EXHIBIT C
Part 1 of 2

US005753486A

United States Patent [19]

Goeddel et al.

[11] Patent Number: 5,753,486

[45] Date of Patent: May 19, 1998

[54] **HUMAN TISSUE PLASMINOGEN ACTIVATOR**

[75] Inventors: **David V. Goeddel**, Hillsborough; **William J. Kohr**, San Mateo; **Diane Pennica**, Foster City; **Gordon A. Vehar**, San Carlos, all of Calif.

[73] Assignee: **Genentech, Inc.**, South San Francisco, Calif.

[21] Appl. No.: **472,549**

[22] Filed: **Jun. 6, 1995**

Related U.S. Application Data

[63] Continuation of Ser. No. 264,134, Jun. 21, 1994, Pat. No. 5,587,159, which is a continuation of Ser. No. 109,698, Aug. 20, 1993, abandoned, which is a continuation of Ser. No. 911,021, Jul. 9, 1992, abandoned, which is a continuation of Ser. No. 489,855, Mar. 2, 1990, Pat. No. 5,185,259, which is a continuation of Ser. No. 12,694, Feb. 9, 1987, abandoned, which is a division of Ser. No. 483,052, Apr. 7, 1983, Pat. No. 4,766,075, which is a continuation-in-part of Ser. No. 398,003, Jul. 14, 1982, abandoned, and Ser. No. 374, 860, May 5, 1982, abandoned.

[57] **ABSTRACT**

A human tissue plasminogen activator (t-PA) is produced in useful quantities using recombinant DNA techniques. The invention disclosed thus enables the production of t-PA free of contaminants with which it is ordinarily associated in its native cellular environment. Methods, expression vehicles and various host cells useful in its production are also disclosed.
