting and we have all tools available for our uploaders. If you wish to upload for your blog or write a review about Uploadline i may be able to provide anyone a premium account which can do it.

That site realy is slower from what i heard from users ;) also dont advertise your crap on my thread reported.

---

rudeturk   Apr 3rd 2009, 6:07 pm

Has anyone tested our upload speeds yet? you would definately not be able to get that speed with any other file host.

Bohra   Apr 5th 2009, 9:20 am

Your service now has many restrictions and catches so too tough to earn from this. But best of luck

---

I purchased your 12 month premium account so I could download your apps fast to my
Iphone 4. 32gig. In particular the Tom Tom eorope navigation app.
It shows on your add non premium account are delayed and take over 5 hours but
premium are not delayed and down load in 35 mins. I have tried at different times
day and night but still get a very slow download, at worst it takes 60500 mins but
crashes after 3gig, at best 2500 mins and still crashes. My router is A DSL 27408
and cable of fast reliable downloads I have a 24 gig account with BE unlimited and
I rareley have problems I get appx betwen 5 and 10 wireless download speed to my
Iphone can you help me to achieve the fast speeds you say a premium account give
Thanks

Hello

This is ███████ am the ██████████████████████████████████

I have a huge problem with Hotfile

My account has been downgraded to free from premium

Account is registered on ██████████████████████████

How could ıt possible?

Firstly I did not share my acount with anyone.

secondly, there is no Multiple IP downloads

thirtly there is no Using your own or 3rd party server to leech traffic and share it

Yes, I just dowload too much. Becouse so far I know that, my accont is premimum and and there is no limit.

I just downloaded Bluray movies...

That's the reason ı want my account back.

I gave 55 dolar money to Hotfile, İ did not choose Rapidshare or other things. I choose Hotfile. Dıd I make a mistake?.

Thanks.
