_GrowthAugOct_1..

Jerry,

Several months ago, I mentioned to you some out of data 3G coverage comparison maps that were circulating in print. Since that time a web site with a similar comparison map has appeared. It is also grossly out of date.

```
http://www.verizonwireless.com/b2c/CoverageLocatorController?requesttype=NEWREQUEST  
<http://www.verizonwireless.com/b2c/CoverageLocatorController?  
requesttype=NEWREQUEST&lid=//global//plans//coverage+maps>  
&lid=//global//plans//coverage+maps (you have to click the  
<javascript:displayComparisonMaps('ATT');> Broadband 3G Network Comparisons link)
```

I have attached a comparison map which shows the delta between the ATT coverage you are depicting and the actual ATT coverage through the end of October (of course with an ongoing build program, we have now expended even beyond the coverage depicted in this map).

This type of misrepresentation is unacceptable and has begun drawing much attention here. Please provided your assurance that you will correct this.
