It is within my own knowledge that BM were involved in the negotiations regarding the amount of damages which GI were going to pay following the final holdings of the District Court and the the CAFC that GI had infringed the '008 patent. I handled these negotiations on behalf of Amgen. We were told by the representative negotiating on behalf of GI that before any agreement could be finalised the terms of settlement had to be approved by BM.

+++++

The reason for including the above material in a confidential exhibit is that it was a provision of the agreement disposing of Amgen's damages claims arising from the US litigation that all parties would maintain the agreement and its terms as confidential and would not disclose such terms save under a protective order maintaining that confidentiality granted by a Court.
