This is probably not worth mentioning, but I added dartmouth.org, to dartmouth's domain names, and a guy who was a guest did not change to a member. I assume this is being tackled in the new registration process...or will changes on new registration only affect users from this point forward? Forgive me for being over vigilant.

-Cameron

Dave,

Laura Bowman from Wellesley can no longer see profiles. Again, her school and member status have disappeared from the database.

This has happened to a number of profiles. What do you think is going on?
