Re: *Amgen Inc. v. F. Hoffmann-LaRoche Ltd., et al.*
Civil Action No. 05-CV-12237 WGY

Dear Tom:

We understand that you would like Amgen to produce to you a copy, in native format, of the data files used to generate the three-dimensional representations of EPO, the EPO receptor, and peg-EPO that are attached to Dr. Lodish's report. We are happy to produce the data files to you on the condition that Roche will reciprocally produce, in native format, a copy of data files used to generate any graphics attached to or relied on in its expert reports. A copy of the data files in Protein Data Base (PDB) format is enclosed. If you do not intend to make a reciprocal production, please return the enclosed data files and all copies immediately.

Pursuant to the parties' stipulation regarding expert discovery, we are providing only those data files used to generate the final versions of graphics submitted as part of Dr. Lodish's 4/6/07 report.

No scientific tests were performed in connection with or in furtherance of this action by, for, or behalf of Dr. Lodish or Amgen in connection with the generation of the graphics attached to Dr. Lodish's report. The graphics were generated using data from the Protein Data Bank under accession numbers 1 BLW (subsequently renamed 1CN4) and 1EER in the manner described in Dr. Lodish's report. As described by Dr. Lodish, the representation of the attached carbohydrate and peg moieties are not based on any x-ray crystallography data, but are illustrations to explain certain concepts.

We still have not received any response to our repeated inquiries about Roche producing electronic files for three-dimensional graphics and animations relating to CERA. You have indicated on at least two instances that you were investigating the issue and would promptly inform us of Roche's position. Please let us know as soon as possible if it will be necessary to seek relief from the Court on this issue.

Sincerely,

DAY CASEBEER
