**COMPLAINT FOR PATENT INFRINGEMENT**

Plaintiffs Financial Systems Technology (Intellectual Property) Pty. Ltd. ("FST-IP") and Financial Systems Technology Pty. Ltd. ("FST") (collectively, "Plaintiffs") file this complaint for infringement of U.S. Patent Nos. RE40,520, entitled "Easily Expandable Data Processing System And Method," (Exhibit A) and RE40,063, entitled "Data Processing And Method For Maintaining Cardinality In A Relational Database," (Exhibit B) by CDW Corporation and Microsoft Corporation (collectively, "Defendants") as follows:

**JURISDICTIONAL STATEMENT**

1. This is a claim for patent infringement that arises under the patent laws of the United States, Title 35 of the United States Code. This Court has original jurisdiction over the subject matter of this claim under 28 U.S.C. §§ 1331 and 1338(a).

**BACKGROUND**

2. This case relates to U.S. Patent No. RE40,520, entitled "Easily Expandable Data Processing System and Method," which, after a full and fair examination, was duly and legally issued in the name of Karol Doktor on September 23, 2008 ("the '520 patent"), and U.S. Patent

No. RE40,063, entitled "Data Processing and Method for Maintaining Cardinality in a Relational Database," which, after a full and fair examination, was duly and legally issued in the name of Karol Doctor on February 12, 2008 ("the '063 patent") (collectively, "the Doktor Patents").

3. The inventions claimed in the Doktor Patents pertain generally to technology which has become fundamental to modern day, commercially successful computer database management systems. The Doktor Patents relate to systems and methods for analyzing, modifying and searching through large scale databases at high speed.

4. The '520 patent has been subject to multiple examinations by the United States Patent and Trademark Office ("USPTO"). In each instance, the USPTO has confirmed the validity of each claim of the '520 patent.

5. The '520 patent was originally issued on October 20, 1998 as U.S. Patent No. 5,826,259.

6. The '063 patent has been subject to multiple examinations by the USPTO. In each instance, the USPTO has confirmed the validity of each claim of the '063 patent.

7. The '063 patent was originally issued on October 7, 1997 as U.S. Patent No. 5,675,779.

8. The '520 patent was the subject of a patent infringement lawsuit brought by FST-IP and FST against Oracle Corporation, captioned as *Financial Systems Technology (Intellectual Property) Pty. Ltd., et al. v. Oracle Corporation*, Civil Action No. 2:08-cv-371 (E.D. Tex.).

9. Oracle Corporation ("Oracle") filed two requests for reexamination of U.S. Patent No. 5,826,259 ("the '259 patent") in the USPTO. Oracle identified several prior art patents and publications as part of the reexamination requests and asserted that the prior art invalidated claims of the patent. FST-IP also filed a request to reissue the '259 patent.

10. After full and fair consideration of the claims of the '259 patent and a thorough analysis of the prior art submitted as part of the reexaminations and reissue requests, the USPTO granted the reissued '520 patent.

11. After Oracle filed its requests for reexamination of the '259 patent, FST-IP sought reissue of U.S. Patent No. 5,675,779 ("the '779 patent").

12. After full and fair consideration of the claims of the '799 patent and a thorough analysis of the prior art submitted as part of the reissue requests, the USPTO confirmed the validity of the claims and granted the reissued '063 patent.

13. After the USPTO granted the reissued '520 and '063 patents, FST-IP, FST and Oracle entered into a settlement agreement which resulted in the dismissal of the above-referenced patent litigation.
