Declaration of Monique L. Cordray

1. I am an attorney in good standing with the State Bar of California and have applied for admission *pro hac vice* to this Court. I am employed by Amgen Inc. as Senior Associate General Counsel in the Intellectual Property and Litigation Group of Amgen’s Law Department. I joined Amgen in April 1998 and report to Stuart Watt. Mr. Watt, who is also a lawyer, has the position of Vice President Law and Intellectual Property Officer and leads Amgen’s Intellectual Property and Litigation Group.

2. I submit this declaration in support of my access to confidential information produced by Defendants or third parties under the terms of a protective order in this case.

3. In addition to the courts of California, I am admitted to practice law before the United States District Courts for the Northern, Central and Southern Districts of California, the United States Court of Appeals for the Federal Circuit and the United States Patent and

Trademark Office. I am also an inactive member of the Bars of the District of Columbia and the State of Florida.

4. Before joining Amgen, I was a principal with the law firm of Fish & Richardson P.C. I was engaged in patent litigation in private practice with Fish & Richardson and, before that, with Cushman, Darby & Cushman for 9 years starting in 1989. I earned an LL.M. from the Georgetown University Law Center in 1991 and a J.D. from the University of Florida in 1989. Since 1989 I have continuously been a member (now inactive) in good standing with the State Bar of Florida. Since 1990 I have continuously been a member (now inactive) in good standing with the Bar of the District of Columbia. Since 1996 I have continuously been a member in good standing with the State Bar of California.

5. In consultation with my supervisor Stuart Watt, I am responsible for Amgen's patent litigation. I supervise in-house attorneys and paralegals assigned to support and assist Amgen's outside counsel in the evaluation, preparation and presentation of Amgen's claims and defenses in Amgen's patent litigations. I am responsible for supporting and supervising the work of outside trial counsel retained by Amgen to represent its interests in various intellectual property disputes, including the enforcement of Amgen's patents-in-suit in this litigation. I have been involved in patent litigation concerning the patents-in-suit and related U.S. and foreign patents since I joined Amgen in 1998. I am involved in all aspects of this litigation including the evaluation of substantive issues and litigation strategies.

6. My responsibilities at Amgen are legal, not business or commercial, in nature. I have no responsibility for and do not participate in "competitive decision making," such as pricing, clinical trial design, regulatory proceedings and the like. Within Amgen, responsibility for the legal support of the business functions engaged in such "competitive decision making" resides within Amgen's Business Law Group, which is a separate organization reporting to a separate vice president and assistant general counsel in Amgen's Law Department.

7. In order to perform my professional responsibilities to Amgen, I believe I must have full access to the documents and information produced in this litigation, subject to the terms

of the protective order proposed by Amgen's counsel. Such access is needed not only to discuss this action intelligently with Amgen's trial counsel, but also to give input and direction to trial counsel, and to assess accurately whether Amgen's interests in this litigation are adequately and appropriately represented.

8. Based on my experience with the protective order in the ITC proceeding, where Defendants' confidential information was denied to in-house counsel, I do not believe that I would be able to make an informed evaluation of the issues or merits of this dispute, provide proper direction to trial counsel, or advise Amgen with respect to the appropriate conduct of this litigation without the access Amgen has requested for in-house counsel. For example, in being denied access to Defendants' documents that characterized their peg-EPO product and the process by which it is made, including Defendants' Biologics License Application and Investigational New Drug Applications, I could not independently assess the merits of Defendants' assertions, as set forth in their Answer in the ITC proceeding, that they did not infringe Amgen's patents-in-suit. Nor could I assess which claims should be pursued against Defendants.

9. If I am permitted access to confidential information under the terms of a protective order in this case, I agree to be bound by the terms of such an order and will abide by its terms.

10. In my position at Amgen, and in my previous experience as outside counsel, I have received confidential and highly sensitive information of opposing parties subject to the provisions of many protective orders entered in various proceedings in different jurisdictions, including the protective order entered by this Court in *Amgen v. HMR/TKT*. I have understood and complied with my obligations of confidentiality under these protective orders. No one has ever raised a complaint about my compliance with the terms of a protective order.

11. I declare under penalty of perjury under the laws of the United States of America that the foregoing is true and correct.

Dated: October 24, 2006
