Attachments: Bionic Wrench.pptx; Preliminary Analysis.pdf

John - Per your guidance we are changing the design to have a plunger matching Buchanan (not Brown as the current ppt file shows). We will share this with you for confirmation in a few days. We plan to have complete before 16-Mar.

Thanks, Eric

John – Unfortunately my mobile was not working properly and a message I forwarded to you did not work – that is why you did not receive the message - sorry. Attached is the design concept we presently have. Very much we would prefer to change the design to six jaws. This will improve the performance of the product.

Is this enough detail about the design – or do you need very detail dimensional drawings to perform the analysis?

Thanks, Eric

Eric:

From a patent point of view, 6 jaws is almost the same as 3 jaw, so that change is not a big deal at this point.

FYI, no images received recently. Got a different email earlier, but no images attached.

John.

Thanks! I am in China and meeting about this. I have sent you images our current design. I will need time later today to review your analysis. Can we change our design to 6 jaw and not infringe?

Thanks Eric

Subject: Preliminary Analysis of Gripping Wrench (Brown) Patents (4499-964) - Privileged and Confidential

Eric:

Kindly confirm receipt by simple reply email.

Per your request, I have reviewed the Brown patents we discussed. Attached are my preliminary findings. In short, I believe that there is little risk in proceeding to the next step.

Please contact me if you have any questions.

Regards,
John R. Owen
