Hi Hotfile,

I\ \ \ \ \ \ \ \ 'm only making 1 download from Hotfile, no other downloads.

I\ \ \ \ \ \ \ \ 'm also a Premium user, you can check via this email account.

Even if it\ \ \ \ \ \ \ \ 's through browser, it can\ \ \ \ \ \ \ \ 't be that slow till 1 kb / sec and i\ \ \ \ \ \ \ \ 've no issue downloading other files at other web sites at 200 kb / sec.

Link (1 example) -
<http://hotfile.com/dl/40088369/0a997ac/South.Park.10x09.by.www.seriesfree.biz.rmvb.html>
Download speed of < 1 kb / sec

I tried to download data.bin file and the speed was ard 200 kb / sec.

Last Result from <http://www.ip-adress.com/speedtest/>:
Download Speed: 793 kbps (99.1 KB/sec transfer rate)
Upload Speed: 572 kbps (71.5 KB/sec transfer rate)
Sat Sep 04 2010 12:40:30 GMT+0800 (Malay Peninsula Standard Time)

Pls get back to me ASAP.
The downloading speed is super disappointing.

Rgds,

Hello,

I have premium account from you guyz, but when I want to download a file I can\\\'t use it and I have to download the files as regular user!
for example, when I go to this link :
http://hotfile.com/dl/66932610/baadbb4/Lady_Gaga-Alejandro_www.ChocoCeleb.com.rar.html
and want to download the file, I have to login to system, and when I enter my login info in the login popup up of the page, I will be redirected to the hotfile.com and it\\\'s shown that I\\\'m a premium user, but when I enter the link again, I have to do the login steps again ! and won\\\'t recognize me as premium user in the download page of files but in the main page of hotfile system recognize me as premium user !
even in IDM (Internet Download Manager) when I enter my login it won\\\'t work and I can\\\'t download the files,
my login info is:
username: [REDACTED]
password: [REDACTED]

please tell me what is the problem.

Thanks.

Hello,
Someone can't download the file from this link as a premium user:
<http://hotfile.com/dl/60993370/4fd0f63/Journey.To.The.Center.Of.The.Earth.2008.2-3D.2in1.1080p.BluRay.AC3.x264-HDC.part024.rar.html>

I've tried myself while was logged in, from Firefox or using a download manager with hotfile premium information provided and didn't work.
Please fix this.
Many thanks.

Refer to the link i have pasted. I am currently clicking on each link separately, and opening it up in a new tab, than pressing download with i getter which is my downloading client. I also have a rapid share account and it allows me to copy multiple links to i getter. I want to know how i can save time by doing this with hot file links. Im using a macbook pro, and i getter for my downloading client. If another program works better please let me know.

I try to download from this link several times, but everytime it's almost finished the connection is gone and it can't be resume.
I'm using internet download manager as download accelerator.
I have to start download from the beginning several times but never finish.
It is really annoying!

Hello

I have just paid for a subscription for a year with hotfile. When I originally selected a file to download it told me that if I subscribed I could download the file in approximately 9.2 minutes. So I have signed up but the episodes seem to be taking in excess of 10 hours to download. We have tested our broadband speed and our download speed is 5.9Mb so better than average. Is there a particular process I am missing in terms of getting the files downloaded quicker?

Thanks

Hi i just waned to inform your company about some fake links. I hate IT scams and when ever i find some on my way i tend to do as much as i can to tackle them.

The following links suppose to provide a certain file but when you download the links and extract them the content/file is completely different hence the links are fake made by scams. I dont know whats the benefit of such an action but i am assuming that has to do with points.

the links are:

hi, when downloading data.bin through my browser and JDownloader i am able to reach my maximum speeds of approx 240kb/s, but whenever i try a different link such as the ones below using firefox/IE or JDownloader i can only reach speeds of about 30kb/s.

http://hotfile.com/dl/30084382/1140bfc/I_love_paris_Hotfile-Zone.com.part1.rar.html
<http://hotfile.com/dl/28445882/1813d30/Hulk.Vs.Thor.avi.html>
http://hotfile.com/dl/25607590/d43d02c/Onelinkmoviez.com_30.rock.407.hdtv-lol.avi.html

i am not running other downloads concurrently in the background, or is my speed being limited elsewhere since the data.bin is downloading at full speed and my torrents can also download at full speed when i enable them.

Hello!

When you download from our site, please be sure you don't make other downloads (for example from torrent sites, other downloads and etc). If you make multiple downloads from other sites/places all your download speed is shared between each download and this will cause you slow download from us.

Be sure also that you're logged and then to start download, because free users (or not logged) got capped download speed.

If you download through browser please notice your download speed could be limited due to browser settings. For high speed download it is always better to use any Download Manager program. For example:

<http://freedownloadmanager.org> <<http://freedownloadmanager.org/>>
<http://jdownloader.org/download/index>

We don't limit download speed for our Premium users and if you download speed is slow this could be also your ISP issue.

If you still have slow download speed - please send us link you try to download and get slow download speed. We will check it asap.

For testing your download speed from our servers, please download this file:

<http://w2.hotfile.com/data.bin>

And report us what speed you get, we need this to check where could it be a problem.

Also check your internet download speed here and report us what numbers you get:

Dear Sir/Madam

As I have not had a reply and your company have not been supplying me a service for the past 2 weeks please can I have a refund.

I am reaching speeds of 500kbps as a free user with filesolve.com and the fastest I can currently get with your premium service is 10kbps.

Please can the refund be processed asap.

Many Thanks

Hello,

Sorry for inconvenience, could you make a tracert to hotfile.com and send us the results?

Running a Traceroute on Windows XP:

- 1) Go to Start (start button on the lower left of the desktop)
- 2) Choose 'Run'
- 3) Type: "cmd" (no quotes)
- 4) This should bring up a DOS prompt. Once there, type: "tracert hotfile.com" (without quotes)

This should result in a series of hops from your computer to the server you are tracing to.

Dear Sir/Madam

Over the past 3 days my hotfile downloads have gone really slow e.g. 4kbps from originally 2mbps no matter which link I try to download.

The first few days with my account was great and I could download whatever I liked within minutes, but it now takes days.

I have now tried over 50 links from different websites and all download at less then 10kbps

I am using a download manager and with other suppliers I can still get 4mbps.

An example of a link I'm now trying to download is a TV show:

[REDACTED]

or

[REDACTED]

It's downloading at 4kbps and is saying it will take another 27 hours.

The <http://w2.hotfile.com/data.bin> link on your website downloaded at an average of 4,7mbps and takes a few seconds to download.

Please let me know A.S.A.P how this can be resolved?

Many Thanks

Hello, I would like a refund of my subscription please as I find the level of service unacceptable.

I have tried several download links and all download @ <80KB/s. I was previously with Rapidshare was getting around 700KB/s.

I have run the speed test listed on your help page and my speed is 6210kpbs. The only file that downloads at close to this speed is the test download file that you list on your page, but this must be hosted differently as no other file downloads at above 80KB/s.

For example...

<http://hotfile.com/dl/76857636/23ceech/Dexter.S05E04.HDTV.XviD-FQM.rar> -
This downloads @ <50KB/s!

Only being able to download at speeds at around a seventh of my connection speed is unacceptable for a premium download service.

I have tested all my settings, tested with multiple files and ensured that I am logging in correctly.

Please arrange for my account to be cancelled and my money refunded ASAP.
Thank you.

Above are just a sample of hotfile links I have tried. But any hotfile link I try to download returns the same result. Single file downloads speeds of 10-20kb per second. I have a 15mb down / 1.5mb up cable link. It was all working perfectly up until a week or so ago. I have an account that is fully paid up.
