

NIGHT BOX  
FILEDUNITED STATES DISTRICT COURT  
SOUTHERN DISTRICT OF FLORIDA  
Palm Beach Division

AUG 30 2005

CLARENCE MADDOX  
CLERK, U.S.D.C. / SDPL / MIASTEVEN A. SILVERS, an individual  
Plaintiff,

v.

CASE NO. 05-80387-CIV  
(Ryskamp/Vitunac)

GOOGLE, INC., a Delaware corporation

Defendant,

**PLAINTIFF'S MOTION FOR LEAVE TO FILE FIRST AMENDED COMPLAINT  
AND MEMORANDUM OF LAW IN SUPPORT THEREOF**

Plaintiff, Steven A. Silvers, hereby moves this Court, pursuant to Rule 15(a) of the Federal Rules of Civil Procedure and Rule 15.1 of the Local Rules United States District Court for the Southern District of Florida for leave to amend the complaint in this action – for the first time – by filing the First Amended Complaint, attached hereto as Exhibit A. In support of this motion, Plaintiff states as follows:

This is the first amendment to the complaint. Plaintiff seeks to amend to the complaint to add: (1) additional facts pertaining to Plaintiff's allegations and (2) two additional causes of action for trademark infringement, and cancellation of Defendant's trademark registration – both of which directly stem from the Defendant's actions that Plaintiff already complained of. These changes in no way prejudice Defendant, will aid in the efficient resolution of this action, and are related to subjects raised in the original complaint. Rule 15 of the Federal Rules of Civil Procedure provides that leave to amend pleadings "shall be freely given when justice so requires." This mandate of liberal amendment extends even to amending pleadings at trial to conform to the evidence.<sup>1</sup>

---

<sup>1</sup> See Fed. R. Civ. P. 15(b).

Plaintiff filed this action for trademark infringement under federal law, and unfair competition under Florida law on May 4, 2005. Defendant filed its answer and a counterclaim on August 8, 2005. Defendant has yet to provide any discovery to Plaintiff, but based on Plaintiff's continuing investigation, Plaintiff uncovered additional facts supporting additional causes of action against Defendant stemming from, and directly related to, Defendant's actions identified in the original complaint.

As noted by the United States Supreme Court in *Foman v. Davis*:

Rule 15(a) declares that leave to amend "shall be freely given when justice so requires"; this mandate is to be heeded. *See generally*, 3 Moore, Federal Practice (2d ed. 1948), 15.08, 15.10. If the underlying facts or circumstances relied upon by a plaintiff may be a proper subject of relief, he ought to be afforded an opportunity to test his claim on the merits. In the absence of any apparent or declared reason--such as undue delay, bad faith or dilatory motive on the part of the movant, repeated failure to cure deficiencies by amendments previously allowed, undue prejudice to the opposing party by virtue of allowance of the amendment, futility of amendment, etc.--the leave sought should, as the rules require, be freely given.<sup>2</sup>

Although leave to amend "shall be given freely when justice so requires", the decision to allow an amendment is purely discretionary. The Court cannot, however, abuse its discretion by denying leave to amend unless Plaintiff has abused his privilege in the past, there has been some undue delay, Plaintiff has repeatedly failed to cure deficiencies by amendments previously allowed or the amendment will clearly prejudice the opposing party.<sup>3</sup> Here, there are no such grounds for refusing amendment.

First, there is no issue of repeated failure to cure deficiencies. Second, Defendant cannot claim any prejudice by virtue of this amendment. Plaintiff has not previously amended the complaint. The proposed amendment contains only a few additional facts, and it does not require

---

<sup>2</sup> *Foman v. Davis*, 371 U.S. 178, 182 (1962) (The district court abused its discretion by not allowing plaintiff to amend her complaint, after judgment of dismissal had been entered, to state an alternative theory of *quantum meruit*.); accord *Bryant v. Dupree*, 252 F.3d 1161 (11th Cir. 2001).

<sup>3</sup> *Bryant*, 252 F.3d at 1163.

any additional discovery that would delay the scheduled proceedings in this matter. Third, although Defendant may claim prejudice from an amendment on the eve of trial or after discovery is complete, discovery has not even commenced in this case nor has this case been set for trial.

Moreover, Plaintiff's amendment is timely. In its decision in *Bryant v. Dupree*, the Eleventh Circuit made it clear that, "[t]he lengthy nature of litigation, without any other evidence of prejudice to the defendants or bad faith on the part of the plaintiffs, does not justify denying the plaintiffs the opportunity to amend their complaint."<sup>4</sup> As this case has been pending before this Court for only a few months, far less than the time deemed insufficient to deny amendment in *Bryant*, Defendant cannot claim prejudice by virtue of passage of time, substantial completion of discovery, imminence of trial date, or any other ground. Accordingly, Plaintiff's motion should be granted by allowing the filing of Plaintiff's First Amended Complaint.

#### Conclusion

For all the foregoing reasons, Plaintiff respectfully requests that the Court enter an Order Granting his Motion for Leave to File Plaintiff's First Amended Complaint, attached hereto as Exhibit "A", deeming the amendment filed as of the date of the Order and granting any additional relief as this Court deems just and proper.

DATED this 30<sup>th</sup> day of August, 2005.

Palm Beach Division

STEVEN A. SILVERS, an individual  
Plaintiff,

v.

CASE NO. 05-80387

GOOGLE, INC., a Delaware corporation  
Defendant,

---

**FIRST AMENDED COMPLAINT AND DEMAND FOR JURY TRIAL**

Plaintiff, Steven A. Silvers, files this Amended Complaint against Google, Inc. and alleges as follows:

**SUMMARY OF ACTION**

1. This is a classic “reverse confusion” trademark infringement case involving two nearly identical marks: “Googles” and “Google.” Typically, a suit for trademark infringement involves “direct confusion where a smaller, lesser known company has adopted a trademark that is substantially similar to a larger, well-known company to create the impression with consumers that its products come from or are associated with the larger, well-known company. “Reverse confusion” occurs when someone adopts a mark already in use by another, and then becomes so large and well known that consumers begin to believe the smaller, lesser known, yet senior user of the mark is associated with the junior user. The result is that the senior user loses the value of its trademark, its product identity, control over its goodwill and reputation, and ability to move into related markets.

2. Here, plaintiff Steven A. Silvers (“Silvers” or “Plaintiff”) is the senior user of the mark “Googles” which he has used as a trademark for over twenty years in connection with goods and services directed to children’s education and entertainment. Silvers is also the senior user of the Internet domain name “googles.com” which he has used since 1997 for his “Googles” Website.

3. Defendant Google, Inc. (“Google” or “Defendant”) owns and operates the very well

known Internet search engine "Google." In 1998, with knowledge of Silvers' prior use and registration of the "Googles" mark, and "googles.com" domain name and Website, Google's founders adopted the mark "Google" as a name for an Internet based search engine company. The actual "Google" search engine was launched commercially a year later in 1999. Google does not generate any revenue from its search engine services and makes its information database freely available to anyone with an Internet connection.

4. Google's "Google" mark is now so infinitely more well known, that it has practically obliterated the value of the "Googles" mark which is preventing Silvers from flourishing in the children's market and entering new markets. Google is now using the fame of its mark to expand into a variety of new markets. In particular, it is now using the "Google" mark in connection with the advertising and sale of children's goods and services on the Internet, and has filed a federal trademark application to obtain the exclusive right to use the "Google" mark in the children's market - - where the "Googles" mark has been for nearly two decades. Unless Google is enjoined from using its mark in connection with children's goods and services, consumers will mistakenly associate the "Googles" mark, Website, and merchandise with Google, and are likely to mistakenly believe that Silvers has adopted and is using the "Googles" mark with the intent to infringe and capitalize on the "Google" mark.

5. Moreover, Google has unlawfully appropriated Silvers' "Googles" mark and is using that mark in connection with new domain names and its Internet services. Further, Google is claiming superior rights to all marks that incorporate the GOO- and -OOGLE formatives, despite Silvers' prior use and superior rights in these marks.

6. Silvers has filed this action to protect his superior and exclusive right to use the "Googles" mark on the Internet in connection with children's goods and services, and to enjoin Google from using the "Google" mark in connection with the advertising, promoting, marketing and

sale of children's goods and services. Silvers also seeks damages that he has incurred from the reverse confusion caused by Google's unlawful conduct.

### **JURISDICTION**

6. Silvers is an individual domiciled in Palm Beach County, Florida.

7. Google is a Delaware corporation with its principal place of business at Mountain View, California.

8. This trademark infringement and unfair competition action arises under the Lanham Act, 15 U.S.C. " 1051-1127 and the common law of the State of Florida.

9. Jurisdiction is proper pursuant to 28 U.S.C. '1331, 28 U.S.C. '1332, 28 U.S.C.' 1338, the principles of supplemental jurisdiction pursuant to 28 U.S.C. ' 1367, and because the parties are citizens of different states in a controversy that exceeds \$75,000 exclusive of interest and costs.

10. Venue is proper in this judicial district pursuant to 28 U.S.C. Sections 1391(b) and (c) because Silvers resides in this District, and the injury to Silvers from Google's unlawful conduct arose in this District.

### **GENERAL ALLEGATIONS**

#### **1979 - 1997: The "Googles" Trademark and Intellectual Property**

11. Over 25 years ago, Silvers developed an animated character concept called the "Googles From The Planet Goo" designed to appeal to children. *See Exhibit 1.* Throughout the 1980s, Silvers continued to sketch out and develop the "Googles" concept and refine his characters. *See Exhibit 2.* His initial use of the "Googles" name appeared in the mid-1980s in connection with his first merchandising idea - "Googles the Perfect Pet."

12. In 1986, Silvers obtained a copyright for the "Googles the Perfect Pet" art work. *See Exhibit 3.*

13. By 1990, Silvers had developed the "Googles" character concept into a ten-series

storyline about the “Googles And The Planet Of Goo” that was intended to both educate and entertain children, something known in the children’s market as “edutainment.” *See Exhibit 4*. The “Googles” are lovable, friendly four-eyed alien creatures that live on the planet Goo. *Id.* Silvers’ idea was to use the “Googles” to communicate to children in non-violent themes social lessons, conceptual awareness and educational values, and give Achildren of today, visions of tomorrow.’ *Id.*

14. In 1991, Silvers obtained a copyright registration for the first of his ten-series stories entitled “Googles & The Planet of Goo.” *See Exhibit 5*. Two years later he obtained a copyright on the second story entitled “Googles, The Return Flight To The Planet Of Goo.” *See Exhibit 6*.

15. From 1991 through 1994, Silvers worked to refine the “Googles” characters, and develop the art for the “Googles” stories. *See Exhibit 7*.

16. In 1994, Silvers created the “Googles” logo. *See Exhibit 8*. Silvers obtained a copyright registration for the “Googles” logo on July 26, 1994. *See Exhibit 9*.

17. Shortly after creating the “Googles” logo, Silvers’ father, Michael Silvers, formed AThe Googles Children’s Workshop’ for the benefit of Silvers, and to assist with promoting and marketing the “Googles” concept. The “Googles” name and logo appeared on business cards and letterhead that were distributed across the country in connection with promoting the concept to the children’s industry. *See Composite Exhibit 10*.

18. By 1994, the “Googles” characters were refined to feature the four eyes of the “Googles” trademark design. *See Exhibit 11*. A key feature of the “Googles” characters are the multi-color tennis shoes worn by each character.

19. Silvers expanded on the tennis shoe feature of the “Googles” characters and developed a “Gooshoe” for children that featured the “Googles” trademark. *See Exhibit 12*. In 1994, Silvers obtained a copyright registration for “The Gooshoe” artwork. *See Exhibit 13*.

20. By January, 1995 Silvers had created the first three-dimensional version of a “Googles”

character and was generating local press interest in the “Googles” concept. *See Exhibits 14 and 15.* Silvers’ intention always has been to develop the “Googles” concept for commercial exploitation, and in 1995 Silvers developed a prototype to merchandise the “Googles” characters. *See Exhibit 16.*

21. In March, 1995, Silvers applied for a design patent for the “Googles” tennis shoe which matured into United States Patent Number 397,543. *See Exhibit 17.*

22. In late 1995, Silvers contracted Morris Publishing to print 1,000 copies of the “Googles And The Planet Of Goo.” *See Exhibit 18.* The book was officially printed in May 1996 and featured the “Googles” trademark and design and the “Googles” characters. *See Composite Exhibit 19.*

23. From June, 1996, Silvers sold and shipped copies of the book around the country. *See Exhibit 20.* Silvers continued from that time to promote and sell his book and related “Googles” merchandise through direct and consignment sales. *See Composite Exhibit 21 and 22.* In November 1996, Silvers was featured in a newspaper article published in the Washington, D.C. area with a photograph of the “Googles And The Planet Of Goo” book and the “Googles” trademark. *See Exhibit 23.*

24. In 1996, Silvers applied to register the “Googles” trademark for use in connection with children’s books. That application matured into Federal Trademark Registration No. 2,087,590 issued August 12, 1997. *See Exhibit 24.*

25. In August 1997, Silvers also obtained a copyright registration for the first “Googles” song. *See Exhibit 25.*

### **1997: The “Googles” on the Web**

26. When Silvers published “Googles And The Planet Of Goo” he realized that the Web was fast becoming the marketplace of the future providing a far reaching opportunity to further develop and market the “Googles” to children throughout the world. In July 1997, Silvers registered for and obtained the Internet domain name “googles.com” as the address for his “Googles” Website. *See*

*Exhibit 26.* A few months later, the “Googles” Website was operational, featuring the “Googles” trademark, “Googles” characters, “Googles” merchandise, “Googles” song, “Googles And The Planet Of Goo” book, together with sales and order information. *See Composite Exhibit 27.*

27. Silvers intended to develop “googles.com” into a highly interactive children’s Website to promote and sell children’s books, merchandise, and related goods and services. In 1998, Silvers added a new feature called the “FOG” Club meaning AFriends of Googles.’ *See Exhibit 28.* As the “googles.com” Website caught on, hundreds of “Googles” fans used the Internet to register on the “Googles” Website as “FOG” Club members. *See Exhibit 29.*

### **1998 - 2005: The “Googles” Concept Becomes Popular On The Internet**

28. By late 1998, Silvers worked with a manufacturer to make the “Googles” characters “Oogle,” “Iggie,” and “Oggie” into plush toys. *See Exhibits 30 and 31.* In March 1999, Silvers applied for a federal trademark registration for each name, which resulted in Federal Trademark Registration Nos. 2496755, 2496754, 2496753. *See Composite Exhibit 32.*

29. By 1999, Silvers had entered into a license agreement with The Aurora Collection for the commercial exploitation of the “Googles” trademark, related intellectual property, Website, and products. That agreement was memorialized in July 2000. *See Exhibit 33.* Soon after, the “Googles” characters drawings were further refined for commercial use. *See Composite Exhibits 34 and 35.*

30. From 2000 - 2001, the “Googles” continued to develop on the Web and were featured in the Internet based educational site called AFun With Science Club.’ *See Exhibit 36.* That Website featured the “Googles” theme song, animated cartoons called “GooToons,” and stories about each of the “Googles” characters. *See Composite Exhibit 37.*

31. To further promote the “Googles,” Silvers and Aurora created a “Googles” theater show that played to children around the country. *See Composite Exhibits 38 and 39.* In 2001, the “Googles” performed live on national television during the Jerry Lewis Telethon.

**Meanwhile: A Prototype Search Engine Project Called “BackRub” Is Born**

32. In 1996, Sergey Brin and Larry Page, two graduate students at Stanford University, collaborated on a university research project to develop a prototype search engine for the Web. *See Exhibit 40.* The project was named “BackRub” for its unique ability to analyze the “back links” that point to a given Website. *Id.*

33. While the two students worked on the research project through 1997, a demo version of the developing search engine was available through the Internet at backrub.stanford.edu. *See Exhibit 41.*

34. Upon information and belief, sometime in 1997, after giving much thought about a better name for this prototype search engine, Page decided on the name “googol.” “Googol” is a word that means the mathematical number 1 followed by one hundred zeros and denotes the largest finite number short of infinity. The word fit the goal of the research project to organize an almost infinite amount of information on the Web.

35. Upon information and belief, after Page decided to name the prototype search engine “googol,” he searched the Web to determine if he could obtain the domain name “googol.com.” That domain name, however, had been registered by Tim Beauchamp in 1995 and thus was unavailable.

36. Upon information and belief, Page searched the Web for other domain names similar in spelling to “googol” to determine what was available. Page settled on the word “Google” and registered the domain name “google.com.” Upon information and belief, Page knew when he registered “google.com” that the domain name “googles.com” had been registered by Silvers three months earlier and was in use, and that Silvers had a federal trademark registration for the “Googles” mark.

37. Upon information and belief, sometime in late 1997, Page and Brin changed the name of their research project from “BackRub” to “Google.” *See Exhibit 42.* Upon information and belief, access to the demo of the research project remained, however, at “backrub.stanford.edu” throughout

1997. *See Exhibit 43*. Around this same time, both Brin and Page displayed information about their prototype search engine project on their Stanford University home WebPages, each playing with the design of the word “Google.” *See Composite Exhibit 44 at pages 2 and 3*. The design displayed by Brin on his home Webpages showed the word “Google” with the two “o’s” as eyes.

38. Upon information and belief, sometime in 1998, Page and Brin began using the domain name “google.stanford.edu” as the Web address of their search engine demo site. *See Exhibit 45*. Throughout most of 1998, however, the “Google” prototype search engine was associated with Stanford University. *See Exhibit 46 at page 2*. The index of information provided through the “Google” prototype search engine was free to anyone with an Internet connection, and there was no intention to sell the services to consumers.

39. Upon information and belief, in and around August 1998, Page and Brin commissioned a formal trademark and domain name search to determine whether the name “Google” was available for use as a trademark. The search result revealed Silvers’ “Googles” trademark, “googles.com” domain name, and picture of the “Googles” Website. *See Exhibit 47*. Based on the trademark search results, Page and Brin both had actual knowledge that Silvers owned the “Googles” mark and owned and operated the “googles.com” Website before they adopted and used the “Google” mark as a trademark. Further, based on Silvers’ federal copyrights and patent incorporating the “Googles” name, Page and Brin had constructive notice of the extent of Silvers’ use of the “Googles” mark.

40. On or about September 4, 1998, a year after Page acquired the “google.com” domain name, Page and Brin adopted the name “Google” as their company name and incorporated Google Technology, Inc. in California. *See Exhibit 48*. Page and Brin decided to adopt the name “Google” rather than “Googol” because “googol.com” was not available as a domain name, and could not be trademarked. *See Exhibit 49 at page 2*. This decision was influenced also by the child-like sound of the word “Google” and the colorful sense of fun that it invoked.

41. On September 16, 1998, Google, Inc. filed an Intent-To-Use federal trademark registration application to register the mark “Google” for use in connection with computer hardware (Int’l class 9), and computer services (Int’l class 42). *See Exhibit 50*. An Intent-To-Use application means that the applicant has not yet used the mark in commerce but has a bona fide intent to use the mark in commerce at some future date.

42. Up through 1998 and into 1999, the “Google” search engine remained free to anyone connected to the Internet and was still a non-commercial experimental academic model. *See Exhibit 51 at page 1, 3, 4, 5 and 10*. Page intended to keep the “Google” search engine in the non-commercial academic realm because it avoided the advertising supported business model of most search engines.

43. On March 15, 1999, “Google, Inc.” filed an Amendment-To-Allege-Use in the pending federal trademark application alleging, in contradiction to its original declaration that it had an intent to use, that it had used the “Google” mark in interstate commerce in connection with Int’l class 42 services since September 1997, a full year before the Intent-To-Use application date. *See Exhibit 52*. The Amendment-To-Allege-Use was filed together with Page’s Declaration that based on his own knowledge the “Google” mark was in use in commerce as of March 9, 1999, another contradiction. *See Exhibit 53*. Upon information and belief, up until late 1999, the “Google” search engine services were not advertised or offered for sale, and thus were not rendered in interstate commerce.

44. On or about September 23, 1999, the “Google” search engine was “commercially” launched. But it was not until the first quarter of 2000 that Google Technology introduced a paid advertising program. This advertising program was then followed by the “Google AdWords” and “Google AdSense” advertising programs in 2000 and 2002 respectively.

45. On September 23, 2002, three years after the “Google” federal trademark application was filed, “Google, Inc” was incorporated as a California corporation. *See Exhibit 54*. Upon information

and belief, on October 11, 2002, Google, Inc. purported to assign federal trademark application Serial Number 75/978469 (for “Google”) to Google Technology, Inc. On August 27, 2003, Google, Inc. was reincorporated as a Delaware corporation. Upon information and belief, on that same date, Google Technology, Inc. purported to assigned federal trademark application Serial No. 75/978469 to Google, Inc., the Delaware corporation. Upon information and belief, sometime in 2004, Google Technology, Inc. was merged into Google, Inc.

**1998: Silvers Attempts to Contact Larry Page To Avoid Confusion**

46. In or around late 1998, Silvers tried to contact Larry Page about his intended use of the “Google” name on the Web and to discuss ways to avoid potential confusion with the “Googles” mark and the “googles.com” Website. Silvers did not receive a response.

47. On August 12, 2001, Silvers again tried to contact Larry Page about his use of the “Google” name. *See Exhibit 55*. In his e-mail directed to Page, Silvers noted that confusion had started between the Websites, and simply asked if they could work out a mutual plan to avoid confusion, especially regarding traffic to each other’s Websites. Silvers did not receive a response.

48. On August 13, 2002, Silvers called Google’s Director of Legal Affairs to ask if they could work out a mutual plan to avoid confusion, and was told Google was not interested in taking steps to avoid confusion. Indeed, as explained below, Google has recently taken steps despite its knowledge of Silvers’ rights, to increase confusion and trample on Silvers’ rights even more.

**2001 -2004: The “Googles” Continue to Develop Commercially**

48. From 1999- 2002 Silvers and Aurora continued to develop the “Googles” concept with new music, adventures, and improved interactive Website. By 2001, the “Googles” were attracting media attention and were featured in *Kidscreen Magazine*. *See Exhibit 56*.

49. In 2002, Aurora sold its licensing rights in the “Googles” trademark, domain name, Website , and related “Googles” intellectual property to Stelor Productions.

50. Since 2002, Stelor as Silvers' licensee has continued to promote and develop the "Googles" trademark, Website, and related intellectual property in connection with children's goods and services. *See Composite Exhibit 57.*

51. By March 2003, the "googles.com" Website was being inundated with people looking for the "google.com" Website. To protect the identity of the "Googles" mark and combat confusion between the "Google" and "Googles" Websites, a feature was added to the googles.com Website that asked the Internet visitor if the "Googles" site was where it intended to be. *See Exhibit 58.* Upon information and belief, Google has taken no action to avoid confusion with the "Googles" mark.

#### **Google Expands The Use Of The "Google" Mark Into Childrens Goods and Services**

52. Since adopting the "Google" mark in 1999, and with knowledge of Silvers' superior rights to the "Googles" mark, googles.com domain name and Website, Google has expanded the use of its "Google" mark into all areas of commerce, including the market for children's goods and services. Despite Silvers' superior right to use the "Googles" mark in connection with children's goods and services on the Web, Google filed a federal trademark application to expand its right to use the "Google" mark for children's goods, including books and clothing. *See Exhibit 59.*

53. On July 13, 2004, Silvers' then licensee, Stelor Productions, filed an opposition to Google's federal trademark application. Google in turn filed a petition to cancel Silvers' trademark registration. Stelor also filed a Uniform Domain-Name Dispute Resolution Policy proceeding with the National Arbitration Forum ("NAF Action") challenging Google's right to use the domain name "google.com" based on Silvers' superior registration of "googles.com."

54. In February, 2005, after several months of discussion and because Google could not obtain an extension of time to file a response to the NAF Action, the parties agreed to a 30-day stand-off agreement under which Google, Stelor, and Silvers agreed to a withdrawal of the pending actions against each other to allow time to continue negotiations to resolve all pending disputes. The intent of

the standoff agreement was that each party would be entitled to re-file its action if a resolution was not reached after 30-days.

55. Upon execution of the standoff agreement, Stelor learned that under the Trademark Trial and Appeal Board rules, it would not be entitled to re-file its Opposition at the end of this 30-day standoff period. Therefore, Stelor filed a Motion for Stay Pending Settlement Negotiation to stay the Opposition for the 30-day period. This protected Stelor from losing the opportunity to oppose Google's trademark application, and was within the spirit of the agreement.

56. In contravention of the intent of the standoff agreement, and Silvers' request, Google refused to agree to the stay and, filed a motion demanding that the Opposition be dismissed. On March 22, 2005, the Opposition was dismissed, and Registration No. 2954071 issued. *See Exhibit 60*. Based on Google's actions, negotiations ceased and this action was filed a few weeks later.

#### **Google's Unlawful Use Of Silvers' Mark For Domain Names**

57. Google has also unlawfully and intentionally misappropriated the word "Googles" and incorporated that word into domain names. For example, despite naming its advertising programs "Google Adwords" and "Google AdSense," Google registered the domain names **googlesadwords.com**, **googlesadsense.com**, and **googles-adwords.com**. Google also has unlawfully and intentionally registered the domain names **20googles.com**, **googlesc.com**, **googlesms.com**, **googlessms.co.il**, **googlessms.de**

58. Google now uses the "Google" mark, "google.com" and other domain names incorporating the name "googles," and the "Google" Website to advertise, promote, market and sell children's books, merchandise, and related goods and services, and has encroached upon Silvers' federal and common law trademark rights. In further violation of Silvers' rights, Google now offers for sale a product called "Google Goo." *See Exhibit 61*.

59. Google has become so well-known through publicity, advertising and marketing that it

now overwhelms the public recognition of the “Googles” trademark, domain name, and Website, and is preventing Silvers from flourishing on the Web or entering new markets within his natural scope of expansion. And, Google is now attempting to assert exclusive rights over all marks with the GOO- and -OOGLE formative, despite Silvers’ prior use and superior rights in these marks.

**COUNT ONE**

**(Trademark Infringement under 15 U.S.C. § 1114)**

60. Silvers realleges and incorporate by reference the allegations of paragraphs 1 through 59, inclusive, as though fully set forth.

61. Silvers is the senior user of the mark “Googles” for use in connection with children’s books, merchandise, music, toys, and related goods and services. Since 1997, Silvers, and those associated with him, have used the Internet to market and promote the “Googles” mark.

62. With knowledge of Silvers’ superior and exclusive rights in the “Googles” mark, the “googles.com” domain name, and Website, Google adopted the mark “Google,” which is the singular version of and almost identical to Silvers’ “Googles” mark, and Google has used that mark extensively in connection with goods and services offered to consumers through the Internet.

63. With knowledge of Silvers’ superior rights in the “Googles” mark, “googles.com” domain name, and Website, Google registered the domain name “google.com” and has used that domain name extensively in connection with its Internet-based services.

64. Google’s infringing use of the name “Google,” which is substantially identical to Silvers’ “Googles” mark, has caused and will continue to cause “reverse confusion” in that the consuming public will now falsely believe that Silvers’ goods and services, “googles.com” domain name, and Website are connected, affiliated, associated, sponsored, endorsed or approved by Google, and that Google is the source of origin of the “Googles” concept, books, music, “googles.com” domain name, Website, merchandise, and related goods and services, in violation of 15 U.S.C. ' 1114.

65. Google's infringing use of the "Google" name and "google.com" domain name for Internet-based services, which include advertising for and providing links to sites selling children's books, games and other educational and entertainment products and services, and unlawful use of the "Googles" name, and related names, is diminishing the identity and value of Silvers' "Googles" mark, "googles.com" domain name, and Website, and is preventing Silvers from flourishing on the Web, or expanding his goods and services at the "googles.com" Website, and otherwise causing Silvers great harm.

66. As a direct and proximate result of Google's unauthorized and unlawful acts, Silvers has suffered and will continue to suffer irreparable harm for which there is no adequate remedy at law. Unless restrained, Google's conduct as described above, will continue to cause confusion and will continue to injure, if not obliterate, the value of Silvers' "Googles" mark, domain name, and Website, causing great harm and damage to Silvers.

67. As a direct and proximate result of Google's wrongful conduct, Silvers has also suffered and will continue to suffer monetary damages from the "reverse confusion" caused by Google.

WHEREFORE, Plaintiff requests that this Court provide relief against said acts of Defendant as set forth in the Wherefore clause below.

### **COUNT TWO**

#### **(Unfair Competition under 15 U.S.C. § 1125(a))**

68. Silvers realleges and incorporate by reference the allegations of paragraphs 1 through 59, inclusive, as though fully set forth.

69. Silvers is the senior user of the mark "Googles" for use in connection with children's books, merchandise, music, toys, and related goods and services. Since 1997, Silvers, and those associated with him, have used the Internet to market and promote the "Googles" mark.

70. With knowledge of Silvers' superior and exclusive rights in the "Googles" mark, the

“googles.com” domain name, and Website, Google adopted the mark “Google,” which is the singular version of and almost identical to Silvers’ “Googles” mark, and Google has used that mark extensively in connection with goods and services offered to consumers through the Internet.

71. With knowledge of Silvers’ superior rights in the “Googles” mark, “googles.com” domain name, and Website, Google registered the domain name “google.com” and has used that domain name extensively in connection with its Internet-based services.

72. Google’s unauthorized and unlawful use of the name “Google,” which is substantially identical to Silvers’ “Googles” mark, has caused and will continue to cause “reverse confusion” in that the consuming public will now falsely believe that Silvers’ goods and services, “googles.com” domain name, and Website are connected, affiliated, associated, sponsored, endorsed or approved by Google, and that Google is the source of origin of the “Googles” concept, books, music, “googles.com” domain name, Website, merchandise, and related goods and services, in violation of 15 U.S.C. ' 1125(a).

73. Google’s use of the “Google” name and “google.com” domain name for Internet-based services, which include advertising for and providing links to sites selling children’s books, games and other educational and entertainment products and services, and unlawful use of the “Googles” name, and related names, is diminishing the identity and value of Silvers’ “Googles” mark, “googles.com” domain name, and Website, and is preventing Silvers from flourishing on the Web, or expanding his goods and services at the “googles.com” Website, and otherwise causing Silvers great harm.

74. As a direct and proximate result of Google’s unauthorized and unlawful acts, Silvers has suffered and will continue to suffer irreparable harm for which there is no adequate remedy at law. Unless restrained, Google’s conduct as described above, will continue to cause confusion and will continue to injure, if not obliterate, the value of Silvers’ “Googles” mark, domain name, and Website, causing great harm and damage to Silvers.

75. As a direct and proximate result of Google’s wrongful conduct, Silvers has also suffered

and will continue to suffer monetary damages from the “reverse confusion” caused by Google.

WHEREFORE, Plaintiff requests that this Court provide relief against said acts of Defendant as set forth in the Wherefore clause below.

**COUNT THREE**

**(Unfair Competition Under Florida Law)**

76. Silvers realleges and incorporates by reference the allegations of paragraphs 1 through 59, inclusive, as though fully set forth.

77. Google’s unauthorized and unlawful use of the name “Google,” which is substantially identical to Silvers’ “Googles” mark, has caused and will continue to cause “reverse confusion” in that the consuming public will now falsely believe that Silvers’ goods and services, “googles.com” domain name, and Website are connected, affiliated, associated, sponsored, endorsed or approved by Google, and that Google is the source of origin of the “Googles” concept, books, music, googles.com domain name, Website, merchandise, and related goods and services, which constitutes unfair competition under Florida common law.

78. Google’s use of the “Google” name and “google.com” domain name for Internet-based services, which include advertising for and providing links to sites selling children’s books, games and other educational and entertainment products and services, and unlawful use of the “Googles” name, and related names, is diminishing the identity and value of Silvers’ “Googles” mark, “googles.com” domain name, and Website, and is preventing Silvers from flourishing on the Web, or expanding his Internet- based services and goods at the googles.com Website, and otherwise causing Silvers great harm.

79. Further, Google is attempting to establish rights *in gross* to the term “Google” to prevent anyone else from using any derivation of the “Google” mark whatsoever, including the formatives GOO- and - OOGLE.

80. Google's attempt to prevent others from using any derivation of the "Google" mark whatsoever also constitutes unfair competition under Florida law.

81. As a direct and proximate result of Google's unauthorized and unlawful acts, Silvers has suffered and will continue to suffer irreparable harm for which there is no adequate remedy at law. Unless restrained, Google's conduct as described above, will continue to cause confusion and will continue to injure, if not obliterate, the value of Silvers' "Googles" mark, domain name, and Website, causing great harm and damage to Silvers.

82. As a direct and proximate result of Google's wrongful conduct, Silvers has also suffered and will continue to suffer monetary damages from the "reverse confusion" caused by Google.

WHEREFORE, Plaintiff requests that this Court provide relief against said acts of Defendant as set forth in the Wherefore clause below.

#### **COUNT FOUR**

##### **(Cancellation of Defendant's Registration)**

83. Silvers realleges and incorporates by reference the allegations of paragraphs 1 through 59 inclusive, as though fully set forth.

84. On or about September 4, 1998, Google Technology, Inc. was incorporated in California.

85. On September 16, 1998, "Google, Inc." filed an Intent-To-Use federal trademark registration application to register the mark "Google" for use in connection with computer hardware (Int'l class 9), and computer services (Int'l class 42). An Intent-To-Use application means that the applicant has not yet used the mark in commerce but has a bona fide intent to use the mark in commerce at some future date.

86. Up through 1998 and into 1999, the "Google" search engine remained free to anyone connected to the Internet and was still in the realm of a non-commercial experimental academic

model. Page intended to keep the “Google” search engine in the non-commercial academic realm because it avoided the advertising supported business model of most search engines.

87. On March 15, 1999, “Google, Inc.” filed an Amendment-To-Allege Use in the pending federal trademark application alleging, in contradiction to its original declaration that it had an intent to use, that it had used the “Google” mark in interstate commerce in connection with Int’l class 42 services since September 1997, a full year before the Intent-To-Use application date. The Amendment-To-Allege-Use was filed together with Page’s Declaration that based on his own knowledge the “Google” mark was in use in commerce as of March 9, 1999, another contradiction. *See Exhibit 53.* Upon information and belief, up until late 1999, the “Google” search engine services were not advertised or offered for sale, and thus were not rendered in interstate commerce.

88. On or about September 23, 1999, the “Google” search engine was “commercially” launched. But it was not until the first quarter of 2000 that Google Technology introduced its first paid advertising program. This advertising program was then followed by the “Google AdWords” and “Google AdSense” advertising programs in 2000 and 2002 respectively.

89. Three years after filing a federal trademark application, on September 23, 2002, “Google, Inc.” was incorporated as a California corporation. Upon information and belief, on October 11, 2002, Google, Inc. purported to assign federal trademark application Serial Number 75/978469 (for “Google”) to Google Technology, Inc. On August 27, 2003, Google, Inc. was reincorporated as a Delaware corporation. Upon information and belief, on that same date, Google Technology, Inc. purported to assigned federal trademark application Serial No. 75/978469 to Google, Inc., the Delaware corporation. Upon information and belief, sometime in 2004, Google Technology, Inc. was merged into Google, Inc.

90. At the time the trademark application was filed, the applicant “Google, Inc.” was not a legal entity incorporated in California. Therefore, the statements made in Page’s declaration were

false. And, Page falsely stated in his declaration that “no one else has the right to use the mark in commerce, either in the identical form in such near resemblance “ that it will cause confusion.

91. Further, the statement in the Amendment-To-Allege-Use that the “Google” was first used in interstate commerce in September, 1997 was false.

92. Because Page’s statements in the application and Amendment-To-Allege-Use were false, Google’s trademark registration no. 2806075 was obtained fraudulently and must be canceled.

WHEREFORE, Plaintiff requests that this Court provide relief against said acts of Defendant as follows:

a. That Defendant, its agents, servants and employees, and other such persons in concert or participation with Defendant, including licensees, pursuant to 15 U.S.C. § 1116, be preliminarily and then permanently enjoined from the further use of the mark “Google” or any confusingly similar variation thereof, in connection with the advertising, promotion, marketing, and sale of children’s goods and services;

b. That Defendant’s Federal Trademark Registration No. 2954071 as to Int’l class 16 be ordered cancelled;

c. That Defendant’s Federal Trademark Registration No. 2806075 be ordered cancelled;

d. That Plaintiff be awarded compensatory damages for the reverse confusion caused by Google consistent with, but not limited to, all remedies available under 15 U.S.C. §§ 1114 and 1117, and Florida common law.

d. That Plaintiff be awarded his costs, and attorneys fees pursuant to the exceptional case provisions of 15 U.S.C. §1117(a) and (b);

e. That Defendant’s domain name registrations for googlesadsense.com, googlesadwords.com, googles-adwords.com, 20googles.com, googlesc.com, googlesms.com,

googlessms.co.il, googlessms.de and any other domain name incorporating the word "Googles" be cancelled;

f. That Defendant, its agents, servants and employees, and other such persons in concert or participation with Defendant, including licensees, be preliminarily and then permanently enjoined from the further use of the name "Googles" in connection with any domain name;

g. That Defendant, its agents, servants and employees, and other such persons in concert or participation with Defendant, including licensees, be preliminarily and then permanently enjoined from using any trade practices whatsoever that injure the value and goodwill in the "Googles" mark and Plaintiff's related intellectual property, including claims that it has superior rights to any mark using the GOO- or -OGGLE formative marks;

h. That Plaintiff be granted such further relief as this Court may deem just and proper.

**JURY DEMAND**

Plaintiff demands a trial by jury on all issues so triable.

# Exhibit 1

August 31, 1984

To Whom It May Concern:

Be it known to all parties that I, Steven A Silvers, have developed a children's record concept utilizing three characters called THE GOOGLES FROM THE PLANET GOO. The names of these characters are GOOGLES, GIGGLES, and GOGGLES. During their inception in 1979, the characters were originally intended to act as an educational tool through audio and visual means in teaching children, preferable pre-school, various concepts such as counting numbers, coping with the loss of a pet or family member, divorce and other experiences of life.

The configurations of these three characters are, to date, first being finalized since they have gone through many figure changes. As best as can be described verbally, and for the sake of brevity and legality in protecting my concept, they will appear as little furry gremlin-like characters with no mouth, no ears, no limbs; only an expressive pair of eyes. They will host different colors, to be decided on prior to manufacture.

Due to the tremendous competition in the children's records market and my involvement and interest moving toward the pop record market, I thought it best to temporarily abandon the idea. Since then, the following events have occurred:

Among my hobbies, one of my favorite past-times and means of sanity in this insane world we live in is to, from time to time, invent gadgets and items to make life a little easier and a little more fun to live in. Some of them have already been patented, and others I am waiting to patent.

Several months ago I met a gentlemen by the name of Barry Ober, who is a qualified audio and electronic engineer/technician. Since I am a state of the arts recording studio owner, from time to time, through an organization Barry works for by the name of Harris Audio Systems, Barry had visited by company called Import Studios, Inc. located at 7326 Biscayne Boulevard, Miami, Florida 33138, and he and I befriended each other. During the next several social meetings Barry and I discussed various issues pertaining to our lives ambitions, goals, concepts and found out that a good many of them were quite similar. One of the issues at hand, in specific, was an invention that Barry had claimed he had worked on for quite a number of years. As best as he could describe it, he called it similar to the Pet Rock and at the beginning he gave me no name. It was described as a little pet animal very similar in character and design to my Googles character. I then asked him if he would be willing to enter into an agreement and exploit the concepts that we both shared jointly since I, for some time, had been thinking about turning the Googles into a combination toy doll/puppet and television series. Barry's reply was that he had to give it some thought.

Several more weeks passed, many more phone conversations and personal meetings ensued, but to date nother has transpired, not even a simple written agreement to collaborate. He liked my idea very much and took somewhat of an offense to criticisms I had made about his verbal explanation of his design and configuration.

When I asked him for specifics such as his patent attorney's name, his utility and design patent numbers, his trademark registration number, and other pertinent information to substantiate his claims, he constantly gave me excuses, at which time I decided to go forth and protect myself through this diary/letter and the eventual follow-up which I plan to do immediately, before the end of September 1984 with my patent attorney and legal advisors.

The very last conversation which was with Barry on or about August 28, 1984 was with specific reference to informing him that I was going through with my concept full force, with or without him involved. He then informed me that he sent away for the necessary parts for a prototype that he was going to have made as soon as possible; and that in fact he had received the parts and was about to start assembling them. However, again, as of this writing some five days later, I have seen neither the parts or a finished prototype, which he claimed he could have for me within one or two days after he received all the parts, which he claimed to have received.

Being the entrepreneur that I am, I decided to go forth and acquire a professional commercial artist, an electronic engineer, a professional carpenter to put together my prototypes which I am calling THE GOOGLES, The Perfect Pet. I will patent, trademark, and whatever else I need to do to legally protect my idea the aforementioned name and product.

The first of the configurations to be manufactured will be called Googles. An artist's rendition is in the works, as per the above, and it will be manufactured in a cage-like configuration (material to be decided upon, as well as size). The character will be, as described above, libless with LED, possibly blinking, colored eyes, operated off a micro chip solid state transistorized circuit board, utilizing a hearing-aid type battery or, if need be, a larger type battery to give a longevity of approximately two years use of constant illumination. A motor movement of lift to right by the head is also in the works, but more than likely this will be incorporated in a later model.

I am planning to make one last attempt, over the Labor Day 1984 weekend, to contact Barry and see what, if anything we can do to merge and jointly pursue this endeavor. If unsuccessful, I will immediately, as described above, pursue the matter on my own and would like it to go on record as such that every opportunity according to this letter of facts was granted to Barry to participate in this joint venture and that due to circumstances beyond my control, and his lack of initiative and response to my many pleas to do so, I have been left no alternative but to go it alone.

Respectfully submitted by me, Steven A. Silvers, on this 31st day of August, 1984.

# Exhibit 4

### THE GOOGLES' PROJECT

Googles And The Planet Of Goo will, undoubtedly, capture the reader's intrigue and interest enough to warrant s/he to want to read the next Googles' adventure titled: Googles And The Return Flight To Goo.

There are a total of ten Googles' edutainment books currently being developed, each with its own separate adventure story.

In Vol. I., the reader is taken on a journey to a faraway imaginary planet where s/he is introduced to an extremely intelligent life form of aliens called Gootians--one of whom is the main character called Googles. This lovable, friendly looking alien ventures off into outer space, after leaving his planet called Goo, in search of a new home for his family, friends, and loved ones to live, work, learn, and play.

The planet Goo was destroyed by a combination of disasters, including the invasion of a destructive and violent alien race that totally dominated the planet, destroyed all of its natural resources, polluted its air, water, and rain forests--sounds familiar--thus forcing the remaining Gootians to seek refuge underground.

We next learn that a meteor shower ensues and when the smoke finally clears, all of Goo was cleansed of the violent intruders who either voluntarily departed or were destroyed by the meteor shower. However, in its wake, Goo was left in shambles. Now it was Googles sole appointed task, by his mentor, GooRoo, to find a planet for those Gootians who were still alive to immigrate to.

Googles sets out on his journey and as the first adventure book denotes, what a journey it turns out to be.

Vol. II. titled: Googles And The Return Flight To Goo is even more captivating than Vol. I because it traces the end of Vol. I. and the reader is left hanging as to whether or not Googles and his stowaway companion, Joshua, ever make it safely back to Goo in enough time to rescue Googles' younger siblings (Giggles and Goggles).

Vol. II. further delves into the trials and tribulations that Joshua and Googles encounter once they rescue Giggles and Goggles. It is packed with a lot of adventure, twists, and excitement all of which lends itself to a movie script or perhaps an edutainment children's tv series.

THE GOOGLES' PROJECT  
Cont. at Page 2

Additionally, Googlemania merchandise is introduced throughout both adventure books and the educational value and conceptual awareness lessons they both have to offer is a refreshing alternative to the violence that is, otherwise, currently and has been for sometime, permeating the media airwaves and children's literature affecting the **"children of today, with visions of tomorrow."**

As we move into Vol. III, Vol. II ends in a similar fashion as Vol. I. That is it leaves the reader, once again, hanging and very curious as to whether or not Googles, Giggles, Goggles, and Joshua make it safely back to Earth, after their spacecraft, the Ares One, heads toward Mars as originally planned, collects all of its data and samples and then heads swiftly back to Earth. The only problem is Cape Candy Space Center personnel--who were tracking the Ares One--begin experiencing transmission difficulties and finally lose permanent contact with the space shuttle. It's now up to its clandestine crew--three aliens and one earthling--to safely guide the Ares One back to Earth. Can it be done? You'll have to read Vol. III. which I've titled: Earth To Ares One, Where Are You?

Vol. II. is already completed and is awaiting final editing at this time. Vol. III. is still inside my head but it's all there ready to be penned. So are the other themes for the remaining adventure books IV through X, respectively. Hopefully I'll be able to keep the project alive that long.

I think the Googles' project is ripe for edutainment programming considerations--both for radio and television, as well as the big screen.

The social lessons, conceptual awareness, non-violent themes, and the educational values I've built into my storylines are well planned and very marketable to those responsible parents who would like to make a difference, offer an alternative to their children's library, and instill upon them a sense of enrichment that they have otherwise been missing as a result of all the violent orientated programs, literature, games, etc., that they've been constantly bombarded with and exposed to for the last 15+ years.

We at the Googles Children's Workshop, Inc., are ready to make that difference. We are ready to take the Googles

THE GOOGLES PROJECT  
Con't. at Page 3

concept into the 21st Century. We'd be only too honored to have you, on behalf of your company, hop aboard the GooShip with us and the "new kids from Goo:" Googles, Giggles, and Goggles and we'd like to close by wishing you a.....

**GoDay!**

Sincerely yours,

Steven A. Silvers

RE: FOLLOW UP TO YOUR LETTER OF OCTOBER 31, 1994

Dear Mr. Marra:

I received your informative material and was rather impressed with your company's services and your personal track record in the highly competitive toy industry.

I've enclosed, for your review, a synopsis of my innovative children's edutainment adventure series book, inclusive of the "Authors Notes", which will give you a detailed description of exactly what the book's concept is all about.

Additionally, I've enclosed some photos of the originally created character, which my dad's company is planning to market worldwide.

All copyright protection has been effectuated and the document disclosures for all of the merchandise and toy inventions have, likewise, been executed. Design patents have been recently submitted and we are awaiting patent pending documentation from the U.S. Patent & Trademark Office.

The product has yet to be exposed and we are moving very, very carefully, because the potential, we feel, is tremendous for what we have to offer in the way of a "non" violent alternative to parents of children around the globe, surrounding the Googles' concept.

If you are truly interested in becoming a part of this new and exciting and potentially rewarding project, I'd like to hear from you at your earliest convenience.

I did not enclose your requested evaluation fee, because I am quite convinced that the product development is way beyond such an unwarranted stipulation on your behalf. We have spent

**"AN INNOVATIVE COMPANY TEACHING CHILDREN OF TODAY, VISIONS OF TOMORROW"**

Michael Marra  
Page 2.  
December 4, 1994

nearly a decade perfecting this concept and the creation of, what we believe to be the next line of Muppets, as we enter the 21st Century.

If, upon your review of the enclosed material, you would like to discuss this matter further, to our mutual benefits, I'd very much enjoy hearing from. If no, no hard feelings, simply return the enclosed material, along with the photos, in the SASE.

We at the Googles Children's Workshop, look forward to hearing from you soon and until then, have a...

GOD DAY!

Sincerely & Gooly Yours,

Steven A. Silvers

**RE: GOOGLES AND THE PLANET OF GOO, CHILDREN'S BOOK**

Dear John:

As per our conversation, I've enclosed a final draft copy of my children's book for your review and publishing consideration.

Like I informed you, when we spoke, the text may need some minor editing. Also, the dictionary appendix is not complete, as I'm in the process of revising it a bit. I'm trying to place the text on computer disc format so that I can make the changes I feel necessary, to ensure the book's success when it hits the market.

However, I'm certain you will have a good solid understanding of the concept from the package I've presented and would very much love for you to read my book to your children for some unbiased input. While the words may be a little advanced for a seven year old, nevertheless, the storyline is what is the most captivating, as you will soon learn.

I've geared my book to advanced readers, ages 8-12. The dictionary appendix, at the end of the text, is a unique concept that encourages the child to increase his vocabulary in a fun filled manner. And, the word skill challenges that I've, likewise, included, are very stimulating, too.

I will be contacting you in two weeks, or if you feel the need to speak with me sooner, you may call the above listed number and leave a message for me.

Here's hoping to be hearing good things from your end soon, as both Alex and myself are anxious to learn of Harcourt's "hopeful" interests in The Googles's project.

**"AN INNOVATIVE COMPANY TEACHING CHILDREN OF TODAY, VISIONS OF TOMORROW"**

John Radziewicz  
Page 2.  
October 26, 1994

With Barney, just about on his way out, at least that is what all the current press coverage is saying, the Ninja Turtles, soon to become extinct, and all the bad press surrounding the Power Rangers, recently, **Googles, Giggles, and Goggles**, the **NEW KIDS ON THE BLOCK**, are surefire winners, especially for a visionary company, such as Harcourt! Wouldn't you have to agree, John?

The greatest selling feature of my Googles's project is the educational value it has to offer the parents of young children, today. The edutainment alternative, is, likewise, a refreshing twist to all the violence that "smart", educated, and concerned parents are looking to steer away from, too.

Once again, John, thank you for taking the time, and effort to review and consider finding a home for my Googles's project.

If, for whatever reason, you or your associates are not interested in publishing my text--no hard feelings--however, I'd appreciate it if you'd see to it that all of the enclosed material is returned to the company, at your earliest convenience.

Hoping to hear from you soon and until then, you have a...

**GOO DAY!**

Sincerely yours,

Steven A. Silvers

**Dr. Benedetto joins Center**  
 Dominick Benedetto, M.D. and Maria Lopatynsky, M.D. are now associated with Center for Sight-Northern New Jersey (formerly Gunther Vision Associates). The new ophthalmology practice is located at 861 Evelyn Street on Rt. 17 North in the Health South Building in Paramus.

**Bayonne businessman is stuck on 'God'**

By ALAN CHRISTOFFERSEN

HELEN GOODMAN  
 500 Broadway, New York, N.Y. 10013  
 God is the answer; how many Googles is so much all.

A 78-year-old Bayonne businessman is stuck on a child again, thanks to a piece called "Googles and the Planet of God."

Michael J. Silvers, a local and having his dispenser for Wide Optical Center at 890 Broadway, is involved in a children's project entitled "Googles and the Planet of God."

"My oldest son Steven, at the age of 46, decided to start writing as a hobby. He's been a professional entertainer for most of his life but always expressed a desire to some day write a children's book," Silvers explained.

"Sharing a love for children, having three of my own, plus two grandchildren, I read my son's first draft of a children's book that he had written: "Googles and the Planet of God," Silvers continued.

"The book, a fantasy adventure is aimed at children, ages 8 to 12. On the child's travels through reading the text, he learns approximately 200-250 new words and some valuable lessons in conceptual awareness. It's a learning process," Silvers said.

At the back of the book is a dictionary appendix that is used by the child for quick and easy reference purposes when learning new words. There are also special word

Washington, Arkansas, Kansas, Illinois, Indiana, Ohio.  
 Dr. Benedetto, and Lopatynsky are members of numerous professional organizations, including the American Society of Cataract and Refractive Surgery, the American Academy of Ophthalmology, the International Society of Refractive Keratoplasty and the Association for Research in Vision and Ophthalmology. Dr. Lopatynsky is also a member of the California Ophthalmological Society.

Dr. Lopatynsky trained in ophthalmology at Albany Medical College and completed a fellowship in corneal diseases at Wills Eye Hospital. Most recently she was the acting division chief of ophthalmology at the Mary Imogene Bassett Hospital in Cooperstown, N.Y.

She specializes in the treatment of corneal diseases including infections, scarring, dry eye and tumors. She performs corneal transplants and has experience in dealing with complications of cataract and refractive surgery. She corrects nearsightedness and astigmatism.

Center for Sight-Northern New Jersey specializes in cataract surgery, refractive surgery (LASIK) and medical and laser treatment of eye diseases. The practice is part of a nationwide network of ophthalmologists associated with EquiVision, Inc. based in Atlanta, Georgia. EquiVision presently operates 15 ophthalmology centers in 10 states for cataract, refractive and specialty eye care. For more information, call 862-7100.

**Bayonne airman finishes course**

Alan Bruce Kirkland's first class has graduated from the communications computer system operations specialist course at Keesler Airfield, Biloxi, Miss.

Students were taught how to operate and maintain electronic data processing equipment including software, tape and disk management and other related tasks.

Lack is the son of Eugene and Ana M. Lack of Bayonne. He is a graduate of the U.S. Air Force Academy and is currently a captain in the U.S. Air Force.

TERMS & CONDITIONS

This order form must be signed and submitted with your manuscript.

**TERMS OF BOOK ORDER FORM**

Morris Publishing, hereinafter referred to as the Company, agrees to publish an original book in accordance with information furnished on this order form. The purchaser, hereinafter referred to as the Customer, agrees to furnish all text and other material to be published in Customer's book.

**MATERIALS**

Sketches, artwork, copy, plates, film negatives and any other work created or furnished by the Company, shall remain the exclusive property of the Company. This work cannot be used, nor any ideas obtained from this work, without written permission and compensation of the Company. Film negatives will be stored by the Company for five years.

**TYPESETTING**

Typesetting is included in the base price of the book and is based on receiving original copy, clearly typed on one side of a sheet of paper, and conforming to one of the Company's book formats. Copy not submitted in this manner may incur additional typesetting charges.

**PRODUCTION**

The Company assumes responsibility for scheduling and production of the books with normal production time, for books requiring typesetting, at 45 to 60 WORKING DAYS after we receive the manuscript. Production schedule for camera-ready books is 35 to 45 WORKING DAYS. However, the Company reserves the right to adjust production schedules due to heavy seasonal demands, shortages, strikes, fire, energy failure, equipment breakdown, supplier or carrier delays or any other reasonable causes whatsoever. We cannot promise or guarantee ship dates other than our normal production time. Customer delays may alter final delivery date.

**PROOF & CORRECTIONS**

A proof will be submitted to the Customer with original copy. Corrections are to be made on this proof and signed by the customer. The Company reserves the right to use our judgment on design of artwork and cover, if no definite instructions are given. The Company will endeavor to do our best to produce error-free books. However, material submitted by Customer or inadequate final proofing by Customer may result in errors that are not the Company's fault. The Company is not responsible for errors under these conditions: if the work is printed per Customer's OK; if changes are communicated verbally; if Customer failed to return proof with corrections; or if Customer instructed the Company to proceed without submission of a proof. The Company will assume responsibility to correct errors in the event that any subsequent printings are ordered, if Customer provides corrections at time of reorder. **Note:** After the book is in production, the Company cannot guarantee change orders from the submitted order form. **Color Proofs:** Due to differences in equipment, processing, paper, inks and other conditions between color proofing and printing, a reasonable variation in color between proofs and completed job shall be acceptable.

**SHIPPING**

The Customer pays the freight on all book orders. Estimated shipping costs will be provided and are to be included with final payment, due before books are scheduled for shipment. Unless otherwise noted, costs are for a single shipment, without storage. Orders are shipped via U.P.S. or motor freight carrier (truck). The Customer may request faster service (i.e., bus, air freight, etc.). Shipping outside the Continental United States, APO or FPO addresses, will be shipped Parcel Post (Special 4th Class Book Rate).

**Note:** As is customary in the printing trade, all orders are subject to a 10 percent overrun and underrun factor and will be shipped, invoiced and billed accordingly. Under no circumstances are books to be returned without the Company's written approval. Defective books not due to shipping damage must be reported to the Company within 90 days of ship date. The Company reserves the right to repair, replace or credit defective books.

**PAYMENT**

One-third of the total printing bill will be due when the manuscript and other materials are submitted to the Company. The second one-third will be due when the Customer returns the proof; and the final one-third (including shipping costs) will be due before the books are scheduled for shipment. All accounts over 90 days will be considered over-due and will be charged 1 1/2% interest per month (18% per annum). If collection services are necessary to collect over-due accounts, the Customer is liable for any such fees incurred. All prices are based on payment in U.S. Currency.

**CONDITIONS**

This book order form is a binding contract between the Company and the Customer; no other statements or oral agreements are binding. Cancellations after this order form is received will still hold the Customer responsible for costs incurred by the Company concerning actual preparation and/or production on order. In the event of unusual customer delay, the Company reserves the right to bill for work completed. We reserve the right to accept or reject all order applications and manuscripts (including camera-ready or those needing typesetting). The Company's promotional card will be in the back of every book published.

**INDEMNIFICATION**

The Customer shall indemnify and hold harmless the Company from any and all loss, cost, expense and damages on account of any and all manner of claims, demands, actions and proceedings that may be instituted against the Company on grounds alleging that the said printing violates any copyright or any proprietary right of any person, or that it contains any matter that is libelous or scandalous, or invades any person's right to privacy or other personal rights, except to the extent that the Company has contributed to the matter. The Customer agrees to, at the Customer's own expense, promptly defend and continue the defense of any such claim, demand, action or proceeding that may be brought against the Company, provided that the Company shall promptly notify the Customer with respect thereto, and provided further that the Company shall give to the Customer such reasonable time as the exigencies of the situation may permit in which to undertake and continue the defense thereof.

**Signature Required**

I have read the **Guide Book** and the terms above and authorize the Company to compile and print a book in accordance with the information furnished on this order form.

Robert S. Malina  
90 Victory Blvd.  
New Rochelle, New York 10804

July 8, 1996

Hi Bob:

It was a pleasure speaking with you this past Monday. Once again, thank you for taking the time to do so.

As per our discussion, I've enclosed two copies of my "self-published" children's edutainment book. Upon your review, if you feel the material is worthy of your time to pass along to some of your publishing and/or entertainment associates/contacts, I'd be very honored and grateful in your doing so.

If you feel the need for me to send you a few more copies of my text, by all means, please don't hesitate to let me know and I'll get them to you immediately.

Like I informed you when we spoke, I believe I am on to something very special and I don't mean to be tooting my own horn, however, I've done extensive research as to the potential of my Googles' project and now I'm in need of a few door openers to make my dream become a reality.

Ilan has spoken very highly of you and told me that you had quite a few solid contacts in both the publishing and entertainment world.

Being that TOYLAND U.S.A. is desperately searching for the next BARNEY (TOYLAND HERO) I think I have just what the doctor has ordered.

So without further ado my new kids from GOO: Googles, Giggles, and Goggles, would like to say--it's a pleasure to meet you!.

Here's hoping I'll be hearing your "good word" soon, and

**"AN INNOVATIVE COMPANY TEACHING CHILDREN OF TODAY, VISIONS OF TOMORROW"**

Robert S. Malina  
Page 2.  
July 8, 1996

until then, all of us at the Googles Children's Workshop wish  
you and yours a.....

GOO DAY!

Sincerely yours,

Steven A. Silvers

P.S. I've enclosed an outline of the Googles' project to sort  
of give you a better idea as to where we're headed with the  
concept. I'll plan on calling you in a few weeks to learn  
what headway, if any, you've made concerning the book. Thank  
you for any assistance you can lend to me.

August 7, 1996

Charles A. Smith, Ph.D  
Department of Human Development  
and Family Studies  
Kansas State University  
Manhattan, Kansas 66506

Dear Mr. Smith:

I read with interest your wonderfully written book: "*From Wonder to Wisdom.*" It was a great read for me.

I'm a self-published children's book writer.

My first book is titled: "*Googles and the Planet of Goo.*" It is a children's edutainment type book, teaching the children of today, visions of tomorrow. Incorporated into my concept is a fun filled way for a child to increase his/her vocabulary while also teaching lessons in conceptual awareness and social values.

I would very much like to know if you could, perhaps, lend me some of your professional tips on how I might be able to get my book professionally reviewed and/or critiqued.

I've not yet officially released my book for sale. We are still conducting our own grass roots surveys and the results have been wonderful. However, I'm not looking for praise--not just yet. On the contrary, I'm in search of some professional criticism and an honest evaluation of my work. Any suggestions would be most graciously appreciated.

I would be only to honored if you would consider giving your input of my first adventure series Googles' book. Upon your request I would be elated to forward to you a copy of same.

Hoping to hear from you soon; until then I remain:

Cordially yours,

Steven A. Silvers

Courtney Jones  
25264 Malibu Road  
Malibu, CA 90265

Hi Courtney:

I've decided to try my luck and write to you a second time since my last correspondence may have been overlooked perhaps you've been too busy and inadvertently may have forgotten all about it.

In either event, a mutual friend, Robert Land, suggests I write to you again to see what avenues we may pursue surrounding my children's edutainment book, which is self-published, to our mutual benefit.

I've tried calling you several times but have been unable to reach you.

As Robert may have told you, I've worked diligently on a wonderful children's "young reader's" combination adventure and educational book. It is geared toward children ages 7 and up. I'm now ready to promote, market, and distribute it nationwide. Robert suggested I write to you because he thought you could be a source of exposure for the text.

I've not enclosed a copy because I'll first want to speak with you to learn of your interests and whether or not you want to become involved with the project.

If you could let me know when is a good time to reach you and on what number, keeping in mind that I'm on the West Coast, I'd be only too happy to give you a buzz.

For now, I'm living with my sister and don't have my own private line, however, if you wish you may FAX your info to me at 301-762-3247 and I'll respond accordingly.

Hope to hear from you soon and until then, I remain:

Sincerely yours,

Steven A. Silvers

**RE: GOOGLES AND THE PLANET OF GOO**

TO WHOM IT MAY CONCERN:

My name is Steven A. Silvers and I'm the self-published author of the enclosed children's edutainment book as referenced above.

A relative of mine approached the store manager of Encore Books in the Rosehill shopping Center, Thornwood, New York. The purpose of her visit was to seek the store manager's interest in selling our company's book. The interest was, indeed, sparked, however, it was suggested, due to Encore's policy, that I submit a copy of my book to your corporate headquarters for distribution consideration.

Accordingly, I've enclosed a complimentary copy of **GOOGLES AND THE PLANET OF GOO**. The store manager is willing to order copies of our book, and I'm hopeful you'll consider to carry them as a welcomed addition to your existing line of children's book.

Please feel free to contact me at your convenience to discuss pricing and terms. Here's hoping we'll hear from you soon and until then have yourself a...**GoodDay!**

October 18, 1996

Hi Pennie:

I left a message on your voice mail last week but I don't know if I pressed the right button or not in order for you to retrieve it.

In either event, I must tell you it was a very clear and concise message and you have a lovely speaking voice, too.

Since I've not heard from you, I thought I'd take a chance and write you this letter of introduction.

We, at the Googles Children's Workshop, are very proud of our latest children's edutainment book release. Upon perusing the children's book section of one of your Price Club stores in the Rockville, Maryland area, I was quite impressed with your selection, and I believe our GOOGLES AND THE PLANET OF GOO would be a great compliment to your existing titles offered to your customers.

I've enclosed a complimentary copy of our text for your review and distribution consideration. At the present time we are a self-published company promoting and licensing our product lines on an independent basis. If, upon your review of our book, you'd like to discuss pricing and distribution opportunities, I would very much like to hear from you at your convenience.

Hope you enjoy reading our adventure and educational book/concept. Share it with a few children, ages 7 and up, to see how they react to our alien character, Googles, and the storyline or his adventures from the Planet of Goo to Earth.

Thomas L. Phillips, President  
Phillips Publishing International, Inc.  
7811 Montrose Road  
Potomac, MD 20854

October 21, 1996

Dear Mr. Phillips:

It was a pleasure meeting you at the Bullis Library Fund Raising Ceremony this past Sunday.

I wanted to once again, personally, thank you for taking the time to speak with me about my self-published children's edutainment book--GOOGLES AND THE PLANET OF GOO.

It was also very kind of you to accept the complimentary copies of my book and your offer to try and assist me with my distribution needs through one of your personal contacts in the children's book publishing industry.

I've always been a firm believer in the old adage: "NOTHING VENTURED, NOTHING GAINED!"

We, at the Googles Children's Workshop, believe that we have a fine book and our educational and entertainment values are a welcome alternative to all of the unnecessary violence currently being foisted upon the children of today with visions of tomorrow.

Once again I thank you for speaking with me and any assistance you can offer is most certainly greatly appreciated. I know the children's book market is a highly competitive one, and to crack the market is not going to be an easy task. However, I'm confident that Googles, Giggles, and Goggles, from the imaginary planet of Goo, have great

Thomas L. Phillips, President  
Page 2  
October 21, 1996

potential and all I need is a door opener; the characters and storyline will do the rest.

Here's wishing you continued success in all of your life's endeavors, continued good health and a happy and healthy forthcoming holiday season to you and yours.

**Have A GoodDay!**

Sincerely yours,

Steven A. Silvers

**RE: NEW BOOK ACQUISITION**

Dear Ms. Smith:

As per your informative message, please find enclosed a courtesy copy of our children's edutainment text for your review and distribution consideration.

Currently our book is being sold, on a consignment basis, in the Tower Records & Books store in Rockville, MD as well as a local children's book store by the name of Leaf Through, also located in Rockville, MD. Additionally, Borders Books (White Flynt Mall) Rockville, MD has expressed interest and is currently evaluating our book for possible consignment placement.

A feature story is due to be published in the local Potomac Gazette newspaper next week. The gist of the article will be centered around our children's edutainment text and its educational and entertainment value for the "children of today with visions of tomorrow."

Ms. Wanda Smith

November 12, 1996

Dear Mr. Lowe:

As per your message on my voice mail last week, in response to my inquiry with Crown Books, I've enclosed a courtesy copy of our children's edutainment book for your review and distribution consideration.

I might also inform you that a feature article is being published in the Potomac Gazette, within the next two weeks, about our children's edutainment book: GOOGLES AND THE PLANET OF GOO.

Hopefully, upon your review of the book you will feel it worthy of being carried in your chain of book stores. I would be willing to place our books, on a consignment/test market basis, in one or two of your stores in the local Rockville area at which time you could determine for yourself whether or not you would like to purchase them through one of your preferred book distributors.

I've already contacted Koen, Baker & Taylor, and Ingram, all of whom are currently evaluating the book for distribution purposes.

Mr. Lowe

**RE: NEW ACQUISITION AND/OR CONSIGNMENT PLACEMENT  
"GOOGLES AND THE PLANET OF GOO"**

Dear Buyer:

Please excuse my not being more formal as I attempted to acquire your name from the local Borders' Book store here in Rockville but was unable to do so.

In either event, please find enclosed a courtesy copy of my self-published children's edutainment book for your review and distribution consideration with Borders Books, Inc.

In the event that you would like to give me the opportunity of placing my book in one or more of your retail stores on a sort of test market basis, I'd be glad to do so on a consignment basis. I've gotten very good reviews and as a matter of fact the local newspaper is doing a feature story on me and my book this month.

Books are currently being sold in Tower Record and Books in Rockville (on a consignment basis) and several of the other local bookstores as well.

I approached the manager of Borders here at White Flynt Mall and was informed to submit my book and request directly to corporate headquarters.

Page 2

RE: FOLLOW UP TO LAST LETTER OF OCTOBER 17, 1996

TO WHOM IT MAY CONCERN:

This is my second letter of inquiry seeking your company's interests in distributing my children's edutainment book in the Encore book stores (specifically the one in the Rosehill Shopping Center, Thornwood, New York).

So as not to sound redundant, I've enclosed a copy of my last letter which is self explanatory.

I don't mean to make a pest of myself, however, the store manager of Encore books, in Thornwood, New York has expressed a desire to carry my book and there are sales that could be made if he had access to them. As I've informed you in my last letter, the store's manager has openly expressed a desire to carry my book. However, according to Encore's policy he can only procure it through your company.

I would very much appreciate a call from you to discuss pricing and terms at your earliest convenience. The holiday season is upon us and it makes good sense to have my book made available through your distribution network.

Hoping to hear your "good word" and until then, as we say on the planet of Goo, have a....**GoodDay!**

TOYS 'R' US  
Attn: Ms. Leah Michaels  
461 From Road  
Paramus, New Jersey 07652

October 17, 1996

Hi Leah:

Upon speaking with Rick Downs, Regional Office, Frederick, Maryland, he suggested I contact you, directly, for submission and review of our children's edutainment book.

We, at the Googles Children's Workshop, are very proud of our latest children's edutainment book release. Upon perusing the Books 'R' Us section of one of your larger Toys 'R' Us stores in the Rockville, Maryland mall, I was very impressed with the layout and easy accessibility of children's books offered.

I believe that our GOOGLES AND THE PLANET OF GOO would be a great compliment to your existing titles currently being offered to your customers.

Accordingly, I've taken the liberty of enclosing a complimentary copy of our text for your review and distribution interests. At the present time, we are a self-published company promoting and licensing our product line on an independent basis. If, upon your review of our book, you'd like to discuss pricing and distribution opportunities, I would very much like to hear from you at your convenience.

Hope you enjoy reading our adventure and educational book/concept. Share it with a few children, ages 7 & up, to see for yourself how they reach to our alien character, Googles, and the storyline of his adventures from the Planet of Goo to Earth.

Here's hoping to hear from you soon and until then you have yourself a...

David Schlesenger, President  
ZANYBrainy  
308 East Lancaster Avenue  
Wynnewood, PA 19096

December 3, 1996

Dear David:

I visited your Rockville, Maryland ZANYBrainy store, in the Federal Plaza Shopping Center, several weeks ago. Upon my doing so, I introduced myself to Noah Israel, the store manager. I informed Noah that I was a local self-published author who was interested in exploring the possibilities of placing my children's edutainment adventure book in your Rockville store--on consignment if necessary. After a courteous explanation, by Noah, that ZANYBrainy does all of its buying through its regional offices, Noah proceeded to inform me that the best shot of accomplishing my goal was to mail a copy of my book directly to the Regional Office.

I was then informed that you would be touring that particular facility and was expected momentarily. I offered Noah a copy of my book to be given directly to you for your review and interests.

Now for the rest of the story, as Paul Harvey would say!

Noah accepted my book and business card and promised to deliver it to you. I've since understood from him that you had suggested to him that the book be forwarded to someone else in your organization for proper evaluation and distribution considerations. I have been unsuccessful in finding out who that someone is and how may I get in touch with him/her.

I understand from my research that you were the successful entrepreneur that started Encore Books and have since sold the company and that you recently began building the ZANYBrainy Store concept primarily, for the time being, of course, in the Northeast. It is for that reason I chose to

David Schlesenger

reach out to you like I had, via Noah, and see if I couldn't muster some sort of positive reaction from you about my characters and the book's storyline, too. When I went to followup with Noah as to whether or not he was successful in approaching you and personally hand delivering my book and business card, he responded that you suggested to him to forward the text to someone in the Regional Office who could better evaluate the product.

I just wanted to thank you for this kind gesture and I've enclosed a set of articles that appeared in the second largest newspaper in the state of Maryland. My books are currently being sold on consignment in Tower Records & Books and several other bookstores in the general D.C. area.

I'd be willing to provide your firm an extremely fair and lucrative arrangement if you placed my books in your Rockville store and where ever else you may feel the book would sell at.

I believe my Googles, Giggles, and Goggles could just be the next toyland heroes to land in America and I'd like ZANYBrainy aboard when the GooShip finally lands.

Once again thank you for your kind gesture and I'll look forward to hearing from corporate headquarters, soon, as to whether you would be interested in carrying my book in your wonderful stores around the country. Why not take a shot on me and this great concept? No violence! Educational! Entertaining! Amusing, too! This is the only four-eyed cartoon character to ever have emerged on the animation scene in the world. My patents and copyrights are all in order and I'm ready to rock & roll with the right set of people to make Googles and the Planet of Goo the next toy craze in America. I'd surely like to welcome you and your firm aboard!

David Schlesenger  
Page 3.  
December 3, 1996

Here's hoping to hear from you soon and until then, as they  
say on the planet of Goo...

Have Yourself A GooDay!

Sincerely,

Steven A. Silvers

TOY MAX, INC  
Attn: Scott Shahmanesh  
200 Hicks Street  
Westbury, New York 11950

December 6, 1996

Hi Scott:

As per my conversation with our mutual friend, Howard, I've enclosed a courtesy copy of my self-published children's edutainment book for your review and interests.

I've also enclosed two articles that were recently published in Maryland's second largest newspaper--"The Gazette" (circulation of over 300,000)--for your reading interest.

I believe very strongly in the value my book has to offer the "children of today, with visions of tomorrow". I'm looking for the right company who can also see the wonderful potential my book, characters, and the Googles' concept has to offer Toyland U.S.A.

I truly believe that with the right promotion, marketing, and distribution Googles, Giggles, and Goggles, from the imaginary planet of Goo, can become the next toyland heroes in America.

I shall look forward to your comments on the book and to discussing with you, perhaps in person at the upcoming Toy Fair in New York, licensing and/or joint venture opportunities surrounding my intellectual properties.

Enjoy the holidays and as we say on the planet of Goo...

**Have A GoodDay!**

Sincerely,

Steven A. Silvers, President  
P.O. Box 60210

COMMUNITY BUSINESS

Brian Lewis/GAZETTE

Steven Silvers of Potomac has written a children's book he sees as an alternative entertainment choice to children's television shows he says are too violent.

## Rejections don't stop new author

by Jason Brockwell  
Staff Writer

Last year Potomac resident Steven A. Silvers did something he had always dreamed. He published his children's book.

He didn't go through a major publisher. He says he ran into the same brick wall many first-time authors hit at the big publishing houses.

But Silvers, a father of two, believed in his book. He said he wrote it as an alternative to the children's television shows he sees as too violent.

He figured if his son liked the book other kids would, too. He found an independent publisher and paid for the printing of 1,000 copies.

"I've always been one to persevere," he said. "The rejection only made me fight harder because I believe in [the idea] so much."

The book is titled "Googles and the Planet of Goo." The story centers around Googles, a friendly alien, and his effort to find a safe place on Earth for his family. His home, the imaginary planet of Goo, is ravaged by problems mirroring environmental issues kids learn in school, Silvers said.

"It's an adventure story with an educational twist, and it's an alternative to the violence that

permeates the air waves today," Silvers said.

There is no violence in the first story, but Silvers said there is a discussion of death.

Silvers, a former professional drummer and talent scout, used his own life experience to craft the story. The young boy who helps Googles is named Joshua, also the name of Silvers' son. The father is named Mr. Silverton. The father and son discover Googles on a camping and fishing trip in Florida, a state where Silvers lived for years.

He wants the story to teach social values and inspire children. "I'm trying to show them to do unto others as they would have done unto them," he said.

Silvers also designed the book to help children build their vocabulary and learn about the solar system.

Throughout the text, he has italicized many of the more difficult words in the story. He provides the pronunciations and definitions of about 100 words in an appendix.

He also provides a color map of the solar system and scientific explanations of its origin.

The author will read from his work on Dec. 21 at Leaf Through book store at 1701-L Rockville Pike in Rockville. For information about how to get the

Something new & refreshing !

Something exciting & entertaining !

That's what parents and children are saying about our innovative, interactive children's edutainment book.

The Googles concept was created as a means to provide your child with a fun-filled method of expanding his/her vocabulary. In this first of several

Googles adventures, your child will learn and recognize many words.

Along with vocabulary enrichment your child will also learn application of the imagination, identifiable lessons in concept awareness and social interaction.

- The first page
- Googles' song
- Googles' Earth Landing
- Solar System
- Articles
- Order

To further assist your child in learning new words, a dictionary appendix is conveniently provided at the end of each book which corresponds to the (*italicized*) words in the original text. This method of learning alleviates the tedious task of having to refer to a dictionary to find the meaning of the new words he/she is about to learn.

A phonetic pronunciation of each (*italicized*) word is also provided.

We sincerely hope your child will enjoy reading all about the adventures of Googles, Giggles and Goggles from the imaginary planet of Goo.

We welcome your comments and/or suggestions about our interactive children's edutainment reading and vocabulary enrichment technique.

Kindly direct your correspondence to :

The Googles Children's Workshop  
Attention : Steven A. Silvers

## Googles' Song for Kids

Googles from Goo

Hi boys and girls!

I'm Googles from Goo and I'd like to know you,  
I want you to be my best friend.

Together we'll play, laugh every day,  
we'll make fun and learning a blend.

We'll visit Planets and Stars from Jupiter to  
Mars,  
you'll find it a thrilling sensation.

And I will take you to my Planet called Goo,  
all in your imagination.

I'll teach you a word that you never heard  
I'll teach you to spell it, say it, and tell it  
amazing your family and friends.

Then everyone will know that I love you so,  
cause we're Buddies and Pals to the end.

I'm Googles from Goo and now I know you,  
and you are my very best friend.

## The Origin of the Solar System

Many scientists have tried to explain how and why the Solar System came into existence, but so far many questions remain unanswered.

Some have suggested that the Sun was born first, and that as it moved through an interstellar cloud it collected the matter that eventually became the planets.

Perhaps this material was blasted out of some former companion star, or sucked out of the Sun or a passing star during a close encounter.

The most accepted view, however, is that the Sun and planets were born at the same time out of a single cloud of gas and dust (called a nebula). This is often referred to as the "nebular hypothesis".

It seems likely that the birth of the Solar System began with the collapse of a cloud of gas and dust of between one and two solar masses.

Clouds of this size do not usually breakdown under their own gravity unless they are compressed by some sort of "trigger" event.

Analysis of meteorites-rocks falling out of space-suggest that short-lived radioactive materials (notably aluminum-26 which decays to magnesium-26) were added to the Solar System material just before the meteorites and planets were formed.

Since these materials are created inside exploding stars, known as "supernovae", it may be that such an explosion was the trigger for the collapse of the cloud that then became the Solar System.

# Rejections don't stop new author

## Four-eyed alien beams down to Union

By Maury Nade Staff Writer

First there were Carbage Patch Kids, then Pound Puppies and most recently Fiekie Me Finao, but look out - here come Googles and they're coming to stores soon.

Googles are four-eyed aliens from outer space with a message to love each other and live together in harmony in the form of children's books and toy figurines.

Googles' creator, Steven Silvers, 47, along with his father, Michael, 77, a Bayonne businessman who lives in Union, worked together to create the furry, fun-loving creature.

The Silvers have hopes, in addition to the books and toy figurines, that Googles' food, called Goo-food, and other Googles' merchandise will also be available.

"I came up with the idea 10 years ago but put away the prototype to continue my career in music," Silvers said.

Googles, the four eyed alien from the Planet of Goo, was created by Steven Silvers and his father, Michael.

Silvers, who graduated from Union High School and went on to Monmouth College, West Long Branch, has had a diverse career including his own talent agency and band, said he first decided to create the character as a vehicle to communicate with 10-year-old son, Joshua.

"My son loves Googles and is so excited about the project," he said.

Silvers said there is a reason for the two extra peepers. "This is the only four-eyed animated creature in cartoon-land. We want it to be the next Barney or super hero but without the violence."

"Everything in life rejuvenates and that is what I want to teach in the book. And everyone lives happily ever after," he said.

Silvers and his father also created two similar looking characters called Giggles and Goggles.

"We are hoping for big things including a television show with a segment on exercise where the children will do "goo-ups, goo-jacks on goo-mats."

The book, a fantasy adventure for children ages 7 and up, learn 100 different words which are italicized throughout the book. There is a glossary in the back as well as a guide to all of the planets, Silvers said.

SIXERS said he could not have done it without the help of his father, who was instrumental in procuring, coordinating and marketing the products.

PLUSH TOYS, STUFFED TOYS

# Exhibit 33

N / O  
N  
CA

**LICENSE, DISTRIBUTION AND MANUFACTURING  
AGREEMENT**

THIS LICENSE, DISTRIBUTION AND MANUFACTURING AGREEMENT (hereinafter the "Agreement"), is made this 21 day of July, 2000, by and between STEVEN A. SILVERS, an individual whose principal business address is 3741 NE 163<sup>rd</sup> St., North Miami Beach, Florida 33160, (hereinafter referred to as "LICENSOR") and THE AURORA COLLECTION, INC., a corporation whose principal business address is 4651 SW 51<sup>st</sup> St., Davie, Florida, 33314 (hereinafter referred to as "LICENSEE"). Said addresses shall be used for notices between the parties of an official or legal nature.

**RECITALS**

LICENSOR is the sole owner, creator, developer, author and artist of a product line and concept which includes all intellectual property rights and all other rights to the Googles family and products, as further defined hereafter.

LICENSOR desires to engage LICENSEE in the manufacture, marketing, distribution, and commercial expansion of the Googles family and products.

LICENSEE desires to acquire the exclusive right to manufacture, market, distribute and expand the product line known as the Googles family and products, both as to existing designs, concepts and products, as well as future designs, concepts and products, under the terms and conditions set forth herein.

LICENSOR desires to grant LICENSEE the rights referred to above, under the terms and conditions set forth herein.

THEREFORE, in consideration of the premises and of the mutual covenants herein and for other good and valuable consideration, the parties agree as follows:

**TERMS AND CONDITIONS**

1. **Recitals.** The recitals stated above are hereby made a part of and are incorporated into the Agreement.
2. **Definitions.** As used in the Agreement, the terms "Licensed Articles" and "Licensed Products" shall mean that which is contained in '(a)'. "Gross sales price" is defined

in ' (b) '. " Net profit(s)" is defined in ' (c) '. "Gross receipts" is defined in ' (d) '.

(a) The products which deal with a creative character known as Googles, together with any and all other products which comprise and which will comprise those characters, likenesses, stories, ideas, concepts, designs, Googles spin offs and family members, which include Iggle, Oogle, Oggle, Gooroo, Gootian(s), the planet Goo, slides, movies, cartoons, books (comic and otherwise), posters, playing, trading and collector cards, CDs and tapes, DVDs and all other forms of communication and publication, programs, computer web site(s), membership lists, clubs, materials, patterns, prototypes, logos, trademarks, servicemarks, clothing, merchandise, educational products, marketing and promotional data and tools, packaging and advertising, modifications, updates, and variations, and all other items associated therewith, whether in the singular or plural.

(b) The term "gross sales price" shall mean the price charged by LICENSEE to its customers, but shall not include any sales or other taxes, nor shall it include any shipping and handling charges.

(c) The term "net profit(s)" shall mean that amount of money left after the deduction of expenses of LICENSEE for the manufacture, marketing and sale of those licensed Articles that are subject to distribution/division of net profits..

(d) The term "gross receipts" shall mean money received by LICENSEE for the sale of licensed articles and products, but shall not include taxes, shipping and handling charges.

### LICENSE

3. The Grant. LICENSOR hereby grants to LICENSEE and LICENSEE hereby accepts from LICENSOR, upon the terms and conditions set forth herein, the sole and exclusive right and license to manufacture, market, distribute, sell, use and otherwise commercialize, licensed products and articles. LICENSEE shall have the right to grant sub-licenses without the prior consent of LICENSOR, so long as all sub-licensees operate in the spirit and intent of providing wholesome, non-violent entertainment and education. So long as LICENSEE is in compliance with the terms of this Agreement, LICENSEE shall have the right to continue to exercise all rights granted by this license.
4. Best Efforts. LICENSEE will use its best efforts to engage in the commercial venture whose end goal is the ethical marketing and sale of licensed articles, however, nothing herein shall obligate LICENSEE to meet

any particular quota, schedule, time table, volume requirement or monetary minimums. If, in the sole opinion of LICENSEE, LICENSEE desires to abandon this LICENSE and all rights hereunder, LICENSEE shall be free to do so. During the term of its license, LICENSEE will assume the costs of production, marketing and sale of those items that it chooses to market, as well as the fees and costs of obtaining, defending and/or protecting any patent and trademark rights to such items. Best efforts means the active promotion and marketing of said products.

5. LICENSOR Representations. LICENSOR represents, and LICENSEE has relied on this fact and assertion, that LICENSOR is the creator and owner, with all rights of ownership, of the Googles family and products and licensed articles and has the sole right, title, interest and authority to grant this license. LICENSOR further represents that he knows of no claims, notices, suits, threatened or otherwise, which would in any way limit or impede his right to grant this license, other than those attached hereto as Exhibit A. LICENSOR represents that there are no brokers or agents involved in this matter and that LICENSOR alone is entitled to any remuneration herein. LICENSOR agrees to hold harmless and indemnify LICENSEE for all costs, fees and charges should claims or suits be brought against LICENSEE which allege that LICENSOR did not possess the right, title and interest in those licensed articles that were in existence at the time of, and which formed a great part of the consideration for, this transaction.
6. Retained Ownership Interest. LICENSOR retains sole creative ownership rights to licensed articles which predate this Agreement and shall have final approval rights for all additions and changes in the future.

#### ROYALTIES AND PAYMENTS

7. Consideration. Fees, stock and royalties paid under this agreement shall be in consideration for the sum total of all rights conferred by LICENSOR to LICENSEE.
8. License Issuance Fee. Upon execution of this Agreement, LICENSEE shall pay LICENSOR a license issuance fee in the amount of Ten Thousand Dollars ( \$10,000.00 ).
9. License Issuance Stock. Upon execution of this Agreement, LICENSEE

### TERMINATION RIGHTS AND METHODS

15. Cause Not Needed. LICENSEE reserves the right to cancel this Agreement, if in its sole business judgment, the Agreement is no longer in the best interests of the company. LICENSEE shall have the right to sell its existing inventory and those items that cannot be canceled without financial penalty, but shall not cause additional items to be manufactured thereafter. In the event of termination, LICENSOR shall be given all original material that he provided to LICENSEE.
16. Use of Name After Termination. In the event of termination, LICENSEE shall have the right to continue to use the name(s) associated with the products and articles that encompass this Agreement for so long as LICENSEE is actively selling its inventory of articles and products. At the conclusion of LICENSEE'S efforts in this regard, LICENSEE agrees to discontinue the use of names, trademarks, signs, advertising and anything else that might make it appear that the LICENSEE is still handling the articles and products of LICENSOR.

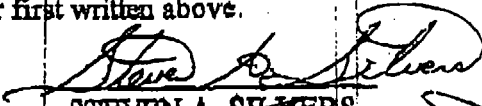

### ADDITIONAL PROVISIONS

17. Authorization. LICENSOR and LICENSEE represent and warrant that the consummation of this Agreement has been duly authorized by all requisite corporate and personal action and this Agreement is enforceable against the parties in accordance with its terms. Both parties represent and warrant that the making and performance of this Agreement will not violate any agreement or understanding to which they are a party or to which they are bound.
18. Assignment. LICENSEE shall not have the right to sell, transfer or assign, in whole, or in part, its rights under this Agreement, without the written consent of LICENSOR, which consent shall not be unreasonably withheld if the proposed buyer, transferee or assignee is willing and able to carry out the goals and mission of the Google's project to ethically market non-violent entertainment and educational products to the public. Furthermore, such sale, transfer or assignment shall include a provision that permits LICENSOR, at his option, to become employed by the new entity for a period of six months, or if not employed, to become a paid consultant for six months for a fee which equals his last salary when employed by LICENSEE.

- 19. Waiver. No waiver of any breach of any provision of this Agreement shall constitute a waiver of any other breach of the same or any other provision hereof, and no waiver shall be effective unless made in writing and signed by the parties hereto.
- 20. Interpretation. This Agreement and performances hereunder shall be interpreted and governed by the laws of the State of Florida. No provision shall be interpreted against any party because that party or their legal representative drafted, modified or recommended inclusion of such provision. Venue for any legal action, whether equitable or otherwise, shall be in Broward County, Florida.
- 21. Entire Agreement. This Agreement constitutes the entire Agreement between the parties and no warranties, representations or understandings which may have been made by either party shall be enforceable unless specifically expressed herein. Any amendment, alteration or modification of this Agreement will be enforceable only if it is signed by both of the parties.
- 22. Binding Effect. This Agreement shall inure to the benefit and be binding upon the parties, their heirs, legal representatives, successors and assigns.
- 23. Severability. If any provision or sub-provision of this Agreement is declared invalid or void by a court of competent jurisdiction, the remainder of the Agreement shall nevertheless remain in full force and effect.
- 24. Counterparts. This Agreement may be executed in two or more counterparts, each of which shall be deemed to be an original. Each shall constitute one and the same Agreement.
- 25. Paragraph Headings. Paragraph headings and titles contained herein are inserted as a matter of convenience and reference only and shall not be used in construing the meaning of, or enforcing any of the provisions of, this Agreement.

IN WITNESS WHEREOF, the parties hereto have executed this Agreement by their duly authorized signatures the day and year first written above.

Hey there GooFriends!

My name is Oogle Googles, but you can call me Oogle. I've come to visit you from a far away planet called Goo. I've come to Earth with my sister Iggle and brother Oggle to teach you our best GooFion ways. We're going to sing, dance, play games and have lots of GooFun together. And as we say on planet Goo...

Have a GooDay!

TO: \_\_\_\_\_

FROM: \_\_\_\_\_

**Hi GooPals!**

My name is Oogle. It's so GooRiffic to be sharing this adventure to Earth with my sister Iggle and brother Oogle. I'm looking forward to teaching you the GooThings we've learned back on planet Goo. We're going to have a GooMazing time together...so get ready! And like my brother Oogle always says...

Have yourself a GooDay!

TO: \_\_\_\_\_

FROM: \_\_\_\_\_

Hi GooKide!

I'm Iggle...Oogle and Oggle's sister. My brothers and I are very GooCited about meeting you on our special journey to Earth. As Oogle said, we've come to teach earthlings our best GooGian ways: to share, care, be fair and play nice with your friends.

Have a GooRiffic Day!

## The Googles™

### The Adventures of Oogle™ Googles™ Episode I

#### "Oogle™ and The Planet of Goo™"

In a galaxy far, far away, there is a small planet very similar to Earth called Goo™.

Years ago it had deep oceans, huge forests, beautiful deserts, high mountains and many different kinds of plants and animals. Its warm and bright sun had made the planet of Goo™ and its four-eyed inhabitants, the Gootians™, some of the luckiest people in the Universe.

The sun not only made Goo™ warm, it made it sparkle like a diamond. The tree's colors were more vibrant, the air purer, the water cleaner and the people nicer than anywhere.

Then one day, a wasteful, destructive and lazy bunch of aliens called the Zorkans™ from the planet Zork™ arrived on Goo™. The Zorkans™ had no planet of their own since they destroyed it through their wasteful ways. They traveled from planet to planet using up the natural resources to feed their greed and laziness.

The Gootians™ were a kind and gentle people who, at first, had hoped the Zorkans™ would just go away. They were not prepared for what was to happen. After many years the Zorkans™ had used up Goo's™ resources by polluting their streams, rivers and oceans, destroying the forests, depleting their farmland and damaging the ozone layer. The atmosphere was so badly spoiled that the Gootians™, and even the Zorkans™, were beginning to get sick.

GooRoo™, the wisest of all the Gootians™, knew from the day the Zorkans™ arrived that he needed to find a way to protect the planet. Now, after two generations of Zorkan™ destruction, he had developed a secret plan to save the Gootians™, and hopefully, his planet. With his special communication device, he was able to intercept radio signals from a planet in another galaxy called Earth. He listened to the signals until one day he heard of a human named Dr. Stephen Hubbell. The earthlings called him an ecologist. GooRoo™ realized, from listening to his speeches, that Dr. Hubbell was a wise man and he knew about saving the environment. This was a man GooRoo™ could trust and who would understand the Gootian's™ problems. GooRoo had to reach Dr. Hubbell, and FAST!

GooRoo™ was very old and needed someone young and strong to make this special trip in his one- of-a-kind advanced Gootian™

spaceship. He decided that his best pupil ever, Oogle™  
Googles™, would be the one to make the trip. Oogle™ was very  
smart and courageous enough to do the job.

Oogle™ was a very special Gootian™. He had studied hard and  
had become one of the smartest Gootians™ on the planet. He was  
kind, resourceful, brave and respectful to others. No wonder  
GooRoo™ selected him for this most important of all missions.  
GooRoo™ knew, at the very least, Oogle™ would give it his best.

GooRoo™ put all the things Oogle™ would need in the GooShip™  
including a book on the languages of Earth for him to study while  
on his journey. To make sure that if the Zorkans™ caught Oogle™  
they would not discover his mission, GooRoo™ coded the flight  
information into the GooShip™ computer. He put a special  
computer chip, in a code that Dr. Hubbell would have to decode, in  
Oogle's™ shoe. The chip would tell Dr. Hubbell about the trouble  
on Goo™ and ask for his help. GooRoo™ also knew that if  
Oogle™ could help Dr. Hubbell teach the Earthlings how important  
it was to properly care for and protect Earth's environment then  
maybe, if all else failed, Earth could be the place where the  
remaining Gootians™ could go to live. But first, he needed Dr.  
Hubbell's help in trying to find a way to restore Goo's™  
environment, if that were even possible. All of this GooRoo™  
explained to Oogle™.

The day had come for Oogle™ to embark on his mission. With his  
sister Iggle™, and brother Oggle™, Oogle™ met GooRoo™ at the  
secret launch pad. He prepared to make the dangerous trip.  
GooRoo™ knew Oogle™ may not make it to Earth, and if he did,  
he may not be able to return to Goo™. That is why he asked  
Oogle's™ family to be with him.

Iggle™ was a pretty Gootian™. She was smart and always  
managed to keep her brothers in line. Oggle™ was bright and very  
curious, about everything. They both were very sad that Oogle™  
was going away. Oogle™ was sad too, and a little scared, but he  
knew GooRoo™ was counting on him. He was determined not to  
let GooRoo™ down. As he prepared to enter the GooShip™, a  
singular tear ran down from each of his four eyes but he raised his  
arm and bravely waved Goo-bye.

As the ship departed Goo™, heading to the wormhole, there  
suddenly appeared a Zorkan™ ship. Would Oogle™ get by the  
Zorkan™? Would Oogle's™ ship make it through the wormhole?  
Would Oogle™ reach Earth at all?

**We will all find out in the next adventure of Oogle™  
Googles™.**

The stories of Goo™, all of the Gootian™ characters, and the wonderful stories to follow,  
are the creation of Steven A. Silvers. Mr. Silvers, a talented storyteller, has been  
preparing this children's teaching tool for several years. His collaboration with the Aurora  
Educational Group and the Fun With Science Club™ makes his goal of reaching and  
teaching all children about our fragile environment and its care, an endearing reality.

## Oogle™ Google

The Googles™ family live on a faraway planet called Goo™. Oogle™ is the oldest son of Mr. and Mrs. Googles™. Oogle™ also has a sister named Iggle™, and a brother named Oggle™.

Oogle™ is our hero in this first of many Googles™ adventures. In Book 1, Episode 1, called: "Oogle™ and the Planet of Goo™", Oogle™ finds himself zooming through outer space at warp speed. Oogle™ is headed toward our planet Earth. He was sent by his mentor GooRoo™ to find a new home for all of the Gootians™ to live, laugh, learn, and play.

You, too, can join Oogle™ Googles™ online in his first adventure "Oogle™ and the Planet of Goo™".

As we say on the planet of Goo™...  
Have yourself a GooDay!

## The Planet of Goo™

The planet of Goo™ was a beautiful planet located outside of our Galaxy, many light years away from Earth.

In the early years of Goo's™ existence it was a very nice place to live. The air was pure. The rivers and oceans were free of pollutants and the water was refreshing and healthy to drink. The rainforests were full of foliage and the wildlife was plentiful. Everything was green and healthy, and everyone was so happy to be living on Goo™.

Then one day a violent force of aliens, from a distant planet, decided to invade Goo™. Not knowing any better they began destroying this once beautiful planet. They polluted the air and water. They destroyed the rainforests and the Gootians'™ farmlands. When they finally departed, all of the environment on Goo™ was ruined.

Learn if Oogle™ Googles™ finds a new place to live on the planet Earth for his family and the remaining Gootians™ left on Goo™. Can Oogle™ help Earth's children learn to care for and protect their environment? Read the first Oogle™ adventure: "Oogle™ and the Planet of Goo™".

## Science Forum

Hosted by nationally known Dr. Stephen Hubbell, Chairman of the National Council for Science and the Environment and Dr. Patricia Adair Gowaty, President of the Animal Behavior Society, the Science Forum brings you up-to-date and in-depth articles on a wide range of science topics.

This unique program is a regular feature of the Fun With Science Club. It will bring you scientific information from and articles written by well-known and celebrated United State's scientists.

## The Googles™

Welcome, I'm Oogle™ Googles™. I come from a planet called Goo™ in a galaxy far, far away. I have come to Earth to help teach you how to care for the planet, because I don't want what happened to my planet to happen to yours.

Together we will take a journey as you enjoy my fantastic adventures. You can read all about my first adventure in my first online story, "Oogle™ and the planet of Goo™".

### Fun Stuff!

Hey Kids, the first Googles™ song is here! Now you can sing along with Oogle™ Googles™, or sing the words  by yourself to the music.

### The Googles™ Adventures

NEW! You can be a part of the most amazing adventure series of all time! Come read Episode 1 "Oogle™ and the planet of Goo™" today and look for the very first GooToon coming in 2001.

## The Googles Song

### "The Googles' Theme Song"

Words & Music by: Steven A. Silvers  
and Marilyn Shockey

©2000 GooTunes Publishing

We're the Googles from Goo,  
And we'd like to know you,  
We want you to be our best friend

Together we'll play,  
And laugh everyday,  
We'll make fun and learning a blend

We'll visit planets and stars,  
From Jupiter to Mars,  
You'll find it a thrilling sensation

And we will take you,  
To our planet called Goo,  
All in your imagination

We'll show you the way,  
to have fun everyday,  
To be nice and play nice,  
with your friends

And everyone will know,  
how much we love you so,  
cause we're buddies and pals,  
ever friends.

We're the Googles from Goo,  
And now we know you,  
And you are our very best...  
You are our very best...  
You are our very best friend!

Dear Steven:

On behalf of Adventure Theatre I would like to extend our thanks for your presenting the Goosical Musical Revue on Friday, September 14, 2001. In spite of the terrible events of September 11, your show went on as scheduled. The free show was well received and came at a time when children of all ages needed some diversion. The Googles costumes and music were upbeat and fun and put smiles on the faces of the audience.

We wish you all goo things in the future!

Sincerely,

Carol Leahy

Jewish Community Center  
OF GREATER WASHINGTON

October 30, 2001

Dear Steven,

I just want to send you this letter expressing our appreciation for the great Googles production you put on at the Jewish Community Center of Greater Washington in September. It really came at a time when all peoples spirits needed to be lifted, and this is exactly what the show accomplished. The children were so excited during the show. They and their parents were singing and clapping along. The characters were amazing. It had the same effect on the children as if the were watching the familiar "Barney." You have a successful venture on your hands. Our thanks again, for a terrific show.

Wishing you the best,

Ilene Eisenberg

## Google History

Google is a play on the word **googol**, which was coined by Milton Sirota, nephew of American mathematician Edward Kasner, and was popularized in the book, "Mathematics and the Imagination" by Kasner and James Newman. It refers to the number represented by the numeral 1 followed by 100 zeros. Google's use of the term reflects the company's mission to organize the immense, seemingly infinite amount of information available on the web.

### Back before Google? Aye, there's the Rub.

According to Google lore, company founders Larry Page and Sergey Brin were not terribly fond of each other when they first met as Stanford University graduate students in computer science in 1995. Larry was a 24-year-old University of Michigan alumnus on a weekend visit; Sergey, 23, was among a group of students assigned to show him around. They argued about every topic they discussed. Their strong opinions and divergent viewpoints would eventually find common ground in a unique approach to solving one of computing's biggest challenges: retrieving relevant information from a massive set of data.

By January of 1996, Larry and Sergey had begun collaboration on a search engine called BackRub, named for its unique ability to analyze the "back links" pointing to a given website. Larry, who had always enjoyed tinkering with machinery and had gained some notoriety for building a working printer out of Lego™, took on the task of creating a new kind of server environment that used low-end PCs instead of big expensive machines. Afflicted by the perennial shortage of cash common to graduate students everywhere, the pair took to haunting the department's loading docks in hopes of tracking down newly arrived computers that they could borrow for their network.

A year later, their unique approach to link analysis was earning BackRub a growing reputation among those who had seen it. Buzz about the new search technology began to build as word spread around campus.

### The search for a buyer

Larry and Sergey continued working to perfect their technology through the first half of 1998. Following a path that would become a key tenet of the Google way, they bought a terabyte of disks at bargain prices and built their own computer housings in Larry's dorm room, which became Google's first data center. Meanwhile Sergey set up a business office, and the two began calling on potential partners who might want to license a search technology better than any then available. Despite the dotcom fever of the day, they had little interest in building a company of their own around the technology they had developed.

Among those they called on was friend and Yahoo! founder David Filo. Filo agreed that their technology was solid, but encouraged Larry and Sergey to grow the service themselves by starting a search engine company. "When it's fully developed and scalable," he told them, "let's

# Exhibit 41

**BackRub** is a "web crawler" which is designed to traverse the web.

Currently we are developing techniques to improve web search engines. We will make various services available as soon as possible.

**Sorry, many services are unavailable due to a local network failure beyond our control. We are working to fix the problem and hope to be back up soon. 12/4/97**

**We have a demo that searches the titles of over 16 million urls:  
[BackRub title search demo](#)**

[BackRub search with comparison \(type in top box, ignore cgi-bin error\)](#)

New systems will be coming soon.  
Some documentation from a talk about the system is [here](#).

BackRub is a research project of the [Digital Library Project in the Computer Science Department at Stanford University](#).

Some Rough Statistics (from August 29th, 1996)  
Total indexable HTML urls: 75.2306 Million  
Total content downloaded: 207.022 gigabytes

Total indexable HTML pages downloaded: 30.6255 Million  
Total indexable HTML pages Documents not been attempted by Docket 8/31/2005 Page 249 of 319  
Total robots.txt excluded: 0.224249 Million  
Total socket or connection errors: 1.31841 Million

BackRub is written in Java and Python and runs on several Sun Ultras and Intel Pentiums running Linux. The primary database is kept on an Sun Ultra II with 28GB of disk. [Scott Hassan](#) and [Alan Sterenberg](#) have provided a great deal of very talented implementation help. [Sergey Brin](#) has also been very involved and deserves many thanks.

**Before emailing, please read the FAQ. Thanks.**

## Current Status of Google:

### Web Page Statistics

Number of Web Pages Fetched	24 million
Number of Urls Seen	76.5 million
Number of Email Addresses	1.7 million
Number of 404's	1.6 million

### Storage Statistics

Total Size of Fetched Pages	147.8 GB
Compressed Repository	53.5 GB
Short Inverted Index	4.1 GB
Full Inverted Index	37.2 GB
Lexicon	293 MB
Temporary Anchor Data (not in total)	6.6 GB
Document Index Incl. Variable Width Data	9.7 GB
Links Database	3.9 GB
<b>Total Without Repository</b>	<b>55.2 GB</b>
<b>Total With Repository</b>	<b>108.7 GB</b>

1. We have only crawled US looking domains so as not to congest international links. This make the search engine somewhat incomplete.
2. There has been some corruption in docid's for anchor hits. This results in some random lookin matches (about 1 in 10). SB: I have tried to patch the code to account for this but there are stil many problems.
3. Also, some docinfo pointers are corrupted. SB: I have patched the code to account for most of these but I don't have tight bounds on the extent of corruption.
4. The performance is somewhat poor right now. This is partly due to data going over NFS and antiquated hardware. However, we are anticipating equipment donations from IBM and Intel t help with performance and increase our disk capacity so we can scale to 100 million pages.

**Before emailing, please read the FAQ. Thanks.**

# Sergey Brin's Home Page

Ph.D. student in Computer Science at Stanford - [sergey@cs.stanford.edu](mailto:sergey@cs.stanford.edu)

## Research

### Data Mining

A major research interest is data mining and I run a meeting group here at Stanford. For more information take a look at the [MIDAS](#) home page or see the [datamine mailing list archive](#). Here are some recent publications:

- **Extracting Patterns and Relations from the World Wide Web**

by Sergey Brin.

We demonstrate a technique for extracting relations from the WWW based on the duality of patterns and relations. We experiment with it by extracting a relations of [books](#). ([postscript](#)).

- **Dynamic Data Mining: A New Architecture for Data with High Dimensionality**

by Sergey Brin and Lawrence Page.

We describe a new architecture for data mining (sorry not yet available online). It makes use some of the dynamic itemset counting technology described below.

Submitted to VLDB '98. ([postscript](#))

- [Scalable Techniques for Mining Causal Structures](#)

by Craig Silverstein, Sergey Brin, Rajeev Motwani, and Jeff Ullman.

We address mining for causality, not just correlation in data.

Submitted to VLDB '98. ([abstract](#) , [gzipped ps](#))

- [Dynamic Itemset Counting and Implication Rules for Market Basket Data](#)

by Sergey Brin, Rajeev Motwani, Jeffrey D. Ullman and Shalom Tsur.

We present an algorithm for counting large itemsets faster than previous algorithms. We rely on partial results to guide the mining process.

Proceedings of the ACM SIGMOD International Conference on Management of Data, pp. 255-264, Tucson, Arizona, May 13-15 1997. ([html](#) , [postscript](#) , [gzipped ps](#) , [bibtex](#))

by Craig Silverstein, Rajeev Motwani, and Sergey Brin.

Proceedings of the ACM SIGMOD International Conference on Management of Data, pp. 265-276, Tucson, Arizona, May 13-15 1997. ([abstract](#), [gzipped ps](#), [bibtex](#)). Note a version of this paper has been submitted to Data Mining and Knowledge Discovery.

- For the above two papers, we used the following census data.

## World Wide Web

Research on the Web seems to be fashionable these days and I guess I'm no exception. Recently I have been working on the [Google](#) search engine with Larr

Page.

- [The Anatomy of a Large-Scale Hypertextual Web Search Engine](#)

by Lawrence Page and Sergey Brin.

Submitted to [WWW7](#).

- **PageRank, an Eigenvector based Ranking Approach for Hypertext**

by Lawrence Page and Sergey Brin.

This is work in progress which we intend to submit to SIGIR '98.

## GNAT's

This project involved indexing multidimensional data for near-neighbor searches. The kind of applications I envision are identity comparisons, information finding, molecular biology, ...

- [Near Neighbor Search in Large Metric Spaces](#)

by Sergey Brin.

We introduce a new data structure for near-neighbor searches which is well suited for high-dimensional or "large" metric spaces.

[VLDB '95](#) : proceedings of the 21st International Conference on Very Large Data Bases, Zurich, Switzerland, Sept.

- Current Development: Sergey Brin and Larry Page
- Design and Implementation Assistance: Scott Hassan and Alan Steremberg
- Faculty Guidance: Hector Garcia-Molina, Rajeev Motwani, Jeffrey D. Ullman, and Terry Winogra
- Equipment Donations: IBM, Intel, and Sun
- Software: GNU, Linux, and Python
- Collaborating Groups in the Computer Science Department at Stanford University.: The Digital Libraries Project, The Project on People Computers and Design, The Database Group, The MIDAS Data Mining Group, and The Theory Division
- Outside Collaborators: Interval Research Corporation and the IBM Almaden Research Center
- Technical Assistance: The Computer Science Department's Computer Facilities Group, Stanford's Distributed Computing and Intra-Networking Systems Group

Note: Google is research in progress and there are only a few of us so expect some downtimes and malfunctions. This system used to be called Backrub.

New! Wonder what your search runs on? Here are some pictures and stats for the Google Hardware

1. This new index contains only a very limited number of international pages because we do not want to congest busy international links.
2. When no documents match your query, the system will return 20000 random web pages.
3. For improved speed, try to avoid common words unless they are necessary, and use as few search terms as possible.

**Before emailing a question please read the FAQ. Thanks! We can be reached at google@google.stanford.edu and we appreciate your comments.**

## Reviews of Three Up-And-Coming Search Engines - PlanetSearch, Google, and GoTo.com

In the split-second world of the Internet, search engines like Yahoo and Alta Vista, founded in 1994 and 1995, are considered "established" and past their youth. New search engines are continually being created, and it's safe to assume that many of them won't survive. Three that seem to have good prospects for commercial success are PlanetSearch, Google, and GoTo.com.

Author  
**Paula Dragutsky**

Published  
**July 10, 1998**

These three search engines were founded in 1997, and all were developed to be extremely easy to use. However, the similarities between them end there. Their goals and approaches to searchers are very different.

### PlanetSearch - MAKING LIFE EASY ON THE INTERNET

#### Overview: PlanetSearch's

(<http://web.archive.org/web/20000304001937/http://www.planetsearch.com/>) stated aim is to make life easier on the Internet. And its very simple search options and clear design go a long way toward fulfilling this goal.

Searching is fast, and results for the searches that I did were fairly comprehensive and above-average in relevance. Of course, if you want to limit your search results (e.g. to date ranges, images, countries, etc.), it's best to use a search engine with a more complex search system.

The main search page at PlanetSearch looks like a less cluttered version of the older search engines. It offers several special features, including **finance**, **weather**, and **directories**.

**Directories:** The directories feature is especially comprehensive and includes U.S. and Canadian white pages, international white pages, yellow pages, worldwide e-mail, companies online, government pages and personal web pages. The government directory gives you the names (with links) of your state and U.S. elected officials.

**Hotlinks:** There's a helpful subject directory of recommended web sites called Hotlinks which is much less extensive than the directories provided in the major search engines. Listings for the recommended sites include only their names with no accompanying description.

**Search System: PlanetSearch** gives you two search alternatives. You can simply enter your search words to retrieve results containing all or some of your search terms. Or you can precede a search word with a plus sign to require that the word appear in each result.

In addition, for each result, you can elect to have the system search for similar items.

**Results:** Results are presented in a format that's easy to read, and includes title, description, URL, date, and number of words. Relevance ratings are given in a color-coded bar next to each result.

You can preview each item resulting from your search without leaving **PlanetSearch**. The preview option shows you only the text of the item and not the graphics, though. The idea of previewing is a valuable one, but it's done better in HotBot where you're shown both text and graphics.

## GOOGLE - IMPROVING THE RELEVANCY OF RESULTS

**Overview:** Despite a name that sounds like a baby babbling, **Google** (<http://web.archive.org/web/20000304001937/http://google.stanford.edu/>) is all business. (The name Google is actually derived from the mathematical term googol meaning  $10^{100}$ . Please don't ask me to explain.)

It was created at Stanford University where it's still considered "research in progress." Its goal is to improve the relevancy of results returned by search engines.

**Only One Search Operator:** Google employs only one search operator and no search menus, yet often proves adept at coming up with the type of results I was looking for. However, it's not the best choice for doing highly specialized searches.

Google is still a relatively small search engine (25 million web pages indexed as compared with Alta Vista's 110 million), but it usually returned a greater number of results than its size would suggest.

**Search System:** For most searches, simply enter your search words or phrase in the search box. If you type in more than one word, **Google** searches for the phrase first, and then the individual words.

The system automatically assumes that you require each item to include all your search terms. Google searches only for the form of the word you enter. (It won't automatically search for plurals, past tense, etc.)

You can force Google to search for common words which it would usually ignore (e.g. with, the) by putting the plus sign in front of them. This is especially useful in searching for phrases (e.g. **Gone +With +The Wind**).

**Linked Web Pages:** For each result, you're given the option of retrieving all the web pages that link to it.

**Results:** Results include title, URL, when the item was cached (indexed) by Google, and whether or not there's a phrase match. Also included are page rank (related to websites that link to the item) and relevance ratings.

Google gives you the opportunity to go straight to your first result without even seeing the whole list by selecting the *I'm feeling lucky* button near the search box.

## **GoTo.com - A REVOLUTIONARY CONSUMER SEARCH ENGINE**

### **Overview: GoTo.com**

(<http://web.archive.org/web/20000304001937/http://www.goto.com/>) is revolutionary in the search engine business, not because of its search algorithm, but because of the way web sites get listed in it. Web site owners are required to pay to have their site listed in GoTo.com.

**Bidding On Search Words:** In addition, site owners bid on search words that are relevant to their site in order to be listed toward the beginning search results. Since most people don't look past the first page or two of results, an early placement is especially important to companies trying to sell something on the Web.

**You And I Predicted To Benefit:** According to GoTo.com's developers, paid listings will result in high-quality, relevant web sites appearing among the first results.

As far as I know, GoTo.com is the only search engine that charges for listings. Until now, webmasters have used various tricks (coding invisible keywords in their articles, duping the engine into repetitive listings, etc.) to get advantageous placements, but they haven't been given the option to buy their position.

**Search System:** GoTo.com's design and search system make it impossible to get confused. The home page contains only a search box - no special features, news, etc. *There's only one way to search - enter the terms you're looking for in the search box. That's it!*

Searching is speedy and result relevance is comparatively good. At this time only a small percentage of the items in GoTo.com's system are paid for. It's non-paid web pages come from Inktomi's crawler.

**Cost Per Web Page Visit Displayed:** Even at this early stage in GoTo.com's development, many search words will retrieve paid for web sites among the first few results. Each of these results displays how much the advertiser is paying per visit for his position on the list.

**Results:** The title, fairly full description and URL are given for every result.

*More articles are available about search and metasearch engines.*

**Google On Searching: Do It Fast**

By Kimberly Welsch  
May 10, 1999 8:41 AM ET

Yahoo!'s founders have said time and again that the goal of their company is to be the one place anyone can go to to find or get connected with anyone or anything.

Google's founders have added a new twist to searching the Net: Do it quickly.

"Our goal is not to maximize the amount of time a user spends on our site," said Sergey Brin, one of Google's co-founders. Google users have the choice of ordering a full search or clicking on an "I Feel Lucky" button, which will take them directly to the first match - without first presenting the full list of matched sites. Search results are listed under a banner that tells the users not only how many matches were found but also how much time the search took, down to one-tenth of a second.

Brin thinks the search engines of yore - now known as portals - were led astray by their focus on page views. "Page views are a red herring," he said. "You can't sell ads based on chat page views. The search page views are the ones that make the most money, because they're very well-targeted." Brin is adamant that he's focusing on search - and only search. "We want to be the Dolby of search," he said.

Google started out as a research project when Brin and his co-founder, Larry Page, were graduate students at Stanford University. Technically, they still are enrolled at Stanford, but they are on a one-year leave of absence. The pair was interested in downloading the link structure of the Internet and "seeing what we could do with it," Brin said.

The result is a search engine that aims to rank every page on the Internet in order of importance. A page's importance is determined partly by the number of other links that point to it. The Yahoo! home page gets a high rank because hundreds of thousands of links point to it. The Google search engine uses other tricks, such as assigning a page higher ranking if the search term appears in a heading rather than in a footnote.

Brin said it wasn't clear at first that Google should become a for-profit enterprise. Existing navigation tools have de-emphasized search, he said. But with angel funding from Sun Microsystems founder Andy Bechtolsheim and others, Google is looking to hire up to 20 people who hold doctorate degrees to work on its search service; it has more than 100 computers working in its network facility. "Turning this into a company has allowed us to push a lot of resources at the problem," Brin said.

It also led to their adoption of "Google" as the company name. A "googol" is a one followed by one hundred zeros; the term captures the founders' goal of bringing a lot of information to Web users. But Googol.com already had been registered, and Brin said the word "googol" could not be trademarked.

APPLICATION TO REGISTER TRADEMARK AND SERVICE MARK  
ON PRINCIPAL REGISTER

BASIS OF APPLICATION: INTENT TO USE (SECTION 1(b))

MARK: GOOGLE

INTERNATIONAL CLASS: 9 AND 42

Applicant: Google Inc.,  
a California corporation

Address of Applicant: Gates 360  
Computer Science Department  
Stanford, CA 94305

TO THE ASSISTANT COMMISSIONER FOR TRADEMARKS:

The applicant identified above has a bona fide intent  
to use in commerce the mark shown in the accompanying  
drawing for the following goods and services:

International Class 9:

Goods: computer hardware; computer software for  
searching, compiling, indexing and organizing  
information within individual workstations,  
personal computers or computer networks;  
computer software for electronic mail and  
facilitating workgroup communications over  
computer networks; computer software for  
creating indexes of information, web sites  
and other resources

CERTIFICATE OF EXPRESS MAIL UNDER 37 C.F.R. \$1.10	
Express Mail Label No. <u>EL106956928 US</u>	Date of Deposit <u>9-16-98</u>
I hereby certify that this paper or fee is being deposited with the United States Postal Service "Express Mail Post Office to Addressee" service under 37 C.F.R. \$1.10 on the date indicated above and is addressed to the Assistant Commissioner for Trademarks, 2900 Crystal Drive, Arlington, VA 22202-3513.	
<u>Lisa M. Davis</u> Signature	
<u>Lisa M. Davis</u> Print Name	

75554461

110 490-361

International Class 42:

Services: computer services, namely, on-line personalized information services; information extraction and data mining; providing access to proprietary collections of information; creating indexes of information, web sites and other information sources; providing information concerning a wide range of text, electronic documents, databases, graphics and audiovisual information; providing electronic mail and workgroup communications services

The applicant requests that the mark be registered in the United States Patent and Trademark Office on the Principal Register established by the Act of July 5, 1946.

The mark will be printed on labels applied directly to the goods, printed on containers of the goods, displayed on screen during operation of the software, printed on advertising and promotional materials associated with the services, displayed on signs advertising or otherwise associated with the services, or used in other ways customary to the trade.

Please include Attorney Docket Number TM1001 on all future communications regarding this application and address all communications regarding this application to the applicant's attorneys at the following address:

Andrew P. Bridges  
Harold J. Milstein  
Wilson Sonsini Goodrich & Rosati

## Google Takes the Web by Storm

Thursday, Feb 18, 1999 by Robin Miller

A couple of Stanford students have created a new WWW search engine that is already hugely popular even though it isn't 100 percent public yet. It's getting all kinds of happy press coverage. And even though this new search engine's crawler is already a few months behind, the new search engine is yards better than the ones that were already out there. Familiar story? Yep. But Google is far more elegant than its famous predecessor, Yahoo!

I am going to admit that I am one of world's many Google fans. I like a search engine that's fast, simple, and doesn't have a front page crudded up with portal features. When I want to find something, I don't want to scrounge through "my" Yahoo, get hounded to sign up for free Netscape e-mail, join a What-U-Seek chat or send a Lycos love note to my sweetie. I just want to type in my keywords and get a list of relevant Web sites.

I have been using Google since I got their first "Hi! We're here!" press release about two months ago. I held off on writing this review for two reasons:

- 1) Everyboby else was already writing about Google.
- 2) I was afraid it would get too popular too fast.

Have you ever found a nice little neighborhood restaurant, liked it, and told a few friends about it

QUICK SEARCH

ADVICE,  
SOLUTIONS,  
KNOWLEDGE.

Reallybig.com is the COMPLETE RESOURCE for all web builders!

This award-winning site is really big with more than 1000 links to sites of specific interest to web builders.

Included are the best places to find free clipart, animations, backgrounds, icons and buttons, as well as huge amounts of information about counters, cgi, Java, icons, promoting your site, and much more.

Reallybig.com is for ANYONE who wants to develop pages on the internet, from beginner to experienced

restaurant, liked it, and told a few friends about it, only to find, a month later, that so many people had told a few friends about it that it suddenly got overcrowded – and both the service and food had dropped in quality?

Nothing can kill a restaurant faster, in my experience (to which my large potbelly is testimony) than a spate of favorable publicity. Same with search engines. So here's poor little Google, still in Alpha, already getting buzz all over the place.

For an example of what's going on at this (deservedly) popular but soon - to - be - overwhelmed site, take a look at their submit URL page. It says, "...it may be quite a while before we get around to your page." Elsewhere on the site, the word "months" is used.

Oh, well. I'll keep on using Google even so. Most other search engines are just as far behind, and Google gives me more relevant, better-ranked results than any of the others, with less fuss and hoo-hoo.

Check it out

Search Engines

**Google!**

**Google!**

Here's your chance to search the Web and participate in high-level academic research at the same time. Google! is a Stanford University project designed to find the most relevant Web pages (those with the most inbound links) and run searches against them. The 25 million pages currently catalogued seem to be good choices; the site has an uncanny knack for returning extremely relevant results. There's much more to come at Google!, but even in its prototype form it's a great search engine.

Google!

By Breck Witte, PC Magazine

November 19, 1998 [google.stanford.edu](http://google.stanford.edu)  
 Searching the Web has increasingly become a two-stage process—execute a search, then wade through the results trying to find what you're actually looking for. Google!, an ongoing research project at Stanford University, helps you access the most relevant finds more quickly, and rivals Yahoo! for finding that handful of key sites you may be looking for.

The site's unique PageRank function indicates how many Web pages point to a particular document. Google! uses PageRank to decide which documents in the result set you might want to see first. For example, when searching for the National Institutes of Health, we entered the acronym NIH, and the NIH home page appeared at the top of our list. Google! is so confident that it includes an "I'm feeling lucky" button that retrieves Google!'s top pick for your search.

Google!'s large collection of cached pages is equally useful. We found ourselves visiting a document's cached page to assess its relevance, then linking to the live page for time-sensitive information.

If you're used to performing complex Boolean searches, you'll find Google!'s search capabilities limiting. It really offers only simple keyword searching. The ability to truncate search terms would be a welcome addition to this promising new site.

## Counting Clicks and Looking at Links

*From The Search Engine Report*

*August 4, 1998*

*(a longer version is available to site subscribers)*

At their core, the major search engines use what I call the location/frequency method of determining relevancy. For example, search for "bill clinton," and most will return pages primarily ranked by where and how often those words appear in each document.

To be more specific, a page titled "Bill Clinton's Life" is likely to be considered more relevant than others where the title tag doesn't mention the US president's name. That's an example of how the location of a term can be important. Similarly, a page that repeatedly mentions Bill Clinton probably will get more of a boost than a page with only one reference.

I'm grossly over simplifying the process, of course. Location and frequency are not the only factors used. Each search engine has a blend of techniques that go into their algorithms. But location and frequency have tended to be the dominant factors.

Some new techniques may be about to change that. The idea of leveraging links as a means to improving results is making a comeback. And later this month, one search engine is going to enhance its service with Direct Hit, which taps into user feedback to improve relevancy.

Direct Hit works in the background, quietly watching what users search for, then recording which pages they visit from the "normal" search results. Over time, it develops enough data to know which pages are popular and which aren't.

To use this information, a user selects the Direct Hit option, which will likely appear above the regular search results. This will bring up Direct Hit's own list of what's relevant, where pages are ranked by user popularity.

The system is ideally suited to general queries of one or two words, which are common on the major services. A suggestion to try Direct Hit will probably only appear in response to short queries like these, similar to how the RealNames option appears only for queries of three words or less at AltaVista. The Direct Hit option will also only appear if enough data on a term has been gathered.

Some problems immediately come to mind. Spamming is foremost. Can site owners simply click their pages to the top? The chief defense against this is the sheer amount of data that Direct Hit samples, which makes it hard to skew things. Those attempting to do so are likely to be spotted. There are also some other tricks Direct Hit has to help control spamming.

Another problem is the fact that many users don't search deep. "Only about 7% of users really go beyond the first three pages of results," says Gary Culliss, Chairman and Founder of Direct Hit. How can the system bring the good stuff to the top if users never dig initially to find it?

"All it takes is one person to find something buried deep in the results list to start its movement upward where it can be viewed by other searchers and boosted further in its ranking," said Culliss.

In fact, top listed sites that are not visited can move down in the Direct Hit ratings, while sites buried in the results enjoy a significant boost if someone drills down and selects them.

"You can view it in the negative sense of whatever people pass over gets moved down, or in the positive sense of whatever they click on moves up," Culliss said.

I ran some quick comparisons of Direct Hit against results from the search engine it will soon appear on. All results were at least a little better, and with some queries, they were dramatically improved. A search for "microsoft," for example, put the company home page, the Internet Explorer page and a software download page at the top.

I've no doubt Direct Hit will be popular as a supplement, and not necessarily just on one search engine. The company is talking with other players and positioning its technology as a non-exclusive addition that any of them can use.

While Direct Hit leverages humans directly, Clever leverages them indirectly, via the links they create.

You may have heard of Clever through some scattered press coverage recently given to its core technology, HITS. HITS stands for Hypertext-Induced Topic Search, and it was developed by Cornell University researcher Jon Kleinberg, while he was a visiting scientist at IBM's Almaden Research Center.

IBM has expanded and enhanced HITS into Clever, a system that ranks pages primarily by measuring links between them.

The process starts by collecting a set of pages relevant for a particular term. For example, Clever might send a query to AltaVista for "bill

clinton" and then retrieve the top 200 pages listed. Next, Clever gathers all the pages that the initial 200 link to, plus any pages on the web that link to them.

The result is a set of a few hundred to a few thousand pages, which Clever ranks by counting links. Pages in the set with the most links pointing at them get the best scores, but only initially.

"Links have noise, and it's not always clear cut which pages are best," said Kleinberg. "We wondered, was there a way to get some sort of consensus out of the links?"

The solution is to recalculate the scores, this time letting links from important pages carry more weight. To paraphrase Animal Farm, all links are created equal, but some are more equal than others.

Picture it in real life. A link from a page within Yahoo should mean more than a link from someone's personal page, since the criteria to be listed is much higher. Likewise, links from other "important" sites should carry more weight.

The challenge is helping the algorithm understand what pages are "important." That's where the initial ranking comes in. Pages with the most links are established as most important, and during the recalculation, their links transmit more weight.

This produces a completely new set of scores and even allows for situations where a page with only one link to it could do better than another with two links, if that single link is from a very important page.

Repeating this recalculation a number of times further refines scores. Nor does Clever stop there. A series of other tweaks are also made to help improve relevancy.

A key component is to consider text within and near the link. If the actual search term appears, then that link transmits more weight to the page it points at. Clever also discounts the weight of links between pages at the same web site.

The end result of this is a list of top ranked pages. However, IBM doesn't see Clever being used to provide real-time search results in response to queries. Instead, they feel the value will be to create constantly refreshed lists of relevant pages for categories.

Specifically, imagine the situation at Yahoo, where there are thousands of different subjects. Clever researchers believe their technology could be used to populate these categories with minimal human assistance. Give Clever a few terms relevant to the subject, and it will leverage links to fill the category with best pages on the web.

"You don't have to have an army of ontologists to stay current," said Prabhakar Raghavan, a researcher on the Clever project.

So how good are the results? The system isn't available for testing outside of IBM's firewall, but in a recent study IBM conducted, Clever's results were as good or better than Yahoo's results 81% of the time.

That's IBM's research, of course, but I think it's pretty trustworthy. One need only look at Google to see how effective links can be in improving relevancy.

The last time some students at Stanford University got involved with categorizing the web, it turned into a little site you may have heard of called Yahoo. That alone makes me surprised someone hasn't yet swooped in to carry off Google developers Larry Page, Sergey Brin and Craig Silverstein into portal heaven. Even more so is the fact that the engine they've put together is really good and even has a catchy name.

Google is an experimental search engine that, like Clever, uses weighted link popularity as a primary part of its ranking mechanism. Each page has a rank, based on the number of other pages linking to it and the importance of those pages. Importance, as with Clever, is derived from an overall link count.

Google also makes extensive use of the text within hyperlinks. This text is associated with the pages the link points at, and it makes it possible for Google to find matching pages even when these pages cannot themselves be indexed.

An important difference from Clever is that Google actually crawls the web itself, rather than analyzing a core set of pages from another search engine. Thus, its results should be more comprehensive. Over 25 million pages have been indexed, and the goal is to gear up toward 100 million or more.

Google also provides some ranking boosts on page characteristics. The appearance of terms in bold text, or in header text, or in a large font size is all taken into account. None of these are dominant factors, but they do figure into the overall equation.

So how about the results? I think many people will be pleased, especially for the ever-popular single and two-word queries. A search for "bill clinton" brought the White House site up at number one. A search for "disney" top-ranked disney.com, and sections within it like Disney World, the Disney Channel, and Walt Disney Pictures. Yet interesting alternative sites, such as Werner's Unofficial Disney Park Links, also made it on the list.

Will Google be going commercial? Page has no opposition to it, but said there's no particular hurry.

"We're Ph.D. students, we can do whatever we want," he said. And what they want is to find the right partners to let them focus on improving relevancy. "I'd like to build a service where the priority is on giving users great results," Page said.

If you pay a visit, don't be frightened by the interface. One thing Google needs is a good facelift. Relevancy scores and other extraneous information can obscure the actual listings -- but I did say this was an experimental service, right?

The value of links hasn't been lost on the major search engines, of course. Infoseek chairman Steve Kirsch recently said that link data was a core component of his service's new retrieval algorithm. And Excite has long made use of link data as part of its ranking mechanism.

"Most in the industry would recognize that the links pointing into a site give you a fair idea of the visibility of the site and its prominence," said Excite search product manager Kris Carpenter.

It's likely that there will continue to be a growing emphasis on non-traditional data such as links and user feedback to make sense of the web, as opposed to just the words on the page. It's essential in a web universe where the text on some pages cannot be trusted, and where other pages cannot be indexed at all.

Box ITU FEE  
Assistant Commissioner for Trademarks  
2900 Crystal Drive  
Arlington, VA 22202-3513

**AMENDMENT TO ALLEGE USE UNDER 37 C.F.R. § 2.76, WITH DECLARATION**

Assistant Commissioner:

The applicant requests registration of the above-identified trademark in the United States Patent and Trademark Office on the Principal Register established by the Act of July 5, 1946 (15 U.S.C. 1051, et seq., as amended).

The applicant is using the mark in commerce in connection with the services identified in the application.

The mark was first used at least as early as September, 1997; was first used in interstate commerce at least as early as September, 1997; and is now in use in such commerce.

<p>CERTIFICATE OF MAILING UNDER 37 C.F.R. §1.8(a)</p>	
<p>I hereby certify that this correspondence is being deposited with the United States Postal Service as first class mail in an envelope addressed to the Assistant Commissioner for Trademarks, 2900 Crystal Drive, Arlington, VA 22202-3513, on:</p>	
<p><u>Suet W. Tam</u> Print Name</p>	<p><u>March 15, 1999</u> Date of Deposit.</p>
<p><u>[Signature]</u> Signature</p>	<p><u>3-15-99</u> Date</p>

**FOR REFERENCE ONLY**

Three specimens showing the mark as actually used accompany this Amendment to Allege Use.

The mark is displayed on screen in conjunction with the services.

The applicant encloses a check made payable to the "Commissioner of Patents and Trademarks" in the amount of \$100.00 as the fee for this filing.

Please use Attorney Docket No. 21622-TM1002 when referring to this application and address all communications regarding this paper and the application to the applicant's attorneys at the following address:

bizdev@google.com, 10:30 PM 8/12/2001 -0400, Inquiry!

---

To: bizdev@google.com  
From: "Steven A. Silvers" <sas@theauroracollection.com>  
Subject: Inquiry!  
Cc: gewrue@aol.com  
Bcc:  
Attached:

This message is to be kindly directed to Larry Page, if he is currently your CEO or if not, then your current CEO would suffice. My name is Steven A. Silvers, the Director of Creative Development for The Aurora Collection, Inc., and present owner of the URL otherwise known as: [www.googles.com](http://www.googles.com). Several years ago I contacted Larry Page to offer to sit down with him and discuss mutual ways we could benefit one another since I have a trademark on the name "Googles" in several areas of commerce, and also registered the "Googles" name prior to the Google search engine name being registered with Internic for use on the world wide web. I never heard back from Larry or anyone else in the google.com organization. Needless-to-say, your organization has grown to be a world recognized search engine and your recent affiliation with Yahoo has made your company virtually a household name among computer savvy researchers around the world. I tip my hat to you for having accomplished this wonderful success. During all of this time, our Googles.com site has likewise prospered. We are now enjoying well over 2 million page visitors per month and an average daily visitor hit of close to 20,000 per day as well. It has been brought to my attention that many of the visitors that have come to our site have come to us by accident while looking for your search engine site. We have been inundated with literally hundreds of e-mail inquiries a day from google.com visitors looking for your site and requesting info from us regarding your site. We have, up until, recently, been kind enough to refer these researchers to your site by individually answering them, one by one, and telling them where they need to go. As we continue to grow, I'm sure the confusion will grow. I am equally sure that many parents, children, and educators alike are also going to [www.google.com](http://www.google.com) when they were searching for us at [www.googles.com](http://www.googles.com). With our affiliation with the Muscular Dystrophy Association (National) and several multi-media giants looking at our company and our properties, namely our cartoon characters: "The Googles From Goo", we are about to make a lot of noise around the globe. The purpose of this e-mail is to once again inquire with your company as to a feasible way for us to both co-exist in a way as not to further confuse our individual base of visitors and a mutual way to refer them to the proper site should they find themselves coming to google.com when they meant to visit us and vice versa. I would like the opportunity to offer you a viable solution, one that would be mutually beneficial and certainly workable on our end and hopefully equally workable on yours. I would invite you to take a look at our site when you get the chance and then please feel free to contact me at your earliest convenience. You can reach me at: 954-205-4357 or at our toll free number at: 888-888-0740 and asked for me and I'll get back to you right away. Be sure to tell our receptionist that she needs to contact me immediately and she'll be happy to accommodate you. I look forward to speaking with you and until then wish you a GooDay! Sincerely, Steven A. Silvers

## UpNext

## What's developing in kids production

BY MIKE CONNELL

### Mainframe and Tony Hawk grind out toon series deal

Tony Hawk, who has traditionally shied away from TV development, has signed on with Vancouver-based Mainframe Entertainment to produce a skate-culture CGI series for boys eight to 14. In mid-October, Mainframe and Hawk were still fleshing out the creative concept, but the team is working on pitches in order to bring international and domestic partners on immediately and kickstart the production cycle with a September 2002 air date in mind.

Dan Didio, Mainframe's senior VP of creative affairs, says that the company is working on live-action wrap-around concepts and motion-capture for Hawk's moves, as well as bringing in other extreme sports celebs. The show will feature teen skaters (one an alter ego of Hawk himself) who kick ass in their chosen sport while trying to figure out what's going on with their lives. Twenty-six half hours are planned, budgeted roughly between US\$425,000 and US\$450,000 each.

Under the full partnership, Mainframe and Tony Hawk will be sharing the licensing and merchandising responsibilities. "Naturally," says Didio, "he has pre-existing relationships, so we'll follow his lead." Hawk's personal fame on the skate circuit has grown worldwide—

along with the continued success of his Pro-Skater vid game franchise—stretching his popularity beyond North America into Europe, the U.K. and Australia.

### Adventures in winning millions

L.A.-based DIC Entertainment has partnered with the U.K. creators of *Who Wants to Be a Millionaire*, Celador International, to produce, distribute and merchandise an animated adaptation of the hit game show. In *The Adventures of Who Wants To Be A Millionaire: The Animated Series*, the final question has been answered, and millions have been won. The victors take off on exotic journeys, giving viewers a chance to get a look at what happens

when the winners walk out of the studio with money enough to realize their greatest dreams. The host keeps in touch with the characters via the Millionaire Studio Command Center.

Production is slated to start in January, with 26 half hours targeting families in the pipeline. Licensed or optioned in more than 100 countries to date, the toon series is budgeted at roughly US\$300,000 to US\$350,000 per episode.

### The Googles go tube

A gaggle of characters with a whole whack of grassroots exposure is gearing up for small-screen treatment as 13 half hours of *The Googles* top the development slate at Florida-based Aurora Collection. What are Googles, you might ask? They're a trio of three young aliens who travel to Earth to teach kids how to love, laugh, learn and care for the environment. Targeted at two- to 10-year-olds, *The Googles* will be rendered in 2-D Flash for a per-episode price tag of around US\$250,000. Over US\$500,000 has been spent on the project so far.

Since Aurora's director of creative development Steven Silvers came up with the concept in the late '80s to entertain his kids, *The Googles* have generated a fair bit of exposure in other media. They have attracted two million visitors since launching in July on *Googles.com*, which also features a product range of music CDs, trading cards, T-shirts, caps, stickers and plush toys. A live show tour, coined *A GooSical Musical Revue*, is tentatively pegged to roll out in the U.S. in six months, and a video project is also being explored. The characters were also recently featured on the Jerry Lewis Labor Day Telethon, and negotiations are underway to put the Googles to work on other fundraising events nationwide at the Muscular Dystrophy Association's 200-plus district offices. 

DIC taps into game show chic with animated *Millionaire* series

Tony Hawk gives in to TV industry pressure and will develop a toon with Mainframe

Google Goo

Google Goo It's time to get hands-on with a fistful of Google Goo. This stretchy ball of blue fun works overtime to decrease stress and stretch your creativity. It doesn't stain and it's non-toxic -- and endlessly satisfying to shape and squeeze. Comes in a handy storage tin. Age 3 and over.
