whatis googles without an "s"? because sometimes i go on to google by accident and it sends me to this bear and bunny and sum and substance(stuff)and when i type in games and say"go" it takes me to games i can buy. i got confused because i thought it was supposed to let you play so i got off and was board half to death but then i typed in the s and i was happy.

I have heard that you give out maps according to phone numbers and I want to know how I can verify if our phone number is in your system. I do not approve of this service and feel it is irresponsible and unsafe for both adults and children. Why would you provide such information? I do not want to join your site, or give you any personal information you may use or sell, but I do want to make sure you erase all information regarding our address/phone number in your databse. Please respond to the above e-mail address.

I have a real concern about one of your services. I was just shown that if I typed in a phone number with area code the person's name, address comes up and you have a street map, an aerial view of the person home. Plus you also give personal information about who lives in the home, what organizations that person belongs to. This is not right!!! All this information is available to anyone in the WORLD. I really believe people are not aware of what you have available and to me this is infringing on privacy. You need to eliminate this service. It also can be very dangerous because of pedefiles, rapists, murderers, incarcerated individuals, etc! If I do not get a response from you, I am considering contacting the news media so that at least the public can make their own choice. I have already contacted SBC. Do you want to be responsible for what could happen! Thank you for your immediate attention.

Hi. My name is Shannon. I wanted to e-mail you to inform you that your site is hazardous to teenagers 13 and up. While trying to finish a project for school, I stumbled upon this site and almost fell out of my chair. This site has almost the same address as www.google.com which is a site to search information with. In conclusion, in my opinion you should change your site name because it is hazardous to us all. It looks like you have a child on acid working on this site. Sincerely, Shannon
