### THE NEW BREED

Here at **Open Range RV Company**, we have created our flagship product, the Open Range Fifth Wheel, to bring the future of leisure travel to your doorstep. It's a future you have helped to mold, with your many excellent suggestions and ideas, which we have added as features in the Open Range design.

The **Open Range Fifth Wheel** is a maverick in its category. We've developed new, advanced construction techniques and materials so that you don't have to give up space or luxury features to obtain lighter weight. Without sacrificing quality, the Open Range gives you extraordinary towing ease and aerodynamics engineered for a carefree road experience. We back our promises with a two-year transferable (limited) warranty.

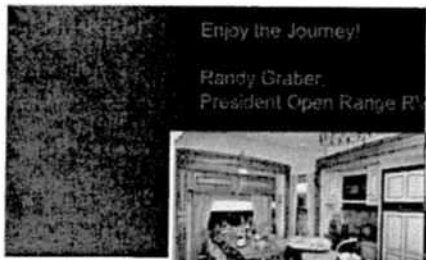

From its silvery, high-gloss metallic-finished exterior to its 10-year warrantied cabinet doors, everything about the Open Range unveils a new era in the realm of Fifth Wheel RVs. This New Breed is surprisingly lightweight, easy to maintain, loaded with features, and built to last for years while remaining completely affordable at a mid-price point category.

You will notice that our floor plans are numbered in terms of square feet of living space, not in length. That is because our 100-inch wide-body chassis, along with slide-outs 6" deeper than most, create extra living space in each and every floor plan, regardless of length. This simply adds up to more living space with less length to tow!

I look forward to meeting you in the campgrounds of North America in your easy-towing, spacious, Open Range RV. May you be among the first to own the fifth wheel brand which has been designed to become a Classic.

"The **Open Range** is simply the easiest towing fifth wheel we have ever transported..."  
To see how easy the Open Range RV is to tow, see the dealer nearest you, click [here](#).

Enjoy the Journey!

Randy Graber,  
President, Open Range RV Company
