Subject: Re: Vulcan Golf, LLC v. Google, Inc. et al.

Dear Counsel:

As a follow up to the e-mail sent this morning, we remind you of your duty to act diligently and use appropriate filtering and blocking technology to avoid further infringements of named Plaintiffs and the putative class members' distinctive and valuable marks (as defined in the Amended Complaint).

As stated in the e-mail, your commercial use of deceptive domains has willfully continued even after the filing of our original complaint, amended complaint, and verbal and written notice.

It is not our duty to monitor your companies and prevent your illegal conduct. It is your duty to take all steps necessary to stop this egregious conduct. If further infringements occur, we will have no option but to seek the Court's assistance on this matter. Thank you very much for your cooperation.

Sincerely,

Robert M. Foote

Fully Custom Web Services, One Week of Turnaround

As by Google

web design with a difference

Having an effective website can be vital to small businesses, service professionals, and freelancers. Flashy graphics and pretty colours on your website are NOT going to make your business successful.

If people are finding your site, are they getting the information they came for? That's the real credit, but that's not marketing, effective - your competition is only a click away.

design + communication = an effective website

At Indelible Design we do more than just web design. We work with you to help you determine your goals. Together we generate ideas to enhance your business and improve your relationship with your clients. We plan and develop a website that not only compares your site to your competitors, but gives your clients what they are looking for. We make it easy for them to find your site, and give them reasons to want to look around once they get there.
